Amendment of Multiple Ownership Rules, Docket No. 8997, 18 FCC 288, 291–292 (1953). *See also Notice of Proposed Rulemaking*, Docket No. 14711, FCC 62–

747, 27 FR 6486 (1962). The attribution portion of the rules is the mechanism by which the multiple ownership rules are given practical effect. That is, the attribution rules define what constitutes a "cognizable interest" for the purpose of applying the multiple ownership rules to specific situations.

2. It has been almost three decades since the Commission first addressed the issue of what constitutes a "cognizable interest" for purposes of operation of its multiple ownership proscriptions. During that period, a number of significant developments have taken place in the investment community and the telecommunications marketplace that warrant revisiting the attribution rules. In addition, there currently are pending several proceedings involving our ownership rules: three related dockets,[1] three undocketed proceedings [2] and several waiver requests.[3] These related proceedings have ben pending from between one to eight years. It is our intention that the present proceeding be wide-ranging and, to the extent practicable, dispositive of these interrelated proceedings. We intend to resolve the outstanding proceedings that have been consolidated into this docket in subsequent *Report and Orders*, as Commission resources permit.[4]

[1]The docketed ownership proceedings that are still pending are as follows: *Notice of Proposed Rule Making* in Docket 20521, issued June 11, 1975, regarding corporate ownership disclosure; *Further Notice of Proposed Rule Making* in Docket 20548, issued March 9, 1977, regarding a ten percent cognizable ownership benchmark for all multiple ownership purposes, except the seven station rule; and BC Docket 78–238, issued July 27, 1978, regarding voting trusts and other non-voting interests.

[2]The undocketed ownership proceedings that are before the Commission are as follows: RM–3853, filed April 21, 1980 by the First Manhattan Company, regarding a rule amendment to establish a 5% cognizable ownership benchmark for investment advisors; RM–3995, filed June 5, 1980, by the Investment Company Institute, regarding a rule amendment to increase the cognizable ownership benchmark to 10% and RM–4045, filed January 27, 1982, by the Centennial Fund, regarding a rule change to allow self-administered pension funds to be subject to a 5% ownership benchmark.

[3]Several waiver requests have been filed with the Commission. For example, the Ford Foundation is currently seeking a waiver to grant it a 5% benchmark for both closely-held and widely-held corporate licensees; and the Commission recently granted a waiver to permit the New York State Teachers' Retirement System to have a 5% benchmark for its self-administered pension fund. *Harry L. Drubin, Jr., Esq.*, FCC–83–18, (adopted January 20, 1983, released January 24, 1983).

[4]It is not the Commission's intention in this proceeding to evaluate the underlying premises of the individual multiple ownership rules; it is only to determine to whom and how those rules should be applied.

II. Discussion

A. Multiple Ownership Rules and Policies

3. Collectively, the media multiple ownership rules consist of three broad types of geographic proscriptions: national, regional and local. The national rules are: (1) the "seven station" rule, which establishes an absolute limit on an individual entity's broadcast station ownership. No entity may own, operate, control or have any interest in more than seven AM, seven FM and seven television (of which no more than five may be VHF) stations, 47 CFR 73.35(b)(1), 73.240(a)(2) and 73.636(a)(2); and (2) the "network/cable cross-ownership" rule, which prohibits an entity from owing, operating, controlling or having an interest in both a national television network and a cable television system. 47 CFR 76.501(a)(1).[5]

4. The "regional concentration of control" rule proscribes common ownership, operation or control of three or more broadcast stations (in any service) where any two are within 100 miles of the third and there is primary service contour overlap of any of the stations' signals. 47 CFR 73.35(b)(1), 73.240(a)(2) and 73.636(a)(2).

5. The local multiple ownership rules consist of: (1) the "duopoly" rule, which prohibits any party from owning, operating or controlling two or more broadcast stations in the same service if there is overlap of the stations' signals, 47 CFR 73.35(a)(1), 73.240(a)(1) and 73.636(a)(1); (2) the "one-to-a-market" rule, which essentially limits common ownership, operation or control of a radio and television station in the same community; *Id.;* (3) the "newspaper/broadcast cross-ownership" rule, which prohibits any entity from owning, operating or controlling a broadcast station and a daily newspaper in the community in which the newspaper is published, *Id.;* and (4) the "broadcast/cable cross-ownership" rule, which applies to the common ownership, control and operation prohibition to co-located broadcast television and cable television system, 47 CFR 76.501(a)(2).

6. Closely related to these rules is the "cross interest policy" that prohibits certain types of interests in two broadcast stations in the same service in the same community. Essentially meant to encourage arms-length transactions, this policy would limit, for example, ownership of one AM radio station in a market by one entity, if at the same time, that entity's principals maintain a signficent employment or managerial role in another AM station in the same market. *See Cleveland Television Corp.*, 52 RR 2d 581, 585 (Rev. Bd. 1982); *Farmville Broadcasting Co.*, 47 FCC 2d 403, 404 (1974); *United Community Enterprises, Inc.*, 37 FCC 2d 953, 960 (Rev. Bd. 1972).

[5]There is currently pending a Notice of Proposed Rule Making that proposes the deletion of the network/cable television cross-ownership rule. *Notice of Proposed Rule Making*, CT Docket No. 82–434, 47 FR 39212 (Sept. 7, 1982).

B. Attribution Rules

7. The attribution rules are the mechanisms by which the multiple ownership rules are implemented and enforced. Ownership interest banchmarks have been set at a point below which the rules are not applied. These ownership benchmarks define the interests in or relations to a Commission licensee, cable system or newspaper that are cognizable for purposes of compliance with the Commission's multiple ownership rules. The benchmarks define the amount of minority ownership that is cognizable under the various provisions of the ownership rules. As the Commission previously noted:

> For corporate broadcast licensees, the decisive factors in detemining whether stock holdings may thwart the purpose of the [ownership] rules are the amount of stock held and the right to vote the stock.

Multiple Ownership of AM, FM and TV Stations (Docket No. 15627), 13 FCC 2d 357, 363 (1968).

8. Simply stated, the attribution rules provide that media interests are imputed following the line of control to an ultimate entity. Thus, media interests of broadcast licensees and cable operators are ascribed to officers, directors, partners, trustees and significant shareholders (vertical attribution upward). Media interests of individual officers, directors, partners, trustees and shareholders of the same entity are not aggregated (no horizontal attribution).[6] An interest that is "significant" or reportable is defined through the various ownership benchmarks.

9. Although administrative interpretation and case law have generated variable standards of permissible minority equity ownership in corporate licensees,[7] the ownership benchmarks generally provide that for corporate licensees with more than fifty shareholders, a cognizable interest is inherent in officers and directors as well

[6]The provisions in the multiple ownership rules limiting "indirect" ownership, operation or control provide the basis for the attribution mechanics.

[7]*Further Notice of Proposed Rule Making*, Docket No. 20548, 63 FCC 2d 602 (1977).

as shareholders with 1% or more of the outstanding voting stock.[8] The holdings of bank trust departments and investment and insurance companies are subject, however, to a 5% benchmark.[9] For closely-held corporations; *i.e.*, those with fewer than fifty shareholders, a cognizable interest is inherent in officers, directors and all shareholders. Any voting partnership or proprietorship interest is congnizable.

C. Historical and Comparative Perspective

10. Multiple ownership restrictions in the broadcast context first became effective in the early 1940's.[10] In 1953, the Commission concluded a five year rule making proceeding on multiple ownership by adopting the seven station rule as well as attribution rules that considered ownership of 1% or more of the voting stock in a corporate licensee with more than 50 shareholders to be a cognizable interest. The Commission reasoned that "owners of 1% of the stock *may* have considerable voice in the control and management" of corporate licensees. *Amendment of Multiple Ownership Rules, supra* at 294 (emphasis added). As early as 1953, the Commission considered an attribution benchmark of at least 5%. *Id.* The 1% attribution rule was upheld by the court of appeals on remand of a case from the Supreme Court that challenged the multiple ownership rules. *Storer Broadcasting Co. v. United States*, 240 F.2d 55, 56 (D.C. Cir. 1956). The court observed, however, that interests of more than one percent do not necessarily constitute control. *Id.*

11. Over the years, the 1% rule has been modified to accommodate the investment objectives of certain institutions presumed to be "passive" investors who were concerned with investment profits and who did not invest for purposes of control or influence over programming. The first modification was made in 1968 when the benchmark for cognizable ownership interests was raised from 1% to 3% for investment companies.[11] *Report and Order, Docket 15627*, 13 FCC 2d 357, 369–70 (1968). The effect of this exception was to permit investment companies to own up to 3% of the voting stock of a broadcast licensee before that interest became cognizable. In 1972, the broadcast multiple ownership rules were amended to raise the benchmark from 1% to 5% for the ownership of broadcast licensee voting stock by bank trust departments. *Report and Order, Docket 18751*, 34 FCC 2d 869 (1972). At that time, the Commission declined to raise to 5% the benchmark for bank trust department holdings in cable systems. *Id.* at 892.

12. A rule making proceeding commenced by the Commission in 1975 culminated in further expanding the modifications to the 1% rule. The Commission adopted 5% as the standard for determining a cognizable interest for insurance companies, bank trust departments and investment companies. *Multiple Ownership and Cross Ownership*, 59 FCC 2d 970, 975 (1976), *aff'd sub nom. National Citizens Committee for Broadcasting v. FCC*, 559 F.2d 187 (D.C. Cir. 1977). Both the broadcast multiple ownership rules and the cable television cross-ownership rules were amended to adopt the 5% benchmark for bank trust departments, insurance companies and investment companies. The Commission found this action to be "in the public interest because it will most likely increase investments in broadcast and cable companies and thus strengthen the economic foundation of the broadcasting and cable industries without creating undue concentration of control." *Id.* at 974–75.

13. As part of the multiple ownership rule making in *Docket No. 20548*, the Commission also proposed the adoption of a uniform 10% attribution rule for the duopoly, one-to-a-market and the regional concentration rules. 54 FCC 2d 331, 335 (1975). The Commission proposed the 10% attribution benchmark with the provision that investors would file a disclaimer of intent to control the licensee or station. This proposal received very little attention in the comments filed in the proceeding. In a *Further Notice of Proposed Rule Making*, the Commission again sought comment on the 10% attribution proposal. 63 FCC 2d 832 (1977). This rule making still is pending.

14. As a point of reference, it may be useful to compare the Commission's current 1% and 5% attribution rules with other federal legal ownership requirements. The alien ownership provisions of the Communications Act provide that aliens may own no more than 20% of the capital stock of a corporate licensee, nor may aliens own or control more than 25% of the capital stock of a controlling corporation whose subsidiary holds a license. 47 U.S.C. 310(b)(3)–(4). Two of the statutes that govern the Securities and Exchange Commission ("SEC") contain provisions that may provide a useful reference point for the present analysis. The Securities and Exchange Act of 1934 provides that any person who acquires more than 5% of certain classes of securities must disclose specified ownership and background information to the issuer, stock exchanges and the SEC. 15 U.S.C. 78m(d)(1). On the other hand, the Investment Company Act of 1940 provides a 25% benchmark for control of a corporation. 15 U.S.C. 80a–2(a)(9). That Act presumptively defines "control" as the direct or indirect beneficial ownership of more than 25% of the voting securities of any company. *Id.* We note that these statutes are referenced only for illustrative purposes; public policy considerations may require the adoption of unique ownership attribution benchmarks for telecommunications.

III. Need for the Notice of Proposed Rule Making

15. One of the statutory mandates of the Commission is "to make available, so far as possible, to all the people of the United States a rapid, efficient, Nation-wide and world-wide wire and radio communication service * * *" 47 U.S.C. 151. Sections 154(i) and 303(r) of the Communications Act grant the Commission broad authority to enact appropriate regulations to further the Commission's statutory purposes. As explained below, we believe the attribution rules may work against the realization of an efficient nationwide radio service by unnecessarily limiting the number and location of broadcast and cable television interests that may be held. Accordingly, it is important that we scrutinize the policies that underlie the rules to ensure that our statutory objectives are being fulfilled by the rules, that the costs and impact are not outweighing their benefits and that those costs imposed upon society are not excessive or creating disproportionate economic inefficiencies.

16. To the extent that our rules are based upon economic concentration considerations, it is appropriate for the Commission to consider whether the attribution rules advance the objectives of the antitrust component of the public interest standard embodied in the Communications Act. The antitrust laws provide guidance for making our public interest determinations in this area. The attribution rules should be scrutinized to insure that they advance antitrust objectives and further the public interest

[8] 47 CFR 73.35, 73.240, 73.636, note 3.

[9] *Id.*, at notes 4 and 5.

[10] The Commission adopted multiple ownership rules for FM broadcasting in 1940, 5 FR 2384 (June 26, 1940); television broadcasting in 1941, 6 FR 2284 (May 6, 1941); and AM broadcasting in 1943, 8 FR 16065 (November 27, 1943).

[11] Investment companies (mutual funds) are defined by Section 80(a)(3) of the Investment Company Act of 1940, 15 U.S.C. 80(A)(3).

in efficiency of operation, investment decisions and consumer welfare.[13] Unnecessarily restrictive attribution rules could hinder the most efficient combination of video distribution resources by erecting ownership standards which proscribe combinations that would not be suspect under the Justice Department's recently revised antitrust and merger guidelines.[14]

17. It is particularly important to determine whether the attribution rules further the Commission's concern for program diversity. The ownership benchmarks may be set at levels that do not reflect ability to control the programming of a licensee. Depending on variable criteria, 1% equity ownership of a corporate licensee may or may not vest power in an entity to control station programming. Nevertheless, the attribution rules implicity make the assumption that such control exists. A benchmark that is not a reasonably tailored proxy for control over programming will not advance diversity concerns yet will curb broadcasting investments. The public interest suffers from such unnecessary government intrusions.

18. We also are concerned that our current attribution rules may create a restraint on the amount of capital that otherwise would flow into broadcast or cable television ventures. Capital resources are difficult to obtain in today's economy.[15] Operators frequently must turn to non-traditional means of financing to obtain needed capital. Such techniques may provide for acquisition of subordinated equity holdings which quickly may bring investors to the ownership limits permissible under the Commission's Rules. Thus, the attribution rules may impose an impediment to increased investment. We may find in reevaluating our rules that the assumptions prevalent at the time of adopting the rules are no longer valid or, even more likely, that certain ownership patterns are not necessarily correlated to the possibility of control over corporate licensees.

19. Telecommunications is one area of the economy that today is showing real signs of positive growth and the concomitant need for investment capital. In addition, recent deregulatory actions of the Commission have increased the need for capital resources. For example, the Commission's deregulation of the subscription television service,[16] authorization of the direct broadcast satellite service,[16] and low power television [17] each will create additional demands for telecommunications investment capital.[18] Since these services (aside from STV) have no formal ownership and attribution rules *per se*, the existence of restrictive broadcast and cable television attribution rules may distort the flow of investment capital into the new unfettered services.

20. An additional public benefit that may be derived from our modifying the attribution rules as a result of this proceeding is that new entrants in general, and minority group entrants in particular, should enjoy additional capital availability. It has been advocated that potential minority group investors are foreclosed from opportunities in telecommunications due to their inability to obtain adequate financial support.[19] Minorities often must seek funds from secondary lenders, such as venture capitalists, Small Business Investment Companies (SBIC) and Minority Enterprise Small Business Investment Companies (MESBIC).[20] Due to the restrictions on ownership established by the Commission's multiple ownership and attribution rules, lenders who acquire equity interests in licensees may have to restrict the number of ventures in which they participate. One of the public interest reasons for seeking to expand the attribution benchmarks in this proceeding may be to facilitate more readily available financing for minority group applicants. A recent report to the Commission indicates that the operation of the Commission's attribution and ownership rules actually may constitute a barrier for minority group entrepreneurs entry into the field of telecommunications.[21] It thus appears that it may be in the public interest for the Commission to lift some of the restrictions on investment created by the attribution rules to increase the opportunity for new entrants and applicants.

IV. Options for Revision of the Commission's Attribution Rules.

21. We intend in this proceeding to conduct a fresh inquiry by examining regulatory options ranging from attribution only for interests over 20% to maintaining the *status quo ante*. We also will inquire, whether, in light of the rapid changes in the services offered by financial institutions, the Commission should change its current position of specifying particular financial institutions subject to the 5% attribution rule in favor of either broad rules or a set or sets of indicia to identify on an *ad hoc* basis, the various entities that should be subject to certain levels of attributable interests due to their potential for licensee control.

22. First, we solicit comment on the broad question of whether the public interest requires attribution of an ownership interest of less than 20%. Under our current statutory scheme, a 20% interest in a licensee is the maximum direct interest that may be held by aliens.[22] The common denominator in both the Commission's multiple ownership rules and the statutory ownership limit is that there is a minimum level at which influence or control is presumed. Given Congressional guidance that a 20% level of interest confers such control, an amount greater than that for purposes of applying the multiple ownership rules does not appear to be appropriate. We seek comment on what probable ownership patterns would emerge under this standard.

23. Comments and data are also requested on the advisability of substituting a definition and set of indicia of control to be applied on a case-by-case basis for the current practice of specifying particular entities subject to certain ownership benchmarks.[23] In this connection,

Bar J. 185 (1978).

[21] Strategies for Advancing Minority Ownership Opportunities in Telecommunications, *supra* note 19, at 14.

[22] 47 U.S.C. 310(b)(3).

[23] It should be noted that in 1984 the Commission abandoned its previous practice of dealing with multiple ownership problems on an *ad hoc* basis in favor of a "particularized" standard. *1984 Multiple Ownership Rules*, note 7, *supra* at 1478. There may be administrative burdens associated with a case-by-case approach, and we request comments on the possible burdens to applicants and the Commission.

comments are requested on the advisability of establishing a set of presumptions to assist the Commission in making case-by-case judgments. For example, a conclusive presumption could be established that a 20% or greater ownership interest in a licensee portrayed a cognizable interest in the entity. On the other hand, a rebuttable presumption could be established that less than 20% ownership of a licensee does not constitute a cognizable interest. As a starting point, indicia that could be analyzed for making control determinations for less than 20% ownership could include, *inter alia:*

- Potential for management influence and control;[24]
- Size of ownership interests;
- Nature of ownership interests, *i.e.*, type and nature of partnership or other non-corporate interest and the type and quality of corporate ownership interest (voting or non-voting stock);
- Significant holdings of non-voting interests;
- Power to sell or control the sale of securities and the impact such sales would have on other holders of that security;
- Interlocking directorates with other relevant corporations;
- Express disclaimers of control (such as insulation letters executed by bank directors disavowing intent to participate in trust department activities);
- Coextensive federal or state securities and investment regulation;
- Dispersion of stock among shareholders;
- Existence of voting trusts, shareholder agreements or other non-voting equity interests such as preferred stock;
- Redemption, liquidation or convertability rights in stock or other securities;
- Ownership interests of parent or affiliated corporations.

24. In connection with the above indicia of control, an option exists to essentially shift the burden of proof as to whether a particular entity exercises control over a media property. Under this option, an entity would only be attributed with those media interests if it is affirmatively demonstrated by the Commission or others that actual control under the indicia will occur. Comment is sought as to the effectiveness of this approach.

25. Another option upon which we seek comment is the advisability of linking the Commission's attribution rules to other legal or regulatory requirements. For example, should we establish a disclosure requirement for persons or entities that own more than 5% of the voting securities in a corporate licensee as required by the 1934 Securities and Exchange Act? 15 U.S.C. 78m(d)(1). The attribution rules could be modeled after the Commission's 20% alien ownership rules. The advantages of linkage of the attribution rules with other regulatory requirements are that consistency of federal regulations would be enhanced, and the reporting and administrative burden on licensees and investors may be reduced. On the other hand, the underlying public interest considerations in telecommunications may be unique, and we may not necessarily be able to rely upon other standards of regulatory ownership.

26. A final regulatory option is to retain the current attribution levels. Are the current attribution rules set at appropriate levels to prevent influence over licensees and yet ensure adequate availability of capital? Should the attribution benchmarks be raised to some level less than 20%? Given the recommendation of the Commission's Advisory Committee on Alternative Financing, would it be appropriate to maintain the present attribution rule structure and grant a higher benchmark for SBICs and MESBICs to increase the availability of capital for the acquisition of telecommunications facilities by minority entrepreneurs? [25] Specific data and facts should be provided to demonstrate whether the current rule structure is justified. Should the current benchmarks be retained with a revisonary effort directed toward clarifying the explanatory notes? Would the public be served better if the FCC modified the current benchmarks to provide a flat, across-the-board standard?

27. We have sought comment on the issue of how the attribution rules should function in conjunction with the use of voting trusts and the ownership of non-voting preferred stock. [26] These forms of ownership, expressly avoiding control, insulate the holder from attributable ownership interests. [27] In reevaluating the attribution rules, the Commission will take into account comments in BC Docket No. 78–239 (non-voting equity ownership interests in corporate licensees). To the extent that those comments require alteration in light of the higher benchmarks now under consideration, we request that that information be submitted.

28. One issue on which we are especially interested in obtaining comments is the effect that a change in the attribution rules would have on the investment community and entrepreneurs seeking financing for telecommunications ventures. To what extent would minority group members and new entrants have greater access to financing if the restrictions were eased?

29. The Commission is interested in obtaining public comment on the advisability of treating all investors in a similar fashion. For example, should bank trust departments, insurance companies, investment companies, mutual funds, venture capitalists, SBIC/MESBICs, pension funds, investment clubs and others be accorded identical treatment under the attribution rules? Are there policy or legal reasons why a different standard should apply to any particular group of investors? Should different benchmarks be established for active and passive investors; should there be no distinction or should the distinction be framed differently? Should "passive" investment be defined in a different manner than it has in the past? What is the optimal mix of benchmarks for the different investment groups? Should the attribution rules be the same for national, regional and local ownership situations, or are there reasons for delineating specific rules for each? In this connection, should the Commission explicitly link its cross interest policy to the attribution benchmarks? Should the attribution rules vary according to the type of media or with mode of distribution?

30. Apart from the ownership benchmark portion of the attribution rules, we seek to elicit comment on the degree to which indirect interests are attributed. Comments are sought on the appropriate approach for attributing ownership interests in vertical ownership situations. Should the current approach of mechanically determining

---

[24] At least with respect to larger corporations, there is some debate whether management or owners (*i.e.*, stockholders) control the company. *See e.g.*, F. M. Scherer, Industrial Market Structure and Economic Performance 32–33 (2d ed. 1980). This point is especially relevant to the underlying premise of the multiple ownership rules which assumes that programming decisions are made by, or are the responsibility of, officers, directors and shareholders.

[25] Strategies for Advancing Minority Ownership Opportunities in Telecommunications, *supra* note 19, at 18. *See also*, Petition for Rule Making on Minority Ownership, National Association of Black Owned Broadcasters ("NABOB"), October 1981. The NABOB Petition, *inter alia*, requests the Commission to consider exempting MESBICs from the multiple ownership rules.

[26] The pending *Notice of Inquiry and Proposed Rule Making* in BC Docket No. 78–239, explores various issues related to voting trusts and non-voting stock. 66 FCC 2d 1302 (1978).

[27] *Evening Star Broadcasting Co., Inc.*, 68 FCC 2d 129, 135–36, *reaff'd as modified on other grounds*, 68 FCC 2d 158 (1978); *Bonneville International Corp.*, 43 RR 2d 863, 865 (1977).

whether each level of ownership exceeds the benchmarks be replaced with a more efficacious method of limiting the effect of the attribution benchmarks to only those entities with a reasonable nexus to the licensee? Should a "multiplier" be used to limit the effect of the attribution benchmarks such as that which currently is used in the alien ownership context? [29] For purposes of illustrating the current "chain effect" of the attribution rules in the vertical ownership context, consider the following example: The X Corporation is the licensee of two standard broadcast stations. Twenty percent of X's voting stock is owned by Y Company. In turn, five percent of Y's voting stock is owned by Z Corporation. Under our current attribution rules, to compute ownership for all of the multiple ownership rules, the two stations would be attributed to X, Y and Z, since the chain effect would mean that each owns 1% or more of the voting stock in the company below. Each corporate entity itself has a greater than 1% interest. In addition, officers and directors of Z Corporation would have a cognizable interest in the two stations. Using a multiplier approach, Z's interest in X, the licensee, would be 1% (5% of 20%). Under the current benchmark, that is a cognizable interest. Using a higher benchmark, the interest would not be reportable for multiple ownership purposes.

31. Closely related to the chain effect on voting interests is the issue of imputing those interests to non-shareholder officers, directors, partners and trustees. Commenters are asked to address whether and to what extent these parties should be attributed with media interests of their corporations or non-incorporated associations such as limited partnerships. Assuming a multiplier approach is adopted as a method for establishing a nexus to programming decisions for those entities with ownership interests, what similar types of limiting devices may be used for non-interest owning corporate officers and directors and non-corporate representatives? An option would be to attribute a corporate or non-corporate entity's cognizable media interests to the officers, directors and other representatives except where specific, affirmative insulating mechanisms are employed; *e.g.*, letters abdicating responsibility for an disavowing intent to participate in decisions directly affecting station operation and programming.

32. Another issue requiring comment concerns corporate size and the attribution rules. The concerns of closely-held and widely-held corporations appear to be somewhat different with regard to investment financing. New licensees, particularly minority groups often organize as closely-held corporations. The attribution rules relevant to close corporations require that *any* equity interest be cognizable. On the other hand, the larger widely-held broadcasting and cable television operations have a different concern. [30] Large scale investors may be able to invest in only one or a few of the larger widely-held communications firms because the attributable holdings may run afoul of, *e.g.*, the duopoly or regional concentration rules. Moreover, in combination with the ownership transfer constraints of 47 U.S.C. 310(d), the ownership of a remote attributable interest in a single broadcast property may delay or preclude a takeover bid by another entity. This effect may skew the normal operation of corporate financial affairs.

33. Given these circumstances, we therefore inquire into the distinction the Commission has drawn between closely-held and widely-held corporations. Should the same attribution rules apply to each? Is there a justifiable reason for continuing to define a closely-held corporation as one that has 50 or fewer share-holders? [30] Should a closely-held corporation be redefined in terms of 25 or fewer shareholders, [31] or should the quantitative approach be abandoned in favor of a functional definition? Should the Commission's traditional distinction between closely-held and widely-held corporations be deleted as being unduly discriminatory against the efforts of closely-held corporations to raise capital? Should closely-held corporations be subject to a higher attribution benchmark because a higher proportion of stock ownership may be necessary to influence the corporation? Comment is also sought whether non-corporate associations should be treated in a manner similar to closely-held corporations and to what extent equity interests such as limited partnership interests are equivalent to corporate equity interests for attribution purposes.

34. It has been noted that private pension funds currently control over $400 billion of investment capital. [32] Those assets constitute one of the largest available pools of investment funds. Although pension funds are subject to the 1% ownership rule in all FCC multiple and cross-ownership contexts, [33] we currently have pending an undocketed petition for rule making requesting a 5% cognizable ownership level for pension funds. [34] Should these funds be subject to the same benchmarks as investment and insurance companies and other apparently passive investors?

35. Reporting ownership interests raises questions on which we also seek comment. In terms of cognizable interests, should the Commission continue to monitor ownership activity by requiring the submission of reports on FCC Form 323 pursuant to 47 CFR 73.3615 and FCC Form 325, schedules 3 and 4 pursuant to 47 CFR 76.403? If so, how often should such disclosures be made? Are routine reports necessary or should the Commission address ownership questions only in the context of license assignment and transfer of control situations or only when the ownership benchmarks are exceeded?

36. Finally, an issue also exists with regard to the ability of parties to evade the proscriptions of the multiple ownership rules. Under the current attribution structure, entities may be able to avoid a strict application of the multiple ownership rules by maintaining independent accounts, each of which contains less than a cognizable voting interest in the licensee, but aggregated exceed that amount. For example, Mr. Q may maintain accounts in two separate brokerage houses with 0.5% of the outstanding voting shares of each of the three national television networks in each account. The networks, as licensees, are required to furnish information regarding their shareholders having the right to vote 1% or more of their stock. Although each brokerage house may hold in its "street name" an

[29] *See e.g., Closer & Fletcher*, 33 R.R. 2d 37, 38 (1975); and Watkins, *Alien Ownership and the Communications Act*, 33 Fed. Comm. L.J. 1, 32 n. 126 (1981). We use the word "multiplier" to describe the reduction of an intermediate investment entity's interest in the licensee.

[30] Even the larger communications concerns are relatively small compared to other domestic corporations. Some of the larger broadcasting firms do not even rank in the *Fortune* 500. B. Compaine, C. Sterling, T. Guback & J. Noble, Who Owns the Media? 327 (2d ed. 1982).

[30] In 1976 the Commission reaffirmed the 50 shareholder cutoff as the distinction between closely and widely-held corporations. *First Report and Order*, Docket No. 20521, 59 FCC 2d 905, 908 (1976).

[31] *See* 28 U.S.C. 1371(a).

[32] American Council of Life Insurance, 1982 Life Insurance Factbook 30 (1982).

[33] A special exception has been carved out for the College Retirement Equities Fund ("CREF"), which provides pension plans for educational institutions. The Commission has treated CREF like an investment company and permits it to take advantage of the 5% benchmark due to its passive investment objectives. *Multiple Ownership and Cross Ownership*, 59 FCC 2d 970, 979 (1976).

[34] RM–4045, filed January 27, 1982, by The Centennial Fund.

aggregated interest greater than 1% of the stock of each network, Mr. Q would not appear as having the right to vote that amount. Hence, our reporting requirements in connection with the benchmarks would not disclose Mr. Q's otherwise cognizable interest in each network. Comment is sought as to whether there is an administratively workable mechanism that would prevent parties from evading our ownership constraints by breaking down their interests into non-cognizable discrete investments.

V. Tentative Recommendations

37. After reviewing the ownership benchmarks, the mechanism for imputing them, their regulatory history and Commission decisions construing these rules, we believe that some of the burdens currently imposed by the attribution rules should be removed. The benchmarks were developed at a time when telecommunications services were not as diverse and dynamic as they are today. Indeed, the underlying facts and assumptions that were prevalent at the time the attribution rules were developed seem no longer to be necessarily valid. Healthy competition exists from both within and between each of the traditional service areas. For example, the Commission has found that sufficient competition exists within broadcasting to permit deletion of many of the ascertainment and commercial guidelines for radio broadcasters [36] and drop many of the subscription television regulations.[36] Cable, broadcast and multipoint distribution service are competing on an unprecedented level to fulfill consumers' video needs. Moreover, the recently authorized low power television [37] and interim DBS service [38] will provide additional competitive stimuli. Given these circumstances, the levels at which the benchmarks are set appear to be overly restrictive.

38. It is our tentative view that the ownership benchmarks should be raised to allow more investment in broadcast and cable facilities so as to improve the flow of capital and open opportunities for increased participation in the media distribution market. We believe that to the extent practicable all of the ownership benchmarks should be uniform and understandable. Thus, we propose that all of the benchmarks be lifted from their current levels to some point between 5% and 20%. We would treat the interests of non-corporate entities in an identical fashion. Interests greater than this benchmark but less than majority control will be subject to a rebuttable presumption that the interest held is controlling.

39. An attribution benchmark in the proposed range does not appear to be an unreasonable level that would constitute a significant ability to control licensee's policies or programming.[39] For example, a mid-point 12% corporate ownership interest constitutes less than one-eight interest in total ownership. As with any administrative decision, if experience proves our recommended benchmark to be too high, it can be scaled back accordingly by further rulemaking. Moreover, the Commission could act upon a showing that an ownership level less than the benchmark does, in fact, constitute control. Rather than hindering the public interest, we believe that increasing the ownership benchmarks will fulfill our statutory mandate to "encourage the larger and more effective use of radio in the public interest," [40] by encouraging new capital investment to invigorate the financial health of licensees and applicants and potentially improving the quality of available programming.

40. We would propose, therefore, to modify our ownership reporting requirements to conform to the attribution benchmark that results from this proceeding.[41] Currently, § 73.3615 of the Rules requires corporate broadcast licensees and permittees with more than 50 shareholders to file an annual report with the Commission that specifies stockholders who have 1% or more of the voting or nonvoting stock of the corporation. 47 CFR 73.3615. Additionally, § 76.403 of the Rules requires cable system operators to submit comprehensive annual ownership data upon request by the Commission. 47 CFR 76.403. We can perceive no reason to continue this inconsistency between the attribution and broadcast and cable reporting rules. Thus, we would propose to modify these rule sections to conform to the proposed attribution benchmark and require such reports only when the attribution benchmark is exceeded. The Commission may, of course, reserve the right to require licensees to report specific ownership information if the need arises.

41. It also appears that the current operation of the attribution benchmarks in the vertical ownership context disserves the public interest by making cognizable, ownership interests that are too far removed from the licensee to have any effect on its policies. To correct this situation, we propose to use a multiplier, described earlier, in vertical ownership situations. We believe that the use of a multiplier will provide a sound means of limiting the attribution benchmarks to those situations where there is a reasonable connection between the investor and the licensee.[42] Moreover, we believe that the cross interest policy should conform to the attribution rules. These changes, we hope will help eliminate uncertainty and encourage more investment in telecommunications facilities.

42. We believe it is in the public interest to delete the existing distinction between closely-held and widely-held corporations. The current rules appear to have an unnecessarily discriminatory impact on the ability of closely-held corporations to raise capital. Therefore, we would propose to apply the same ownership benchmarks to both types of corporations.

43. Moreover, we believe that the ownership restrictions applicable to officers, directors and other representatives such as partners and trustees should be reexamined. In some cases, these officials exercise minimal power and serve in honorary or emeritus positions. We intend to explore whether in some cases it might be possible to create an insulation mechanism for officers, directors and other representatives of corporate and non-corporate entities with cognizable interests who could relinquish all authority over programming.[43]

44. In addition to proposing new attribution benchmarks for the multiple ownership rules, the Commission is, at this time, also proposing to provide exceptions to the proposed benchmark. Although we believe that our proposed benchmark is justifiable and reasonable,

[37] 47 FR 30089 (July 12, 1982) (to be codified at 47 CFR 73.642-643).

[38] *BC Docket No. 78-253, supra*, n. 18.

[39] *Direct Broadcast Satellites, Supra*, n. 17.

[39] Various studies have used the assumption that five, ten or twenty percent ownership of the outstanding voting stock is necessary for control of larger corporations. F. M. Scherer, Industrial Market Structure and Economic Performance 33-33 (2d ed. 1980).

[40] 47 U.S.C. 303(g).

[41] *See generally, Notice of Proposed Rule Making, Docket No. 20521*, 40 FR 20543 (June 11, 1975).

[42] To determine an intermediary investor's interest in a licensee, the multiplier procedure simply requires multiplication of an investor's interest in the licensee by the interest held in that investor and so on up the chain. At the point where the product is less than the benchmark, attribution stops.

[43] *See e.g., Whitcom Investment Company*, FCC 82-582, ——FCC 2d ——, (1983) (released January 6, 1983). In *Whitcom*, the Commission waived the network/cable television cross-ownership rule because, *inter alia*, of a pledge of non-participation and the proposed use of structural insulating mechanisms to "wall-off" a new partner with network ownership interests.

it may not be appropriate in all cases. As in many areas of government regulation, it is difficult to predict with precision every future circumstance in which the attribution benchmark may be applied. In some instances, the benchmark may disserve the public interest by being too expansive or restrictive. Although we do not anticipate granting exceptions on a routine basis, they should be available where the facts of the case indicate that the public interest would be better served by deviating from the "bright line" test that we are now proposing for the attribution benchmarks. We acknowledge that experience with new attribution benchmarks may demonstrate the need for occasional exceptions.

45. It is our intention that this proceeding be, to the extent practicable, dispositive of the issues in the related docketed and undocketed multiple ownership proceedings, as well as any waiver requests that are pending at the time of publication of this *Notice* in the **Federal Register.**[44] Any outstanding proceedings not resolved by this rule making will be resolved as resources permit. We fully intend the disposition of this proceeding to establish a comprehensive policy framework for the attribution rules.

VI. Conclusion

46. By this Notice, we hope to elicit thorough analysis and discussion of the issues that have been raised. We invite concise and thorough legal briefs as well as extensive economic, social and policy analyses. Because it is expected that the staff will have a large number of comments and reply comments to synthesize, we suggest that the comments generally follow the order of discussion of issues in this Notice. The records in the consolidated proceeding should be updated where the record may be stale. Commenters should, however, avoid redundancy.

47. The Commission is particularly interested in the submission of specific, empirical data relating to the proposals set forth herein. We are interested in data that address the probable impact on diversity of ownership and concentration of control of licensees; industry's need for additional capital infusion; the probable increase of capital availability as a result of the proposed rule change; and the potential for anticompetitive practices. In addition, we seek specific comment and the submission of empirical evidence on the public interest impact of our proposed rule changes.

48. *Regulatory Flexibility Act Initial Analysis.* Persuant to the Regulatory Flexibility Act of 1980, 5 U.S.C. 601 *et seq.*, the Commission issues the following regulatory flexibility analysis:

I. Reason for Action. This proposal was prompted by the Commission's desire to reexamine its rules and policies that attribute licensed telecommunications ownership interest to certain entities. Through this proceeding, the Commissioner seeks to establish an overall policy to assist in the resolution of several incomplete proceedings in the ownership area.

II(a). Objective. The purpose of this Notice is to initiate a rule making proceeding and seek comment on whether the Commission's current attribution rules, designed to prevent undue concentration of ownership interests, continue to serve the public interest in light of increased competition in the provision of telecommunications services and the difficulty in financing new communications ventures.

II(b). Legal Basis. The legal authority for seeking comment on these policies resides in Sections 1, 4(i), 303(r) and 403 of the Communications Act of 1934, as amended (47 U.S.C. 151, *et. seq.*).

III. Description, Potential Impact and Number of Small Entities Affected. These proposals should benefit all entities seeking telecommunications licenses from the Commission that rely on external financing. Existing and potential FCC license applicants range in size from single individuals and small partnerships to multi-million dollar corporations. This proposal is expected to maintain the Commission's traditional policy of ownership diversity, while enhancing the availability of capital for applicants and licensees. Hence many small entities should find increased capital availability and more open entry into the telecommunications business.

IV. Recording, Record Keeping and Other Compliance Requirements. The ease of filing FCC Form 301 (Application for Commercial Construction Permit), Form 314 (Assignment of Broadcast Station Construction Permit or License), FCC Form 315 (Transfer of Corporate Licensee or Permitee Control) and FCC Form 325—schedules 3 and 4 (Cable Operator Ownership Data) should be substantially improved.

V. Federal Rules Which Overlap, Duplicate or Conflict With These Rules. There are no other federal rules that directly conflict with the Commission's attribution rules.

VI. Any Significant Alternative Minimizing Impact on Small Entities and Consistent with Stated Objectives. None.

49. Written public comments are requested on the Initial Regulatory Flexibility Analysis (IRFA) *supra.* These comments must be filed in accordance with the same filing deadlines as comments on the balance of the Notice, but they must have a separate and distinct heading designating them as responses to the regulatory flexibility analysis. The Secretary shall send a copy of this Notice to the Chief Counsel for Advocacy of the Small Business Administration in accordance with Section 603(a) of the Regulatory Flexibility Act (Pub. L. No. 96–354, 94 Stat. 1164, 5 U.S.C. 601 *et seq.*) (1980).

50. For purposes of this non-restricted notice and comment rule making proceeding, members of the public are advised that *ex parte* contacts are permitted from the time the Commission adopts a Notice of Proposed Rule Making until the time a Public Notice is issued stating a substantive disposition of the matter is to be considered at a forthcoming meeting or until a final order disposing of the matter is adopted by the Commission, whichever is earlier. In general, an *ex parte* presentation is any written or oral communication (other than formal written comments/pleadings and formal oral arguments) between a person outside the Commission and a Commissioner or a member of the Commission's staff that addresses the merits of the proceeding. Any person who submits a written *ex parte* presentation must serve a copy of that presentation on the Commission's Secretary for inclusion in the public file. Any person who makes an oral *ex parte* presentation addressing matters not fully covered in any previously-filed written comments for the proceeding must prepare a written summary of that presentation; on the day of oral presentation, that written summary must be served on the Commission's Secretary for inclusion in the public file, with a copy to the Commission official receiving the oral presentation. Each *ex parte* presentation described above must state on its face that the Secretary has been served, and must also state by docket number the proceeding to which it relates. *See generally,* 1.1231 of the Commission rules, 47 CFR 1.1231.

51. Pursuant to applicable procedures set forth in § 1.415 of the Commission's rules, interested parties may file comments on or before April 25, 1983 and reply comments on or before May 10, 1983.[45] All relevant and timely

[44] The pending ownership proceedings are cited at notes 1 through 3 *supra.*

[45] Due to the Commission's desire to act promptly on this matter and because of the large amount of

comments and reply comments will be considered by the Commission before further action in this proceeding. The Commission may also consider any other relevant information brought to its attention.

52. In reaching its decision, the Commission may take into consideration information and ideas not contained in the comments, provided that such information or a written summary indicating the nature and source of such information is placed in the public file, and provided that the fact of the Commission's reliance on such information is noted in the Report and Order. In accordance with the provision of § 1.419 of the FCC's Rules and Regulations, an original and 5 copies of all comments, replies or other documents filed in this proceeding shall be furnished to the FCC. Participants filing the required copies who also desire that each Commissioner receive a personal copy of the comments may file an additional 6 copies. Members of the general public who wish to express their interest by participating informally in this proceeding may do so by submitting one copy of their comments, without regard to form, provided that Mass Media Docket No. 83-46 is specified in the heading. Such informal participants who desire that responsible members of the staff receive a personal copy may file an additional five copies. Responses will be available for public inspection during regular business hours in the Commission's Public Reference Room (Room 239) at headquarters in Washington, D.C. (1919 M Street, N.W.). Further information concerning this proceeding may be obtained from Randy W. Thomas, Office of General Counsel, 202-632-6990.

(Secs. 4,303, 48 stat., as amended, 1066, 1082; 47 U.S.C. 154, 303)

Federal Communications Commission.

William J. Tricarico,

Secretary.

Joint Concurring Statement of Commissioners Henry M. Rivera and Joseph R. Fogarty

In Re: Notice of Proposed Rulemaking on Ownership Attribution Rules

We concur in the adoption of this Notice of Proposed Rulemaking (NPRM), but only because we agree that existing ownership attribution benchmarks may be ready for reevaluation and, in some instances, upward adjustment.[46] The tentative recommendations outlined in paragraphs 37–44 of the Notice are not our recommendations, and we strongly disagree with the overall approach to attribution espoused by this NPRM.

As an initial matter, this Notice is ill-advised because it continues this Commission's newfound penchant for piecemeal evaluation of ownership issues. Picking off longstanding ownership rules one by one can only produce disjointed results,[47] and give credence to criticism that this agency has abandoned its interest in promoting diversity of expression through effective structural restraints.

The essential premise of this Notice is also misguided. The NPRM proceeds from a belief that the attribution rules "may work against the realization of an efficient nationwide radio service," paragraph 15, and goes on to argue that the rules must be scrutinized so that the costs they impose on society "are not excessive or [do not] create disproportionate economic inefficiencies." *Id.* The item further observes that the attribution rules operate to restrict combinations permissible under the Justice Department's revised antitrust and merger guidelines, paragraph 16, and implies that such inconsistency alone warrants their amendment.

By attempting to ground the Commission's ownership attribution benchmarks primarily in principles of "economic efficiency," and proposing their substantial upward amendment in accordance with that reformulation, this Notice advocates a deep and disturbing break with bedrock public policy governing media ownership. At the heart of the existing multiple ownership rules is the Commission's historic policy favoring diversification of ownership and control. The FCC has long emphasized that:

> [T]he fundamental purpose * * * of the multiple ownership rules is to promote diversification of ownership in order to maximize diversification of program and service viewpoints as well as to prevent undue concentration of economic power contrary to the public interest.[48]

The public interest rationale for a dramatic policy shift away from these established principles to the putative virtues of economic efficiency is less than self-evident. The Notice expresses concern that the current benchmark may inhibit capital investment in media industries subject to our regulation, but other than the evidence compiled by the Advisory Committee's Final Report, *See* note 1 *supra*, no evidence—empirical, anecdotal or otherwise—is cited for the proposition that those industries are lacking in needed capital infusions or that the public interest is in any way suffering as a result of the existing attribution rules. Paragraph 26 of the Notice emphasizes that "specific data and facts should be provided to demonstrate whether the current rule structure is justified;" unfortunately, the Notice does not subject its new policy predisposition to the same rigorous test. It is even more unfortunate that this glib shift in the burden of policy persuasion has not been squared with basic First Amendment principles.[49]

---

information now on file in the various related dockets, we believe this time frame is appropriate. We do not intend to grant extensions of time to any commenters in this proceeding except for exceptionally compelling circumstances.

[46] For example, the *Final Report of the Advisory Committee on Alternative Financing for Minority Opportunities in Telecommunications* recently recommended that the FCC liberalize the attribution benchmarks applicable to MESBICs and SBICs, which often serve as lenders to prospective minority media owners. Those proposals are highly meritorious and worthy of adoption because of the important policy goal they would further. It is most unfortunate that these recommendations are all but buried in the instant Notice. We hope they will not be overlooked by the commenters, since they were a key element of the Advisory Committee's plan to increase minority participation in telecommunications.

While the Notice prominently cites the hardship that the existing rules work on minorities, and the benefits that radically elevated benchmarks would confer upon them, we note that if the Commission wished specifically to address the financing problems faced by minorities, it could tailor special attribution rules for minority ownership enterprises rather than propose a reflexive opening of the concentration floodgates.

[47] Currently pending before the Commission are other proceedings designed to eliminate existing structural restraints, and several Commissioners have publicly stated their interest in reexamining still other restrictions on ownership. The Commission cannot, however, revise its ownership rules in a coherent manner if it examines each one in isolation. In the cable/network ownership rulemaking, for example, the Commission has proposed a media concentration index to safeguard against excessive domination by any one entity. If adopted, however, the index would perforce conflict with the policy premises of the so-called seven-station rule, leaving at least the impression that the rule had been amended without public comment, let alone agency forethought. Similarly, in the context of this NPRM, if a twenty percent benchmark is adopted and no duty to report ultimate beneficial owners is imposed, an entity could easily defeat existing multiple and cross-ownership restrictions by creating several layers of wholly-owned intermediate companies, each holding less than the operative attribution benchmark.

We are not contending that the Commission cannot make a judment on any of its ownership rules unless it conducts a "massive" omnibus proceeding on ownership; we do submit that the Commission must *at least* expressly acknowledge and analyze the impact of proposed changes on interdependent existing rules and policies, and should time the various proceedings such that we have the information necessary to make intelligent decisions.

---

[48] *Amendment of Multiple Ownership Rules*, 18 FCC 288, 291–92 (1983); *see also FCC* v. *Nat'l. Citizens Comm. for Broadcasting*, 436 U.S. 775, 780 (1990).

[49] As the Supreme Court has stated: "The 'public interest' standard necessarily invites reference to First Amendment principles * * * and, in particular,

In seeking to identify the level at which investors may *control* programming, rather than the level at which programming *influence* is possible, the Notice further underscores its apparent disinterest in promoting diversity of ownership and viewpoint. In its several prior reexaminations of the attribution benchmarks, the Commission has consistently emphasized that ability to influence should be the focus and concern of FCC ownership rules. In this connection, the Commission has stated:

> The principle of diversification and the realities of the situation require that no distinction be made between a minority non-controlling interest and a full or controlling one. While the holder of a small interest in many instances may have a slight influence on the operation of the station in question, it is also true such a person can exert considerable influence—to an extent clearly within the objectives and purview of the prescribed diversification policy.[50]

In the light of this consistent precedential emphasis on programming influence, the failure of the Notice to explain and justify its shift in focus to programming control makes what might otherwise be perceived as subtle inquiry an obvious exercise in predestination.

The NPRM is also seriously flawed by its impoverished analysis of this refined and complicated area of ownership attribution benchmarks. The superficial approach taken by the Notice not only disserves the commenting parties by forcing them to shadow-box untenable options, but also sells this agency short by creating the unfortunate impression that we have little appreciation of the business environment in which our regulatees operate. Stripped of rule citations and history, open-ended questions, and rhetorical assertions about competition and change, the Notice is little more than two pages of conclusory "tentative recommendations." An expert agency should look like one; we regret having to observe that such expertise is notably lacking here.

Turning to specific weaknesses, the Notice's failure to analyze, even superficially, the characteristics of various common business entities and investment arrangements—for example, the significant differences between closely-held and widely-held corporations—has led it to the unrealistic and unwise tentative recommendation that all investors be subject to identical attribution benchmarks. Can it seriously be argued that ten percent holdings in a publicly-traded company and in a closely-held company with a handful of stockholders confer equivalent potential for decision making influence or control? It is equally implausible that an institutional investor, such as a pension fund, no matter how "passive" its intentions, will not dominate with a ten, fifteen or twenty percent interest in a publicly-held media company. The Commission previously took cognizance of these business realities by shaping rules appropriate to particular classes of entities. This rulemaking should have continued that level of analytic sophistication.

The failure of the NPRM to recognize and deal intelligently with basic business realities is more than matched by its cursory analysis of the quantitative benchmark issue. Here, the Notice makes a decisive, if silent, break with past Commission proceedings on attribution of ownership. This lapse of institutional memory is evident from the fact that an outstanding Further NPRM on this identical subject—proposing to raise the benchmark across-the-board to ten percent, except for purposes of the seven-station rule—is barely referenced, and no rationale is supplied for rejecting that approach in this proceeding.

Still more troubling is the unexplained departure of this Notice from the Commission's prior view of the relevance of benchmarks set elsewhere in the Communications Act or other federal statutes to the decision as to when and where our ownership rule restrictions should apply. The Commission previously rejected cross-reference to such other statutory guidelines, stating:

> The Communications Act uses a figure of 20 percent with regard to alien control of a broadcast corporation, and we have noted that the Investment Company Act uses a standard of 25 percent. In other words, under one set of circumstances legislators have agreed on one figure; in different circumstances, on another. Although in other contexts, and for other purposes, other standards might be appropriate, we believe that in the field of broadcasting, where the important public interest consideration of preserving diversity of programming and service viewpoints attaches, special caution is warranted.[51]

Despite this prior interpretation and conclusion, and the absence of any intervening legislation or other congressional declaration, this Notice now blithely suggests that Congress may have intended the alien ownership maximum of Section 310 of the Communications Act to serve as a guide for determining when all other ownership rules should become operative.[52] If any federal standard should serve to inform us on the issue, why not the five percent benchmark specified by the Securities and Exchange Act as the level that confers the potential to affect a company's decisions?[53] Again, a public interest rationale for the preferences of this Notice is less than intuitively obvious.

The tentative recommendation to require ownership disclosure only when the attribution benchmark is exceeded is also highly inappropriate because it poses a significant threat to fundamental interests in robust economic competion and spirited competition in ideas. Not requiring identification of the ultimate beneficial owners of any company holding less

---

to the First Amendment goal of achieving 'the *widest possible* dissemination of information from diverse and antagonistic sources.' " *FCC* v. *Nat'l. Citizens Comm. for Broadcasting*, 436 U.S. at 795 (citations omitted, emphasis added). Given these paramount policy guideposts, our media ownership policies should "never be driven by a desire to facilitate a market structure which, short of domination by a few firms, would yield maximum organizational efficiencies." *Report and Order Terminating Docket 18691*, —— FCC 2d —— (1982).

It also bears emphasizing that many of the economic arguments against retention of existing attribution rules apply equally to the FCC's "substantive" ownership restrictions. To the extent this proceeding is designed to rule on the validity of such arguments, it appears specious to maintain that "it is not the Commission's intention * * * to evaluate the underlying premises of individual multiple ownership rules * * *." *See* NPRM at n.4.

[50] *Amendment of Multiple Ownership Rules*, 18 FCC 288, 289–90 (1953).

[51] *Multiple Ownership of AM, FM and TV Stations*, 13 FCC 2d 357, 370 (1968).

[52] The alien ownership restrictions of the Communications Act were fashioned to curb alien activities against the United States in time of war. *See Hearings on H.R. 8301 Before the House Comm. on Interstate and Foreign Commerce*, 73d Cong., 2d Sess. 26 (1934). Those provisions of Section 310 have remained essentially unchanged since 1934.

[53] The Securities and Exchange Act of 1934 provides that a person who acquires more than five percent of certain classes of securities must disclose specific ownership and background information to the issuer, the stock exchanges, and the SEC. 15 U.S.C. 78m(d)(1) (1976). The purpose of this reporting requirement is to protect other investors in those securities and to maintain investor confidence in exchange markets by discouraging insider trading. *See* H. Rep. No. 1383, 73d Cong., 2d Sess. 13 (1934). Originally, the Act provided for disclosure by beneficial owners of more than ten percent of any equity security registered on a national securities exchange. 4 B. Schwartz, *The Economic Regulations of Business and Industry* 2033–34 (1973). However, in 1970, Congress amended the Act to require disclosure of holdings of more than five percent. Pub. L. No. 91–567 (Dec. 22, 1970). This amendment was designed to give extra protection to investors with respect to corporate tender offers and other securities acquisitions. The lower level of five percent was intended to prevent persons from obtaining eight or nine percent of a company's stock to avoid the original disclosure requirement, a practice which Congress believed deprived investors of information necessary to make certain investment decisions. It is significant to our inquiry here that Congress concluded that purchases of over five percent are material to investment decisions because they can lead to important changes in the management or business of a company. *See* H. Rep. No. 1655, 91st Cong., 2d Sess., *reprinted in* 1970 *U.S. Code Cong. and Admin. News* 5025, 5027–28.

than twenty percent of an entity with media interests would enable parties to violate existing local and regional concentration rules in some cases,[54] and to go undetected as media participants in others.[55] Those who have the capacity to use the airwaves and the power to influence public opinion should be known to the public and this Comission. Accordingly, if the Commission decides to raise existing benchmarks, it should require parties to report interests that fall short of the new level and should devise a means to detect violation of remaining ownership limitations.

One might be tempted to take some comfort in the fact that the Notice outlines a fairly broad range of options. A cursory reading of the Notice quickly makes plain, however, that most of the listed options are decorative only. For instance, it is difficult to credit the possibility that the Commission will adopt the *ad hoc* factor analysis described in paragraphs 23–24. That approach would produce nothing short of an administrative and business planning nightmare.[56] The Commission long ago recognized that ineluctable effect, and abandoned the practice of making individualized determinations of multiple ownership issues in favor of hard-and-fast rules on cognizable interests.[57] Furthermore, the suggestion that the FCC or the general public bear the burden of proving "actual control" under an *ad hoc* approach is particularly disingenuous from the standpoint of a continuing Commission commitment to furthering diversity of ownership, given the limited resources and incentives for "outsiders" to make such showings.

Maintenance of the *status quo*, another option identified, is theoretically possible but unlikely as a practical matter given the sanguine but largely rhetorical references of the Notice to the "dynamic," "rapid," "significant," and "competitive" changes that have occurred in telecommunications since the prevailing benchmarks were adopted.[58] However, in view of the paucity of data and analysis proffered to support the "tentative recommendations" of this NPRM, preserving the *status quo* may be the most rational of the posited alternatives.

February 7, 1983.

Concurring Statement of Commissioner Anne P. Jones

In Re: Notice of Proposed Rulemaking on Attribution of Ownership Interests in Broadcast, Cable Television, and Newspaper Entities

There are a number of things about this Notice which trouble me, perhaps most especially the "tentative recommendations" in it, which I am not prepared to endorse. However, I agree that reexamination of these rules and policies may be worthwhile, so I concur in issuance of the Notice.

BILLING CODE 6712-01-M

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

Research and Special Programs Administration

49 CFR Part 192

[Docket No. PS-76; Notice 1]

Transportation of Natural and Other Gas by Pipeline; Monitoring of External Corrosion Control

AGENCY: Materials Transportation Bureau (MTB), DOT.

ACTION: Advance notice of proposed rulemaking.

SUMMARY: This notice invites comments on the problem of conducting electrical tests of cathodic protection systems and electrical surveys to determine areas of active corrosion. Compliance with current requirements is controversial for pipelines located in areas that are subject to stray electrical currents or beneath continuous paving. Comments received will be considered with a view to proposing specific changes to the existing requirements for monitoring of external corrosion control.

DATE: Interested persons are invited to submit written comments on this notice before June 8, 1983. Late filed comments will be considered so far as practicable. All interested persons must submit as part of their written comments all the supporting material that they consider relevant to any statement of fact made by them.

ADDRESS: Communications should be sent to the Dockets Branch, Materials Transportation Bureau, U.S. Department of Transportation, 400 Seventh Street, SW., Washington, D.C. 20590.

All comments and docket materials may be reviewed in the Dockets Branch, Room 8426, between the hours of 8:30 a.m. to 5:00 p.m. each working day.

FOR FURTHER INFORMATION CONTACT: Paul J. Cory, 202–426–2082, regarding the content of this notice, or the Dockets Branch, 202–426–3148, regarding copies of this notice or other information in the docket.

SUPPLEMENTARY INFORMATION:

Statement of the Problem

MTB has reviewed the requirements of § 192.465(a) that each pipeline that is under cathodic protection must be tested at least once each calendar year, but with intervals not exceeding 15 months, to determine whether the cathodic protection meets the requirements of § 192.463. A copy of the Regulatory Review Report is in the docket. At issue is the technical feasibility of making the necessary tests on pipelines under cathodic protection, as required by § 192.465(a), in areas where the pipeline is located beneath continuous paving or in areas where electrical stray currents interfere with cathodic protection measurements. The review was conducted in accordance with Executive Order 12291 as a part of MTB's program to review existing regulations and revoke or revise those that are not achieving their intended purpose. Consideration of the difficulties in meeting the requirements of § 192.465(a) also disclosed similar problems in meeting §§ 192.457(b)(3) and 192.465(e). Therefore, this rulemaking action to change § 192.465(a) also considers and seeks answers to related compliance problems associated with these other two sections.

---

[54] For instance, under the approach outlined in the Notice, an entity seeking to control a newspaper and television station serving the same community in violation of the newspaper broadcast cross-ownership ban could easily do so without detection simply by holding either media outlet through six wholly-owned subsidiaries, five owning 19.9 percent each and the sixth owning the remaining .5 percent. The Notice's contention that such circumvention is possible even now completely overlooks the fact that such evasion would be extremely cumbersome, and therefore unlikely with a one percent benchmark. That would not be true if the attribution ceiling were lifted to fifteen or twenty percent.

[55] It is unclear, for example, how the Commission would be able to promote one of its primary broadcast licensing objectives—maximum diffusion of control—in the comparative hearing process if interests that are significant are not required to be reported.

[56] An *ad hoc* approach to attribution would sap our limited agency resources, inevitably produce inconsistent and arbitrary results, and make it virtually impossible for businesses to plan their endeavors with any reasonable degree of advance assurance.

[57] *See Multiple Ownership of Standard, FM and Television Broadcast Stations*, 45 FCC 1476, 1749 (1964); *Multiple Ownership of Standard, FM and Television Broadcast Stations*, 50 RR 2d 85, 89 (1975).

[58] It is "little more than wishful thinking to predicate a finding of 'workable competition' on new technology and services (e.g., DBS, Low Power TV, and fledgling STV and MDS) which are more on the horizon than with us here and now. In the final analysis, this Commission must have more than merely the *assumption* of a 'workably competitive' marketplace as the basis for policy making." Staff Report, FCC, *FCC Policy on Cable Ownership* 1, 1-2 (Nov. 1981) (Concurring Statement of Commissioner Joseph R. Fogarty).

Background

The American Society of Mechanical Engineers (ASME) Gas Piping Standards Committee on February 27, 1976, petitioned the Office of Pipeline Safety Operations (OPSO), predecessor to the Office of Pipeline Safety Regulation (OPSR), (Docket No. Pet. 76–5) to add a new paragraph to § 192.465, External corrosion control: Monitoring, to permit the use of annual leakage surveys, corrosion and leak history studies to verify and monitor the effectiveness of cathodic protection and other corrosion procedures.

The ASME contended that where pipelines are beneath paving, the reference electrode often cannot be placed in intimate electrical contact with the soil and readings taken with contact on the paving surface were often found to be invalid. Similarly, the ASME contended that electrical tests conducted on pipelines located in areas of stray current could not be relied upon as an indicator of the level of cathodic protection.

By a letter of September 15, 1976, OPSO denied that petition because the objective of the monitoring required by § 192.465 is to find and correct faulty cathodic protection in time to prevent corrosion leaks. The denied pointed out that use of the proposed alternatives of leak surveys and leak history studies are weak forms of preventive maintenance since they would be fruitful only after cathodic protection has become so ineffective that leaks are occurring. Particularly in paved areas, such leaks are more likely to be potentially hazardous to the safety of the public. In addition, OPSO was not convinced that electrical testing was impractical or ineffective for the reasons set forth in the petition. In its denial OPSO stated, "According to contract studies performed for this Office, the best indicator of effective corrosion control appears to be frequent monitoring and interpreting of pipe potentials." (Study report, Ferrous Pipeline Corrosion Processes, Detection, and Mitigation, October 1971, DOT–OS–A8–108).

In a meeting of the Technical Pipeline Safety Standards Committee (TPSSC) held in Washington, D.C., on January 17 and 18, 1978, the Committee recommended that OSPO institute rulemaking procedures to amend § 192.465. This proposal would permit the use of annual leakage surveys, and corrosion and leak history studies to verify and monitor the effectiveness of cathodic protection and other corrosion control procedures where it was found that electrical methods for evaluating and monitoring pipeline cathodic protection systems are impractical or are ineffectual. This would provide an alternative method for determining whether cathodic protection meets requirements of § 192.463 where the pipeline is located in areas such as (1) those congested with numerous buried metallic structures, (2) business and commercial areas where roadway and sidewalk paving exists between buildings on each side of the street, (3) where stray current effects are predominant, and (4) in lakes, rivers, and marsh lands.

The Committee gave as a reason for this recommendation that electrical tests will not always be effective in determining whether cathodic protection is effective and other means should be provided.

By a letter of August 28, 1978, OPSR dined this specific recommendation, citing the similarity to the February 27, 1976, petition of the ASME that is previously discussed and giving the same reasons. In reconsidering this recommendation, MTB believes that areas congested with numerous buried metallic structures would normally be included as part of the paved area being reviewed. In addition, MTB has no information to show that lakes, rivers, and marsh lands should be excepted from the requirements of § 192.465(a).

The continuing controversy involved over the requirements of testing the effectiveness of cathodic protection on pipelines under paving and in stray current areas prompted the Department to study the feasibility of applying testing techniques necessary to comply with § 192.465(a) in such areas.

This study, done by the Harco Corporation under Contract DTRS–5680–C–00004, completed in January 1982, was based on making electrical measurements on cathodically protected steel pipelines located in business or commercial areas where roadway and sidewalk paving exist between buildings on each side of the street and other underground metallic structures are buried and in areas where stray current effects are predominant.

In paved areas, four pipelines were selected that had other underground structures present as is considered typical of those found in distribution systems. These included pipelines that were:

1. Effectively coated with galvanic anode cathodic protection, located entirely under concrete paving;

2. Bare with galvanic anode cathodic protection, part under asphaltic macadam and part under asphalt on top of concrete paving;

3. Effectively coated with impressed current cathodic protection, mostly under an asphalt surface over brick and limestone but with a few areas having a concrete paving; and

4. Bare with impressed current cathodic protection, located under asphalt paving.

In all four paved locations, it was found that both asphalt and concrete paving influence the resultant pipe-to-soil measurements and that each material has a different effect. On asphalt, the resistance in the contact between the reference electrode and the paving was found to be the major consideration in obtaining pipe-to-soil voltage readings. On concrete, the effect of contact resistance was negligible, but other conditions introduced errors in the voltage potentials measured as explained below.

Conclusions to the Harco study pointed out that:

1. On all locations having asphalt pavement:

a. Potential measurements were often obtainable at cracks in the paving.

b. Potential measurement with the reference electrode placed on dry, well-sealed asphalt pavement were not possible.

c. With water poured on well-sealed, asphalt pavement, potential measurements were obtainable, but these potentials were obtained only where the water "bridged" the asphalt surface between the location where the reference electrode was placed to a crack in the asphalt or to an unpaved area. Where the water remained "local" on well-seal asphalt, a valid reading was not obtained.

d. When the entire asphalt pavement was wet (such as during or immediately after rain), readings were obtained without difficulty, but the exact meaning of the readings with respect to location of the reference electrode is in doubt.

2. Conclusions to the Harco study pointed out that on concrete pavement:

a. Apparently valid potential measurements taken with the reference electrode placed on concrete pavement were easily obtainable with instruments of high input resistance.

b. However, potentials taken with the reference electrode on concrete differed from those taken with contact to the soil at the same location through a drilled hole or an adjacent unpaved area. In most instances, the potential indicated on the concrete was more negative than the potential in the adjacent soil although the reverse condition was also seen.

c. Despite the error in potential readings introduced by concrete

pavement on piplines with impressed current systems, the changes in potential (delta E) obtained when the rectifier unit was turned "off" and "on," were approximately the same on concrete and in soil at the same locations.

In areas of stray current, two pipelines were selected for study. Both pipelines, one in Pittsburgh, Pennsylvania, and the other in Berkeley, California, were being subjected to stray current resulting from the operation of public transit systems. Both pipelines were well coated. The Pittsburgh pipeline was protected by galvanic anode cathodic protection, and the Berkeley pipeline had an impressed current cathodic protection system. It was found that valid pipe-to-soil potentials could be obtained on both pipelines during nonrush hour periods either by use of a direct reading high resistance voltmeter or by use of a recording voltmeter.

Conclusions to the Harco study pointed out that in areas where stray currents are predominant:

1. Every situation is unique and must be dealt with in a manner which fits the particular condition encountered.

2. It is first necessary to overcome any possible adverse effects generated by that stray current (see 49 CFR 192.473(a)).

3. The fluctuations in pipe-to-soil potential will be proportional to the magnitudes of the stray currents.

4. Because the fluctuations in pipe-to-soil potentials are unpredictable in stray current areas, the only appropriate criterion listed in Appendix D of Part 192 that would be useable for those areas would be a negative voltage of at least 0.85 volts with reference to a saturated copper-copper sulfate half cell rather than using those criteria related to a change of voltage potential. However, these measurements can only be made during time periods when stray currents are minimal.

Review Determination

(a) Paved Locations

Harco's testing of cathodic protection on pipelines under paving verified the ASME contention that pipe-to-soil voltage readings were often not obtainable using surface contact, and when readings were obtained, they were often of little or no value in determiing the level of cathodic protection being provided. The only reliable readings that could be taken were obtained at cracks in the pavement or by boring holes through the pavement to permit contact with the soil.

Contrary to the ASME petition, Harco found that readings which were obtained using surface contact for pipelines under concrete paving were inconsistent and could not have a correction factor applied to obtain meaningful data.

As a result of the above, it is clear that tests required under § 192.465(a) on pipelines that are located where readings are only taken on the paving surface covering the pipeline cannot be relied upon to show compliance with § 192.463.

(b) Stray Current Areas

Testing of cathodic protection on pipelines in stray current areas done by Harco verified the ASME Committee contention that reliable pipe-to-soil voltage readings were often difficult to obtain. However, on the two pipelines tested, it was found that meaningful test data could be obtained if taken during nonrush hour periods when the d.c. transit systems were operating at a minimum level.

To determine the extent of the d.c. transit systems that were likely to effect stray currents, MTB contacted the Urban Mass Transportation Administration who advised that there were only 10 such systems in the major cities of the United States. MTB then determined by telephone calls to the 10 transit systems that six such systems have periods when no trains are operating. The four other systems (Chicago, Newark, New York, and Philadelphia) have late night schedules with sufficient time between trains that in most locations the stray currents due to electric transit systems would be periodically reduced to a level that would permit meaningful electrical tests to be conducted on pipeline cathodic protection systems.

It must be recognized that all stray current areas do not result from subways and electric trains as was the case with the two pipelines tested. There are many different sources of stray currents, including the cathodic protection systems of other pipelines and underground cables, that do not necessarily drop to such low levels as experienced in the Pittsburgh and Berkely tests. Particularly in the crowded subsurface of streets in major cities, there are areas that experience fluctuating stray currents from multiple sources of varying characteristics. The ASME petition states that in these areas it is impossible to obtain meaningful data from the test required by § 192.465(a). This may be true of some pipelines where no action has been taken to comply with § 192.473(a), External corrosion control: Interference currents. However, where stray currents have been appropriately controlled by such steps as isolation or in some cases bonding, effective and meaningful electrical tests usually can be obtained to determine the level of corrosion control.

As a result of the above, MTB believes that § 192.465(a) can be met on most pipelines in areas of stray current where steps have been taken to control the detrimental effects of stray currents as required by § 192.473(a). In order to monitor the effectiveness of steps taken to minimize the adverse effects of stray currents under the program required by § 192.473(a), MTB would propose the use of other measures, such as Beta curves and Beta profiles under § 192.465(a) for this purpose.

In the regulatory review process OPSR concluded that one possible alternative to the present requirements of § 192.465(a) was to permit the use of more frequent leak surveys or corrosion and leak history records to be used to determine the effectiveness of corrosion control systems in lieu of electrical tests. This would only be permitted where an operator demonstrates that electrical tests are not technically or economically practicable for (a) pipelines under paving, or (b) after the steps required to minimize the effects of stray current under § 192.473(a) have been taken, tests are still impracticable.

As pointed out in the Harco study, there are paving inserts available that are now used by some operators at a few selected locations to permit tests to be conducted to evaluate cathodic protection systems. To install such inserts in streets and sidewalks in quantity may be costly from both the original costs and maintenance standpoints. OPSR believes that this would be one of the more appropriate methods of complying with the requirements of §§ 192.465(a) and 192.469 in many areas.

Cathodic protection is widely accepted by the operators of underground metallic systems (including oil, gas, and water pipelines and electric and telephone cables) as the best method available to prevent corrosion and resulting leaks or other damage. The electrical tests required for gas pipelines under § 192.465(a) are similarly accepted for determining that cathodic protection systems are operating satisfactorily on other underground metallic structures. This is a preventive measure designed to keep leaks from occurring. There are many locations where electrical tests cannot be conducted effectively by methods normally used. Due to the extraordinary effort required to obtain proper electrical data from tests on pipelines located under paving and in

some stray current areas, as contended by the ASME and confirmed generally by the Harco study, it is obvious that some alternative method of checking such areas may be needed because of the high cost of compliance.

OPSR Comment

The requirements for testing a cathodic protection system and for conducting an electrical survey to detect areas of active corrosion are generally valid; however, MTB recognizes that their accomplishment may not always be practicable. Impracticability of electrical tests or surveys must be demonstrated with written documentation of test studies, or documented past experience of the operator with electrical surveys for pipelines in the system that have a similar environment.

It seems inappropriate to amend the requirement for monitoring cathodic protection by suggesting ways that do not monitor the effectiveness of cathodic protection except after failure. However, a leak survey and corrosion and leak records often appear to be the only economically practical alternative available. Although a leak survey does not detect the failure of the cathodic protection system, it does detect the leakage which results from corrosion of the unprotected pipeline.

To assist in the selection of an appropriate alternative course of action where testing of cathodic protection and conducting electrical surveys to detect areas of active corrosion have been demonstrated to be invalid, MTB invites interested persons to participate in this rulemaking by responding to the questions which follow and submitting any substantiating information. These questions are intended to apply to both gas transmission and distribution pipelines. If comments are made for only transmission or distribution pipelines, comments should identify which, or if combined so state. Where there are significant differences, data should be submitted separately for transmission or distribution pipelines. In figuring the costs requested, consider all wages, instruments, tools, other equipment and vehicles, and overhead. Do not consider maintenance to the cathodic protection system, except on questions where this is requested. In basing costs on miles of main, also include any related costs resulting from connected service lines. Do not consider the length of services in the miles figure.

1. Describe what you consider must be done to prepare for and conduct an electrical survey to determine areas of active corrosion for the first time on an existing, unprotected gas pipeline. (§§ 192.457(b)(3) and 192.465(e))

2. What is the average annual cost of conducting electrical surveys to determine areas of active corrosion under § 194.465(e):

a. On a gas pipeline with minor or no paving or stray currents:

(i) The first time, when electrical isolation is done, test leads installed, etc.? ($/mile of pipeline)

(ii) Subsequent surveys? ($/mile of pipeline)

b. In paved areas where drilling of pavement is used:

(i) The first time, when electrical isolation is done, test leads installed, etc.? ($/mile of pipeline)

(ii) Subsequent surveys? ($/mile of pipeline)

c. In stray current areas requiring special measures, such as nighttime or weekend field testing and/or use of recording voltmeters? ($/mile of pipeline)

3. Should § 192.465(a) include a reference to the use of Beta curves and Beta profiles as a means of determining the effectiveness of measures taken to mitigate the adverse effects of stray currents during peak periods?

4. Describe how you interpret data from electrical surveys or by other means to determine areas of active corrosion. (§§ 192.457(b) and 192.465(e))

5. When you dig up pipe in areas where active corrosion is indicated by electrical survey and other data, what percent of the instances do you actually find active corrosion? (§§ 192.457(b) and 192.465(e))

6. Under § 192.465(e), in areas where an electrical survey is impractical, what are the methods used to determine areas of active corrosion from study of corrosion and leak history records, leak detection survey, or other means?

a. If there are significant ways such means are applied or interpreted, please explain for each method.

b. Provide pertinent cost data for each. ($/mile of pipeline)

c. What are frequencies for each study, survey, or other method?

7. Describe how you conduct tests under § 192.465(a) to determine whether cathodic protection meets the requirements of § 192.463.

8. What is the annual cost of conducting electrical tests under § 192.465(a) to determine whether the cathodic protection meets the requirements of § 192.463:

a. On a gas pipeline with minor or no paving or stray currents? ($/mile of pipeline)

b. In paved areas where, in the absence of inserts, drilling of pavement is used? ($/mile of pipeline)

c. In stray current areas requiring special measures, such as night time or weekend field testing and/or use of recording voltmeters? ($/mile of pipeline)

d. An anode installations made at corrosion repairs under § 192.483(c) (average $/location); and under the sampling category of § 192.465(a)? ($/mile of pipeline)

9. Under what conditions should monitoring be considered as causing extreme hardship and expense for tests required by § 192.465(a)? Specifically, for installations made under § 192.483(c)?

10. What would be the cost burden of having to keep a written record demonstrating that electrical surveys are impractical on a given pipeline? ($/mile of pipeline) (§§ 192.457(b)(3) and 192.465(e))

11. If recording voltmeters are used, what is their capital cost? ($/unit)

12. What is the cost of installing access to the soil beneath paved areas (pavement inserts, etc.) as needed in areas of continuous paving:

a. For one insert? ($/insert)

b. For the conducting of electrical tests under § 192.465(a)? ($/mile of pipeline)

c. For the conducting of electrical surveys under § 192.465(e)? ($/mile of pipeline)

d. If pavement inserts are not installed, how is access to the soil obtained? ($/location)

13. Where access to the soil beneath paved areas (pavement inserts, etc.) and test stations required by § 192.469 have been installed, what would be the cost of conducting:

a. Electrical tests under § 192.465(a)? ($/mile of pipeline)

b. Electrical surveys under §§ 192.457(b) or 192.465(3)? ($/mile of pipeline)

14. Are there any feasible alternative methods to the use of electrical tests for determining the level of cathodic protection on a pipeline that is located beneath paving other than using leak surveys, corrosion and leak history studies? What are their associated costs? ($/mile of pipeline) (§ 192.465(a))

15. Describe locations, other than paved areas or some stray current areas, where electrical surveys might be considered impractical. (§§ 192.457(b) and 192.465(e))

16. Considering the design life of anodes installed on unisolated segments of pipeline, is 1 year a reasonable time interval between electrical tests at such

anodes from a maintenance and safety cost/benefit basis? If not, what interval should apply? Explain. Please differentiate between urban and rural locations.

17. Should there be a requirement other than § 192.469 for installation of a permanent test station on cathodically protected pipelines at locations where a minimal response to cathodic protection is detected or otherwise believed to exist on cathodically protected pipelines in paved areas and stray current areas? Explain.

18. What is the life expectancy of a test station, and what is the estimated capital costs for test stations? ($/mile of pipeline)

19. What is the average cost of repairing ineffectively operating cathodic protection systems? ($/mile of pipeline)

20. What is the average cost of leak surveys in paved areas? ($/mile of pipeline)

21. How frequently should leak surveys be run to serve as an alternative to annual electrical tests under § 192.465(a)?

22. What is the average cost of repairing leaks in paved areas? ($/repair)

23. If a cathodic protection system is not operating effectively (i.e., active corrosion is present), on average, how long do you think it will be before a corrosion leak occurs? (——— years?)

24. Are there areas where the potential for developing faults in cathodic protection systems are less than normal that would justify a longer interval between tests of the cathodic protection systems than the current requirements? If yes, describe any such areas and state intervals considered appropriate.

25. What percent of the cathodic protection systems tested under § 192.465(a) are found to be operating effectively?

26. At the Technical Pipeline Safety Standards Committee meeting in Washington, D.C., on November 17, 1982, one pipeline operator suggested that an operator be permitted to increase the time interval between tests of a cathodic protection system under § 192.465(a) to 2 years if that system has been tested and found to be operating satisfactorily for two consecutive years. Systems found to have failed would have to be repaired and then if subsequently found to be operating effectively for two consecutive years could be placed on a 2-year test interval. What would be the effect of such a program on your system? How would this change your costs per mile of monitoring cathodically protected pipelines? ($/mile of pipeline)

49 CFR Part 571

[Docket No. 83-01; Notice 1]

Evaluation Report on Federal Motor Vehicle Safety Standard No. 105; Hydraulic Brake Systems

AGENCY: National Highway Traffic Safety Administration (NHTSA); DOT.

ACTION: Requests for comments.

SUMMARY: This notice announces the publication by NHTSA of a preliminary Evaluation Report concerning Safety Standard No. 105, Hydraulic Brake Systems. This staff report evaluates the safety effectiveness and costs of two major improvements in the design of passenger car brakes: dual master cylinders and front disc brakes. The report was developed in response to Executive Order 12291, which provides for government-wide review of existing major Federal regulations. The Agency seeks public review and comment on this evaluation. Comments received will be used to complete the review required by Executive Order 12291.

DATE: Comments must be received no later than: May 9, 1983.

ADDRESSES: Interested persons may obtain a copy of the report free of charge by contacting Mr. Robert Hornickle, Office of Management Services, National Highway Traffic Safety Administration, Room 4423, 400 Seventh Street, S.W., Washington, D.C., 20590 (202–426–0674). All comments should refer to the docket and notice number of this notice and be submitted to: Docket Section, Room 5109, Nassif Building, 400 Seventh Street, SW., Washington, D.C. 20590. (Docket hours, 8:00 a.m.–4:00 p.m., Monday through Friday.)

FOR FURTHER INFORMATION CONTACT: Mr. Frank G. Ephraim, Director, Office of Program Evaluation, Plans and Programs, National Highway Traffic Safety Administration, Room 5212, 400 Seventh Street, SW., Washington, D.C. 20590, (202–426–1574).

SUPPLEMENTARY INFORMATION: Safety Standard No. 105 (49 CFR 571.105) requires that passenger cars have a dual braking system and contains specifications for stopping performance under a variety of normal and adverse conditions. The purpose of a dual braking system is to provide a back-up braking capability in the event of a hydraulic failure. The two most significant changes in brake design of the 1960's and 70's were the introduction of dual master cylinders and front disc brakes. Dual master cylinders are the principal hardware element of a dual braking system. Disc brakes are not required by Standard 105, but they do make it easier for a car to meet the standard's stopping tests simulating brake fade and water immersion; in addition, they improve a car's handling during brake applications.

Pursuant to Executive Order 12291, NHTSA recently conducted an evaluation of dual master cylinders and front disc brakes to determine the effectiveness of the technology selected by the manufacturers in preventing accidents, deaths and injuries and to determine the costs of the technology to consumers. Under the Executive Order, agencies are to review existing regulations to determine whether the regulations are achieving the Order's policy goals, i.e., achieving legislative goals effectively and efficiently and without imposing any unnecessary burdens on those affected. This preliminary evaluation, however, is limited to dual master cylinders and disc brakes and does not deal with other aspects of Standard 105.

The principal findings and conclusions of the report are the following:

- Dual master cylinders are effective in reducing the number of accidents due to defective brakes. They eliminate 40,000 accidents per year, resulting in an estimated reduction of 280 fatalities, 24,000 injuries and $132 million in property damage (in 1982 dollars).
- Dual master cylinders add $17 to the cost of purchasing and operating a car over its lifetime (in 1982 dollars).
- Front disc brakes are effective in reducing the number of accidents due to defective brakes. They eliminate 9,800 accidents per year, resulting in an estimated reduction of 84 fatalities, 5,700

injuries and $32 million in property damage.

• Front disc brakes add $21 to the lifetime cost of a car.

The report was developed from statistical analyses of North Carolina, Texas and Fatal Accident Reporting System data, a review of Indiana in-depth accident analyses, and manufacturing and repair costs analyses for production brake assemblies.

NHTSA welcomes public review of the evaluation report and invites the public to submit comments.

It is requested but not required that 10 copies of comments be submitted.

Those persons desiring to be notified upon receipt of their comments in the rules docket should enclose, in the envelope with their comments, a self-addressed stamped postcard. Upon receiving the comments, the docket supervisor will return the postcard by mail.

BILLING CODE 4910-59-M

---

49 CFR Part 571

[Docket No. 81-04; Notice 3]

Federal Motor Vehicle Safety Standards; Glazing Materials

AGENCY: National Highway Traffic Safety Administration (NHTSA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: The purpose of this notice is to propose an amendment to Safety Standard No. 205, Glazing Materials, to permit the installation of glass-plastic glazing as windshields and windows in motor vehicles and to adopt appropriate performance requirements for such glazing. The existing requirements of the standard do not permit the use of glass-plastic glazing in certain locations on the automobile, principally by operation of the abrasion resistance requirement.

The agency has conducted an extensive evaluation to determine the performance characteristics of glass-plastic glazing in the critical areas of injury reduction, visibility distortion and impact attenuation for occupants in a crash. Research data indicate that such glazing may substantially reduce lacerative injuries when vehicle occupants strike glazing in an accident.

The proposed amendment would establish performance requirements specifically designed to ensure the safety and performance of glass-plastic glazing. This notice implements the agency's granting of a petition for rulemaking by Saint Gobain Vitrage and follows the issuance of an advance notice for proposed rulemaking.

DATES: Comments must be received on or before April 25, 1983. Proposed effective date: Upon publication of a final rule.

ADDRESS: All comments should refer to the docket number and notice number of this notice and be submitted to: Docket Section, Room 5109, National Highway Traffic Safety Administration, 400 Seventh Street, SW., Washington, D.C. 20590. Docket hours are from 8 a.m. to 4 p.m., Monday through Friday.

FOR FURTHER INFORMATION CONTACT: Edward Jettner, Office of Vehicle Safety Standards, National Highway Traffic Safety Administration, 400 Seventh Street, SW., Washington, D.C. 20590 (202-426-2264).

SUPPLEMENTARY INFORMATION: Safety Standard No. 205, Glazing Materials (49 CFR 571.205), specifies performance requirements for the types of glazing that may be used in motor vehicles, as well as the vehicle locations in which the various types of glazing may be used. The standard incorporates by reference the American National Standard "Safety Code for Glazing Materials for Glazing Motor Vehicles Operating on Land Highways," § 26.1—1966 (ANS § 26). The requirements in ANS § 26 are specified in terms of performance tests that the various types or "Items" of glazing must pass. There are 13 "Items" of glazing for which requirements are currently specified in the standard. The only current items of glazing that may be used in the windshield of a motor vehicle are Item 1, Safety Glazing Material for Use Anywhere in Motor Vehicle, and Item 10, Bullet Resistant Glass for Use Anywhere in Motor Vehicle.

The windshield in virtually every car in the U.S. today is a "safety" or "High Penetration Resistant" (HPR) windshield whose interior and exterior surfaces are made of Item 1 laminated glass. (ANS § 26 describes laminated glass as two or more sheets of glass held together by an intervening layer or layers of plastic material.) This type of windshield was first provided as standard equipment on motor vehicles over twenty years ago. The layer of plastic in the HPR windshield acts as a barrier to prevent the occupant's head from completely penetrating the windshield when the occupant strikes the glazing during a crash. However, on impact, both the inner and outer glass layers tend to break, leaving edges of broken glass on the inner surface.

To alleviate the problem of lacerative injuries resulting with current HPR windows, Saint Gobain Vitrage (SGV) of France developed an innovative new glazing called Securiflex. The Securiflex windshield is composed of laminated glass to which a layer of polyurethane (plastic) is bonded on the inner side (i.e., the side of the windshield facing inside the occupant compartment). The Securiflex windshield reduces the risk of lacerations to car occupants who strike the window in an accident because the plastic inner layer prevents the occupant from coming into contact with the sharp glass edges that are formed when the glazing is struck and broken.

In early 1980 SGV requested an interpretation from the agency stating that the abrasion requirements of Standard No. 205 are applicable only to the exterior, glass side of glass-plastic materials such as Securiflex. On April 22, 1980, the agency issued an interpretation which stated that both sides of windshield glazing material must pass the performance tests specified in the standard for a particular glazing item (contrary to the interpretation urged by SGV). When ANS § 26 was first drafted, almost all types of glazing material were symmetrical, i.e., both sides of the glazing were made of the same substance. Thus, Standard No. 205 did not contemplate asymmetrical glazing material such as Securiflex, and the agency had determined that the existing requirements of the standard are not appropriate for glass-plastic glazing.

Subsequently, SGV filed a petition for rulemaking requesting that Standard No. 205 be amended to permit the use of glass-plastic glazing (June 12, 1980). The agency finally granted the petition on December 8, 1980. An amendment of the standard was necessary because the interior plastic side of glass-plastic windshields cannot pass Test No. 18, Abrasion Resistance, and therefore Securiflex cannot qualify as Item 1 glazing under the standard.

After granting the SGV petition, the agency still did not issue a proposal to amend the standard to permit the use of glass-plastic glazing. Rather, on January 26, 1981, the agency issued an advance notice of proposed rulemaking concerning possible amendment of Standard No. 205 to adopt specific requirements for glass-plastic glazing (46 FR 8076). At that time, the agency was beginning a study of the new glazing material and requested information from the public concerning various issues associated with that material.

Primary among these issues was whether the inner plastic side of glass-plastic glazing materials such as Securiflex can adequately resist abrasion. Plastic does not resist the surface damage caused by rubbing and scuffing as well as glass. Abrasion is a potential concern since it produces haze which scatters the light passing through the glazing in a way that can make it more difficult for the driver to see through the windows. Obviously, the sources of abrasion are less numerous and severe on the inside of a vehicle window than on the outside. Nevertheless, abrasion on the inner side is still an important issue.

Another possible problem of concern to the agency was delamination. The Securiflex windshield consists of four layers of glass and plastic bonded together. As the number of bonding layers increases, the probability of a bonding failure may increase. Such delamination may result in vision distortion and optical deviation and thus present a safety hazard to drivers.

Other considerations discussed in the advance notice included rearview mirror attachment to the inner side of the windshield, attachment to and removal from the inner side of the windshield of decals such as State inspection stickers, the ability of the plastic coating to withstand body repair shop paint bake ovens, and the ability of the plastic coating to withstand inboard frost accumulation and its removal.

To address these concerns, the advance notice listed various questions and areas in which data and information were requested so that appropriate performance requirements could be established for glass-plastic glazing to ensure the safety and structural integrity of this new development in automotive glazing. Since that time, the agency has also collected additional information and analyzed the effectiveness of glass-plastic glazing in reducing injuries as well as performance requirements that are necessary to address the potential problems that could result with the use of such materials.

The agency has always recognized that glass-plastic glazing would have substantial potential for reducing lacerative injuries in motor vehicle accidents, and has now tentatively concluded that the standard can and should be amended, consistent with and in furtherance of the interests of the safety of occupants, to permit this type of glazing in the windshield and all windows of motor vehicles.

This notice proposes specific performance requirements designed particularly for glass-plastic glazing, recognizing the varying environmental demands placed on the outer and the inner or occupant compartment side of glazing materials.

The agency believes that the proposed performance requirements will ensure adequate abrasion resistance for glass-plastic glazing. As for the potential other problems discussed in the advance notice, the agency tentatively concludes that they are not so serious that they should forestall the introduction of a technology which has such great injury reducing potential.

Every year, hundreds of thousands of American motorists suffer pain, disfigurement and psychological trauma from lacerative injuries caused by broken motor vehicle windows. SGV studied this safety problem by interviewing 600 hospital physicians in the United States, and estimated that more than 350,000 patients were treated for facial injuries cause by broken windshield glass in automotive accidents during a 12-month period. Sixty percent of the lacerations required suturing and more than 15 percent required further treatment by plastic surgeons or other specialists (such as ophthalmologists) to prevent permanent disfigurement or physical handicaps. SGV estimated that the cost of medical treatment for laceration injuries caused by broken windshields could exceed $16 million annually.

NHTSA's own data indicate that more than 200,000 laceration injuries occur each year due to broken windshield glass, and that another 100,000 such injuries result from broken side window glass. (See NHTSA's July 1980 report, "Glass Related Injuries on NCSS," including the December 18, 1981, update of this report, as well as Table 10, Motor Vehicle Lacerative Injury Rate, Regulatory Evaluation, in NHTSA Docket 84-01; Notice 01 and Notice 03, respectively.)

All evidence thus indicates that glass-plastic glazing has the potential to eliminate many of these lacerative injuries. (See, for example, "Safety Performance of Securiflex Windshield," Patrick and Chou, NHTSA Docket 84-01; Notice 01.)

The amendment proposed in this notice would establish a new glazing "Item", glass-plastic glazing, which could be used anywhere in a motor vehicle, including the windshield. Specific new performance requirements would be established for this new glazing category. For example, the present standard assumes that all windshields have inner and outer layers composed of glass and, therefore, includes no specifications for testing chemical resistance, flammability and weathering. It appropriately assumes that windshields made of glass on both sides are highly resistant to all of these factors and thus specifies no tests for these capabilities. These characteristics are, however, important and less certainly are properties of less durable materials like plastics. The agency has therefore tentatively determined that minimum performance levels should be established for materials, for these characteristics, to ensure the integrity of glass-plastic glazing.

The proposed amendment specifies that glass-plastic glazing materials to be used in areas requisite for driving visibility must meet, in addition to the normal tests to which the conventional windshield is subjected, Abrasion Test No. 17 (for the plastic side of the glazing), but would allow a haze of only four percent after 100 cycles of the Taber abraser; Flammability Test No. 24; Chemical Resistance Test No. 19; Weathering Test No. 16, and Resistance to Temperature Change Test No. 20. All of these tests are already included in the standard (ANS §26). It is important to note that the four percent haze criterion specified in this proposal for the plastic side of glass-plastic glazing is far more stringent than the 15 percent haze limitation currently specified for other plastic materials which cannot be used in areas necessary for driver visibility.

The proposed abrasion requirement for the plastic side of glass-plastic glazing would result in an abrasion test procedure identical to that for glass-plastic windshields specified by the Economic Commission for Europe in ECE Regulation R43, which is currently recognized by ten European countries. Thus, the proposal would foster the international harmonization of standards in this regard. The agency believes that the typical windshield would actually experience less than 4 percent haze over its lifetime. The agency does, however, seek additional comment concerning the 4 percent haze proposal, including any information concerning whether this level of stringency is adequate to ensure visibility through glass-plastic glazing over time.

All information available to the agency indicates that the proposed test requirements for glass-plastic glazing can be met by materials such as Securiflex, and that the requirements are sufficiently stringent to ensure that inferior glass-plastic glazing is not produced. (See Exhibit 1 in Docket 81-04; Notice 01.) In addition to abrasion resistance, the other proposed test requirements for glass-plastic glazing are very similar to the requirements specified in ECE Regulation 43. The

agency has prepared a Table which illustrates the similarities and differences among the requirements proposed in this notice, ECE Regulation 43, the tests proposed by Saint Gobain in their petition, the new requirements being sponsored by the ANS § 26 committee, and the basic requirements for windshield grade material (Type 1) currently specified in the standard. (See Table 1 in Docket 81–04; Notice 03.)

The proposal also includes a requirement that manufacturers place a label on glass-plastic glazing which specifies proper cleaning instructions and other warnings. The agency has tentatively determined that such a label would help ensure that owners do not subject the plastic glazing to unduly abrasive objects for purposes of cleaning or removing decals from their windshields.

Relevant Technical Information

Following is a brief discussion of the information that has been gathered and which has led the agency to propose the requirements included in this notice. The discussion is organized in terms of some of the major points and questions included in the January 1981 advance notice.

1. The advance notice asked about the relationship between light transmittance and haze (caused by either abrasion or chemical action) for glass-plastic materials, particularly as this relationship is affected by the age of the material. It is very difficult to quantify the amount of haze that is tolerable before a driver's vision is impaired to the point that it is unsafe. However, when evaluated under the existing test procedures of Standard No. 205, Securiflex has performed very well, and other available information indicates that there would be no problem. For example, a Securiflex side window was tested by SGV during two series of development tests to determine the haze producing effects of dry, dusty friction such as could be produced by felt and rubber strips during roll-up/roll-down of typical side windows. During the first series of tests, run at 300 cycles per day, the Securiflex sample gained less than 0.1 percent haze after 27,000 cycles. During the second series, run at 1000 cycles per day, the sample gained 0.1 percent haze after 20,000 cycles. These data indicate that Securiflex is able to withstand the type of abrasion caused by the sliding motion of windows being rolled up or down.

The in-use experience of the European cars equipped with Securiflex windshields corroborates these laboratory results. The accuracy of the transmittance and haze data of high mileage and other European Securiflex car windshields provided by SGV has been verified in independent tests conducted for the agency by the National Bureau of Standards. The agency has tentatively determined that haze on both clear and tinted Securiflex windshields builds up slowly with use. The agency estimates that haze build-up for Securiflex windshields would be less than 4 percent in the typical 10 year life of a car, and could be less than 2 percent if trends of present data continue.

With regard to haze and light transmittance of Securiflex, the agency is also monitoring an experimental test program of Securiflex-equipped vehicles being conducted by the Maryland State Police in conjunction with SGV and the Insurance Institute for Highway Safety. An interim progress report concerning this test program was issued on April 7, 1982. Test measurements relating to the degree of surface deterioration were made on a number of the vehicles. These data, although preliminary, indicate that the surface quality of the Securiflex polyurethane (plastic) sheet is stable, even under the hard use condition in an American environment. (See Docket 81–04; Notice 01, Entry 001, 008, 024, 019, 025, 027.)

2. The advance notice also discussed the possible problem of delamination of the glass and plastic components of Securiflex type windows, under natural causes such as heat, light and moisture. SGV reports that its field experience with a relatively few cars for more than five years and thousands of cars for more than three years has revealed no sign of any delamination problem. Standard No. 205 currently includes four tests to measure properties associated with delamination due to natural causes (Test 1, Light Stability; Test 3, Humidity; Test 4, Boil; Test 20, Temperature Change), for laminated glass windshield material. This notice would apply these tests to glass-plastic glazing as well as one additional test not required for glass windshields (Test 16, Weathering). The agency has tentatively concluded that these tests would ensure that glass-plastic glazing materials experience no problem with delamination. (See SGV Supplement of April 22, 1981, Docket 81–04; Notice 01, Entry 035).

3. The agency asked whether the attachment of rearview mirrors to the inside plastic layer of glass-plastic windshields would present problems. A review of technical material presented in SAE Paper 770240, "Performance of a Non-Lacerative Windshield in Case of Accident and under Environmental Conditions" (NHTSA Docket 81–04; Notice 01) indicates that this is not an insurmountable technical problem. SGV has also presented a feasible solution for this problem. In recent developments in Europe, an aerobic acrylic adhesive material has been used to attach the mirror to Securiflex, polymerized by ultraviolet radiation or by chemical action. SGV reports that a mirror retainer button made of Zamac bonded with Loctite No. 356 and No. 312 adhesive materials apparently withstands the necessary performance for cleavage resistance and fatigue strength. Therefore, the agency has tentatively concluded that attachment of rearview mirrors on glass-plastic windshields would not present a problem. (See Docket 81–04; Notice 01.)

4. The advance notice also asked whether attachment and removal of decals such as State inspection stickers on glass-plastic glazing would present a problem because of the possibility of abrading or tearing the inner plastic layer. Stickers are typically removed by the use of a razor blade or other metal scraper. Although a steel cutting edge will damage the plastic of Securiflex, tests indicate that plastic scrapers would not be harmful. Under the proposed requirements of this notice, this information would be provided to all vehicle owners by a warning label on the glass-plastic windshield and information in the Owner's Manual. Additionally, SGV has worked with the American Decal and Manufacturing Co. which has produced a sticker which can be removed by a simple manual peeling action (i.e., without use of a sharp tool), and which will meet all needs of existing State required stickers, e.g., they are automatically "voided" if removed. Other options include the use of mechanical positioning devices (pedestal mounted, for example) to hold the sticker in the vicinity of the windshield. The agency has tentatively determined that this potential problem can probably be solved and should not preclude the use of a material which has such great potential for reducing lacerative injuries in vehicle accidents. (See SGV Supplement of April 22, 1981.) However, the agency remains concerned about the possibility of damaging the relatively soft plastic inner liner on these types of windshields, and solicits specific comments and suggestions on this issue, including comments concerning the adequacy and practicability of the possible solutions just discussed.

5. The advance notice asked whether Securiflex type windshields could withstand the intense heat generated in paint bake ovens (used for baking paint on a car originally or when the paint has

to be retouched or redone). Existing information indicates that the Securiflex plasic layer can withstand such exposure as well as, or better than, many other elements of a vehicle. The results of the "tunnel bake" test reported in SAE paper 770246 (Docket 81–04; Notice 01) for Securiflex windshields shows that the glass-plastic glazing successfully passed stringent tests with no bubbles appearing under the plastic layer or any other adverse effect. Therefore, the agency tentatively concludes that bake ovens will not present problems for glass-plastic windows.

6. The advance notice discussed the possible problem of inboard frost accumulation and its removal on the inner plastic layer of glass-plastic windows. Tests are currently being conducted concerning this question by Transport Canada (the Canadian regulatory agency equivalent to NHTSA), to determine if the mechanical removal of ice and frost with scrapers will scratch and damage Securiflex. The Results of these tests are scheduled for completion in the near future and will be reported to NHTSA. SGV has conducted its own test concerning this question along lines similar to the Transport Canada procedures and reports that Securiflex shows no problems. (See Docket 81–04; Notice 01.) The agency seeks any additional information which might now be available on this subject.

7. The advance notice asked, "Do the anti-lacerative properties of glass-plastic windshields, such as the Securiflex windshield, outweigh the problems of visibility distortion that may result with this type of windshield?"

This question was asked as part of the ANPRM's general inquiry. No information was presented which would indicate that visibility distortion would be a problem. As proposed in this notice, glass-plastic glazing would have to pass the light stability, luminous transmittance and deviation distortion tests currently specified in the standard for windshield-grade glazing materials. If glass-plastic materials pass these tests, the agency believes they would perform as well as existing HPR windshields with regard to visibility distortion.

8. The advance notice asked about the cost-differential between glass-plastic glazing such as Securiflex and typical HPR windshields. Although no exact cost estimates were received in response to the advance notice, the agency estimates that glass-plastic windshields will cost approximately $38 to $45 more than their standard HPR counterpart. However, use of this material would result in greatly reduced laceration injuries, with attendant savings. It should be emphasized that, as proposed in this notice, glass-plastic glazing would be permitted but not required. Therefore, the cost differential and replacement costs would depend greatly on the volume of installation chosen by manufacturers, which cannot be determined at the current time.

9. The agency notes that data reported by Patrick and Chou (see NHTSA Docket) suggest that HIC (Head Injury Criteria) values in impact tests with some types of glass-plastic glazing may be higher then for similar HPR (high penetration resistant) windshields. A review of the reported HIC values shows that the data were scattered, but that, graphically, the "best fit" curve of HIC values for glass-plastic glazing is approximately 100 units higher than the comparable curve representing the standard HPR glazing (see Regulatory Evaluation). The safety implications of these limited data are of concern to the agency. Comments and information are specifically requested on this issue.

10. The ANPRM also listed several areas of research and study which would be conducted concerning the various issues surrounding glass-plastic glazing materials. These included:

- Identifying specific methods and engineering tests to assess the suitability of glass-plastic glazing and other asymmetrical glazing for safe automotive use.
- Assessing the consistency of measurements of light transmittance through glass and plastic.
- Assessing the adequacy and consistency of current mechanical abrasion methods to measure the abrasion resistance properties of glass and plastic.
- Determining the adequacy of current methods used to measure haze and distortion in glass and plastic glazing materials.

The agency has undertaken an active effort to acquire specific information concerning the above technical areas. This work, initiated under contract DTNH22–82–C–07045, is designed to conduct optical engineering research on new and used automotive glazing for the purpose of considering longer-range modifications of Standard No. 205 if research indicates that this is advantageous. The IIT Research Institute has been awarded this contract and began work in March 1982. The final report of this contract is due in March 1983, and will be placed in the NHTSA Docket. The work being performed is expected to confirm the appropriateness of the test requirements proposed in this notice for glass-plastic glazing. The testing under this project is almost completed and there have been no advance reports of findings inconsistent with the information used by the agency to develop the specifications in this proposal.

The agency has examined the impacts of this proposed amendment and determined that the notice is not major within the meaning of Executive Order 12291 or significant according to the Department of Transportation's regulatory policies and procedures. The agency has prepared a preliminary regulatory evaluation concerning the proposed amendment, which has been placed in the public docket. (A free copy may be obtained by contacting the Docket Section.) The agency estimates that the consumer cost of glass-plastic glazing would be greater than existing laminated or tempered glass, although it is not possible to determine the exact increase in cost at the current time because this material is not being marketed. (As noted earlier, the agency estimates costs at $38 to $45 greater.) It should be noted that the proposed amendment would allow glass-plastic glazing, but not require it. Therefore, any increase in cost would be determined by the number of manufacturers which chose this alternative material for certain windows in their vehicles. The agency has determined, however, that cost increases to consumers would not be significant within the meaning of the Executive Order. Moreover, any increase in cost for this material would be offset to a certain extent by the savings which would accrue because of reduced lacerative injuries resulting from the installation of glass-plastic glazing.

NHTSA has also considered the impacts of this proposal under the Regulatory Flexibility Act. I hereby certify that permitting the use of glass-plastic glazing under Safety Standard No. 205 would not have a significant economic impact on a substantial number of small entities. Few, if any, motor vehicle manufacturers would qualify as small entities. Small organizations or governmental units that purchase vehicles equipped with glass-plastic glazing might have to pay a slightly higher price, but this cost increase would be somewhat offset by the accruing savings discussed above. The proposed amendment could have some impact on small glazing manufacturers and glazing dealers that would be considered small entities for purposes of the Act. If glass-plastic glazing were to become popular, these small entities might be forced, through competition, to stock the new item of

glazing, to provide safe and secure types of storage, to develop new material handling procedures and to ensure the soft plastic side of such glazing is not damaged during shipment and installation. These possible impacts are all speculative at the current time since the agency has no information to determine how many manufacturers would choose the option of producing glass-plastic glazing, and no information on the magnitude of the above possible impacts or on the likelihood of their occurrence. Based on the agency's judgments regarding information that is currently available, I certify that the proposed option would not have a significant economic impact on a substantial number of these small entities. Specific comments on this issue are requested.

Finally, NHTSA has analyzed this proposal for purposes of the National Environmental Policy Act. The agency has determined that implementation of this action would not have any significant impact on the quality of the human environment.

Interested persons are invited to submit comments on the proposal. It is requested but not required that 10 copies be submitted.

As provided in 49 CFR 553.21, all comments must be limited not to exceed 15 pages in length. Necessary attachments may be appended to these submissions without regard to the 15 page limit. This limitation is intended to encourage commenters to detail their primary arguments in a concise fashion.

If a commenter wishes to submit certain information under a claim of confidentiality, three copies of the complete submission, including purportedly confidential information, should be submitted to the Chief Counsel, NHTSA, at the street address given above, and seven copies from which the purportedly confidential information has been deleted should be submitted to the Docket Section. A request for confidentiality should be accompanied by a cover letter setting forth the information specified in the agency's confidential business information regulation (49 CFR Part 512).

All comments received before the close of business on the comment closing date indicated above will be considered, and will be available for examination in the docket at the above address both before and after that date. To the extent possible, comments filed after the closing date will also be considered. However, the rulemaking action may proceed at any time after that date, and comments received after the closing date and too late for the consideration in regard to the action will be treated as suggestions for future rulemaking. The NHTSA will continue to file relevant material as it becomes available in the docket after the closing date, and it is recommended that interested persons continue to examine the docket for new material.

Those persons desiring to be notified upon receipt of their comments in the rules docket should enclose, in the envelope with their comments, a self addressed stamped postcard. Upon receiving the comments, the docket supervisor will return the postcard by mail.

List of Subjects in 49 CFR Part 571

Imports, Motor vehicle safety, Motor vehicles, Rubber and rubber products, Tires.

PART 571—[AMENDED]

In consideration of the foregoing, it is proposed that Safety Standard No. 205, *Glazing Materials* (49 CFR 571.205), be amended as set forth below.

§ 571.205 [Amended]

1. Paragraph § 4 would be amended to add the following definition:

* * * * *

"Glass-plastic glazing material" means a laminate of one or more sheets of glass that has a layer of plastic that is bonded to the surface of the glazing that faces inward when the glazing is installed in a vehicle.

* * * * *

2. Existing paragraph § 5.1.2.3 would be designated § 5.1.2.4 and revised to read as follows:

* * * * *

Section 5.1.2.4 *Cleaning instructions.* Each manufacturer of glazing materials designed to meet the requirements of § 5.1.2.1, § 5.1.2.2 or § 5.1.1.3 shall affix a label, removable by hand without tools, to each item of such glazing materials. The label shall identify the product involved, specify instructions and agents for cleaning the material that will minimize the loss of transparency and instructions for removing frost and ice and, at the option of the manufacturer, refer owners to the vehicle's Owner's Manual for more specific cleaning and other instructions.

* * * * *

3. A new paragraph § 5.1.2.3 would be added to read as follows:

* * * * *

Section 5.1.2.3 Item 14—*Glass Plastics.* Glass-plastic glazing materials that comply with the labeling requirements of § 5.1.2.4 and Tests Nos. 1, 2, 3, 4, 9, 12, 15, 16, 17, 18, 19, 24, 26, and 28, as those tests are modified in (a), (b), and (c) of this paragraph, may be used anywhere in a motor vehicle.

(a) Tests Nos. 9, 16, and 18 shall be conducted on the glass side of the specimen, i.e., the surface which would face the exterior of the vehicle. Tests Nos. 17, 19, 24, and 26 shall be conducted on the plastic side of the specimen, i.e., the surface which would face the interior of the vehicle. Test No. 15 should be conducted with the glass side of the glazing facing the illuminated box and the screen, respectively.

(b) Glass-plastic specimens shall be exposed to an ambient air temperature of −40°C (±5°) (−40°F ±9°) for a period of 6 hours prior to conducting Test No. 28, rather than at the initial temperature specified in that test. After testing, the glass-plastic specimens shall show no evidence of cracking, clouding, delaminating, or other evidence of deterioration.

(c) Glass-plastic specimens tested in accordance with Test No. 17 shall be carefully rinsed with distilled water following the abrasion procedure and wiped dry with lens paper. After this procedure, the arithmetic mean of the percentages of light scattered by the three abraded specimens shall not exceed 4.0 percent.

(Secs. 103, 119, Pub. L. 89-563, 80 Stat. 718 (15 U.S.C. 1392, 1407); delegations of authority at 49 CFR 1.50 and 49 CFR 501.8.)

Issued on March 7, 1983.

Courtney M. Price,

Associate Administrator for Rulemaking.

BILLING CODE 4910-59-M

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 20

Development of an Agreement on Interpretation and Implementation of a Protocol on Subsistence Hunting of Migratory Birds

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of intent.

SUMMARY: This notice is to inform the public that the Fish and Wildlife Service in coordination with the Department of State intends to work with the Canadian Wildlife Service to develop an agreement regarding the interpretation and implementation of a protocol to amend the subsistence hunting provisions of the *Convention for the Protection of Migratory Birds* concluded by the United States and Great Britain

(acting on behalf of Canada) in 1916. The amendment would make the subsistence hunting provisions of this treaty consistent with those of the *Convention between the United States of America and the Union of Soviet Socialist Republics Concerning the Conservation of Migratory Birds and their Environment*, signed in 1976. It would provide a basis for managing subsistence hunting of migratory birds in Alaska and Canada.

DATE: Comments on this notice must be received by April 30, 1983.

ADDRESS: Address correspondence to Director, U.S. Fish and Wildlife Service (MBMO), U.S. Department of the Interior, Washington, D.C. 20240.

FOR FURTHER INFORMATION CONTACT: John P. Rogers, U.S. Fish and Wildlife Service, Migratory Bird Management Office, Department of the Interior, Washington, D.C. 20240; (202/254–3207).

SUPPLEMENTARY INFORMATION: On January 30, 1979, the Secretary of the Interior of the United States and the Minister of the Environment of Canada signed a protocol to amend the subsistence hunting provisions of the 1916 *Convention for the Protection of Migratory Birds*. This convention is between the United States and Great Britain (acting on behalf of Canada) and is hereafter referred to as the 1916 Treaty. The amendment would make the subsistence hunting provisions of the 1916 Treaty consistent with those of the *Convention between the United States of America and the Union of Soviet Socialist Republics Concerning the Conservation of Migratory Birds and their Environment*, signed in 1976 (hereafter referred to as the US/USSR Treaty).

The US/USSR treaty provides, in essence, that residents of rural Alaska (not just Indians and Eskimos) may take migratory birds for their own nutritional and other essential needs in accordance with seasons set by the competent authority, i.e., the Secretary of the Interior. The seasons may occur during periods when hunting would otherwise be prohibited, i.e., outside the March 10–September 1 period. The treaty requires that the nutritional and other essential needs, for which subsistence hunting may be permitted, must be determined by the competent authority, and any hunting seasons set must provide for the preservation and maintenance of the stocks of migratory birds. There is a clear provision for regulation and control of subsistence hunting, which is presently lacking in the 1916 Treaty. The pertinent wording of the US/USSR Treaty is contained in Article II (1 and 2) and is as follows:

Article II

1. Each Contracting Party shall prohibit the taking of migratory birds, the collection of their nests and eggs and the disturbance of nesting colonies. Also, any sale, purchase or exchange of these birds, whether dead or alive, or their nests or eggs, and any sale, purchase or exchange of their products or parts, shall be prohibited. The importation and exportation of migratory birds and their nests, eggs, parts, and products shall also be prohibited. Exception to these prohibitions may be made on the basis of laws, decrees or regulations of the respective Contracting Parties in the following cases:

(a) For scientific, educational, propagative, or other specific purposes not inconsistent with the principles of this Convention;

(b) For the establishment of hunting seasons in accordance with Paragraph 2 of this Article;

(c) For the taking of migratory birds and the collection of their eggs by the indigenous inhabitants of the Chukchi and Koryaksk national regions, the Commander Islands and the State of Alaska for their own nutritional and other essential needs (as determined by the competent authority of the relevent Contracting Party) during seasons established in accordance with Paragraph 2 of this Article; and

(d) For the purpose of protecting against injury to persons or property.

2. The hunting seasons for migratory birds provided for in Paragraph 1(b) of this Article, and the seasons during which the indigenous inhabitants mentioned in Paragraph 1(c) of this Article may take such birds and collect their eggs for their own nutritional and other essential needs (as determined by the competent authority of the relevant Contracting Party), shall be determined by the competent authority of each Contracting Party respectively. These seasons shall be set so as to provide for the preservation and maintenance of stocks of migratory birds.

The Fish and Wildlife Improvement Act of 1978 authorized the Secretary of the Interior to implement the provisions of the US/USSR Treaty and specifically directed the Secretary to assure that subsistence hunting of migratory birds in Alaska will be guided by the language of that Treaty. In effect, Congress established the language of the US/USSR Treaty as the standard for dealing with subsistence hunting of migratory birds in Alaska.

The subsistence hunting provisions of the 1916 Treaty are inconsistent with this standard. The pertinent wording of the 1916 Treaty is contained in Article II and is described in the following excerpt:

The High Contracting Powers agree that, as an effective means of preserving migratory birds, there shall be established the following close seasons during which no hunting shall be done except for scientific or propagating purposes under permits issued by proper authorities.

The close season on migratory game birds shall be between March 10 and September 1, except * * * that Indians may take at any time scoters for food but not for sale.

The close season on other migratory birds shall continue throughout the year, except that Eskimos and Indians may take at any season auks, auklets, guillemots, murres, and puffins, and their eggs, for food and their skins for clothing, but the birds and eggs so taken shall not be sold or offered for sale.

The protocol is modeled after the subsistence hunting provisions of the US/USSR Treaty. It is intended to make the 1916 Treaty consistent with those provisions, and provide a basis for managing subsistence hunting of migratory birds in Alaska and Canada. The wording of the protocol is as follows:

The Government of Canada and the Government of the United States of America,

Desirous of amending the Migratory Birds Convention signed at Washington on August 16, 1916,

Have agreed as follows:

Article I

Article 2 of the Convention of August 16, 1916 for the Protection of Migratory Birds in Canada and the United States is amended by adding the following additional paragraph:

Notwithstanding any other provision of this Convention, the High Contracting Powers may, without prejudice to those rights accorded to Indians by sub-paragraph 1 of the first paragraph of this Article and to Eskimos and Indians by sub-paragraph 3 of the said first paragraph, authorize by statute, regulation, or decree the taking of migratory birds and the collection of their eggs by the indigenous inhabitants of the State of Alaska and the Indians and Inuit of Canada for their own nutritional and other essential needs (as determined by the competent authority of each High Contracting Power), during any period of the year in accordance with seasons established by the competent authority of each High Contracting Power respectively, so as to provide for the preservation and maintenance of stocks of migratory birds.

Article II

This Protocol shall be subject to ratification. It shall enter into force on the date of exchange of instruments of ratification which shall take place at Washington as soon as possible.

The major problem addressed by the protocol is that subsistence hunting of migratory birds, as practiced for generations in Alaska and Canada, for the most part is not provided for under terms of the 1916 Treaty. This treaty prohibits hunting between March 10 and September 1, the period when waterfowl are most available and most needed for food in the far North. Exceptions are made for subsistence hunting but they

apply only to Indians for the taking of scoters and to Eskimos and Indians for the taking of certain sea birds and their eggs. These species may be taken by these people at any time of the year and in any number but they are either not generally available or not traditionally utilized in most areas of Alaska. Although migratory birds generally are a relatively small part of the total subsistence needs of the people in these areas, they are a very important element at certain times of the year in some locations and the people still depend on them. Thus, the 1916 Treaty does not adequately address the legitimate subsistence needs of people.

Subsequent to the signing of the protocol an environmental assessment on *Subsistence Hunting of Migratory Birds in Alaska and Canada* was prepared by the Fish and Wildlife Service. This was made available in March 1980 as a draft for public comment. A final version, incorporating changes derived from the public comments, was completed and made available in December 1980. The assessment was structured around a proposal to amend the subsistence hunting provisions of the 1916 Treaty as well as the migratory bird treaties with Mexico, and Japan so as to make them consistent with the subsistence hunting provisions of the US/USSR Treaty. The consequences of implementing the proposal (no significant adverse impacts were found), and the alternatives of taking no action, prohibiting subsistence hunting of migratory birds, or renegotiating the protocol on subsistence hunting to make it more specific were described and evaluated. The protocol to amend the 1916 Treaty is the first and most important step in this process because the subsistence hunting provisions of this treaty are most in conflict with those of the US/USSR Treaty.

Following completion of the environmental assessment the protocol was transmitted to the Senate in December 1980 with a request for ratification but no immediate action was taken. On January 24, 1981, the Secretary of the Interior requested the Senate Foreign Relations Committee to delay action on the protocol until the Department had an opportunity to evaluate concerns that had been raised about it. Thus, the protocol was set aside and has not as yet been taken up in the Senate.

A number of organizations and individuals have expressed concern about some aspects of the protocol. Most stated that they did not object in principle to subsistence hunting if carefully regulated. However, they were concerned that the protocol was too vague and imprecise about what would be permitted in the way of subsistence hunting and who would be allowed to participate in it.

More specifically, these groups identified the following points of concern or objection:

1. The protocol does not clearly identify who has authority to set seasons for subsistence hunting.
2. It does not appear to clearly prohibit commercial use of birds taken for subsistence purposes.
3. It does not establish bag limits, season lengths, methods of taking, etc.
4. It does not set limits on the size of the subsistence harvest.
5. It does not identify those who will be allowed to engage in subsistence hunting.
6. It does not contain a viable framework and plan for enforcement of subsistence hunting regulations.

Underlying these specific points is a basic concern that subsistence hunting in Alaska and Canada will adversely affect recreational hunting in the United States. There is a particular concern about this in connection with subsistence hunting in Canada, which contains the breeding grounds for a large proportion of the ducks and geese important to U.S. hunters. In this regard it is important to note that the protocol is not aimed at increasing the amount of subsistence hunting but at regulating and controlling a subsistence harvest that has been occurring for decades. Nevertheless, some people fear that it could lead to increases in subsistence hunting to the point that a reduction in recreational hunting would be necessary.

In contrast to the views outlined above, the protocol has essentially the unanimous support of people who live in rural areas of Alaska where subsistence hunting continues to be an important means of livelihood. About 90 percent of the population in these areas is made up of Eskimos, Indians, and Aleuts. These people have long been troubled by a situation in which laws and prohibitions that they had no voice in developing are in conflict with their traditional customs and needs. They have repeatedly urged that this situation be changed.

Although the protocol was signed in 1979, it has not been implemented because the United States has not ratified it. In view of the questions raised about it since it was signed, it now appears necessary and desirable to address and clarify the points mentioned above. In order to do this the Fish and Wildlife Service intends to work with the Canadian Wildlife Service to develop a joint U.S./Canadian agreement that would further specify exactly how the two countries will interpret and implement the provisions of the protocol. It is intended that any agreement reached will be made binding on the two countries by inclusion in a signed memorandum/statement of understanding or a diplomatic exchange of notes between the governments. Any such document will be sent to the Senate for information and clarification, and so that it can be considered in deliberation on ratification of the protocol.

Items that will be considered for further discussion and definition in any such agreement will include: (1) A definition of competent authorities, (2) how birds taken under provisions of the protocol may be used, (3) means of regulating take, (4) levels of harvest, (5) who may participate in subsistence hunting, (6) geographic areas where subsistence hunting may take place, (7) provisions for enforcement of subsistence hunting regulations. It is believed that these items cover the major points of concern that have been identified.

As soon as possible after the close of the comment period on this notice of intent, and upon review and consideration of any comments received, the Fish and Wildlife Service will meet with the Canadian Wildlife Service to develop a proposed agreement on interpretation and implementation of the protocol on subsistence hunting of migratory birds. The Fish and Wildlife Service will provide public notice of the proposed agreement through publication in the **Federal Register** and will consider all comments received. In addition, public hearings will be held in Washington, D.C. and Alaska to provide additional opportunity for public comment. Notice of these hearings will be published in the **Federal Register** as soon as possible after determination of times and locations.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 658

Gulf of Mexico Fishery Management Council; Public Hearings

AGENCY: National Oceanic and Atmospheric Administration, Commerce.

ACTION: Notice of Public Hearings and Availability of Proposed Amendment.

SUMMARY: The Gulf of Mexico Fishery Management Council (Council) will hold public hearings for the purpose of gathering information on possible long-term solutions to the gear conflict in Federal waters of Citrus County, Florida. This hearing has particular reference to the extension of control over shrimping and stone crabbing to the Federal waters to complement similar management of these fisheries under Florida law for Citrus County. The Council seeks views on proposed amendments of its stone crab and shrimp plans which may be necessary to provide for orderly conduct of these fisheries in Federal waters, thus reducing the possibility of conflict between stone crab and shrimp fishermen in the area. The hearings will be tape recorded with the tapes filed as an official transcript of the proceedings. A written summary will be prepared.

DATES: Written comments on the proposed management measures or alternatives from the public may be submitted no later than April 1, 1983. Individuals or organizations wishing to comment on this matter may do so at the following public hearings:

March 29, 1983, 7:00–10:00 p.m., Crystal River, Florida;

March 30, 1983, 7:00–10:00 p.m., Apalachicola, Florida.

ADDRESS: A copy of the proposed amendment, environmental assessment, regulatory impact review, and proposed regulations may be obtained from the Council at the address listed below.

Send comments to: Wayne E. Swingle, Executive Director, Gulf of Mexico Fishery Management Council, Lincoln Center, Suite 881, 5401 West Kennedy Boulevard, Tampa, Florida 33609.

Public Hearings Locations:

March 29—Plantation Inn and Golf Resort, Kings Bay Road, Crystal River, Florida;

March 30—The Court Room, Franklin County Court House, Market Street, Apalachicola, Florida.

FOR FURTHER INFORMATION CONTACT: Wayne E. Swingle, Executive Director, Gulf of Mexico Fishery Management Council (813) 228–2815.

SUPPLEMENTARY INFORMATION: The hearings will deal with the need to amend the stone crab and shrimp plans, as a result of cumulative losses of traps by stone crab fishermen in the Gulf of Mexico, loss of damage to shrimp trawling gear, and the possibility of conflict between shrimp and stone crab fishermen in Federal waters adjacent to an area managed by the State of Florida (Chapter 81–129 of the Florida Code). This State statute provides for fishing areas for shrimping and stone crabbing which change over the course of the stone crab season and which can be modified by State regulation based on recommendation of the Citrus County Shrimping and Crabbing Advisory Committee. This Committee is duly constituted by the statute and represents both shrimping and crabbing interests. The fishing areas established by State statutes extend out to the limit of the State waters (nine nautical miles) which transects the proposed Federal area which is in the fishery conservation zone (FCZ). The Committee has petitioned the Gulf Council to modify its stone crab and shrimp plans to establish exclusive fishing areas for stone crab fishing in the FCZ during the period October 4 to May 20 each year. The Council is holding the hearings to seek public input on the proposed measure, and other alternatives that would provide a long-term solution to the conflict problem for inclusion in amendments to its stone crab and shrimp plans.

Dated: March 4, 1983.

Joe P. Clem,

Acting Chief, Fisheries Process Division, National Marine Fisheries Service.

Notices

Federal Register
Vol. 48, No. 48
Thursday, March 10, 1983

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

ADMINISTRATIVE CONFERENCE OF THE UNITED STATES

Exceptions and Waivers, Non-Lawyer Representation; Meeting

AGENCY: Administrative Conference of the United States; Committee on Regulation.

ACTION: Committee meeting.

SUMMARY: The Committee will meet with its consultants to discuss progress on the projects: (1) Exceptions and waivers in the operation of regulatory programs, and (2) Non-lawyer representation of clients in agency proceedings.

DATE: March 18, 1983, 9:30 a.m.

ADDRESS: 1250 Connecticut Avenue, NW., Washington, D.C., 8th Floor Conference Room.

Public Participation: Attendance at the Committee's meeting is open to the public, but limited to the space available. Persons wishing to attend should notify the contact person at least two days in advance of the meeting. The Committee chairman may permit members of the public to present appropriate oral statements at the meeting. Any member of the public may file a written statement with the Committee before, during, or after the meeting. Minutes of the meeting will be available on request to the contact person. This meeting is subject to the Federal Advisory Committee Act (Pub. L. 92–463).

FOR FURTHER INFORMATION CONTACT: William C. Bush, Administrative Conference of the United States, 2120 L Street N.W., Suite 500, Washington, D.C. 20037. Telephone (202) 254–7065.

SUPPLEMENTARY INFORMATION: (1) Exceptions and Waivers—This project deals with the role of an exceptions and waivers process in a regulatory program. The focus will be on the operation of the Office of Hearings and Appeals at the Department of Energy. The Committee will be discussing a draft report recently submitted by our consultant, Professor Peter Schuck of Yale Law School.

(2) Non-lawyer Representation—Our consultant, Professor Jonathan Rose of Arizona State University School of Law, is advising the Committee on possible roles for non-lawyer experts in finance, economics and related fields as direct representatives of clients in agency regulatory proceedings. Particular problems to be explored are the difficulties in exerting ethical controls on non-lawyers and the treatment of a client-representative confidentiality privilege.

Richard K. Berg,
General Counsel.

DEPARTMENT OF AGRICULTURE

Federal Crop Insurance Corporation

Loss Adjustment and Contract Service Agreement

AGENCY: Federal Crop Insurance Corporation, USDA.

ACTION: Notice.

SUMMARY: The Federal Crop Insurance Corporation (FCIC) herewith publishes this notice to provide, for the information of interested parties, the terms and conditions of the Loss Adjustment and Contract Service Agreement (FCIC–448), which becomes effective upon execution by FCIC and a private entity seeking such agreement as a loss adjustment and field service contractor, for the 1983 and succeeding crop years.

ADDRESS: Written comments on this notice may be sent to the Office of the Manager, Federal Crop Insurance Corporation, U.S. Department of Agriculture, Washington, D.C. 20250.

FOR FURTHER INFORMATION CONTACT: Peter F. Cole, Secretary, Federal Crop Insurance Corporation, U.S. Department of Agriculture, Washington, D.C. 20250, telephone (202) 447–3325.

SUPPLEMENTARY INFORMATION: Under the authority contained in Section 507(c) of the Federal Crop Insurance Act (7 U.S.C. 1507(c)), as amended by Pub. L. 96–365, 94 Stat. 1312, approved September 26, 1980, the Board of Directors of the Corporation authorized the use of contractors from the private sector to perform all services in connection with loss adjustment including, but not limited to;

1. Visiting farms to inspect damaged or destroyed crops during the growing season or following harvest;
2. Appraising potential production and giving consent to put the acreage to another use;
3. Explaining to insureds their responsibilities under the insurance contract and necessary filing procedures;
4. Determining cause and time of loss;
5. Determining actual production harvested, unharvested potential, and the amount of insured acres; and
6. Making measurements of farm-stored production.

Form FCIC–448, the Loss Adjustment and Contract Service Agreement, reproduced in part herein, prescribes the terms and conditions under which a private entity may be appointed as a contract loss adjuster.

This notice does not set out the provisions contained in Appendix I, since this document is lengthy; however, a copy will be made available to any qualified applicant for a Loss Adjustment and Contract Service Agreement.

Any interested party is invited to comment on the terms and conditions of the Loss Adjustment and Contract Service Agreement contained in this notice.

FCIC will consider all suggestions and may choose to offer publicly an additional or amended agreement or related document for subsequent crop years incorporating suggested changes.

The terms and conditions of the Loss Adjustment and Contract Service Agreement, effective with the 1983 and succeeding crop years, are as follows:

U.S. Department of Agriculture

Federal Crop Insurance Corporation

Loss Adjustment and Contract Service Agreement

For 19—— Crop Year

[ ] Tax
[ ] S.S. _____
(Identification Number)

(Name) _____

Contract Code

Designated Area

(City and State) _____
(Zip Code) _____
(Contractor's Telephone Number) _____

The Federal Crop Insurance Corporation (hereinafter referred to as the "Corporation") appoints the entity identified above (hereinafter referred to as the "Contractor") as a loss adjustment and field service contractor within the area designated on this agreement according to the provisions of 7 U.S.C. 1507(c), as amended by P.L. 96-365, 94 Stat. 1312.

I The Corporation and the Contractor hereby agree that such appointment shall be subject to the following terms and conditions:

1 The Contractor will perform all services in connection with loss adjustment as assigned by the Corporation including, but not limited to:
- a Visit farms to inspect damaged or destroyed crops during the growing season or following harvest as applicable;
- b Appraise potential production and give consent to have insured acreage put to another use;
- c Explain to insured producers their responsibilities under the insurance contract and necessary filing procedures;
- d Determine cause and time of loss;
- e Determine actual production harvested and unharvested potential and the amount of insured acres; and,
- f Make measurements of farm-stored production.

2 The Contractor will promote favorable relationships with insured producers and stimulate interest and understanding of the Federal Crop Insurance Program with present and potential policyholders.

3 All the required services shall be conducted in a manner set forth in procedures issued by the Federal Crop Insurance Corporation.

4 The Contractor and the Contractor's employees engaged in loss adjustment for the Corporation will be required to successfully complete, at the Corporation's expense, a program of classroom instruction as determined by the Corporation.

5 The Contractor shall keep such records and make such reports as may be required by the Corporation in an accurate and current manner of all activities related to the performance of this agreement. All work performed by the Contractor will be subject to review for accuracy and timeliness of service to insured producers. The Contractor will make its records available to any representative designated by the Corporation during reasonable hours. The Contractor will cooperate at all times with the Corporation in the investigation and litigation of claims.

6 The Corporation will compensate the Contractor for on-the-job training, loss adjustment and servicing, as specified in Appendix II attached.

7 The Corporation shall have the right to terminate the Contractor without advance notice if the Contractor knowingly has committed a material breach of this contract or knowingly has violated Federal law. In the event the Corporation terminates the agreement on this basis, the Corporation shall be liable to the Contractor for all compensation fully earned and for the fair value of other services rendered until the date of termination.

8 The Corporation will make payment to the Contractor on a bi-weekly basis upon submission by the contractor of the prescribed FCIC voucher form at the end of each bi-weekly period in which services are performed.

9 The Contractor shall understand and so advise the public that:
- a All findings with respect to field conditions are the property of and for the sole use of the Corporation.
- b The Contractor is not an employee and does not represent the Corporation on any matter other than specifically set forth herein.
- c the Contractor does not have the power to execute any waiver or incur any indebtedness on behalf of the Corporation.
- d The Contractor is liable for any intentional act or omission outside of or contrary to the scope of its authority and which would cause the Corporation to incur any liability whatsoever.

10 The Corporation reserves the right to modify or terminate this agreement at any time, upon giving the Contractor at least 60 days advance notice, if the Contractor's performance on loss adjustment or field servicing is deemed unsatisfactory by the Corporation, provided the Corporation has put the Contractor on notice of these performance standards, the performance standards are fairly applied on a nondiscriminatory basis to contractors similarly situated, and the Corporation has given the Contractor a reasonable opportunity to comply. Such standards will be considered a part of this agreement as though contained herein. In the event the Corporation terminates this agreement on this basis, the Contractor may continue to perform assigned services up until the date of termination and shall be entitled to full compensation for those services rendered.

11 The Contractor may cancel this agreement by giving at least 14 days advance written notice to the Corporation.

12 The Contractor agrees to give the Corporation priority in time available for loss adjustment over loss adjustments from other agencies, organizations or insurance firms.

13 The Contractor and any employee of the Contractor shall not engage in any selling, servicing or administration involving any policies of the Corporation or reinsured by the Corporation except as that work is assigned under the provision of this contract. This provision specifically does not prohibit the performance of loss adjustment service for other insurance companies as long as such loss adjustment work does not conflict with work assigned by the Corporation. This paragraph applies during the life of the contract and for one year after termination of the contract or termination of the employee status with the Contractor. The Contractor shall not engage in loss adjustment of any policy sold, administered or serviced by any member of the Contractor's family or the family of an employee of the Contractor unless the facts are reported to the Corporation and a written waiver is obtained.

14 The Corporation shall have the right to debar the Contractor or any employee of the Contractor in accordance with Office of Procurement Policy (OFPP), policy letter 82-1, and any amendment thereto (47 FR 28854-60). The Contractor shall provide the Corporation with a list of its Officers and Employees and shall amend that list within 15 days of any change. The Contractor agrees not to employ or contract with any individual or company who has been suspended or debarred by the Corporation or the United States during the term of such suspension or debarment.

15 Moneys due the Corporation from the Contractor or any employee of the Contractor shall be set off, in whole or in part, against any moneys payable to the Contractor or Contractor's employees, respectively, by the Corporation or any other United States Government agency.

II The Corporation and the Contractor further agree that the compensation rates and contract clauses in the appendixes hereto required by various statutes, regulations and executive orders are hereby made a part of the agreement to the extent that they are applicable.

Appendix II-STD to FCIC-448, Loss Adjustment and Contract Service Agreement

1 The Corporation will compensate the Contractor for loss adjustment and servicing as specified below:

A The Contractor will be paid at an hourly rate as stated below:

During formal classroom training None
On-job training prior to full certification $7.50
After full certification on at least two crops $10.00

B The Corporation will reimburse the Contractor for reasonable expenses which the Corporation has determined to be necessary in fulfilling this agreement. Such expenses will be paid in accordance with G&A travel regulations published for General Schedule government employees. During formal classroom training contractors will not be compensated, but will be reimbursed for travel and lodging.

C Payment for services will be made according to the Prompt Payment Act (31 U.S.C. § 1801 *et seq.*). The required payment date for this agreement shall be thirty days after receipt of a proper invoice for the amount of payment due. Proper invoices and filing procedures will be provided by the Corporation. Payment is conditional on the Contractor's meeting standards of performance, including the fulfillment of a minimum number of unit inspections, as established in writing by the Corporation.

D The Corporation will compensate and reimburse the Contractor for loss adjustment and servicing duties including, but not limited to: farm visits on which acreage is released or a final claim is prepared; and farm visits solely for the purpose of measuring farm-stored production at the insured's request.

E When producer data assigned to the Contractor for farm visit(s) includes work for Agricultural Stabilization Conservation Service (ASCS) purposes (whether solely for ASCS or in conjunction with Corporation work) the Contractor will be compensated for ASCS work at the same rates specified herein for FCIC.

2 In the event this agreement is terminated under Section 7 or 10 of the agreement and/or the Contractor withdraws from this agreement, any compensation paid to the Contractor and not earned, shall be returned to the Corporation.

3 In the event loss adjustment work performed by the Contractor must be performend again, and the original work is found to be incomplete or in error, the Contractor will not be compensated for the subsequent inspection.

This appendix is effective for the 19—— crop year for Contract Code No.——.

BILLING CODE 3410-09

Forest Service

1986–90 Period Operating Plan; Alaska Lumber and Pulp Co.; 50–Year Timber Sale; Tongass National Forest, Sitka, Alaska; Intent To Prepare an Environmental Impact Statement

Pursuant to section 102(2)(c) of the National Environmental Policy Act of 1969, as amended, USDA, Forest Service, will prepare an Environmental Impact Statement for the 5-year operating period 1986–90 of the Alaska Lumber and Pulp Company (ALP) 50–year timber sale and for advanced roading associated with other operating periods.

The proposed activity is to harvest 525 million board feet of timber plus an unestimated volume of timber carried over from previous operating periods, and construct roads, terminal transportation facilities, and logging communities. These actions are authorized under the existing 50–year timber sale contract between the United States Department of Agriculture and ALP and in accord with the Tongass National Forest Land Management Plan. The 50-year timber sale operating area includes portions of Chichagof, Baranof, Kruzof, and Kuiu Islands in southeast Alaska.

Public involvement will include inviting participation from those Federal, State, and local agencies, organizations, and individuals interested in the scoping process, which includes: (1) Identification of those issues to be addressed; (2) indentification of issues to be analyzed in depth; (3) elimination of insignificant issues or those which have been covered by previous environmental reviews; (4) determination of potential cooperating agencies, and assignment of responsibilities. Notice of the initiation of the scoping process will also be sent to the news media.

The Forest Service will develop a range of alternatives that will address the various issues, concerns, and opportunities established in the scoping process. One of the alternatives considered will be a no action alternative which will be within the guidelines of the Tongass Land Management Plan and responsive to the timber sale contract. Other possible alternatives will vary the amount of pre-roading, the location of cutting units and roads, and the areas to be available for harvest. Alternatives include: (1) A highly economical alternative that provides a maximum return on investment; (2) a normal harvest alternative such as occurred in past harvest practices, and which includes a mix of economical and economically marginal timber volume; (3) maximum utilization of timber volumes requiring advanced, and costly, harvesting techniques, including helicopter and multi-span skyline systems.

The preliminary issues and concerns that were identified from past planning efforts include: (1) What are the social and economic impacts of logging and associated development on existing communities? (2) Is there enough volume in the contract area to fulfill the life of the contract? (3) What are the costs of implementing the 1986–90 Operating Plan as compared to the value of the product? (4) Are interconnected transportation systems between communities desirable? (5) What is the potential for a loss of soil productivity? (6) How will fish habitat, wildlife habitat, water quality, be maintained? (7) How will the change in land base as a result of Native Corporation and State land selection affect the timber sale? (8) What is the potential for blowdown, and what would be an appropriate process for dealing with blowdown as it occurs in the 1986–90 Operating Period? (9) What will be the logistics, cost and environmental impacts, of the proposed logging camp locations? (10) How will technically marginal timber be phased into the harvesting plan? (11) How will substitution of timber volume from wilderness areas within the 50-day timber sale contract be accommodated?

The analysis is expected to take about eight months. It is anticipated that the Draft Environmental Impact Statement should be available for public review in December 1983 and the Final Environmental Impact Statement is expected to be completed in May of 1984. Implementation of harvest activities would not occur until after December 1985.

The responsible official is R. Max Peterson, Chief of the Forest Service. Comments on this Notice of Intent or on the proposed activity should be sent to William P. Gee, Forest Supervisor, Chatham Area, Tongass National Forest, P.O. Box 1980, Sitka, Alaska 99835, or John M. Hughes, Forest Supervisor, Stikine Area, Tongass National Forest, P.O. Box 3091 Petersburg, Alaska 99833 by April 1, 1983.

Dated: February 28, 1983.

F. Dale Robertson,

Associate Chief, Forest Service

BILLING CODE 3410-11-M

DEPARTMENT OF COMMERCE

International Trade Administration

[Case No. 640]

Robert J. Lambert d.b.a. Computer and Test Systems, et al.; Order Temporarily Denying Export Privileges

In the matter of: Robert J. Lambert d.b.a. Computer and Test Systems, 5671 Via Ceresa, Yorba Linda, California 92686; Dierk Hagemann d.b.a. Uni-Data World Transport Corporation, 110 Standard Street, El Segundo, California 90245; and Albert Franz Kessler, 20 Kennel Street, 8800 Thawil, Switzerland.

The Department of Commerce (the "Department"), pursuant to the provisions of § 388.19 of the Export Administration Regulations (15 CFR Part 368, *et seq.* (1982)) (the "Regulations"), has petitioned the Hearing Commissioner for an order temporarily denying all export privileges to Robert J. Lambert, doing business as Computer and Test Systems, 5671 Via Ceresa, Yorba Linda, California 92686, Dierk Hagemann, doing business as Uni-Data World Transport Corporation, 110 Standard Street, El Segundo, California 90245, and Albert Franz Kessler, 20 Kennel St., 8800 Thawil, Switzerland.

The Department states that separate administrative proceedings have been initiated against the respondents by the Department's Office of Export Enforcement alleging specific violations of the Regulations as follows: (i) That, in order to carry out certain transactions, the respondents conspired to export certain U.S.-origin electronic testing equipment from the United States to Switzerland without the validated export licenses required by the Regulations; (ii) that Mr. Kessler exported or attempted to export this equipment without the required validated export license; (iii) that Mr. Hagemann caused documents and records relating to the purchase and delivery of this equipment to be destroyed; (iv) that Mr. Lambert subsequently filed two license applications representing that the destination for this equipment was Tijuana, Mexico, knowing, however, that the actual destination was Zurich, Switzerland; and (v) that these respondents may attempt future exports contrary to the Regulations, either directly or through one or more of the known related parties, unless appropriate action is taken to preclude such attempts.

The Department further states that on September 7, 1982, a federal jury found: (1) Messrs. Lambert, Hagemann and Kessler guilty of conspiring to export U.S.-origin electronic testing equipment from the United States to Zurich, Switzerland without having first obtained the required validated export licenses from the Department; (2) Mr. Kessler guilty of attempting to export the same equipment from the United States in violation of the Regulations, and Messrs. Lambert and Hagemann guilty of aiding and abetting such attempt; (3) Mr. Hagemann guilty of causing documents and records relating to the purchase and delivery of this equipment to be destroyed; and (4) Mr. Lambert, doing business as Computer and Test Systems, guilty of knowingly and willfully making false statements and representations to a government agency (the Department).

Based upon the showing made by the Department, I find that an order temporarily denying all export privileges to Robert J. Lambert, doing business as Computer and Test Systems, Dierk Hagemann, doing business as Uni-Data World Transport Corporation, and Albert Franz Kessler, and to related parties, is required in the public interest to facilitate enforcement of the Export Administration Act of 1979, as amended (50 U.S.C. app. 2401, *et seq.* (Supp. III 1979)), and the Regulations and to avoid circumvention of the administrative proceedings.

Anyone who is now or may in the future be dealing with the above-named respondents or any related party in transactions that in any way involve U.S.-origin commodities or technical data is specifically alerted to the provisions set forth in Paragraph IV below.

Accordingly, it is hereby

Ordered

I. All outstanding validated export licenses in which respondents or any related party appear or participate, in any manner or capacity, are hereby revoked and shall be returned forthwith to the Office of Export Administration for cancellation.

II. The respondents, their successors or assignees, officers, partners, representatives, agents, and employees hereby are denied all privileges of participating, directly or indirectly, in any manner or capacity, in any transaction involving commodities or technical data exported from the United States in whole or in part, or to be exported, or that are otherwise subject to the Regulations. Without limitation of the generality of the foregoing, participation prohibited in any such transaction, either in the United States or abroad, shall include participation, directly or indirectly, in any manner or capacity: (a) As a party or as a representative of a party to a validated export license application, (b) in the preparation or filing of any export license application or reexport authorization, or of any document to be submitted therewith, (c) in the obtaining or using of any validated or general export license or other export control document, (d) in the carrying on of negotiations with respect to, or in the receiving, ordering, buying, selling, delivering, storing, using, or disposing of, in whole or in part, any commodities or technical data exported from the United States, or to be exported, and (e) in the financing, forwarding, transporting, or other servicing of such commodities or technical data.

III. Such denial of export privileges shall extend not only to the respondent, but also to its agents and employees and to any successor. After notice and opportunity for comment, such denial may also be made applicable to any person, firm, corporation, or business organization with which respondent is now or hereafter may be related by affiliation, ownership, control, position of responsibility, or other connection in the conduct of export trade or related services. Business organizations and individuals now known to be owned by or affiliated with the named respondents, and which are accordingly subject to the provisions of this order, are:

Export Assistance Services, 5671 Via Ceresa, Yorba Linda, California 92686;
Warner Trading Corporation, 5671 Via Ceresa, Yorba Linda, California 92686;
Mrs. Margaret Lambert, 5671 Via Ceresa, Yorba Linda, California 92686;
Manuel Rodrizuez d.b.a. Export Assistance Services, 5671 Via Ceresa, Yorba Linda, California 92686;
Computer Information Systems, also known as (C.I.S.), P.O. Box 90280, Los Angeles, California 90009;

Uni-Data Systems, P.O. Box 90280, Los Angeles, California 90009;
Uni-Data World Ocean Transport Inc.;
Uni-Data Customs Brokers Inc.;
Uni-Data Transport Ltd., London, England and Zurich, Switzerland.

IV. No person, firm, corporation, partnership or other business organization, whether in the United States or elsewhere, without prior disclosure to and specific authorization from the Office of Export Administration, shall, with respect to U.S.-origin commodities and technical data, do any of the following acts, directly or indirectly, or carry on negotiations with respect thereto, in any manner or capacity, on behalf of or in any association with the respondents or any related party, or whereby the respondents or any related party may obtain any benefit therefrom or have any interest or participation therein, directly or indirectly: (a) Apply for, obtain, transfer, or use any license, Shipper's Export Declaration, bill of lading, or other export control document relating to any export, reexport, transshipment, or diversion of any commodity or technical data exported in whole or in part, or to be exported by, to, or for the respondent or any related party denied export privileges; or (b) order, buy, receive, use, sell, deliver, store, dispose of, forward, transport, finance, or otherwise service or participate in any export, reexport, transshipment, or diversion of any commodity or technical data exported or to be exported from the United States.

V. In accordance with the provisions of § 388.19(b) of the Regulations, the respondents or any related party may move at any time to vacate or modify this temporary denial order by filing with the Hearing Commissioner, International Trade Administration, U.S. Department of Commerce, Room 6716, 14th and Constitution Avenue NW., Washington, D.C. 20230, an appropriate motion for relief, supported by substantial evidence, and may also request an oral hearing thereon, which, if requested, shall be held before the Hearing Commissioner at the earliest convenient date.

VI. This order is effective immediately. It remains in effect until the final disposition of the administrative proceedings initiated against the respondents. A copy of this order and Parts 387 and 388 of the Regulations shall be served upon the respondents and the above-designated related parties.

Dated: February 28, 1983.

Thomas W. Hoya,

Hearing Commissioner.

BILLING CODE 3510-DS-M

Telecommunications Equipment Technical Advisory Committee; Closed Meeting

AGENCY: International Trade Administration, Commerce.

ACTION: Notice.

SUMMARY: The Telecommunications Equipment Technical Advisory Committee was initially established on October 23, 1973, and rechartered on September 18, 1981, in accordance with the Export Administration Act of 1979 and the Federal Advisory Committee Act.

The Committee advises the Office of Export Administration with respect to questions involving: (A) Technical specifications and policy issues relating to those specifications which are of concern to the Department, (B) worldwide availability of products and systems, including quantity and quality, and actual utilization of production technology, (C) licensing procedures which affect the level of export controls applicable to telecommunications equipment or technology, and (D) exports of the aforementioned commodities subject to unilateral and multilateral controls which the United States establishes or in which it participates including proposed revisions of any such controls.

Time and Place: March 31, 1983, at 10:00 a.m. The meeting will take place at the Main Commerce Building, Room 3708, 14th Street and Constitution Avenue, NW., Washington, D.C.

The Committee will meet only in executive session to discuss matters properly classified under Executive Order 12356, dealing with the U.S. and COCOM control program and strategic criteria related thereto.

SUPPLEMENTARY INFORMATION: The Assistant Secretary for Administration, with the concurrence of the delegate of the General Counsel, formally determined on September 29, 1981, pursuant to Section 10(d) of the Federal Advisory Committee Act, as amended by Section 5(c) of the Government In The Sunshine Act, Pub. L. 94-409, that the matters to be discussed in the Executive Session should be exempt from the provisions of the Federal Advisory Committee Act relating to open meetings and public participation therein, because the Executive Session will be concerned with matters listed in 5 U.S.C. 552b(c)(1) and are properly classified under Executive Order 12356.

A copy of the Notice of Determination to close meetings or portions thereof is available for public inspection and copying in the Central Reference and Records Inspection Facility, Room 6628, U.S. Department of Commerce, telephone 202-377-4217.

FOR FURTHER INFORMATION CONTACT: Mrs. Margaret Cornejo, Committee Control Officer, Office of Export Administration, Room 2613, U.S. Department of Commerce, Washington, D.C. 20230; telephone 202-377-2583.

Dated: March 3, 1983.

John K. Boidock,

Director, Office of Export Administration.

BILLING CODE 3510-DS-M

Minority Business Development Agency

Minority Business Development Center Program, Jacksonville, Fla.; Soliciting Applications

AGENCY: Minority Business Development Agency, Commerce.

ACTION: Notice.

SUMMARY: The Minority Business Development Agency (MBDA) announces that it is soliciting applications under its Minority Business Development Center (MBDC) program to operate one project for a 12-month period beginning July 1, 1983, in the Jacksonville, FL SMSA. The cost of the project is estimated to be $187,000. The maximum Federal participation amount is $168,300. The minimum amount required for non-Federal participation is $18,700. The award number will be 04-10-83006-01.

Applicants shall be required to contribute at least 10% of the total program costs through non-Federal funds. Cost sharing contributions can be in the form of cash contributions, fee for services or in-kind contributions.

CLOSING DATE: April 7, 1983.

ADDRESS: Atlanta Regional Office, Minority Business Development Agency, 1371 Peachtree Street, NE., Suite 505, Atlanta, GA 30309.

FOR FURTHER INFORMATION CONTACT: Gordon M. Anderson/Karen Davis; telephone (404) 881-3094.

SUPPLEMENTARY INFORMATION:

A. Scope and Purpose of This Announcement

Executive Order 11625 authorizes MBDA to fund projects which will

provide technical and management assistance to eligible clients in areas related to the establishment and operation of businesses. The MBDC program is specifically designed to assist those minority businesses that have the highest potential for success. In order to accomplish this, MBDA supports MBDC programs that can: coordinate and broker public and private sector resources on behalf of minority individuals and firms; offer them a full range of management and technical assistance; and serve as a conduit through which and from which information and assistance to and about minority businesses are funneled.

B. Eligible Applicants

Awards shall be open to all individuals, non-profit organizations, for-profit firms, local and state governments, American Indian tribes and educational institutions.

C. Evaluation Process

All proposals received as a a result of this announcement will be evaluated by a MBDA review panel.

D. Evaluation Criteria for Minority Business Development Center Applications

The evaluation criteria is designed to facilitate an objective evaluation of competitive applications for the Minority Business Development Center program.

MBDA reserves the right to reject any or all applications, including the application receiving the highest evaluation, and will exercise this right when it is determined that it is in the best interest of the Government to do so (e.g., the apparent successful applicant has serious unresolved audit issues from current or previous grants, contracts or cooperative agreements with an agency of the Federal Government).

Evaluation of proposals will employ the following criteria:

I. *Capability and Experience of Firm/Staff* —provide information that demonstrates the organization's capabilities and prior experiences in addressing the needs of minority business individuals and firms. Provide information that demonstrates the staff's capabilities and prior experiences in providing management and technical assistance to minority individuals and firms. Indicate previous experience in MBE community to be served in terms of: inventorying resources and opportunities; the brokering thereof; and providing management and technical assistance.

The following are key factors to be considered in this section:

Firm:

—The organization's receptivity in the MBE community to be served, i.e., business contacts in the public and private sector; leadership responsibilities; and experience in assisting MBE business persons and firms. (References from clients assisted are pertinent.)

—Background credentials and references for the owners of the organization and a capability statement of what the organization can do.

—Knowledge of the geographic area to be served in terms of the needs of minority businesses and past ongoing relationships with local, public and private—entities that can possibly enhance the BDC program effort—i.e., Chambers of Commerce, trade associations, venture capital organizations, banks, SBA, HUD, state, city and county government agencies, etc.

Staff:

—List personnel to be used. Indicate their salaries, educational level and previous experience. Provide resumes for all professional staff personnel.

—Demonstrate competence among staff to effectuate mergers, acquisitions, spin-offs and joint-ventures.

—Provide organizational chart, job descriptions and qualification standards involving all professional staff persons to be utilized on the project.

—If any contractors are to be utilized, identify and indicate areas and level of experience. *Primary consideration will be given to inhouse capability.*

Note.—All contracting proposed should be in accordance with procurement standards in Attachment O of OMB Circulars A–110 or A–102.

II. *Techniques and Methodology*—specify plans for achieving the goals and objectives of the project. This section should be developed by using the outline of the Work Requirements and the MBDC responsibilities as *guides* and will become part of the award document. Include start-up plan and example of work plan format. Fully explain the procedures for: outreach, screening, assisting and monitoring clients; maintaining the profile inventory of minority businesses; and brokering of new business ownership, market and capital opportunities and prevention of business failures. In summary, address how, when and where work will be done and by whom. Include level of performance.

III. *Resources*—address technical and administrative resources, i.e., computer facilities, voluntary staff time and space; and financial resources in terms of meeting MBDA's 10% cost-sharing requirement and including a fee for services for assistance provided clients. A fee for services in the amount of 10% of the cost of assistance will be charged to all clients receiving management and technical assistance.

Cost-sharing is that portion of project costs not borne by the Federal Government. The composition and amount of cost-sharing are key factors that will be considered in determining the merit of this section. The cost sharing requirement can be met through the following order or priority: (1) Cash contributions; (2) fee for services; and (3) in-kind contributions.

A. *Cash contribution*—means cash that is contributed or donated by the recipient, and other non-Federal sources, i.e., public agencies and institutions, private organizations, corporations and individuals.

B. *Fee for services*—is a charge to a client for assistance provided by the MBDC for M&TA and/or SCS.

C. *In-Kind contribution*—represents the value of non-cash contributions provided by the recipient and other non-Federal sources. The order of priority for in-kind contributions are: high technology systems to be utilized to achieve program objectives; top level staff personnel and real and personal property donated by other public agencies, institutions and private organizations. Property purchased with Federal funds will not be considered as the recipient's in-kind contribution. Under no circumstances can the in-kind contribution exceed 50% of the total non-Federal contribution.

IV. *Costs*—demonstrate in narrative format that costs being proposed will give the minority business client and the government the most effective program possible in terms of quality, quantity, timeliness and efficiency.

Include the principal costs involved for achieving work plan under Cooperative Agreement by completing Part III—the Budget Information Section of the Request for Application.

Provide cost-sharing plan information in terms of methodology and format for billing the costs of management and technical assistance and specialized consulting services to clients.

Total project cost will be evaluated in terms of:

—Clear explanations of all expenditures proposed, and

—The extent to which the applicant can leverage Federal program funds and operate with *economy* and *efficiency*.

In conclusion, the applicant's schedule for start of the MBDC operation should

be included in Part II. Part II will be known as the applicant's plan of operation and will be incorporated into the Cooperative Agreement Award.

A detailed justification of all proposed costs is required for Part III and each item must be fully explained.

The failure to supply information in any given category of the criteria will result in the application being considered non-responsive and dropped from competitive review.

All information submitted is subject to verification by MBDA.

E. Disposition of Proposals

Notification of awards will be made by the Grants Officer, U.S. Department of Commerce (DOC) Organizations whose proposals are unsuccessful will be advised by MBDA, DOC.

F. Proposal Instructions and Forms

This program is subject to OMB Circular A–95 requirements.

Questions concerning the preceding information, copies of application forms, and applicable regulations can be obtained at the above address.

Nothing in this solicitation shall be construed as committing MBDA to divide available funds among all qualified applicants.

G. A pre-application conference to assist all interested applicants will be held at the above address on March 24, 1983 at 1:00 p.m.

Dated: March 1, 1983.

(11.800 Minority Business Development (Catalog of Federal Domestic Assistance))

Stanley W. Tate,

Regional Director.

BILLING CODE 3910–01–M

Scientific Advisory Board Ad Hoc Committee on Potential Military Utility of Manned National Space Station, Meeting

February 25, 1983.

The USAF Scientific Advisory Board Ad Hoc Committee on the Potential Military Utility of a Manned National Space Station will meet at the Pentagon, Washington, DC on March 24–25, 1983. The purpose of the meeting will be to review past studies and experimental results of pertinent Air Force programs. The meeting will convene at 8:30 a.m. and adjourn at 5:00 p.m. each day.

The meeting concerns matters listed in section 552b(c) of Title 5, United States Code, specifically subparagraph (1) thereof, and accordingly, will be closed to the public.

For further information, contact the Scientific Advisory Board Secretariat at 202–697–8845.

Office of the Secretary

Defense Science Board Task Force on Close Air Support; Advisory Committee Meeting

The Defense Science Board Task Force on Close Air Support will meet in closed session on 5 thru 7 April 1983 in the Pentagon, Arlington, Virginia.

The mission of the Defense Science Board is to advise the Secretary of Defense and the Under Secretary of Defense for Research and Engineering on scientific and technical matters as they affect the perceived needs of the Department of Defense.

At the meeting on 5 thru 7 April 1983, the Task Force will consider the potential for improving our capability to achieve sustained effectiveness of close air support in the future air-land battles.

In accordance with section 10(d) of the Federal Advisory Committee Act, Pub. L. No. 92–463, as amended (5 U.S.C. App. I (1976)), it has been determined that this DSB Task Force meeting concerns matters listed in 5 U.S.C. 552b(c)(1) (1976), and that accordingly these meetings will be closed to the public.

Dated: March 7, 1983.

M. S. Healy,

OSD Federal Register Liaison Officer, Washington Headquarters Service, Department of Defense.

BILLING CODE 3910–01–M

Overseas Dependents Schools; National Advisory Panel on the Education of Handicapped Dependents; Meeting

The National Advisory Panel on the Education of Handicapped Dependents will meet in open session from 9 a.m. to 4 p.m., 22–24 March 1983, at the Hoffman Building, II Room 12N56, 2460 Eisenhower Avenue, Alexandria, Virginia.

The mission of the Panel is to advise the Director, Department of Defense Dependents Schools (DoDDS), of unmet needs within the system for the education of handicapped children, to comment publicly on rules and regulations proposed for issuance by the Office of Dependents Schools (ODS) concerning education for the handicapped and on procedures for distribution of funds, and to assist ODS in developing and reporting all data and evaluation as may assist the Director in performance of her responsibilities under section 618 of Pub. L. 94–142.

The Panel will review the following areas: eligibility criteria, monitoring procedures, and program development.

This meeting is open to the public; however, due to space constraints, anyone wishing to attend should contact the ODS coordinator, Dr. Diane Goltz, Chief, Special Education, 2461 Eisenhower Avenue, Alexandria, Virginia 22331, (202) 325–7810.

Dated: March 2, 1983.

BILLING CODE 3910–01–M

DEPARTMENT OF ENERGY

Office of Assistant Secretary for International Affairs

Civil Uses of Atomic Energy; Proposed Subsequent Arrangement; Canada

Pursuant to section 131 of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2160) notice is hereby given of a proposed "subsequent arrangement" under Agreement for Cooperation Between the Government of the United States of America and the Government of Canada Concerning Civil Uses of Atomic Energy, as amended.

The subsequent arrangement to be carried out under the above mentioned agreement involves approval of a contract for the sale of 15,322 grams of uranium-233 to Atomic Energy of Canada, Ltd., for use in the study of thorium fuel cycles.

In accordance with section 131 of the Atomic Energy Act of 1954, as amended, it has been determined that the furnishing of the nuclear material will not be inimical to the common defense and security.

This subsequent arrangement will take effect no sooner than fifteen days after the date of publication of this notice.

For the Department of Energy.

Dated: March 4, 1983.

George Bradley,

Principal Deputy Assistant Secretary for International Affairs.

[FR Doc. 83–6158 Filed 3–9–83; 8:45 am]

BILLING CODE 6450–01–M

Civil Uses of Atomic Energy; Proposed Subsequent Arrangement; Japan

Pursuant to section 131 of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2160) notice is hereby given of a proposed "subsequent arrangement" under the Agreement for Cooperation Between the Government of the United States of America and the Government of Japan Concerning Civil Uses of Atomic Energy, as amended.

The subsequent arrangement to be carried out under the above mentioned agreement involves approval for the return of 13.4 kilograms of highly enriched research reactor fuel from the Kyoto University reactor in Osaka, Japan for reprocessing and storage at the DOE facility in Idaho.

In accordance with section 131 of the Atomic Energy Act of 1954, as amended, it has been determined that this subsequent arrangement will not be inimical to the common defense and security. This arrangement for the return of U.S. origin highly enriched uranium (HEU) is consistent with U.S. non-proliferation objectives in that it serves to reduce the amount of HEU abroad.

This subsequent arrangement will take effect no sooner than fifteen days after the date of publication of this notice.

For the Department of Energy.

Dated: March 4, 1983.

George J. Bradley, Jr.,

Acting Principal Deputy Assistant Secretary for International Affairs.

BILLING CODE 6450-01-M

Energy Information Administration

Agency Forms Under Review by the Office of Management and Budget

AGENCY: Energy Information Administration, DOE.

ACTION: Notice of submission of request for clearance to the Office of Management and Budget.

SUMMARY: Under provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35), Department of Energy (DOE) notices of proposed collections under review will be published in the **Federal Register** on the Thursday of the week following their submission to the Office of Management and Budget (OMB). Following this notice is a list of the DOE proposals sent to OMB for approval since Thursday, March 3, 1983. The listing does not contain information collection requirements contained in regulations which are to be submited under 3504(h) of the Paperwork Reduction Act.

Each entry contains the following information and is listed by the DOE sponsoring office: (1) The form number; (2) Form title; (3) Type of request, e.g., new, revision, or extension; (4) Frequency of collection; (5) Response obligation, i.e., mandatory, voluntary, or required to obtain or retain benefit; (6) Type of respondent; (7) An estimate of the number of respondents; (8) Annual respondent burden, i.e., an estimate of the total number of hours needed to fill out the form; and (9) A brief abstract describing the proposed collection.

DATE: Last Notice published Thursday, March 3, 1983

FOR FURTHER INFORMATION CONTACT:

John Gross, Director, Forms Clearance and Burden Control Division, Energy Information Administration, M.S. 1H-023, Forrestal Building, 1000 Independence Ave., NW., Washington, DC 20503

Jefferson B. Hill, Department of Energy, Desk Officer, Office of Management and Budget, 726 Jackson Place, NW., Washington, DC 20503

Vartkes Broussalian, Federal Energy Regulatory Commission, Desk Oficer, Office of Management and Budget, 726 Jackson Place, NW., Washington, DC 20503.

SUPPLEMENTARY INFORMATION: Copies of proposed collections and supporting documents may be obtained from Mr. Gross. Comments and questions about the items on this list should be directed to the OMB reviewer; comments should also be provided Mr. Gross. If you anticipate commenting on a form, but find that time to prepare these comments will prevent you from submitting comments promptly, you should advise the OMB reviewer of your intent as early as possible.

Issued in Washingtom, D.C., March 7, 1983

Yvonne M. Bishop,

Director, Statistical Standards, Energy Information Administration.

Federal Energy Regulatory Commission

[Docket No. CP83-176-000]

Consolidated Gas Supply Corp.; Application

March 7, 1983

Take notice that on January 31, 1983, Consolidated Gas Supply Corporation (Applicant), 445 West Main Street, Clarksburg, West Virginia 26301, filed in Docket No. CP83-176-000 an application pursuant to Section 7(c) of the Natural Gas Act, for a certificate of public convenience and necessity authorizing the continued sale of natural gas to Corning Natural Gas Corporation (Corning) under a combined service agreement which reflects Corning's acquisition of the utility assets of Southern Tier Gas Corporation (Southern Tier), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant proposes the sale of natural gas to Corning as successor to Southern Tier, another customer of Applicant, under a combined service agreement, dated November 19, 1982. The application states that no change in sales obligations, rates, or charges would result from the proposed combination of the Corning and Southern Tier service agreements and that no new or additional jurisdictional facilities are required to be constructed in connection with the instant proposal. It is asserted that the only change not a result of the combination of Applicant's existing service agreements is the addition to Article IV of the agreement of two new delivery points in the Village of Bath, New York. These delivery

points are off-system, wholly intrastate connections for delivery of locally-produced gas purchased by Consolidated and resold to Corning, without commingling with Consolidated's general system supply, it is asserted.

Any person desiring to be heard or to make any protest with reference to said application should on or before March 28, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held witout further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on it own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or to be represented at the hearing.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-6176 Filed 3-9-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CP83-188-000]

El Paso Natural Gas Co.; Application

March 7, 1983.

Take notice that on February 9, 1983, El Paso Natural Gas Company (Applicant), P.O. Box 1492, El Paso, Texas 79978, filed in Docket No. CP83-188-000 an application pursuant to Section 7(b) of the Natural Gas Act for permission and approval to abandon certain natural gas metering facilities and the deletion of a balancing point with Northwest Pipeline Corporation (Northwest) all located in La Plata County, Colorado, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant states that by order issued January 22, 1974, in Docket No. CP73-331, *et al.*, the Commission approved activities that were to be undertaken pursuant to a San Juan Gathering Agreement dated January 31, 1974, as amended, between Applicant and Northwest. The gathering agreement, it is said, provides for the mutual gathering and exchange of natural gas in the San Juan Basin area of northwestern New Mexico and southwestern Colorado. The authorizations, it is stated, granted by the Commission's January 22, 1974, order permitted Applicant and Northwest to utilize, among other things, a point of interconnection between their respective gathering systems in the San Juan Basin area referred to as the Point of Interconnection No. 2 in order to achieve the balancing of deliveries of exchange gas under the gathering agreement. Said Point of Interconnection No. 2 is located at the intersection of Applicant's Trunk 4A-39 pipeline and Northwest's Trunk K pipeline in La Plata County, Colorado, it is asserted.

Applicant states further that subsequent to the installation and initial operation of the Point of Interconnection No. 2 pressure differentials between gathering pipelines of Applicant and Northwest developed which made the exchange of balancing gas at that point impractical. Applicant asserts that as a direct consequence no balancing gas has been delivered by the parties at the Point of Interconnection No. 2 since December 1976. Moreover, it is stated, since the gathering agreement currently provides for four additional balancing points, Applicant and Northwest do not anticipate the need for the Point of Interconnection No. 2 in the future. Applicant and Northwest, it is said, have therefore entered into an amendatory agreement dated December 21, 1982, wherein the parties have mutually agreed to delete said balancing point from the gathering agreement. Accordingly, Applicant requests permission and approval to remove the idle metering facilities, consisting of two standard 12¾ inch O.D. orifice-type meter runs with appurtenances and place them in stock for future use.

Applicant states that no interruption, reduction or termination of natural gas service presently rendered by Applicant to any of its customers would result upon effectuation of the abandonment.

Any person desiring to be heard or to make any protest with reference to said application should on or before March 28, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that permission and approval for the proposed abandonment are required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. CI75-122-001, et al.]

Getty Oil Company, et al.; Applications To Amend Certificates To Establish Entitlement To Section 109 Price[1]

March 7, 1983.

Take notice that each of the Applicants listed herein has either filed

[1] This notice does not provide for consolidation for hearing of the several matters covered herein.

a petition to amend certificate pursuant to Section 7 of the Natural Gas Act or a notice of change in rate which is being treated as a petition to amend certificate to establish Applicant's right to collect the section 109 price consistent with the court order issued in *Tenneco Exploration Ltd v. FERC*, 649 F2d. 376, all as more fully described in the respective applications and amendments which are on file with the Commission and open to public inspection.

Any person desiring to be heard or to make any protest with reference to said applications should on or before March 22, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, petitions to intervene or protests in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure a hearing will be held without further notice before the Commission on all applications in which no petition to intervene is filed within the time required herein if the Commission on its own review of the matter believes that a grant of the certificates is required by the public convenience and necessity. Where a petition for leave to intervene is timely filed, or where the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or to be represented at the hearing.

BILLING CODE 6717-01-M

[Docket No. TA 83-2-37-000 (PGA 83-2, IPR 83-2)]

Northwest Pipeline Corporation; Change in Rates Pursuant to Purchased Gas Cost Adjustment

March 4, 1983.

Take notice that Northwest Pipeline Corporation (Northwest), on February 15, 1983, tendered for filing a proposed change in rates applicable to service rendered under rate schedules affected by and subject to Article 16, Purchase Gas Cost Adjustment Provisions ("PGAC"), contained in its FERC Gas Tariff, First Revised Volume No. 1. Such change in rates is for the purpose of (1) reflecting changes in Northwest's cost of purchased gas which will become effective during the period April 1, 1983 through September 30, 1983, applied to volumes purchased for the 12-month period ending December 31, 1982; (2) its change in unrecovered purchased gas costs since Northwest's prior PGAC filing dated August 16, 1982; and (3) projecting incremental surcharges to be assessed Northwest's affected direct and sales for resale customers pursuant to Order 49. Northwest has included as part of this change in rates costs associated with its pre-1973 leasehold production valued at the applicable NGPA rates pursuant to the March 2, 1982 mandate of the United States Court of Appeals for the Fifth Circuit in *Mid-Louisiana Gas Company* v. *FERC* 664 F.2d 530 (1981).

The current PGAC adjustment, for which notice is given herein, aggregates to a decrease of 1.079¢ per therm in all rate schedules affected by and subject to the PGAC. The annualized change in Northwest's rates is a decrease of $21,176,728. Northwest proposes to recover through a surcharge the adjusted balance of ($3,598,921) in its current deferral subaccount of FERC Account No. 191, as of December 31, 1982. The proposed change in rates from the PGAC and the other changes proposed by Northwest would result in a net decrease in its annual revenues from jurisdictional sales and service of $32,182,657.

Northwest is concurrently filing a notice of change in rates applicable to Section 13.7, Changes in Rates to Reflect Curtailment Credits, contained in its First Revised Volume No. 1 Tariff. In accordance with Article 13.7 contained in the aforementioned tariff, the current rate adjustments under the Demand Charge Credit Adjustment provision is to become effective on Northwest's PGAC adjustment date. Accordingly, both rate ajustments are reflected on the tendered First Amended Eighth Revised Sheet No. 10 which is proposed to become effective on April 1, 1983. Northwest also tendered for filing and acceptance Sixth Revised Sheet No. 10-B. Sixth Revised Sheet No. 10-B sets forth revised projected incremental pricing surcharges to become effective April 1, 1983 as part of the instant filing.

A copy of this filing has been served on all parties on record in Docket No. RP72-154, upon all jurisdictional customers, and affected state regulatory commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Sections 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such petitions or protests should be filed on or before March 9, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the

Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-6140 Filed 3-9-83; 8:45 am]

BILLING CODE 6717-01-M

[Project Nos. 3174-001, et al.]

Ptarmigan Resources and Energy, Inc., et al; Applications Filed With the Commission

Take notice that the following hydroelectric applications have been filed with the Federal Energy Regulatory Commission and are available for public inspection:

1a. Type of Application: License Less than 5MW

b. Project No: 3174-001

c. Date Filed: January 5, 1983

d. Applicant: Ptarmigan Resources and Energy, Incorporated

e. Name of Project: Vallecito

f. Location: Los Pinos River, near the City of Durango, La Plata County, Colorado

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)—825(r)

h. Contact Person: Johnnie A. Siegfried, President, Ptarmigan Resources and Energy, Inc., P.O. Box 292, Durango, Colorado 81301

i. Comment Date: April 29, 1983.

j. Description of Project: The proposed project would utilize the existing U.S. Bureau of Reclamation's Vallecito Dam, Reservoir and adjacent lands and would consist of: (1) A new concrete headwall/intake structure connected to the existing outlet works; (2) a new 1200-foot long, 16-foot deep, 60-foot wide power canal; (3) a new 8.5-foot diameter, 80-foot long welded steel penstock; (4) a new powerhouse containing a single 2,350 kW turbine-generator; (5) an outlet channel; (6) an 1,800-foot long, 12.4-kV transmission line; and (7) appurtenant facilities. The Project would generate up to 8,500,000 kWh annually. The application was filed during the term of Applicant's preliminary permit for Project No. 3174.

k. Purpose of Project: Energy produced at the project would be sold to the local electric cooperative

l. This notice also consists of the following standard paragraphs: A2, B, C, D1

2a. Type of Application: Major License (Over 5 MW)

b. Project No.: P-3344-002

c. Date Filed: January 10, 1983, and revised on January 20, 1983

d. Applicant: Town of Gassaway, West Virginia

e. Name of Project: Sutton

f. Location: On the Elk River, near the Towns of Sutton and Gassaway, Braxton County, West Virginia

g. Filed Pursuant to: 16 U.S.C. 791(a)-825(r)

h. Contact Person: Mr. Robert R. Sowa, 183 Main Street, Sutton, West Virginia 26601

i. Comment Date: April 27, 1983.

j. Description of Project: The proposed project would utilize the existing U.S. Army Corps of Engineers' Sutton Dam and would consist of: (1) New trash bars; (2) a new 16-foot-diameter penstock connected to three existing outlet sluices; (3) a new gated by-pass; (4) a new powerhouse containing two generating units having a total rated capacity of 12,000-kW operated under an 89-foot-head and at a flow of 1,730 cfs; (5) a tailrace; (6) a new switchyard; (7) a new 1,400-foot-long 138-kV transmission line; and (8) miscellaneous appurtenant facilities

Applicant proposes to reschedule the flow from the reservoir to generate the maximum energy during peak hours. Applicant estimates that the proposed project would cost $12,500,000. The application was filed during the term of Applicant's preliminary permit for Project No. 3344

k. Purpose of Project: Project energy would be sold to Allegheny Power System. Applicant estimates that the average annual energy output would be 50 GWh

l. This notice also consists of the following standard paragraphs: A2, B and C

3a. Type of Application: License (5 MW or Less)

b. Project No.: 4881-002

c. Date Filed: September 7, 1982

d. Applicant: Ada County, City of Boise, & Arthur L. Bloom

e. Name of Project: Barber Dam

f. Location: On Boise River, near Boise, in Ada County, Idaho

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)-825(r)

h. Contact Person: William Kenney, Perito, Duerk, Carlson and Pinco, Suite 400, 1140 Connecticut Ave. NW., Washington, D.C. 20036

i. Comment Date: April 8, 1983.

j. Competing Application: Project No. 3598. Date Filed: 10/22/80. Notice Issued: 2/1/81

k. Description of Project: The Barber Damn Project would consist of: (1) The existing 1,500-foot-long, 25-foot-high embankment and timber-crib Barber Dam; impounding (2) a 180-acre reservoir; (3) a new intake structure; (4) a concrete powerhouse containing three generating units with a total installed capacity of 4,140 kW; (5) a 100-foot-long concrete tailrace; and (6) a 175-foot-long transmission line. The run-of-the-river project would have an estimated average annual generation of 16.5 million kWh

l. Purpose of Project: The energy generated by the project would be sold to Idaho Power Company

m. This notice also consists of the following standard paragraphs: A2, B, C, D1

4a. Type of Application: Exemption of Small Hydroelectric Power Project

b. Project No: 6186-000

c. Date Filed: April 7, 1982

d. Applicant: Birch Creek Hydro

e. Name of Project: Birch Creek

f. Location: Inyo County, California

g. Filed Pursuant to: 18 CFR Part 4 Subpart K (1980)

h. Contact Person: Mr. K. Thomas Miller, President, Fluid Energy Systems, Inc., 2210 Wilshire Blvd., #899, Santa Monica, California 90403.

i. Comment Date: April 11, 1983.

j. Description of Project: The proposed project would consist of: (1) 2 proposed powerhouses, each containing 1 generating unit rated at 1,808 kW and 3,120 kW, respectively; (2) proposed diversion and intake structures; (3) proposed steel penstocks and pipelines, ranging in size from 24 inches to 42 inches; (4) proposed 13 kV and 34 kV transmission lines; (5) proposed solar power pumping system; and (6) appurtenant facilities. The average annual energy output would be 19,942,584 kWh. The Applicant would utilize lands owned by the U.S. Forest Service and the Bureau of Reclamation.

k. Purpose of Project: The Applicant proposes to sell the generated power to Southern California Edison.

l. This notice also consists of the following standard paragraph: A1, B, C, and D3a

5a. Type of Application: 5 MW Exemption

b. Project No: P-6802-000

c. Date Filed: October 26, 1982

d. Applicant: Snowbird, Ltd.

e. Name of Project: Little Cottonwood Creek/Tannersville

f. Location: Salt Lake County, Utah; Little Cottonwood Creek

g. Filed Pursuant to: Section 408 of the Energy Security Act of 1980 (Act) (16 U.S.C. 2705 and 2708 *as amended*).

h. Contact Person: Gale C. Corson, P.E., 594 SE Craven Rd., Bend, Oregon 97702.

i. Comment Date: April 8, 1983.

j. Description of Project: The proposed totally unconstructed and run-of-the-river project would consist of: (1) A reinforced concrete diversion structure, approximately 50.0 feet long and 6.0 feet high, and extending from bank to bank;

(2) a reservoir having negligible storage capacity; (3) a steel penstock, 36.0-inches in diameter, and approximately 5,550 feet long; (4) a powerhouse with two generating units, one 390 kW and the other 2,045 kW, giving a total installed capacity of 2,435 kW; (5) an underground 25-kV transmission line, approximately 0.2-miles long; and (6) appurtenant facilities. The Applicant estimates that the average annual energy output would be 7.2 million kWh. The project would be located within the Wasatch National Forest. Project power would be sold to the Utah Power & Light Company.

k. Purpose of Exemption: An exemption, if issued, gives the Exemptee priority of control, development, and operation of the project under the terms of the exemption from licensing, and protects the Exemptee from permit or license applicants that would seek to take or develop the project.

l. This notice also consists of the following standard paragraphs: D3a, A1, B and C.

6a. Type of Application: License (under 5 MW)

b. Project No.: 6951–000

c. Date Filed: December 21, 1982

d. Applicant: Oglethorpe Power Corporation

e. Name of Project: Tallassee Shoals Hydro Project

f. Location: The Middle Oconee River in Clarke and Jackson Counties, Georgia

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r)

h. Contact Person: Mr. Donald L. Martin, Oglethorpe Power Corporation, 2888 Woodcock Blvd., Atlanta, Georgia 30346

i Comment Date: April 29, 1983

j. Description of Project: The proposed project would consist of: (1) An existing quarry rock dam 365 feet long and 25 feet high with a 70-foot-wide breach; (2) a proposed impoundment with a surface area of 37 acres and with a storage capacity of 350 acre-feet; (3) the proposed installation of two 950 kW generator/turbine units for a total installed capacity of 1.9 MW; (4) the proposed refurbishing of a 1400-foot-long and 20-foot-wide headrace; (5) the proposed refurbishing of two existing penstocks which are 8-feet in diameter and which are 60 and 100 feet long respectively; (6) the proposed reconstruction of a powerhouse on the foundation works of the original powerhouse; (7) the proposed interconnection with Georgia Power Company less than one-mile from the project; and (8) appurtenant facilities. The average annual generation is estimated to be 8.0 GWh

k. The notice also consists of the following standard paragraphs: A2, B, C, and D1

7a. Type of Application: Preliminary Permit

b. Project No.: 6960–000

c. Date Filed: December 27, 1982

d. Applicant: Midvale Irrigation District

e. Name of Project: Pilot Canal Chute Hydroelectric Power Development

f. Location: Pilot Canal, Fremont County, Wyoming

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r)

h. Contact Person: Mr. Jack Long, Manager, Midvale Irrigation District, Post Office Box 126, Pavillion, Wyoming 82523

i. Comment Date: May 2, 1983

j. Description of Project: The proposed project would consist of: (1) A proposed diverion structure at the head of the existing Pilot Canal Chute; (2) a proposed penstock; (3) a proposed powerhouse at the bottom of the Pilot Canal Chute, with an estimated installed capacity of 2,500 kW; (4) a proposed transmission line to an existing substation about 6 miles from the site; and (5) appurtenant facilities. Applicant estimates the average annual generation to be 7.0 GWh

k. Purpose of Project: The Applicant proposes to market the power generated in an appropriate local power market

l. This notice also consists of the following standard paragraphs: A4a, A4c, B, C, and D2

8a. Type of Application: Minor License

b. Project No: 6961–000

c. Date Filed: January 3, 1983

d. Applicant: Ray E. Toney

e. Name of Project: South Canal Hydroelectric

f. Location: Adjacent to the existing by-pass chute connecting the High Line Canal to the South Canal in the Stony Creek basin, on U.S. Bureau of Reclamation land in Glenn County, California.

g. Filed Pursuant to: Federal Power Act (16 U.S.C. 791(a)–825(r))

h. Contact Person: Larry A. Toney, P.O. Box 1342, Redding, California 96099

i. Comment Date: April 29, 1983.

j. Description of Project: The proposed project would utilize an existing irrigation canal and would consist of: (1) A gated intake structure; (2) two 48-inch-diameter, 130-foot-long concrete penstocks; (3) two turbine-generators with a total rated capacity of 350 Kw and an average annul output of 1.2 GWh; (4) a control building; and (5) a 150-foot-long transmission line connecting to an existing power line. Project construction would include extending the access road 130 feet and adding a 12-foot by 15-foot parking area. The Applicant expects the project to cost $400,000.

k. Purpose of Project: To generate electric power for sale to the Pacific Gas and Electric Company.

l. This notice also consists of the following standard paragraphs: A2, B, C and D1

9a. Type of Application: Preliminary Permit

b. Project No.: 6969–000

c. Date Filed: January 10, 1983

d. Applicant: Winterflow Hydro, Inc.

e. Name of Project: Little Sardine Creek

f. Location: On Little Sardine Creek, in Linn County, Oregon

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r)

h. Contact Person: Mr. Thomas J. Gallagher, President, Winterflow Hydro, Inc., P.O. Box 40352, Portland, Oregon 97240

i. Comment Date: April 29, 1983.

j. Description of Project: The proposed project would consist of: (1) A 4-foot-high, 36-foot-long diversion structure; (2) a 3-foot-high, 24-foot-long intake structure; (3) a 30-inch-diameter, 600-foot-long conduit; (4) a 12-inch-diameter, 4,500-foot-long penstock; (5) a powerhouse containing a single generating unit with a rated capacity of 305 kW, operating under a head of 1,200 feet; and (6) a transmission line tying into an existing Consumers Power, Inc., line. The average annual energy output would be 1,336,000 kWh.

A preliminary permit, if issued does not authorize construction. The Applicant seeks a 24-month permit to study the feasibility of constructing and operating the project. The estimated cost for conducting these studies is $25,000. No new access roads will be required for the purpose of conducting these studies.

k. Purpose of Project: Project power will be sold to Consumers Power, Inc.

l. This notice also consists of the following standard paragraphs: A4a, A4c, B, C and D2

10a. Type of Application: Preliminary Permit

b. Project No: 7014–000

c. Date Filed: January 20, 1983

d. Applicant: Malta, *et. al.* Irrigation Districts of Montana

e. Name of Project: Fresno Dam Hydro Project

f. Location: Havre, Hill County, Montana

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)—825(r)

h. Contact Person: Mr. Sever Enkerud, Tampico Route, Glasgow, Montana 59230

i. Comment Date: April 8, 1983.

j. Competing Application: Project No. 6750–000 Date Filed: October 4, 1982. Notice Due Date: February 11, 1983.

k. Description of Project: The proposed project would be located at the Bureau of Reclamation's Fresno Dam and consists of: (1) A proposed penstock; (2) a new powerhouse to be located on the east side of the existing stilling basin with an installed capacity of 2.6 MW and an average annual generation of 8.8 GWh; (3) transmission lines; and (4) appurtenant facilities. All power generated would be sold to Montana Power Company or a local utility.

l. This notice also consists of the following standard paragraphs: A3, B, C, and D2

11a. Type of Application: Preliminary Permit

b. Project No: 7042–000

c. Date Filed: February 1, 1983

d. Applicant: Cities of Minden, Natchitoches and Ruston, Louisiana

e. Name of Project: Red River Lock and Dam #2

f. Location: Red River mile 89, near the towns of Vick and Pollard, Rapides Parish, Louisiana

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)—825(r)

h. Contact Person: Ralph L. Laukhuff, Jr., Vice President, Forte and Tablada, Inc., P.O. Box 64844, Baton Rouge, Louisiana 70896

i. Comment Date: April 29, 1983.

j. Description of Project: The proposed project would utilize the U.S. Army Corps of Engineers Red River Lock and Dam #2. The project would consist of a new powerhouse located adjacent to or integral with the Corps' dam structure, containing turbine-generators with a total rated capacity of 39 MW, a transmission line tie-in and appurtenant facilities. The project would produce up to 140,000,000 kWh annually.

k. Purpose of Project: Energy produced at the project would be utilized in the Applicants' municipal electric system for distribution to their customers.

l. This notice also consists of the following standard paragraphs: A4b, A4d, B, C and D2

m. Proposed Scope of Studies under Permit: Applicant seeks issuance of a preliminary permit for a period of two years, during which time it would perform surveys and geologic investigations, coordinate studies with the U.S. Army Corps of Engineers, determine the economic feasibility of the project, reach final agreement on sale of project power, secure financing commitments, consult with Federal, State, and local government agencies concerning the potential environmental effects of the project, and prepare an application for FERC license, including an environmental report. Applicant estimates the cost of studies under permit would be $25,000.

12a. Type of Application: Preliminary Permit

b. Project No.: 7043–000

c. Date Filed: February 1, 1983

d. Applicant: Cities of Minden, Natchitoches and Ruston, Louisiana

e. Name of Project: Red River Lock and Dam #1

f. Location: Red River mile 50, near the town of Marksville, Catachoula Parish, Louisiana

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r)

h. Contact Person: Ralph L. Laukhuff, Jr., Vice President, Forte and Tablada, Inc., P.O. Box 64844, Baton Rouge, Louisiana 70896

i. Comment Date: May 2, 1983.

j. Description of Project: The proposed project would utilize the U.S. Corps of Engineers Red River Lock and Dam #1 which is presently under construction. The project would consist of a new powerhouse located adjacent to or integral with the Corps' dam structure, containing turbine-generators with a total rated capacity of 25 MW, a transmission line tie-in, and appurtenant facilities. The project would produce up to 100,000,000 kWh annually.

k. Purpose of Project: Energy produced at the project would be utilized in the Applicants' municipal electric system for distribution to their customers.

l. This notice also consists of the following standard paragraphs: A4a, A4c, B, C and D2

m. Proposed Scope of Studies under Permit: Applicant seeks issuance of a preliminary permit for a period of two years, during which time it would perform surveys and geologic investigations, coordinate studies with the U.S. Army Corps of Engineers, determine the economic feasibility of the project, reach final agreement on sale of project power, secure financing commitments, consult with Federal, State, and local government agencies concerning the potential environmental effects of the project, and prepare an application for FERC license, including an environmental report. Applicant estimates the cost of studies under permit would be $25,000.

13a. Type of Application: Preliminary Permit

b. Project No.: 7053–000

c. Date Filed: February 3, 1983

d. Applicant: Balance One, Incorporated

e. Name of Project: Circular Dam

f. Location: Charles River, near the towns of Needham and Newton, Norfolk and Middlesex Counties, Massachusetts

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r)

h. Contact Person: Allen Benjamin, 99 Concord Road, Wayland, Massachusetts 01778

i. Comment Date: April 29, 1983.

j. Description of Project: The proposed project would consist of: (1) An existing 11-foot high, 84-foot long granite block dam; (2) a reservior with no storage capacity at elevation 70.35 feet M.S.L.; (3) a new intake and gate/trash rack assembly; (4) a new 170-foot long reinforced concrete penstock; (5) a new powerhouse containing turbine-generators with a total rated capacity of 275 kW; (6) a new 50-foot long tailrace channel; (7) a 100-foot long transmission line; and (8) appurtenant facilities. The dam is owned by the Metropolitan District Commission. The project would generate up to 1,060,000 kWh annually.

k. Purpose of Project: Energy produced at the project would be sold to the Metropolitan District Commission or Boston Edison Company.

l. This notice also consists of the following standard paragraphs: A4a, A4c, B, C, and D2

m. Proposed Scope of Studies under Permit: Applicant seeks issuance of a preliminary permit for a period of 18 months, during which time it would perform surveys and geologic investigations, determine the economic feasibility of the project, reach final agreement on sale of project power, secure financing commitments, consult with Federal, State, and local government agencies concerning the potential environmental effects of the project, and prepare an application for FERC license, including an environmental report. Applicant estimates the cost of studies under the permit would be less than $61,000.

14a. Type of Application: Change in Land Rights

b. Project No.: 485–010

c. Date Filed: August 11, 1982

d. Applicant: Georgia Power Company

e. Name of Project: Bartlett's Ferry Hydropower Project

f. Location: Layfield Creek Branch of Bartlett's Ferry Reservoir in Harris County, Georgia

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r)

h. Contact Person: Georgia Power Company, Land Department, P.O. Box 4545, Atlanta, Georgia 30303

i. Comment Date: April 8, 1983

j. Description of Project: The Applicant seeks Commission approval

to lease approximately 1 acre of project land to the Harris County Commission of Harris County, Georgia, for the construction of a raw water pumping station consisting of: (1) A proposed floating platform positioned approximately 50 feet from shore upon which will be mounted two 750 gallon per minute pumps; (2) a proposed walkway from the shoreline to the floating platform; (3) a proposed 6-inch flange fitting cast iron water line supported by the walkway and the platform with flexible connections at the pivot points on the land and the platform through which water will be transported to the land; and (4) two proposed water intake lines extending 8 feet below the platform. The Harris County Commission intends to use the water in their municipal water works system. The estimated average water withdrawal rate will be approximately 1.2 million gallons per day initially; will increase to 1.8 million gallons per day by 1990; 2.6 million gallons per day by the year 2000; and is estimated to be 4.4 million gallons per day by the year 2014.

The water filtration plant will be located adjacent to Bartlett's Ferry Road approximately 1600 feet from the pumping station. The plant's location is outside of the project boundary defined in the license held by Georgia Power Company for Bartlett's Ferry Hydropower Project.

k. This notice also consists of the following standard paragraphs: B, C and D2.

15a. Type of Application: Application for License of 5 MW or Less

b. Project No: 6188–001

c. Date Filed: August 6, 1982

d. Applicant: Camille E. and Walton B. Held, A.W. Stuart Trust, W. Titus Nelson, and Dale E. Grenoble

e. Name of Project: Tinnemaha and Red Mountain Creeks

f. Location: County of Inyo, California

g. Filed Pursuant to: Order No. 185, RM 81–10

h. Contact Person: Camille E. Held, P.O. Box 1298, Ventura, California 93002 and Dr. Dale E. Grenoble, 2977 Willow Lane, Suite 201, Thousand Oaks, California 91361.

i. Comment Date: April 18, 1983.

j. Competing Application: Project No. 6186–001 Date Filed: April 7, 1982

k. Description of Project: The proposed project would consist of: (1) A proposed concrete masonry unit powerhouse containing 1 generating unit rated at 950 kW; (2) proposed penstock, conduits, and diversion structures; (3) proposed 12 kV transmission line; and (4) appurtenant facilities. The estimated average annual energy output would be 2,613,210 kWh. The Applicant would utilize lands owned by the U.S. Forest Service.

l. Purpose of Project: The Applicant proposes to sell the generated power to the Los Angles Department of Water and Power or the Southern California Edison.

m. The notice also consists of the following standard paragraph: A3, B, C and D1.

16a. Type of Application: Preliminary Permit

b. Project No.: 6930–000

c. Date Filed: December 16, 1982

d. Applicant: Thomas B. Weathers, Wilson B. Humphries and Roland M. Webb

e. Name of Project: Pine Crest Lake

f. Location: Tuolumne County, California; South Fork Stanislaus River

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r)

h. Contact Person: Mr. Wilson Humphries, 17104 Mono Vista Road South, Soulsbyville, California 95372

i. Comment Date: May 9, 1983.

j. Description of Project: A preliminary permit does not authorize construction. The proposed project would consist of: (1) The existing 135-foot-high Pinecrest Lake Dam and Reservoir having an 18,300-acre-feet capacity (also known as the Strawberry Reservoir) owned and operated by the Pacific Gas and Electric Company as a flow regulation component of Project No. 2130; (2) a 21-inch-diameter, 500-foot-long penstock; (3) a powerhouse with a total installed capacity of 375 kW; and (4) a 1,200-foot-long, 4-kV transmission line connecting with an existing Pacific Gas and Electric Company transmission line.

The Applicant does not propose to construct any new roads. The Applicant seeks issuance of a preliminary permit for a period of 36 months during which it would conduct engineering, economic and environmental studies and prepare an FERC license application. These studies are estimated to cost $33,000. The proposed project would affect United States lands within the Stanislaus National Forest.

k. Purpose of Project: The estimated annual output of 2 million kWh from the proposed project would be sold to the Pacific Gas and Electric Company.

l. This notice also consists of the following standard paragraphs: A4a, A4c, B, C and D2.

17a. Type of Application: Preliminary Permit

b. Project No.: P–7003–000

c. Date Filed: January 18, 1983

d. Applicant: The Phoenix Hydro Corporation

e. Name of Project: Morgan Dam

f. Location: on West Canada Creek, in the Towns of Russia and Trenton, Herkimer and Oneida Counties, New York

g. Filed Pursuant to: 16 U.S.C. 791(a)–825(r)

h. Contact Person: Diane L. Schoonmaker, 2701 Howlett Hill Road, Marcellus, New York 13108

i. Comment Date: May 9, 1983.

j. Description of Project: The proposed project would comprise the following existing facilities owned by the New York State Department of Transportation: (1) A 175-foot-long 8-foot-high concrete overflow-type dam; (2) a 25-foot-wide 10-foot-high taintor gate control at the right (west) bank; and (3) a reservoir having a one-acre surface area and a negligible storage capacity at surface elevation 752 feet M.S.L. datum.

Applicant would add the following facilities: (1) A 5-foot-diameter 75-foot-long steel penstock; (2) a powerhouse containing a generating unit having a rated capacity of 100-kW operated under a 14-foot-head; (3) a 1,000-foot-long 46-kV transmission line; and (4) miscellaneous appurtenances.

k. Purpose of Project: Project energy would be sold to Niagara Mohawk Power Corporation. Applicant estimates that the average annual generation would be 1,200,000 kWh.

l. This notice also consists of the following standard paragraphs: A4a, A4c, B, C and D2.

m. Proposed Scope and Cost of Studies under Permit: A preliminary permit, if issued, does not authorize construction. Applicant seeks issuance of a preliminary permit for a period of 24 months, during which time it would perform studies and would prepare an application for an FERC license. Applicant estimates the cost of the work under the permit would be $30,000.

8a. Type of Application: Exemption (5 MW or less)

b. Project No: 7016–000

c. Date Filed: January 24, 1983

d. Applicant: City of Hailey, Idaho

e. Name of Project: Hailey

f. Location: On Indian Creek Springs, near Hailey, within BLM lands, in Blaine County, Idaho

g. Filed Pursuant to: Section 408, Energy Security Act of 1980, 16 U.S.C. §§ 2705 and 2708 *as amended*

h. Contact Person: Wordell Rainey, Mayor, City of Hailey, P.O. Box 945, Hailey, Idaho 83333

i. Comment Date: Apr. 18, 1983.

j. Description of Project: The proposed Hailey Project would consist of: (1) The existing spring collection system, comprising 10-inch-diameter infiltration pipes and collection box; (2) a 2.5-mile-long, 12-inch-diameter pipeline; (3) a 700-foot-long, 10-inch-diameter steel

penstock, bifurcated from the water main; (4) a powerhouse containing one generating unit rated at 46 kW; and (5) an 800-foot-long, underground transmission line. The average annual energy generation is estimated to be 408,000 kWh.

k. Purpose of Project: Power will be sold to Idaho Power Company.

l. This notice also consists of the following standard paragraphs: A1, B, C, D3a

9a. Type of Application: Preliminary Permit

b. Project No: 7029–000

c. Date Filed: January 247 1983

d. Applicant: Grisdale Hill Company

e. Name of Project: Fern Ridge Dam

f. Location: Lane County, Oregon; Fern Ridge Reservoir

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r)

h. Contact Person: Ms. Joy Leong, Morrison and Foerster, 1920 N Street, N.W., Washington, D.C. 20036.

i. Comment Date: May 9, 1983.

j. Description of Project: The proposed project would consist of: (1) Two 9-foot-diameter, 300-foot-long penstocks connected to the existing outlet works from the existing Fern Ridge Dam owned and operated by the U.S. Army Corps of Engineers; (2) a powerhouse with a total installed capacity of 2.7. MW; (3) an outdoor switchyard; and (4) a 300-foot-long, 21-kV transmission line connecting with an existing transmission line. A preliminary permit does not authorize construction. The Applicant seeks a 24-month permit to study the feasibility of constructing and operating the project and does not propose to construct any new roads.

k. Purpose of Project: The estimated 9.5 million kWh generated annually by the project would be sold to the Bonneville Power Administration or a local utility.

l. This notice also consists of the following standard paragraphs: A4a, A4c, B, C and D2

Competing Applications

A1. Exemptions for Small Hydroelectric Power Project under 5MW Capacity—Any qualified license applicant desiring to file a competing application must submit to the Commission, on or before the specified comment date for the particular application, either a competing license application that proposes to develop at least 7.5 megawatts in that project, or a notice of intent to file such a license application. Submission of a timely notice of intent allows an interested person to file the competing license application no later than 120 days after the specified comment date for the particular application. Applications for preliminary permit will not be accepted.

A notice of intent must conform with the requirements of 18 CFR 4.33 (b) and (c) (1982). A competing license application must conform with the requirements of 18 CFR 4.33 (a) and (d).

A2. Applications for License—Anyone desiring to file a competing application must submit to the Commission, on or before the specified comment date for the particular application, either the competing application itself (see 18 CFR 4.33 (a) and (d), and Part 16, where applicable) or a notice of intent (see 18 CFR 4.33 (b) and (c)) to file a competing application. Submission of a timely notice of intent allows an interested person to file an acceptable competing application no later than the time specified in § 4.33(c) or §§ 4.101 to 4.104 (1982).

A3. Public notice of the filing of the initial application, which has already been given, established the due date for filing competing applications or notices of intent. In accordance with the Commission's regulations, no competing application for license, exemption or preliminary permit, or notices of intent to file competing applications, will be accepted for filing in response to this notice (see 18 CFR 4.30 to 4.33 or §§ 4.101 to 4.104 (1982), as appropriate). Any application for license or exemption from licensing, or notice of intent to file a license or an exemption application, must be filed in accordance with the Commission's regulations (see 18 CFR 4.30 to 4.33 or §§ 4.101 to 4.104 (1982), as appropriate).

Preliminary Permits

A4a. Existing Dam or Natural Water Feature Project—Anyone desiring to file a competing application for preliminary permit for a proposed project at an existing dam or natural water feature project, must submit the competing application to the Commission on or before 30 days after the specified comment date for the particular application (see 18 CFR 4.30 to 4.33 (1982)). A notice of intent to file a competing application for preliminary permit will not be accepted for filing.

A4b. No Existing Dam—Anyone desiring to file a competing application for preliminary permit for a proposed project where no dam exists or there are proposed to be major modifications, must submit to the Commission on or before the specified comment date for the particular application, the competing application itself, or a notice of intent to file such an application (see 18 CFR 4.30 to 4.33 (1982)).

A4c. The Commission will accept applications for license or exemption from licensing, or a notice of intent to submit such an application in response to this notice. A notice of intent to file an application for license or exemption must be submitted to the Commission on or before the specified comment date for the particular application. Any application for license or exemption from licensing must be filed in accordance with the Commission's regulations (see 18 CFR 4.30 to 4.33 or §§ 4.101 to 4.104 (1982), as appropriate).

A4d. Submission of a timely notice of intent to file an application for preliminary permit allows an interested person to file an acceptable competing application for preliminary permit no later than 60 days after the specified comment date for the particular application.

B. *Comments, Protests, or Motions to Intervene*—Anyone may submit comments, a protest, or a motion to intervene in accordance with the requirements of the Rules of Practice and Procedure, 18 CFR 385.210, .211, .214 (1982). In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or motions to intervene must be received on or before the specified comment date for the particular application.

C. *Filing and Service of responsive Documents*—Any filings must bear in all capital letters the titles "COMMENTS", "NOTICE OF INTENT TO FILE COMPETING APPLICATION", "COMPETING APPLICATION", "PROTEST" or "MOTION TO INTERVENE", as applicable, and the Project Number of the particular application to which the filing is in response. Any of the above named documents must be filed by providing the original and the number of copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208 RB at the above address. A copy of any notice of intent, competing application or motion to intervene must also be served upon each representative of the Applicant specified in the particular application.

Agency Comments

D1. License applications (5 MW or less capacity)—Federal, State, and local agencies that receive this notice through direct mailing from the Commission are requested to provide comments pursuant to the Federal Power Act, the Fish and Wildlife Coordination Act, the Endangered Species Act, the National Historic Preservation Act, the Historical and Archeological Preservation Act, the National Environmental Policy Act, Pub. L. No. 88–29, and other applicable statutes. No other formal requests for comments will be made.

Comments should be confined to substantive issues relevant to the issuance of a license. A copy of the application may be obtained directly from the Applicant. If an agency does not file comments with the Commission within the time set for filing comments, it will be presumed to have no comments. One copy of an agency's comments must also be sent to the Applicant's representatives.

D2. Preliminary permit applications—Federal, State, and local agencies are invited to file comments on the described application. (A copy of the application may be obtained by agencies directly from the Applicant.) If an agency does not file comments within the time specified for filing comments, it will be presumed to have no comments. One copy of an agency's comments must also be sent to the Applicant's representatives.

D3a. Exemption applications (5 MW or less capacity)—The U.S. Fish and Wildlife Service, The National Marine Fisheries Service, and the State Fish and Game agency(ies) are requested, for the purposes set forth in Section 408 of the Act, to file within 60 days from the date of issuance of this notice appropriate terms and conditions to protect any fish and wildlife resources or to otherwise carry out the provisions of the Fish and Wildlife Coordination Act. General comments concerning the project and its resources are requested; however, specific terms and conditions to be included as a condition of exemption must be clearly identified in the agency letter. If an agency does not file terms and conditions within this time period, that agency will be presumed to have none. Other Federal, State, and local agencies are requested to provide any comments they may have in accordance with their duties and responsibilities. No other formal requests for comments will be made. Comments should be confined to substantive issues relevant to the granting of an exemption. If an agency does not file comments within 60 days from the date of issuance of this notice, it will be presumed to have no comments. One copy of an agency's comments must also be sent to the Applicant's representatives.

D3b. Exemption applications (Conduit)—The U.S. Fish and Wildlife Service, The National Marine Fisheries Service, and the State Fish and Game agency(ies) are requested, for the purposes set forth in Section 30 of the Act, to file within 45 days from the date of issuance of this notice appropriate terms and conditions to protect any fish and wildlife resources or otherwise carry out the provisions of the Fish and Wildlife Coordination Act. General comments concerning the project and its resources are requested; however, specific terms and conditions to be included as a condition of exemption must be clearly identified in the agency letter. If an agency does not file terms and conditions within this time period, that agency will be presumed to have none. Other Federal, State, and local agencies are requested to provide comments they may have in accordance with their duties and responsibilities. No other formal requests for comments will be made. Comments should be confined to substantive issues relevant to the granting of an exemption. If an agency does not file comments within 45 days from the date of issuance of this notice, it will be presumed to have no comments. One copy of an agency's comments must also be sent to the Applicant's representatives.

Dated: March 7, 1983.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-6195 Filed 3-9-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. G-7004-011]

Pennzoil Company; Second Amendment to Application for Immediate Clarification or Abandonment Authorization

March 4, 1983.

Take notice that on March 3, 1983, Pennzoil Company (Pennzoil), P.O. Box 2967, Houston, Texas 77001, filed in Docket No. G–7004–011 an application for immediate clarification of Order dated November 24, 1980 in the above-referenced docket, or abandonment authorization for as much gas as is required to allow sales of gas to nine new applicants for residential service in West Virginia in addition to those applicants specified in Pennzoil's original application filed on October 25, 1982. In filing this Second Amendment to its original application, Pennzoil incorporates herein and renews each of the requests for clarification or abandonment authorization set forth in that application. Service to these applicants would be provided from gas supplies that would otherwise be sold to Consolidated Gas Supply Corporation (Consolidated), an interstate pipeline.

Pennzoil states that immediate action is necessary to protect the health, welfare and property of the applicants and customers in West Virginia who depend upon Pennzoil for their gas supply needs. Pennzoil also states that immediate action also is required because, by order dated October 21, 1982, the Public Service Commission of West Virginia directed Pennzoil "to show cause, if any it can, why it should not be found to be in violation of its duty . . . to provide adequate gas service to all applicants . . . and why it should not be required to provide service to domestic customers in West Virginia when requests are received for same."

Consolidated has indicated that it has no objection to the requested authorization.

It appears reasonable and consistent with the public interest in this case to prescribe a period shorter than normal for the filing of protests and petitions to intervene. Therefore, any person desiring to be heard or to make any protest with reference to said amendment to the original application should on or before March 11, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211, .214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to the proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules. Any person previously granted intervention in connection with Pennzoil's original application in Docket No. G–7004–006 need not seek intervention herein. Each such person will be treated as having also intervened in Docket No. G–7004–011.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure a hearing will be held without further notice before the

Commission on the amendment to the original application in the event no petition to intervene is filed within the time required herein if the Commission on its own review of the matter believes that a grant of the authorization for the proposed abandonment is required by the public convenience and necessity. Where a petition for leave to intervene is timely filed, or where the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or to be represented at the hearing.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-6101 Filed 3-9-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CP83-199-000]

Sabine Pipe Line Company; Application

March 7, 1983.

Take notice that on February 16, 1983,[1] Sabine Pipe Line Company (Applicant), P.O. Box 52332, Houston, Texas 77052, filed in Docket No. CP83-199-000 an application pursuant to Section 7 of the Natural Gas Act and Subpart F of Part 157 of the Commission's Regulations for a blanket certificate of public convenience and necessity authorizing the construction, acquisition, and operation of certain facilities and the transportation and sale of natural gas and for permission and approval to abandon certain facilities and service, all as more fully set forth in the application on file with the Commission and open to public inspection.

Any person desiring to be heard or to make any protest with reference to said application should on or before March 28, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate and permission and approval for the proposed abandonment are required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. EL83-1-000]

Sacramento Municipal Utility District v. Pacific Gas & Electric Company; Order Denying Requests for Declaratory Order and Setting Complaint for Hearing

Issued March 7, 1983.

Sacramento Municipal Utility District (SMUD) and Pacific Gas and Electric Company (PG&E) are parties to an interconnection agreement which they call the Power Sale, Exchange and Integration Contract and which is on file with this Commission.[1] On October 21, 1982, SMUD filed a complaint against PG&E alleging that PG&E is wrongfully charging SMUD for stand-by capacity and energy under the terms of this agreement. SMUD also alleges that PG&E has unlawfully withheld payment of uncontested charges due to SMUD for other transactions governed by the agreement as a set-off without seeking Commission approval. SMUD requests that the Commission issue a declaratory order (1) finding that PG&E's allocation of costs for stand-by capacity is unlawful, and (2) requiring a just and reasonable allocation of those costs. Pending resolution of this controversy, SMUD also requests that PG&E be prohibited from collecting costs associated with "out of area purchases" through set-offs or other means.

Notice of the complaint was published in the **Federal Register**, with comments due on or before December 3, 1982. On December 3, 1982, PG&E filed its answer to the complaint. No interventions have been filed.

SMUD subsequently requested interim relief from further set-offs by PG&E in a motion filed on October 22, 1982, and a petition filed on November 30, 1982. These requests were denied by a Commission order issued December 20, 1982, without prejudice to our making a determination on the merits of the complaint.

Background

Among other things, the power sale agreement entitles PG&E to purchase excess capacity from SMUD. The rate for these purchases is determined according to the agreement, and the amounts charged for this service are uncontested.

The agreement also entitles SMUD to stand-by capacity from PG&E to cover deficiencies on SMUD's system. Article 6 of the power sale agreement provides in pertinent part:

(a) Commencing on the date Rancho Seco Unit No. 1, becomes Commercially Operable, Pacific shall use its best efforts to provide, at Points of Delivery, capacity and energy standby to meet Sacramento's load deficiencies pursuant to this Article for scheduled and unscheduled outages, and for delays in completion, of Sacramento Resources and associated Sacramento transmission facilities and Sacramento shall return energy as hereinafter set forth; *provided* such capacity standby for any such delay in completion shall not exceed the Forecasted Capability of the delayed resource.

(b) In exchange for Reserve Capacity and overhaul capacity provided by Sacramento pursuant to Articles 3 and 4, Pacific shall make available capacity to Sacramento for such outages at no charge except to the extent that unscheduled outages, scheduled outages extending beyond the scheduled period or delays in completion of Sacramento Resources and other Sacramento facilities cause Pacific to incur additional costs to obtain capacity from outside the Area to maintain adequate reliable service within the Area. Sacramento shall pay Pacific the amount of such costs.

---

[1] The application was initially tendered for filing on February 16, 1983. However, the fee required by § 159.1 of the Regulations under the Natural Gas Act (18 CFR 159.1) was not paid until February 16, 1983; thus filing was not completed until the latter date.

[1] Pacific Gas & Electric Company, Rate Schedule FPC No. 45, filed December 21, 1970. The contract is dated June 4, 1970.

PG&E has billed SMUD approximately $7 million [2] for outage capacity purchased outside of the contract area pursuant to Article (6)(b) between January and July of 1982. When SMUD had still not paid these charges in October of 1982, PG&E began withholding its payments for excess capacity purchased from SMUD as an offset in order to recover the disputed charges. By December 16, 1982, PG&E had offset the entire amount in dispute. SMUD now acknowledges that it owes PG&E $1,131,995 for service under Article 6(b), but SMUD has not voluntarily paid PG&E any of that amount.

SMUD asserts that PG&E's allocation of the cost of out-of-area purchases does not conform to PG&E's filed rate. Thus, SMUD asks that PG&E's present allocation of these costs be declared unlawful and that a just and reasonable allocation be substituted.

SMUD further alleges that only a small portion of PG&E's purchases between January and July of 1982 were in fact caused by SMUD's outages. According to SMUD, whenever PG&E purchases out-of-area capacity when Rancho Seco Unit No. 1 is out of service or is expected to be out of service, PG&E improperly allocates to SMUD the entire cost of the purchase or the cost of purchasing an amount of capacity equal to the capacity of Rancho Seco Unit No. 1, whichever is less. SMUD also alleges that PG&E fails to account for the extent to which PG&E's outages or delay in the completion of PG&E resources contribute to the need for the purchase.

It is SMUD's position that the cost of out-of-area purchases should be equitably allocated between SMUD and PG&E. An equitable allocation, according to SMUD, would include (1) considering Area reserves as available to "the integrated [PG&E–SMUD] system" because SMUD and PG&E contribute an equal percentage of their capacity to Area reserves; (2) making PG&E responsible for that portion of out-of-area purchases which is attributable to PG&E's own outages; and (3) prohibiting PG&E from charging SMUD for replacing capacity that PG&E is receiving from SMUD, because SMUD sells that excess capacity at cost, and it should therefore be treated for purposes of Article 6 as a resource of PG&E rather than SMUD.

According to SMUD, PG&E's present allocation makes reserves available to SMUD only to the extent that they are not needed by PG&E. SMUD contends that this allocation: (1) is unjust, unreasonable, unduly discriminatory and preferential, in violation of section 206 of the Federal Power Act; (2) is inconsistent with the terms and intent of the contract between the two parties and therefore violates PG&E's obligation under section 205 of the Act to adhere to the filed rate; and (3) constitutes a change in a filed rate schedule without the notice and permission required by section 205 of the Act and Part 35 of the Commission's regulations.

PG&E responds that its charges have been calculated in accordance with Article 6(b) and that it is SMUD's proposed allocation of the costs of out-of-area purchases that would require a departure from the filed rate. PG&E contends that SMUD has only been billed for out-of-area capacity purchases that resulted from a SMUD resource outage where PG&E did not have sufficient resources available to maintain adequate and reliable service. Where these purchases were made in anticipation of a SMUD resource outage, PG&E asserts that it charged SMUD an amount equal to the rate per kilowatt which PG&E paid for the purchase times the number of kilowatts of the purchase which were caused by the outage, as PG&E contends Article 6(b) expressly permits. PG&E states that not all out-of-area purchases are charged to SMUD, although the only example it gives occurred in August, which was after the period during which the disputed charges were made.

PG&E admits that it takes no account of its own outages or delayed resources in calculating charges for out-of-area purchases but contends that under the terms of the contract it is not required to do so. PG&E admits that SMUD contributes a share of reserve capacity without charge pursuant to Article 3(c) of the contract, but denies that the contract requires PG&E to treat reserves as being equally available to SMUD and PG&E. In addition, PG&E admits that SMUD's capacity is sold to PG&E at cost, but denies that the capacity obtained from SMUD should be treated for purposes of Article 6 as a PG&E resource rather than a SMUD resource. PG&E also admits that it "applies its own resources to meeting the needs of its own customers rather than apportioning or prorating the cost of capacity purchased from outside the Area." However, PG&E denies that the contract or PG&E's interpretation of it is unjust, unreasonable, unduly discriminatory or preferential.

Furthermore, PG&E asserts two "affirmative defenses," both of which pertain to our jurisdiction. First, PG&E alleges that SMUD is seeking a change in the terms and conditions of its own power sales to PG&E when SMUD asks that the amount of capacity it sells to PG&E be excluded from the calculation of out-of-area purchases. PG&E asserts that SMUD's rates and services are beyond the authority of the Commission because SMUD is a governmental entity formed under State law. As its second affirmative defense, PG&E asserts that SMUD is seeking to have the Commission collect SMUD's bills for rates that are not within the Commission's jurisdiction.

PG&E requests that the Commission dismiss the complaint with prejudice. In the alternative, PG&E requests a declaratory order that PG&E's interpretation of its rights to charge SMUD under Article 6(b) of the contract is correct.

Discussion

As a preliminary matter, we shall address PG&E's "affirmative defenses." The second defense was asserted against SMUD's request for a prohibition against further offsets. Without at this time disposing of questions regarding the propriety of PG&E's set-off practice, we note that SMUD's request for an order restraining PG&E from offsetting the particular amounts in controversy has for now become moot since PG&E has already withheld the entire disputed amount from its payments to SMUD for excess capacity. The first defense was asserted against SMUD's request that the amount of capacity it sells to PG&E be excluded from the calculation of out-of-area purchases. It may be true that section 201(f) exempts SMUD's rates and services from regulation by this Commission. However, SMUD is not requesting Commission approval of a change in its own rates and services. The gravamen of SMUD's complaint is that PG&E is incorrectly calculating billings under PG&E's filed rate. It is clear, and PG&E does not deny, that PG&E's rate for service to SMUD is within this Commission's jurisdiction. We see no need to preclude consideration of SMUD's argument merely because capacity sales from SMUD are also involved under the filed rate schedule.

The major question facing the Commission is whether it is appropriate at this juncture to issue a declaratory order on the matters raised by SMUD and by PG&E. SMUD and PG&E dispute several points. They apparently disagree as to whether PG&E has billed SMUD for out-of-area purchases that were not due to actual or anticipated SMUD outages. This is a question of fact which

[2] PG&E had billed SMUD $6,819,200 in charges plus $149,686 in interest as of October 12, 1982.

cannot be resolved on the basis of the pleadings submitted by the parties to date. They also disagree as to whether the contract requires PG&E to (1) take its own outages or delayed resources into account, (2) treat reserves as being equally available to SMUD and PG&E, or (3) treat capacity sold by SMUD to PG&E as a PG&E resource rather than a SMUD resource for the purposes of Article 6(b) of the contract. These are questions of interpreting the contract between the two parties. SMUD asserts that PG&E's allocation violates the intent as well as the terms of the contract. Furthermore, even in the event that PG&E prevails in its interpretation of existing contractual commitments, SMUD's complaint can be read as seeking a prospective amendment to the procedure for allocating out-of-area purchases.

In light of these and other conceivable issues, it would be inappropriate at this time for the Commission to issue an order declaring that the interpretation or actions of either party is correct. The questions raised involve matters best left for resolution after a hearing on the merits. Accordingly, we shall deny the requests for a declaratory order and, instead, set the matter for hearing.

The Commission orders:

(A) The request of SMUD for an order declaring that PG&E's allocation of costs is lawful is hereby denied without prejudice.

(B) The request of PG&E for an order declaring that PG&E's interpretation of its rights to charge SMUD under Article 6(b) of the contract is correct is hereby denied without prejudice.

(C) Pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by section 402(a) of the Department of Energy Organization Act and by the Federal Power Act, particularly section 205 thereof, and pursuant to the Commission's Rules of Practice and Procedure and the regulations under the Federal Power Act [18 CFR Chapter I], a public hearing shall be held concerning the matters raised in SMUD's complaint and PG&E's response thereto.

(D) A presiding administrative law judge, to be designated by the Chief Administrative Law Judge, shall convene a conference in this proceeding to be held within approximately fifteen (15) days of the date of this order in a hearing room of the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426. Such conference shall be held for purposes of delineating the issues and establishing a procedural schedule, including a date for the submission of testimony and exhibits by all participants.

The presiding judge is authorized to establish procedural dates and to rule on all motions (except motions to dismiss) as provided in the Commission's Rules of Practice and Procedure.

(E) The Secretary shall promptly publish this order in the Federal Register.

By the Commission.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. CS81-413-000, et al.]

J. Gregory Merrion Robert L. Bayless, et al.; Applications for "Small Producer" Certificates [1]

March 7, 1983.

Take notice that each of the Applicants listed herein has filed an application pursuant to Section 7(c) of the Natural Gas Act and Section 157.40 of the Regulations thereunder for a "small producer" certificate of public convenience and necessity authorizing the sale for resale and delivery of natural gas in interstate commerce, all as more fully set forth in the applications which are on file with the Commission and open to public inspection.

Any person desiring to be heard or to make any protest with reference to said applications should on or before March 22, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, petitions to intervene or protests in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on all applications in which no petition to intervene is filed within the time required herein if the Commission on its own review of the matter believes that a grant of the certificates is required by the public convenience and necessity. Where a petition for leave to intervene is timely filed, or where the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

ENVIRONMENTAL PROTECTION AGENCY

[AH-FRL 2318-6]

Ambient Air Monitoring Reference and Equivalent Methods; Receipt of Application for an Equivalent Method Determination

Notice is hereby given that on January 24, 1983, the Environmental Protection Agency received an application from the Texas Air Control Board to determine if their X-Ray Fluorescence Spectrometry method for the determination of lead in suspended particulate matter collected from ambient air should be designated by the Administrator of the EPA as an equivalent method under 40 CFR Part 53 (40 FR 7044, 41 FR 11255, 44 FR 37916). If, after appropriate technical study, the Administrator determines that this method should be so designated, notice thereof will be given in a subsequent issue of the Federal Register.

FOR FURTHER INFORMATION CONTACT:
Larry J. Purdue, FTS 629–2665.

Dated: February 25, 1983.

Courtney Riordan,

Acting Assistant Administrator for Research and Development.

[FR Doc. 83-6110 Filed 3-9-83; 8:45 am]
BILLING CODE 6560-50-M

[AH–FRL 2318–7]

Ambient Air Monitoring Reference and Equivalent Methods; Equivalent Method Designation

Notice is hereby given that EPA, in accordance with 40 CFR Part 53 (40 FR 7049, 41 FR 11255), has designated another equivalent method for the measurement of ambient concentrations of ozone. The new equivalent method is an automated method (analyzer) which utilizes a measurement principle based on the absorption of ultraviolet radiation by ozone at a wavelength of 254 nm.

The method is:

EQOA–0383–050, "Dasibi Model 1008–AH Ozone Analyzer," operated on a range of either 0–0.5 or 0–1.0 ppm, with or without any of the following options:

Ozone Generator
BCD Digital Output
IEEE–488 General Purpose Interface Bus
RD–232–C Digital Output
Error Code

This method is available from Dasibi Environmental Corporation, 616 East Colorado Street, Glendale, California 91205. A notice of receipt of applications for this method appeared in the **Federal Register**, Volume 47, April 22, 1982, page 17331.

A test analyzer representative of this method has been tested by the applicant, in accordance with the test procedures specified in 40 CFR Part 53. After reviewing the results of these tests and other information submitted by the applicant, EPA has determined, in accordance with Part 53, that this method should be designated as an equivalent method.

The information submitted by the applicant will be kept on file at the address shown below and will be available for inspection to the extent consistent with 40 CFR Part 2 (EPA's regulations implementing the Freedom of Information Act).

As an equivalent method, this method is acceptable for use by States and other control agencies for purposes of 40 CFR Part 58, Ambient Air Quality Surveillance (44 FR 27571, May 10, 1979). For such use, the method must be used in strict accordance with the operation or instruction manual provided with the method and subject to any limitations (e.g., operating range) specified in the applicable designation (see description of the method above). Vendor modifications of a designated method used for purposes of Part 58 are permitted only with prior approval of EPA, as provided in Part 53. Provisions concerning modification of such methods by users are specified under Section 2.8 of Appendix C to Part 58 (44 FR 27585).

Part 53 requires that sellers of designated methods comply with certain conditions. These conditions are given in 40 CFR 53.9 and are summarized below:

(1) A copy of the approved operation or instruction manual must accompany the analyzer when it is delivered to the ultimate purchaser.

(2) The analyzer must not generate any unreasonable hazard to operators or to the environment.

(3) The analyzer must function within the limits of the performance specifications given in Table B–1 of Part 53 for at least 1 year after delivery when maintained and operated in accordance with the operation manual.

(4) Any analyzer offered for sale as a reference or equivalent method must bear a label or sticker indicating that it has been designated as a reference or equivalent method in accordance with Part 53.

(5) If such an analyzer has one or more selectable ranges, the label or sticker must be placed in close proximity to the range selector and indicate which range or ranges have been included in the reference or equivalent method designation.

(6) An applicant who offers analyzers for sale as reference or equivalent methods is required to maintain a list of ultimate purchasers of such analyzers and to notify them within 30 days if a reference or equivalent method designation applicable to the analyzer has been cancelled or if adjustment of the analyzers is necessary under 40 CFR 53.11(b) to avoid a cancellation.

(7) An applicant who modifies an analyzer previously designated as a reference or equivalent method is not permitted to sell the analyzer (as modified) as a reference or equivalent method (although he may choose to sell it without such representation), nor to attach a label or sticker to the analyzer (as modified) under the provisions described above, until he has received notice under 40 CFR 53.14(c) that the original designation or a new designation applies to the method as modified or until he has applied for and received notice under 40 CFR 53.8(b) of a new reference or equivalent method determination for the analyzer as modified.

Aside from occasional breakdowns or malfunctions, consistent or repeated non-compliance with any of these conditions should be reported to: Director, Environmental Monitoring Systems Laboratory, Department E (MD–77), U.S. Environmental Protection Agency, Research Triangle Park, North Carolina 27711.

Designation of this equivalent method will provide assistance to the States in establishing and operating their air quality surveillance systems under Part 58. Additional information concerning this action may be obtained by writing to the address given above. Technical questions concerning the method should be directed to the manufacturer.

Under Executive Order 12291, EPA must judge whether a regulation is "major" and therefore subject to the requirement of a Regulatory Impact Analysis. This action is not a major regulation because it imposes no additional regulatory requirements, but instead announces the designation of an additional equivalent method that is acceptable for use by States and other control agencies for purposes of 40 CFR Part 58, Ambient Air Quality Surveillance (44 FR 27571, May 10, 1979) or other applciations where use of a reference or equivalent method is required.

This notice was submitted to the Office of Management and Budget for review as required by Executive Order 12291.

FOR FURTHER INFORMATION CONTACT:
Larry J. Purdue, FTS 629–2665.

Dated: February 25, 1983.

Courtney Riordan,

Acting Assistant Administrator for Research and Development.

FEDERAL MARITIME COMMISSION

[Agreement No. 10374–3]

Availability of Finding of No Significant Impact

Upon completion of an environmental assessement, the Federal Maritime Commission's Office of Energy and Environmental Impact has determined that the Commission's decision on Agreement No. 10374–3 will not constitute a major Federal action significantly affecting the quality of the human environment within the meaning of the National Environmental Policy Act of 1969, 42 U.S.C. 4321 *et seq.*, and that preparation of an environmental impact statement is not required.

Agreement No. 10374–3 among Hapag-Lloyd A.G., Intercontinental Transport (ICT) and Compagnie Generale Maritime (CGM) is designed to allow ICT and CGM to transport international cargo in the U.S. Gulf and South Atlantic/Europe trade. On August 5, 1980 (45 FR 51918) the FMC issued a Finding of No Significant Impact concerning Agreement No. 10266–4. The subject agreement encompasses the identical operational terms of Agreement No. 10266–4 and none of the energy or environmental considerations relative to the requested intermodal authority have changed since August 5, 1980.

This Finding of No Significant Impact (FONSI) will become final within 10 days of publication of this notice in the **Federal Register** unless a petition for review is filed pursuant to 46 CFR 547.6(b).

The FONSI and related environmental assessment are available for inspection on request from the Office of the Secretary, Room 11101, Federal Maritime Commission, Washington, D.C. 20573, telephone (202) 523–5725.

Francis C. Hurney,

Secretary.

BILLING CODE 6210-01-M

Formation of Bank Holding Company; St. Anagar Bancorporation

St. Anagar Bancorporation, St. Anagar, Iowa, has applied for the Board's approval under section 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)) to become a bank holding company by acquiring 80 per cent or more of the voting shares of St. Anagar State Bank, St. Anagar, Iowa. The factors that are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

St. Anagar Bancorporation, St. Anagar, Iowa, has also applied pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and 225.4(b)(2) of the Board's Regulation Y (12 CFR 225.4(b)(2)), for permission to directly engage in general insurance activities in a town with population of less than 5,000.

These activities would be performed from Applicant's office in St. Anagar, Iowa, and the geographic area to be served is a 12-mile radius around St. Anagar, Iowa. Such activities have been specified by the Board in § 225.4(a) of Regulation Y as permissible for bank holding companies, subject to Board approval of individual proposals in accordance with the procedures of § 225.4(b). In addition, such insurance activities are permissible under Section 601(C) of the Garn-St Germain Depository Institutions Act of 1982.

Interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Chicago.

Any views or requests for hearing should be submitted in writing and received by the Reserve Bank not later than April 3, 1983.

Board of Governors of the Federal Reserve System, March 4, 1983.

James McAfee,

Associate Secretary of the Board.

[FR Doc. 83-6002 Filed 3-9-83; 8:45 am]

BILLING CODE 6210-01-M

Bank Holding Companies; Proposed de Novo Nonbank Activities; Barclays Bank PLC et al.

The organizations identified in this notice have applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.4(b)(1), for permission to engage *de novo* (or continue to engage in an activity earlier commenced *de novo*), directly or indirectly, solely in the activities indicated, which have been determined by the Board of Governors to be closely related to banking.

With respect to these applications, interested persons may express their views on the question whether

consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any comment that requests a hearing must include a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of that proposal.

The applications may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank indicated. Comments and requests for hearing should identify clearly the specific application to which they relate, and should be submitted in writing and received by the appropriate Federal Reserve Bank not later than the date indicated.

A. **Federal Reserve Bank of New York** (A. Marshall Puckett, Vice President) 33 Liberty Street, New York, New York 10045:

1. *Barclays Bank PLC* and its subsidiary, *Barclays Bank International Limited,* each a bank holding company whose principal office is in London, England (consumer finance, insurance, and travelers checks activities; Ohio): To continue to engage through their subsidiaries, BarclaysAmerican/Financial, Inc. ("BAF") and BarclaysAmerican/Mortgage, Inc. ("BAM"), in making direct consumer loans, including loans secured by real estate, and purchasing sales finance contracts representing extensions of credit such as would be made or acquired by a consumer finance company, and wholesale financing (floor planning); acting as agent for the sale of credit-related insurance, including credit life, credit accident and health, and credit property insurance. Credit life and credit accident and health insurance sold as agent may be underwritten or reinsured by BAC's insurance underwriting subsidiaries; and selling at retail travelers checks issued by Barclays Bank International Limited. The proposed insurance activities are permissible under Sections 601(A) and 601(D) of the Garn-St Germain Depository Institutions Act of 1982. Comments on this application must be received not later than April 1, 1983.

2. *Citicorp,* New York, New York (finance company activities; Massachusetts, Maine, New Hampshire, Vermont and Rhode Island): To establish a *de novo* office of its subsidiary, Citicorp Acceptance Company, Inc. located in Braintree, Massachusetts. The activities in which the *de novo* office proposes to engage are: the making or acquiring of loans and other extensions of credit, secured or unsecured, for consumer and other purposes; the extension of loans to dealers for the financing of inventory (floor planning) and working capital purposes; the purchasing and servicing for its own account of sales finance contracts; and the servicing for any person, of loans and other extensions of credit. The service area of the *de novo* office would be comprised of the states of Massachusetts, Maine, New Hampshire, Vermont, and Rhode Island. Comments on this application must be received not later than April 1, 1983.

3. *Citicorp,* New York, New York (consumer finance and credit related insurance activities; Washington): To establish five *de novo* offices of its subsidiary, Citicorp Homeowners, Inc. The activities in which the *de novo* offices of Citicorp Homeowners, Inc. propose to engage are: making or acquiring of loans and other extensions of credit, secured or unsecured, for consumer and other purposes; the sale of credit related life and accident and health or decreasing or level (in the case of single payment loans) term life insurance by licensed agents or brokers, as required; the sale of consumer oriented financial management courses; the servicing, for any person, of loans and other extensions of credit; the making, acquiring, and servicing, for its own account and for the account of others, of extensions of credit to individuals secured by liens on residential or non-residential real estate; and the sale of mortgage life and mortgage disability insurance directly related to extensions of mortgage loans. The proposed service area for each of the *de novo* offices of Citicorp Homeowners, Inc. shall be comprised of the entire state of Washington for all the aforementioned proposed activities. In regard to credit related insurance, the business of a general insurance agency will not be conducted. Credit related life, accident, and health insurance may be written by Family Guardian Life Insurance Company, an affiliate of Citicorp Homeowners, Inc. The aforementioned activities will be conducted from offices in Spokane, Seattle, Bellevue, Tacoma and Lacey, Washington, serving the State of Washington. Comments on this application must be received not later than April 1, 1983.

4. *The Hongkong and Shanghai Banking Corporation.* Hong Kong, B.C.C. (leasing, installment and commercial financing activities; United States): To engage through its existing indirect subsidiary, U.S. Concord, Inc., in leasing and installment financing activities and to act as agent, broker or adviser for such activities; and commercial financing activities, including making installment, conditional sales and working capital loans secured by commercial and industrial equipment. These activities will be conducted from an additional *de novo* office in Dallas, serving the entire continental United States. Comments on this application must be received not later than April 6, 1983.

B. **Federal Reserve Bank of Richmond** (Lloyd W. Bostian, Jr., Vice President) 701 East Byrd Street, Richmond, Virginia 23261:

1. *South Carolina National Corporation,* Columbia, South Carolina (finance, servicing and insurance activities; South Carolina): To engage, through its subsidiary, Provident Financial Corporation, in making or acquiring of loans or extensions of credit for its own account such as would be made by a consumer finance company; servicing loans and other extensions of credit for the account of others, and offering life, accident, and health, and property insurance directly related to its extensions of credit. These activities would be conducted from an office located in and serving Columbia, South Carolina. Comments on this application must be received not later than April 1, 1983.

C. **Federal Reserve Bank of Atlanta** (Robert E. Heck, Vice President) 104 Marietta Street, N.W., Altanta, Geogia 30303:

1. *Southwest Florida Banks, Inc.,* Fort Myers, Florida (real estate appraisals; Florida): To engage through its subsidiary, Southwest Financial Services, Inc., in appraisals of real estate property. These activities would be conducted in the Florida counties of Collier, Lee, Charlotte, Sarasota, Manatee, Hillsborough, Pinellas and Pasco. Comments on this application must be received not later than March 30, 1983.

D. **Federal Reserve Bank of Minneapolis** (Bruce J. Hedblom, Vice President) 250 Marquette Avenue, Minneapolis, Minnesota 55480:

1. *Northstar Bancorporation,* Wayzata, Minnesota (mortgage banking company, Minnesota): To engage, through its subsidiary, Wayzata Realty Company, in making and acquiring, for its own accounts or for the accounts of others, loans, including but not limited to permanent and construction financing

of residential, income producing, and development projects, and other extensions of credit such as would be made, for example, by a mortgage banking company and servicing of loans and other extensions of credit for any person or company. These activities will be conducted from offices in Wayzata, Minnesota, servicing Minnesota. Comments on this application must be received not later than April 1, 1983.

Board of Governors of the Federal Reserve System, March 4, 1983.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

FEDERAL TRADE COMMISSION

Line of Business Program; Request for Comments

AGENCY: Federal Trade Commission

ACTION: Request for comments on the staff analysis of the benefits and costs of the Federal Trade Commission's Line-of-Business Program.

SUMMARY: The Comission will consider in the near future whether to resume Line of Business data collection for years subsequent to 1977. The Commission requests comments on the staff analysis of the benefits and costs of the Line of Business Program to assist it in making its decision. A 45-day comment period is established and expires April 25, 1983. Comments should be submitted in writing to the Secretary of the Commission; twenty copies should be supplied.

ADDRESS: Office of the Secretary, Federal Trade Commission, 6th Street and Pennsylvania Avenue, NW., Washington, D.C. 20580.

SUPPLEMENTARY INFORMATION: The Federal Trade Commission is currently engaged in evaluating its Line-of-Business ("LB") Program in order to decide whether to collect LB data for years subsequent to 1977. As part of the evaluation process, notices were published in the Federal Register on February 26, and April 12, 1982 (47 FR 8407, 47 FR 15646), inviting public comments on the benefits and costs of the LB Program. Comments were received from about a hundred parties. LB staff have now prepared and submitted to the Commission an analysis of the benefits and costs of the program, based in part on the information supplied by these outside parties.

By this notice, the Commission makes the staff analysis available to the public and invites interested parties to submit comments on the issues raised by the staff analysis. The comment period begins effective the date of this notice, and expires April 25, 1983. The staff analysis consists of the following set of documents.

1. Memorandum to the Commission from Robert D. Tollison, Richard S. Higgins, and William F. Shughart II, Bureau of Economics, January 20, 1983.

2. Memorandum to the Commission from William F. Long, Manager, Line of Business Program, "Line of Business Data Collection," January 20, 1983.

3. Benefits and Costs of the Federal Trade Commission's Line-of-Business Program.

a. Executive Summary;

b. Volume I: Staff Analysis;

c. Volume II: Public Comments on the Benefits and Costs of the LB Program Received in Response to Federal Register Notice Requests of February 26, 1982 and April 12, 1982;

d. Volume III: Comments of Consultant Reviewers to Preliminary Drafts of Volume I: Staff Analysis.

Interested parties may obtain a copy of those documents by writing the Distribution Branch, Office of Public Records, Federal Trade Commission, 6th and Pennsylvania Avenue, NW., Washington, D.C. 20580, or by calling (202) 523-3598.

FOR FURTHER INFORMATION CONTACT: FTC/ESL, David F. Lean, Washington, D.C. 20580; (202) 634-7332.

Dated: February 22, 1983.

By Direction of the Commission.

Benjamin I. Berman,

Acting Secretary.

BILLING CODE 4160-20-M

Rape Prevention and Control Advisory Committee; Meetings

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (5 U.S.C. Appendix I), announcement is made of the following national advisory body scheduled to assemble during the month of April.

Rape Prevention and Control Advisory Committee: April 11-12; 9:00 a.m., Parklawn Building, Conference Room 17-09B, 5600 Fishers Lane, Rockville, Maryland 20857.

Open: April 11-12.

Contact: Mary Lystad, Ph.D., Executive Secretary, Rape Prevention and Control Advisory Committee, 5600 Fishers Lane, Room 6C-12, Rockville, Maryland 20857; (301) 443-1910.

Purpose: The Rape Prevention and Control Advisory Committee advises the Secretary, Department of Health and Human Services, the Administrator, Alcohol, Drug Abuse, and Mental Health Administration, and the Director, National Institute of Mental Health, through the National Center for the Prevention and Control of Rape (NCPR), on matters regarding the needs and concerns associated with rape in the United States and makes recommendations pertaining to activities to be undertaken by the Department to address the problems of rape.

Agenda: The entire meeting will be open to the public. It will include a report from the National Center for the Prevention and Control of Rape on the research, training and educational activities of the Center. Discussions will be held on the role of the Nurse/practitioner, the physician, the police, and judges in handling of sexual assault cases.

Substantive program information may be obtained from the contact person listed above. A summary of the meeting and roster of the Committee members will be furnished upon request from Ms. Helen W. Garrett, Committee Management Officer, National Institute of Mental Health, Room 17C-26, Parklawn Building, Rockville, Maryland, (301) 443-4333.

Dated: March 7, 1983.

Sue Simons,

Committee Management Officer, Alcohol, Drug Abuse and Mental Health Administration.

BILLING CODE 4160-20-M

National Institutes of Health

Biometry and Epidemiology Contract Review Committee; Meeting

Pursuant to Pub. L. 92–463, notice is hereby given of the meeting of the Biometry and Epidemiology Contract Review Committee, National Cancer Institute, March 21, 1983, Building 31C, Vanderbilt University, Medical Center, North U–8206 Learned Laboratory, Nashville, Tennessee 37232. This meeting will be open to the public on March 21, from 8:30 a.m. to 9:00 a.m., to review administrative details. Attendance by the public will be limited to space available.

In accordance with provisions set forth in sections 552b(c)(4) and 522(c)(6), Title 5, U.S. Code and Section 10(d) of Pub. L. 92–463, the meeting will be closed to the public on March 21, from 9:00 a.m. to adjournment, for the review, discussion and evaluation of individual contract proposals. These proposals and the discussions could reveal confidential trade secrets or commercial property such as patentable material and personal information concerning individuals associated with the proposals, disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Mrs. Winifred Lumsden, the Committee Management Officer, National Cancer Institute, Building 31, Room 10A06, National Institutes of Health, Bethesda, Maryland 20205 (301/496–5708) will provide summaries of the meeting and rosters of committee members, upon request.

Dr. Wilna A. Woods, Executive Secretary, Biometry and Epidemiology Contract Review Committee, National Cancer Institute, Westwood Building, Room 822, National Institutes of Health, Bethesda, Maryland 20205 (301/496–7153) will furnish substantive program information.

Dated: February 22, 1983.

BILLING CODE 4140-01-M

Cancer Center Support Review Committee; Meeting

Pursuant to Pub. L. 92–463, notice is hereby given of the meeting of the Cancer Center Support Review Committee, National Cancer Institute, March 31-April 1, 1983, Building 31C, Conference Room 6, National Institutes of Health, Bethesda, Maryland 20205. This meeting will be open to the public on March 31 from 8:30 a.m. to 9:30 a.m. to review administrative details, and to present reports by the Division Director, Branch Chief, and Executive Secretary on committee concerns. Attendance by the public will be limited to space available.

In accordance with provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5, U.S. Code and Section 10(d) of Pub. L. 92–463, the meeting will be closed to the public on March 31, from 9:30 a.m. to recess, and on April 1, from 8:30 a.m. to adjournment, for the review, discussion and evaluation of individual grant applications. These applications and the discussions could reveal confidential trade secrets or commercial property such as patentable material and personal information concerning individuals associated with the applications, disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Mrs. Winifred Lumsden, the Committee Management Officer, National Cancer Institute, Building 31, Room 10A06, National Institutes of Health, Bethesda, Maryland 20205 (301/496–5708) will provide summaries of the meeting and rosters of committee members, upon request.

Dr. John W. Abrell, Acting Executive Secretary, Cancer Center Support Review Committee, National Cancer Institute, Westwood Building, Room 821, National Institutes of Health, Bethesda, Maryland 20205 (301/496–9767) will furnish substantive program information.

Clinical Cancer Program Project Review Committee; Meeting

Pursuant to Pub. L. 92–463, notice is hereby given of the meeting of the Clinical Cancer Program Project Review Committee, National Cancer Institute, April 15–16, 1983, Building 31C, Conference Room 10, 9000 Rockville Pike, Bethesda, Maryland 20205. This meeting will be open to the public on April 15 from 8:30 a.m. to 10:00 a.m. for reports by the Chairperson, Executive Secretary, and other staff members; and to review administrative details. Attendance by the public will be limited to space available.

In accordance with provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5, U.S. Code and Section 10(d) of Pub. L. 92–463, the meeting will be closed to the public on April 15, from 10:00 a.m. to recess; and on April 16, from 8:30 a.m. to adjournment, for the review, discussion and evaluation of individual grant applications. These applications and the discussions could reveal confidential trade secrets or commercial property such as patentable material and personal information concerning individuals associated with the applications, disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Mrs. Winifred Lumsden, the Committee Management Officer, National Cancer Institute, Building 31, Room 10A06, National Institutes of Health, Bethesda, Maryland 20205 (301/496–5708) will provide summaries of the meeting and rosters of committee members, upon request.

Dr. Louise G. Thomson, Executive Secretary, Clinical Cancer Program Project Review Committee, National Cancer Institute, Westwood Building, Room 809, National Institutes of Health, Bethesda, Maryland 20205 (301/496–7924) will furnish substantive program information.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[N–13238]

Airport Lease Amended; Nevada

March 2, 1983.

Notice is hereby given that pursuant to the Act of May 24, 1928, (49 U.S.C. 211–214), Sandy Valley Associates have applied to amend their airport lease N–13238, to include the following described lands:

Mount Diablo Meridian, Nevada

T. 25 S., R. 56 E.,
Sec. 1, Lots 1, 2, 3, 4 and portion of Lot 5 north of the Von Schmidt Line of 1873.

The purpose of this notice is to inform the public that the filing of this amended application segregated the described public lands from all other forms of appropriation under the public land laws. Interested persons should promptly send their comments together with their name and address to the Las Vegas District Manager, Bureau of Land

Management, 4765 Vegas Drive, Las Vegas, Nevada 89106.

Richard G. Morrison,

Acting Deputy State Director, Operations.

BILLING CODE 4310-84-M

[C-35774]

Classification of Public Lands for State Indemnity Selection; Colorado

February 28, 1983.

1. Pursuant to Sections 2275 and 2276 of the Revised Statutes, as amended (43 U.S.C. 851, 852), and the provisions granted to the State of Colorado by the Act of March 3, 1875 (18 Stat. 475), the public lands described below are hereby classified for State Indemnity Selection. The State of Colorado has filed an application to acquire the described lands in lieu of certain school lands that were encumbered by other rights or reservations before the State's title could attach. This application was assigned serial number Colorado 35774.

2. The notice of proposed classification of these lands was published in the Federal Register of December 13, 1982, Vol. 47, No. 239, pages 55739-55740. The land is being classified as proposed. Public lands lying between the linear strips described in the December 13, 1982 Federal Register notice are included in this notice of classification.

3. The lands included in this classification are in Montrose County and are described as follows:

New Mexico Principal Meridian

T. 48 N., R. 16 W.,
- Sec. 19, lots 1, 2, 3, W½SW¼NE¼NW¼, and W½NW¼SE¼NW¼.

T. 48 N., R. 17 W.,
- Sec. 24, SE¼NE¼NE¼, E½SW¼NE¼NE¼, E½W½SE¼NE¼, E½SE¼NE¼, S½NE¼SW¼, SE¼NW¼SW¼, S½SW¼, NE¼NE¼SE¼, E½NW¼NE¼SE¼, S½N½SE¼, and S½SE¼;
- Sec. 25, N½, W½SW¼, E½NE¼NE¼SW¼, W½E½SW¼, W½E½E½SW¼, W½NE¼NE¼SE¼, NW¼NE¼SE¼, and N½NW¼SE¼;
- Sec. 26, E½E½, E½SW¼NE¼, and SW¼SE¼;

§ 70.8 [Amended]

- Sec. 27, Lots 3 and 4;
- Sec. 28, All that portion of Lot 36 lying within a strip 100 feet in width westerly from, and parallel to the centerline of the existing Spring Creek Mesa truck trail;
- Sec. 34, Lot 22;

Together with all those portions of the following described public lands lying southeasterly of a line extending from the center of the SE¼NE¼ of section 26, S. 59°02.0'W approximately 8,137 feet to the intersection with line 5-6 of Mineral Survey 20286, Little Basin lode mining claim in lot 20 of section 34, from which corner No. 6 of said claim bears S. 40°30.0'E. 200 feet:

- Sec. 20, SE¼SE¼NW¼SW¼, SW¼SW¼, E½SW¼, and NW¼SE¼;
- Sec. 27, S½SE¼SW¼SE¼, and SE¼SE¼; and,

All those portions of the following described public lands lying northerly of a line paralleling the centerline of the existing Spring Creek Mesa truck trail, said line being approximately 100 feet southerly from said centerline, through the following described lands:

- Sec. 34, W½ of the NW¼ of Lot 1, and Lots 20 and 21;
- Sec. 35, N½NW¼NW¼NW¼, NE¼NE¼NE¼NW¼, NW¼NE¼NW¼, and N½NW¼NW¼.

The areas described aggregate approximately 1,400 acres.

4. This classification decision is based on the following disposal criteria set forth in Title 43 Code of Federal Regulations, Part 2400.

Transfer of the lands to the State will help fulfill the Federal Government's common school land grant to the State, and constitutes a public purpose use of the land. Lands found to be valuable for a public purpose use will be considered chiefly valuable for public purposes (43 CFR 2430.2b).

5. Rights-of-way granted by the Bureau of Land Management on the above lands will transfer with the land. All minerals will be reserved to the United States if the land is clearlisted to the State of Colorado. Oil and gas leases will remain in effect under the terms and conditions of the lease. State law and Board of Land Commissioners procedures provide for the offering to holders of Bureau of Land Management grazing permits, licenses or leases the first right to lease lands that are transferred to the State.

In the event these lands are clearlisted, the Bureau of Land Management authorized grazing use will terminate at the time title to the land is transferred to the state. Any cultural resources will be managed by the State.

6. The public lands classified by this notice are shown on a map on file and available for inspection in the Bureau of Land Management, Montrose District Office, 2465 South Townsend, P.O. Box 1269, Montrose, Colorado 81402.

7. For a period of 30 days from the date of publication in the Federal Register, this classification shall be subject to exercise of administrative review and modification by the Secretary of the Interior as provided for in 43 CFR 2461.3 and 2462.3. Interested parties may submit comments to the Secretary of the Interior, LLM 320, Washington, D.C. 20240.

George C. Francis,

State Director.

BILLING CODE 4310-84-M

Idaho Falls District; Advisory Council Meeting

Notice is hereby given in accordance with Pub. L. 91-463, Pub. L. 94-579, Pub. L. 95-514 and 43 CFR Part 1780, that a meeting of the Idaho Falls District Advisory Council will be held on Wednesday, April 13, 1983, at 9 a.m. at the Idaho Falls BLM District Office, 940 Lincoln Road, Idaho Falls, Idaho 83401.

Agenda for the meeting will include the following:

1. Wild Horse and Burro Legislation.
2. Asset Management Program.
3. Right-of-way Application, Poleline Road (Egin-Hamer).

The meeting is open to the public. Interested persons may make oral statements to the Council between 11:30 a.m. and 12 noon, or file written statements for the Council's consideration. The afternoon session will be a field tour to the St. Anthony area to the site of the right-of-way application. Persons wishing to attend

the field tour must provide their own transportation. Anyone wishing to make an oral statement or attend the field tour must notify the District Manager at the Idaho Falls BLM District Office, 940 Lincoln Road, Idaho Falls, Idaho 83401 by April 9, 1983. Depending on the number of persons wanting to make oral statements, a per-person time limit may be established.

Summary minutes of the meeting will be maintained in the District Office and will be available for public inspection and reproduction during business hours (7:45 a.m. to 4:30 p.m.) 30 days after the meeting.

Dated: March 1, 1983.

James Gabettas,

Acting District Manager.

BILLING CODE 4310-84-M

[M-45179]

Montana; Conveyance and Order Providing for Opening of Public Lands

March 2, 1983.

Notice is hereby given that pursuant to Sec. 206 of the Act of October 21, 1976 (43 U.S.C. 1716 (1976)), the surface estate only in the following described land has been conveyed to Carol Raffety, et al., Dillon, Montana:

Principal Meridian, Montana

T. 5 S., R. 8 W.,
Sec. 1, E½SW¼ and W½SE¼;
Sec. 2, SW¼NE¼ and SE¼;
Sec. 11, N½NE¼, SW¼NE¼, NE¼SW¼, and SW¼SW¼; and
Sec. 14, NW¼NW¼.

Containing 600.00 acres.

In exchange for the above land, the United States acquired the surface estate only in the following described land in Beaverhead County, Montana. The government owns the phosphate in the SW¼NE¼, SW¼, W½SE¼, Sec. 3; and the SE¼SE¼, Sec. 4. It owns all the minerals in the SE¼SE¼, Sec. 3, and the NE¼, SE¼NW¼, N½SW¼, Sec. 10;

Principal Meridian, Montana

T. 5 S., R. 8 W.,
Sec. 3, That portion of the SW¼NE¼ south of the Big Hole River, SW¼, W½SE¼ and SE¼SE¼;
Sec. 4, SE¼SE¼ and;
Sec. 10, NE¼, SE¼NW¼ and N½SE¼.

Containing 606.00 acres.

This order restores the land acquired by the United States to the operation of the public land laws generally.

The lands are located along the Big Hole River approximately 14.5 miles northwest of Dillon, Montana. These lands have high recreational values.

At 8 a.m. on April 6, 1983, the lands shall be open to the public land law generally, subject to valid existing rights, the provisions of existing withdrawals, and the requirements of applicable law. All applications received at or prior to 8 a.m. on April 6, 1983, shall be considered as simultaneously filed at that time. Those received thereafter shall be considered in the order of filing.

Roland Lee,

Acting Chief, Division of Lands and Renewable Resources.

BILLING CODE 4310-84-M

Richfield District Grazing Advisory Board Meeting

Notice is hereby given in accordance with Pub. L. 92-463, that a meeting of the Richfield District Grazing Advisory Board will be held on March 30, 1983.

The meeting will begin at 9 a.m. in the Conference Room of the Bureau of Land Management Office at 150 East 900 North, Richfield, Utah.

The agenda for the meeting includes discussion of the following items:

(1) Discuss the recently developed Cooperative Management Agreements relating to project implementation (FY 1983).

(2) Discuss 1983 AWP funds and planned projects.

(3) Discuss allotment categorization program.

(4) Discuss the planning and EIS schedule.

(5) Arrange future meeting details.

The meeting is open to the public. Interested persons may make oral statements to the board between 2 p.m. and 3 p.m. on March 30, 1983, or file written statements for the board's consideration.

Anyone wishing to make an oral statement must notify the District Manager, Bureau of Land Management, 150 East 900 North, Richfield, Utah 84701 by March 25, 1983. Depending on the number of persons wishing to make oral statements, a per person time limit may be established by the District Manager.

Summary minutes of the board meeting will be maintained in the District Office and be available for public inspection and reproductions during regular business hours within 30 days following the meeting.

Dated: February 28, 1983.

Larry R. Oldroyd,

Associate District Manager.

Utah Advisory Board; Meeting and Field Tour

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: A combined meeting and field tour will be held at St. George, Utah on March 31, and April 1, 1983 with District Grazing Advisory Boards from Cedar City, Richfield, Moab, Salt Lake and Vernal districts.

The purpose of the tour and meeting will be to review accomplishments in the Hot Desert area including Allotment Management Plans and Range Improvements.

The field tour will commence at 8 a.m. on March 31 and April 1 at the Four Seasons North Motel. A joint meeting will be held at the same motel on March 31 at 7:30 p.m. The meeting agenda items will include Cooperative Allotment Planning Efforts in Utah, and an update on the Randolph Stewardship area.

Individuals desiring to make a statement at the evening meeting or desiring to attend the field tour should notify the Cedar City District Manager at 801-586-2401.

The summary minutes will be maintained in the district offices and will be available 30 days after the meeting.

FOR FURTHER INFORMATION CONTACT: Margan Jensen, Cedar City District Manager, 801-586-2401.

Dated February 25, 1983.

Roland G. Robison,

State Director.

BILLING CODE 4310-84-M

[OR-34957]

Realty Action; Competitive/Modified Competitive Sale of Public Land in Lake County, Oregon

The following described parcels of land have been examined and identified as suitable for disposal by sale under section 203 of the Federal Land Policy and Management Act of 1976 (90 Stat. 2750, 43 U.S.C. 1713) at no less than the appraised fair market value shown:

Parcel No.	Legal description	Acreage	Appraised value
T. 27 S., R. 17 E., Willamette Meridian, Oregon			
1	Sec. 15: SW¼SE¼	40	$13,000
2	Sec. 15: SW¼SW¼	40	12,600
3	Sec. 22: SE¼NE¼	40	13,000

Parcel No.	Legal description	Acreage	Appraised value
4	Sec. 14: SE¼SW¼ Sec. 23: NE¼NW¼, S½NW¼, NW¼	100	25,500
5	Sec. 23: S½NW¼, N½SW¼	160	40,800

The sale will be held on Wednesday, May 18, 1983, at 10:00 a.m., P.D.T., Bureau of Land Management Conference Room, 1000 South Ninth Street, Lakeview, Oregon.

The sale is consistent with publicly supported Bureau planning. The sale involves isolated land completely surrounded by private land, and because of its location, is difficult and uneconomical to manage as part of the public lands, and is not suitable for management by another Federal department or agency. The public interest will be served by offering this land for sale.

Sale parcels #1, #2, #3, and #5, will be offered for sale at public auction through competitive bidding.

Sale parcel #4 will be offered for sale at public auction through modified competitive bidding with William C. Remy given preference to meet the high selling bid. Refusal or failure by Mr. Remy to meet the high selling bid immediately after the close of oral bidding shall constitute a waiver of such right.

Modified competitive bidding procedures are being used to recognize the needs of adjoining landowners and historical use by these landowners. Preference to meet the high selling bid is authorized under section 203 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1713; 43 CFR 2711.3–2(a)(2)).

Federal law requires that all bidders by U.S. citizens, 18 years of age or more, a state or state instrumentality authorized to hold property, or in the case of corporations, be authorized to own real estate in the state in which the sale land is offered. Proof of these requirements shall accompany all sale bids.

Sealed written bids will be considered only if received by the Bureau of Land Management, 1000 South Ninth Street, P.O. Box 151, Lakeview, Oregon 97630, prior to 10:00 a.m., Wednesday, May 18, 1983, P.D.T., and for at least the appraised value. A separate written bid must be submitted for each sale parcel desired. Each written sealed bid must be accompanied by a certified check, postal money order, bank draft or cashiers check, made payable to the Bureau of Land Management for at least twenty percent (20%) of the amount bid and shall be enclosed in a sealed envelope clearly marked, "Bid for Public Land Sale OR–34957, Sale Parcel number ——, Lake County, Oregon, May 18, 1983". The written sealed bids will be opened and publicly declared at the beginning of the sale. If one or more bidders tie as high bid, the bidder who was first to submit his bid deposit and written bid shall be declared the high bidder.

In order to participate in the oral bidding on each parcel, bidders must submit a written bid for not less than the appraised value, and the twenty percent (20%) required deposit.

Oral bidding will be entertained after public declaration of the apparent high sealed bidder and all oral bids must be made in increments of $50.00 or more. After oral bids are entertained, the apparent high qualifying oral bidder shall submit payment by cash, personal check, bank draft, money order or any combination thereof, any additional amount necessary to bring the amount tendered with their sealed bids up to one-fifth of the amount of the oral bid, immediately following the close of the sale.

In the exercise of the preference right, whether submitted by sealed bid or oral bid, the preference right holder shall be required to submit payment as stated above immediately following the close of the sale.

The terms and conditions applicable to the sale are:

1. The apparent high bidder shall submit the remainder of the full bid price within 30 days from receipt of notice of acceptance. Failure to submit the full bid price within 30 days from receipt of notice of acceptance shall result in sale cancellation of the specific parcel and the deposit shall be forfeited.

2. The authorized officer may reject the highest qualified bid and release the bidder from his/her obligation and withdraw any tract for the sale, if he determines that consummation of the sale would be inconsistent with the provisions of any existing law, or collusive or other activities have hindered or restrained free and open bidding, or consummation of the sale would encourage or promote speculation in public lands.

3. The patents will contain a reservation to the United States for ditches and canals.

4. The sale is for surface estate only. The patents will contain a reservation to the United States for all minerals.

5. The sale will be subject to all valid existing rights.

Those parcels not sold pursuant to this Notice of Realty Action shall remain available for sale on a continuing basis until sold. The sale price shall be based on the appraised fair market value at the time of purchase. Subsequent purchases may be transacted at the Lakeview District Office, in person, during regular business hours.

Detailed information concerning the sale, including the planning documents, environmental assessment and the record of public involvement, is available for review at the Lakeview District Office, Bureau of Land Management, 1000 South Ninth Street, Lakeview, Oregon 97630.

For a period of 45 days from the date of this notice, interested parties may submit comments to the District Manager, Lakeview District Office, Bureau of Land Management, P.O. Box 151, 1000 South Ninth Street, Lakeview, Oregon 97630. Any adverse comments will be evaluated by the District Manager who may vacate or modify this realty action and issue a final determination. In the absence of any action by the District Manager, this realty action will become a final determination of the Department of the Interior.

Dated: March 3, 1983.

Richard A. Gerity,

District Manager.

BILLING CODE 4310-84-M

Intent To Prepare a Management Framework Plan Amendment Environmental Impact Statement; Roswell Resource Area; New Mexico

ACTION: Preparation of a Management Framework Plan Amendment/ Environmental Impact Statement (MFPA/EIS) on the rangeland management program in the Roswell Resource Area, Roswell District, New Mexico.

SUMMARY: This Notice of Intent amends the **Federal Register** Notice of Intent to Prepare a Resource Management Plan which was published on Thursday, June 25, 1981, pages 32939 and 32940.

SUPPLEMENTARY INFORMATION: The Roswell Resource Area, Roswell District, will prepare a MFPA/EIS on the rangeland management program (one issue) rather than a resource management plan which would cover a number of issues. The MFPA/EIS will provide resource management information and analysis for the rangeland management program on 1.4 million acres of public land administered by the Bureau in the Roswell Resource Area.

The Interdisciplinary Team

The MFPA/EIS will be developed by an interdisciplinary term under the supervision of the Roswell Resource Area Manager. Area specialists working on the team will include a Range Conservationist, Wildlife Biologist, Recreation Specialist, Realty Specialist, Geologist, Archeologist, and Surface Reclamation Specialist.

Additional technical support will be provided by the District staff as required.

Public Participation

The MFPA/EIS process has advanced to the Alternatives Formulation stage. Reasonable alternatives to be considered at this time include (1) No Action, (2) Limited Management, and (3) Intensive Management. A public scoping meeting is scheduled for March 30, 1983 from 6 to 9 p.m. at the Roswell District Office, 1717 W. 2nd St., Roswell, New Mexico 88201. The purpose is to receive input on these and any other alternatives which the public feels should be discussed.

FOR FURTHER INFORMATION CONTACT:

For further information contact Phil Kirk, Roswell Resource Area Manager or Linda Rundell, MFPA/EIS Team Leader, U.S. Bureau of Land Management, 1717 W. 2nd St., Roswell, New Mexico 88201. Telephone (505) 622–7670.

Dated: March 3, 1983.

Richard W. Baslin,

Associate District Manager, Roswell, New Mexico.

Multiple Use Advisory Council Meeting

Notice is hereby given, in accordance with Pub. L. 94–579 and 43 CFR Part 1780, that a meeting of the Coeur d'Alene District Multiple Use Advisory Council will be held on Thursday, April 28, 1983, at 10:00 a.m., at the Bureau of Land Management Office, 1808 North Third Street, Coeur d'Alene, Idaho 83814.

Agenda for the meeting will include:

1. Introduction and biographical sketch of members;
2. Orientation, briefing, and discussion of Coeur d'Alene District programs by resource area:
3. Discussion of the function of the Council;
4. Establishment of committees;
5. Arrangement for next meeting.

The meeting is open to the public. Interested persons may make oral statements to the council between 11:30 a.m. and 12:00 noon, or file written statements for the Council's consideration. Anyone wishing to make an oral statement must notify the District Manager at the above address by April 22, 1983. Depending on the number of persons wishing to make an oral statement, a per person time limit may be established.

Summary minutes of the meeting will be maintained in the District Office and be available for public inspection and reproduction (during regular business hours) within 30 days following the meeting.

Dated: February 28, 1983.

Wayne W. Zinne,

District Manager.

Prineville District Grazing Advisory Board; Meeting

Notice is hereby given in accordance with Pub. L. 92–463 of a meeting of the Prineville District Grazing Advisory Board to be held April 7, 1983.

The meeting will take place at 1:00 P.M. in the conference room of the Bureau of Land Management office located at 185 East 4th Street, P.O. Box 550, Prineville, OR 97754.

The agenda will center on the following item:

1. Allotment categorization and ranking.

The meeting is open to the public. Anyone wishing to attend and/or make written or oral statements to the board is requested to contact the District Manager at the above address prior to April 1.

Summary minutes of the meeting will be available for review and reproduction within 30 days following the meeting.

Dated: March 1, 1983.

Gerald E. Magnuson,

District Manager.

BILLING CODE 4310-84-M

[NM 54547]

Proposed Withdrawal and Opportunity for Public Hearing; New Mexico

On February 22, 1983, a petition was approved allowing the Bureau of Land Management to file an application to withdraw the following described lands from settlement, sale, location, or entry, under all of the general land laws, including the mining laws, subject to valid existing rights:

New Mexico Principal Meridian

T. 24 N., R. 13 W.,
- Sec. 27, SW¼,
- Sec. 28, S½,
- Sec. 29, S½,
- Sec. 30, that portion of the SE¼ east of State Road 371,
- Sec. 31, that portion of the NE¼ east of State Road 371,
- Sec. 33, all,
- Sec. 34, all.

T. 23 N., R. 13 W.,
- Sec. 3, all,
- Sec. 4, all,
- Sec. 5, that portion of the N½ east of R/W NM 12221, that portion of the S½ east of R/W NM 12221,
- Sec. 9, that portion of the N½ north of County Road CO18 and R/W NM 12221,
- Sec. 10, that portion of the N½ north of County Road CO18.

The Area described contains 3,968.00 acres in San Juan County.

The purpose of the proposed withdrawal is to protect the fragile environment of the Bisti and to preserve the outstanding scenic and scenic values of the area for the enjoyment and enrichment of future generations. The lands will be segregated from the operation of the public land laws, including location under the mining laws for a period of 2 years from the date of publication of this notice in the **Federal Register** unless the application is denied or canceled or until the withdrawal is approved prior to that date. Grazing, recreation and temporary discretionary land uses will continue on the subject lands, if they will have no negative impacts on the values to be protected by the withdrawal.

For a period of 90 days from the date of publication of this notice, all persons who wish to submit comments, suggestions, or objections in connection with the proposed withdrawal may present their views in writing to the undersigned authorized officer of the Bureau of Land Management.

Pursuant to section 204(h) of the Federal Land Policy and Management Act of 1976, notice is hereby given that an opportunity for a public hearing is afforded in connection with the proposed withdrawal. All interested persons who desire to be heard on the proposed withdrawal must submit a written request for a hearing to the State Director, Bureau of Land Management, P.O. Box 1449, Santa Fe, NM 87501, within 90 days from the date of publication of the notice. Upon determination by the authorized officer that a public hearing will be held, a notice of the time and place will be published in the **Federal Register** at least 30 days before the scheduled date of the hearing.

The application will be processed in accordance with regulations set forth in 43 CFR Part 2300.

All communications in connection with this proposed withdrawal should be addressed to the State Director, Bureau of Land Management, Department of the Interior, P.O. Box 1449, Santa Fe, NM 87501.

Dated: February 22, 1983.

Leroy C. Montoya,

Chief, Division of Operations.

BILLING CODE 4310-84-M

Fish and Wildlife Service

Issuance of Permit for Incidental Take of Endangered Species

On December 2, 1982, a notice was published in the **Federal Register** (47 FR 54366), that an application had been filed with the U.S. Fish and Wildlife Service by the County of San Mateo, City of Brisbane, City of Daly City, and City of South San Francisco, California for a permit to incidentally take, pursuant to Section 10(a) of the Endangered Species Act of 1973, as amended, mission blue butterflies (*Icariocia icarioides missionensis*), San Bruno elfin butterflies (*Callophrys mossii bayensis*) and San Francisco garter snakes (*Thamnophis sirtalis tetrataenia*) on San Bruno Mountain, California pursuant to a multi-party agreement which implements the San Bruno Mountain Area Habitat Conservation Plan.

Notice is hereby given that on March 4, 1983, as authorized by the provisions of the Endangered Species Act of 1972 (16 USC 1539), as amended, the U.S. Fish and Wildlife Service issued a permit (PRT 2-9818), to the above named parties subject to certain conditions set forth therein.

Dated: March 4, 1983.

Robert A. Jantzen,

Director, U.S. Fish and Wildlife Service.

[FR Doc. 83-6079 Filed 3-9-83; 8:45 am]

BILLING CODE 4310-55-M

Conservation Plan for Incidental Take of Endangered Wildlife, Finding of No Significant Impact

AGENCY: Fish and Wildlife Service.

ACTION: Notice of Finding of No Significant Impact.

SUMMARY: A joint Federal Environmental Assessment and California Environmental Impact Report (hereinafter referred to as the "EA/EIR") has been prepared for the proposed incidental take of the mision blue butterfly (*Icaricia icarioides missionensis*), San Bruno elfin butterfly (*Callophrys mossii bayensis*), and San Francisco garter snake (*Thamnophis sirtalis tetrataenia*) under a conservation plan pursuant to Section 10(a) of the Endangered Species Act of 1973, as amended. On the basis of the EA/EIR and related documents, and public comments, the Service has determined that the proposed incidental take of these endangered animals would not constitute a major Federal action significantly affecting the quality of the human environment and that a separate Federal Environmental Impact Statement will not be prepared for this proposed activity.

FOR FURTHER INFORMATION CONTACT: Mr. Richard M. Parsons; Chief, Federal Wildlife Permit Office; U.S. Fish and Wildlife Service; P.O. Box 3654, Arlington, Virginia 22203; (703) 235-1903.

SUPPLEMENTAL INFORMATION: On December 2, 1982, the Service published a notice in the **Federal Register** (47 FR [232]: 54366-54367) soliciting public comments on an endangered species permit application jointly submitted by the County of San Mateo, CA; City of Brisbane, CA; City of Daly City, CA; and the City of South San Francisco, CA, for the incidental take of the endangered wildlife mentioned above. The notice provided background information on the permit application and the conservation plan to be used by the applicant to offset loss of the endangered wildlife due to incidental take during a development project within the San Bruno Mountain area in San Mateo County, California.

The Service is considering the issuance of a permit under the Endangered Species Act that would authorize the incidental taking of the mission blue butterfly, San Bruno elfin butterfly, and San Francisco garter snake, within the San Bruno Mountain area. The permit would be conditioned on implementation of the San Bruno Mountain Area Habitat Conservation Plan through an Agreement with respect to such Plan to be entered into by concerned Federal, State, and local parties. The 1982 San Bruno Mountain Area Habitat Conservation Plan and the proposed permit have been the subject of a combined EA/EIR which was finalized in November, 1982. Between 1976 and 1982, local government entities in San Mateo County approved general plans for development and for protection of open space areas on San Bruno Mountain. These local government land use decisions were subject to full consideration in California Environmental Impact Reports and issuance of the proposed permit would be a harmony with such decisions.

Based on a review of these public comments and evaluation of the information provided by the EA/EIR, the Habitat Conservation Plan, the Agreement, and other relevant documents, the Service tentatively determined that issuance of a permit authorizing the incidental taking of mission blue butterflies, San Bruno elfin butterflies, and San Francisco garter snakes within the San Bruno Mountain area was not a major Federal action which would significantly affect the quality of the human environment within the meaning of the National Environmental Policy Act. On January 26, 1983, the Service published a notice in the **Federal Register** (48 FR 3663-3664) of the availability of a proposed Finding of No Significant Impact on the issuance of the permit. The public review period ended on February 25, 1983.

Several comments were received in response to this notice. Based on these and other public comments received and on the above-mentioned documents, the Director has concluded that, as conditioned and mitigated by the requirements of the Habitat Conservation Plan and the Agreement, issuance of a permit authorizing the incidental taking of mission blue butterflies, San Bruno elfin butterflies, and San Francisco garter snakes within the San Bruno Mountain Area is not a major Federal action which would significantly affect the quality of the human environment within the meaning of the National Environmental Policy Act. Therefore, a separate Federal Environmental Impact Statement for this action will not be prepared.

Copies of the Finding of No Significant Impact will be on file for public review, during normal business hours, at the following locations: Federal Wildlife Permit Office, 1000 N. Glebe Road, Room 601, Arlington, VA 22201, (703/235-1903); U.S. Fish and Wildlife Service, Region 1, Office of Federal Assistance, Lloyd 700 Building, Suite 550, 500 NE Multnomah Street, Portland, OR 97232 (503/231-6134) and; U.S. Fish and Wildlife Service, Sacramento Office of Endangered Species, 1230 "N" Street, 14th Floor Sacramento, CA 95814 (916/440-2791).

This action has been reviewed under the requirements of the National Environmental Policy Act (NEPA), as amended, the Council on Environmental Quality's NEPA Regulations (40 CFR 1500-1508), and the Service's guidelines concerning the implementation of NEPA.

Done this 4th day of March, 1983.

Robert A. Jantzen,

Director, U.S. Fish and Wildlife Service.

Information Collection Submitted for Review

The proposal for the collection of information listed below has been submitted to the Office of Management and Budget (OMB) for approval under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35). Copies of the proposed information collection requirement and related forms and explanatory material may be obtained by contacting the Service's clearance officer at the phone number listed below. Comments and suggestions on the requirement should be made directly to the Service clearance officer and the OMB Interior Desk Officer at 202-395-7340.

Title: Pesticide Use Proposal (To monitor the amount and impact of pesticides used on national wildlife refuge lands).

Bureau Form Number: N/A.

Frequency: On occasion.

Description of Respondents: Individuals, farms, mosquito and insect control agencies or businesses.

Animal Responses: 500.

Annual Burden Hours: 50.

Service Clearance Officer: Arthur J. Ferguson, 202-653-7499.

Robert E. Gilmore,

Acting Associate Director, Wildlife Resources.

BILLING CODE 4310-55-M

INTERSTATE COMMERCE COMMISSION

Motor Carriers; Permanent Authority Decisions; Decision-Notice

Motor Common and Contract Carriers of Property (except fitness-only); Motor Common Carriers of Passengers (public interest); Freight Forwarders; Water Carriers; Household Goods Brokers. The following applications for motor common or contract carriers of property, water carriage, freight forwarders, and household goods brokers are governed by Subpart A of Part 1160 of the Commission's General Rules of Practice. See 49 CFR Part 1160, Subpart A, published in the **Federal Register** on November 1, 1982, at 47 FR 49583, which redesignated the regulations at 49 CFR 1100.251, published in the **Federal Register** December 31, 1980. For compliance procedures, see 49 CFR 1160.19. Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart B.

The following applications for motor common carriage of passengers, filed on or after November 19, 1982, are governed by Subpart D of 49 CFR Part 1160, published in the **Federal Register** on November 24, 1982 at 47 FR 53271. For compliance procedures, see 49 CFR 1160.86. Carriers operating pursuant to an intrastate certificate also must comply with 49 U.S.C. 10922(c)(2)(E). Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart E. In addition to fitness grounds, these applications may be opposed on the grounds that the transportation to be authorized is not consistent with the public interest.

Applicant's representative is required to mail a copy of an application, including all supporting evidence, within three days of a request and upon payment to applicant's representative of $10.00.

Amendments to the request for authority are not allowed. Some of the applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

Findings

With the exception of those applications involving duly noted problems (e.g., unresolved common control, fitness water carrier dual operations, or jurisdictional questions) we find, preliminarily, that each applicant has demonstrated that it is fit, willing, and able to perform the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations.

We make an additional preliminary finding with respect to each of the following types of applications as indicated: common carrier of property—that the service proposed will serve a useful public purpose, responsive to a public demand or need; water common carrier—that the transportation to be provided under the certificate is or will be required by the public convenience and necessity; water contract carrier, motor contract carrier of property, freight forwarder, and household goods broker—that the transportation will be consistent with the public interest and the transportation policy of section 10101 of chapter 101 of Title 49 of the United States Code.

These presumptions shall not be deemed to exist where the application is opposed. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient opposition in the form of verified statements filed on or before 45 days from date of publication, (or, if the application later becomes unopposed) appropriate authorizing documents will be issued to applicants with regulated operations (except those with duly noted problems) and will remain in full effect only as long as the applicant maintains appropriate compliance. The unopposed applications involving new entrants will be subject to the issuance of an effective notice setting forth the compliance requirements which must be satisfied before the authority will be issued. Once this compliance is met, the authority will be issued.

Within 60 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

Agatha L. Mergenovich,

Secretary.

Note.—All applications are for authority to operate as a motor common carrier in interstate or foreign commerce over irregular routes, unless noted otherwise. Applications for motor contract carrier authority are those where service is for a named shipper "under contract." Applications filed under 49 U.S.C. 10922(c)(2)(B) to operate in intrastate commerce over regular routes as a motor common carrier of passengers are duly noted.

BILLING CODE 7035-01-M

Motor Carriers; Permanent Authority Decisions

Motor Common and Contract Carriers of Property (fitness-only); Motor Common Carriers of Passengers (fitness-only); Motor Contract Carriers of Passengers; Property Brokers (other than household goods). The following applications for motor common or contract carriage of property and for a broker of property (other than household goods) are governed by Subpart A of Part 1160 of the Commission's General Rules of Practice. See 49 CFR Part 1160, Subpart A, published in the **Federal Register** on November 1, 1982, at 47 FR 49583, which redesignated the regulations at 49 CFR 1100.251, published in the **Federal Register** on December 31, 1980. For compliance procedures, see 49 CFR 1160.19. Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart B.

The following applications for motor common or contract carriage of passengers filed on or after November 19, 1982, are governed by Subpart D of the Commission's Rules of Practice. See 49 CFR Part 1160, Subpart D, published in the **Federal Register** on November 24, 1982, at 49 FR 53271. For compliance procedures, see 49 CFR 1160.86. Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart E.

These applications may be protested *only* on the grounds that applicant is not fit, willing, and able to provide the transportation service or to comply with the appropriate statutes and Commission regulations.

Applicant's representative is required to mail a copy of an application, including all supporting evidence, within three days of a request and upon payment to applicant's representative of $10.00.

Amendments to the request for authority are not allowed. Some of the applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

Findings

With the exception of those applications involving duly noted problems (e.g., unresolved common control, fitness, or jurisdictional questions) we find, preliminarily, that each applicant has demonstrated that it is fit, willing, and able to perform the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations. This presumption shall not be deemed to exist where the application is opposed. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient opposition in the form of verified statements filed on or before 45 days from date of publication, (or, if the application later becomes unopposed) appropriate authorizing documents will be issued to applicants with regulated operations (except those with duly noted problems) and will remain in full effect only as long as the applicant maintains appropriate compliance. The unopposed applications involving new entrants will be subject to the issuance of an effective notice setting forth the compliance requirements which must be satisfied before the authority will be issued. Once this compliance is met, the authority will be issued.

Within 60 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

Agatha L. Mergenovich,
Secretary.

Note.—All applications are for authority to operate as a motor common carrier in interstate or foreign commerce, over irregular routes unless noted otherwise. Applications for motor contract carrier authority are those where service is for a named shipper "under contract."

Please direct status inquiries to Team 2, (202) 275–7030.

Volume No. OP2–089

Decided: February 28, 1983.

MC 5623 (Sub-63), filed February 4, 1983. Applicant: ARROW TRUCKING CO., 4230 South Elwood, P.O. Box 7280, Tulsa, OK 74105. Representative: J. G. Dail, Jr., P.O. BILLING CODE 7035-01-M

Motor Carrier; Permanent Authority Decisions; Restriction Removals

The following restriction removal applications are governed by 49 CFR 1165. Part 1165 was published in the **Federal Register** of December 31, 1980, at 45 FR 86747 and redesignated at 47 FR 49590, November 1, 1982.

Persons wishing to file a comment to an application must follow the rules under 49 CFR 1165.12. A copy of any application can be obtained from any applicant upon request and payment to applicant of $10.00.

Amendments to the restriction removal applications are not allowed.

Some of the applications may have been modified prior to publication to conform to the special provisions applicable to restriction removal.

Findings

We find, preliminarily, that each applicant has demonstrated that its requested removal of restrictions or broadening of unduly narrow authority is consistent with the criteria set forth in 49 U.S.C. 10922(h).

In the absence of comments filed within 25 days of publication of this decision-notice, appropriate reformed authority will be issued to each applicant. Prior to beginning operations under the newly issued authority, compliance must be made with the normal statutory and regulatory requirements for common and contract carriers.

Agatha L. Mergenovich,

Secretary.

Please direct status inquiries to Team 3, at (202) 275–5223.

Volume No. OP3–72

Decided: March 2, 1983.

MC 109104 (Sub-8)X, filed January 14, 1983. Applicant: GREAT SOUTHERN COACHES, INC., 900 Burke Ave., Jonesboro, AR 72401. Representative: Robert J. Brooks, 1828 L St., NW., Suite 1111, Washington, D.C. 20036, (202) 466–3892. Lead, Sub 5 and Deviation Nos. 2, 3 and 4. (1) To authorize service at all intermediate points on passenger carrier's specified routes in lead certificate (a) between West Memphis, AR and Hoxie, AR, (b) between West Memphis, AR and Memphis, TN, and remove restriction against pick-up and discharge on same route, (c) between Advance, MO and St. Louis, MO and eliminate limitations on service at Chester, IL and (d) between Clarkston, MO and Gideon, MO; (2) to authorize service at all intermediate points on applicant's specified routes in Sub-No. 5 (a) between Little Rock, AR and Newport, AR, (b) between Beebe, AR, Searcy, AR, and Judsonia, AR and junction of their branch routes with U.S. Hwy 67, and (c) eliminate service restrictions at Jacksonville, AR and at intermediate points between Jacksonville and Little Rock, AR; (3) authorize service at all intermediate points on deviation routes between (a) St. Louis, MO and Perryville, MO, (b) Memphis, TN and Gilmore, AR, and (c) Perryville, MO and Cape Girardeau, MO; (4) remove restriction limiting pick-up of passengers at St. Louis destined to Cape Girardeau and vice versa on deviation route between Cape Girardeau and Perryville; (5) remove for operating convenience only limitation on deviation routes.

Volume No. OP3–77

Decided: March 3, 1983.

MC 135294 (Sub-3)X, filed February 18, 1983. Applicant: WILLIES BOAT MOVING LTD., 14257 64th Ave., Surrey, BC, Canada V3W. Representative: Jim Pitzer, 15 South Grady Way-Suite 321, Renton, WA 98055 (206) 235–1111. Sub 1 Certificate: (1) broaden port of entry at or near Blaine, WA, to read "ports of entry on the International Boundary line between the United States and Canada, in WA"; (2) broaden Seattle, WA, to "points in King, Pierce, Kitsap and Snohomish Counties, WA"; and (3) change one-way to radial authority.

Volume No. OP3–84

Decided: March 4, 1983.

MC 141385 (Sub-8)X, filed February 16, 1983. Applicant: PENNER FEED & SUPPLY, INC., Inman Industrial Park, P.O. Box 476, Inman, KS 67546. Representative: Robert B. Pepper, 168 Woodbridge Ave., Highland Park, NJ 08904 (201) 572–5551. Subs 1, 3F, 6F, and 7F Permits, (a) broaden (1) Sub 1 to "chemicals and related products" from paints and coating (except in bulk), (2) Subs 3F and 6F to "food and related products" from (a) feed and feed products (except in bulk), and (b) flour, flour products, and baker ingredients and supplies, (B) Subs 1, 3F, 6F, and 7F broaden the territorial description to between points in the U.S. (except AK and HI), under continuing contract(s) with named shippers, and (C) Subs 1, 3F, and 7F, remove commodity restriction "except in bulk."

For the following, please direct status calls to Team 4 (202) 275–7669.

Volume No. OP4–125

Decided: March 3, 1983.

MC 16536 (Sub-8)X, filed February 18, 1983. Applicant: STANDARD FORWARDING CO., INC., 2925 Morton Dr., East Moline, IL 61244. Representative: James C. Hardman, 33 N. LaSalle St., Chicago, IL 60602, (312) 236–5944. Lead and Sub 5 permits: (1) broaden Lead (a) from agricultural implements, farm machinery, and materials and supplies used in the manufacture, sale, or distribution of agricultural implements and farm machinery, agricultural-implement and farm machinery show displays, and experimental types of the above to "machinery, lumber and wood products, transportation equipment, fabricated metal products, pulp, paper, and related products, furniture and fixtures, printed matter, rubber and plastic products, instruments, photographic goods and optical goods, watches and clocks and miscellaneous products of manufacturing", and (b) from tractors, internal combustion engines, pumping jacks, non-self-propelling vehicles, and parts to "machinery and transportation equipment"; (2) remove bulk restriction in Sub 5; and (3) broaden territorial description to in Lead between points in the U.S. under continuing contract(s) with persons whose business is the manufacture or sale of agricultural implements and farm machinery, for the transportation of the commodities indicated and in the manner specified in part (1)(a) above, under contract with unnamed shippers in part (b), and in Sub 5 under contract with a named shipper.

BILLING CODE 7035-01-M

[Ex Parte No. 346; Sub-12]

Petition to Exempt Storage Leases of Norfolk and Western

AGENCY: Interstate Commerce Commission.

ACTION: Notice of exemption.

SUMMARY: In response to a petition filed by Norfolk and Western Railway Company, the Commission is exercising its authority under 49 U.S.C. 10505 to exempt the leasing of surplus covered hopper cars from regulation to permit N&W to compete more effectively with private car companies in the leasing of these idle cars for storage purposes.

EFFECTIVE DATE: March 10, 1983.

FOR FURTHER INFORMATION CONTACT: Louis E. Gitomer (202) (275–7245).

SUPPLEMENTARY INFORMATION: Additional information is contained in the Commission's full decision. To purchase a copy of the full decision, contact T. S. InfoSystems, Inc., Room 2227, Interstate Commerce Commission, Washington, D.C. 20423, or call 289–4357 (D.C. Metropolitan area) or toll free (800) 424–5403.

Decided: March 2, 1983.

By the Commission, Chairman Taylor, Vice Chairman Sterrett, Commissioners Andre, Simmons, and Gradison.

Agatha L. Mergenovich,

Secretary.

BILLING CODE 7035-01-M

[Ex Parte No. 393; Sub-1]

Standards for Railroad Revenue Adequacy

AGENCY: Interstate Commerce Commission.

ACTION: Proposed Revision to Existing Standards for Determination of Revenue Adequacy of Railroads.

SUMMARY: The purpose of this proceeding is to improve the standards adopted in Ex Parte No. 393, *Standards for Railroad Revenue Adequacy*, 364 I.C.C. 803 (1981) (46 FR 20806, April 7, 1981), for determining railroad revenue adequacy. We indicated in our decision an intent to consider major modifications in our revenue adequacy proceedings. The time now seems appropriate to re-examine and resolve issues deferred by our previous decision, and certain principles and procedures adopted with dispatch to comply with the mandatory time limits specified in the Staggers Rail Act of 1980.

Specific proposed revisions in present standards addressed in this proceeding are: (1) Calculation of Return on Investment (ROI) to consider exclusively all transportation elements of income, expense, and investment; (2) Use of normalized or weighted normalized data to compute ROI; (3) Computation of ROI on a consolidated basis to include railroad affiliates; and (4) Conversion from an original cost investment base to one based on current or replacement costs in revenue adequacy determinations, and use of current cost information in other regulatory proceedings.

DATE: Written responses and accompanying data should be filed with the Commission within 60 days from the publication in the **Federal Register.**

COPIES: Copies of the full decision are available from the Office of the Secretary, Room 2215, Interstate Commerce Commission, Washington, D.C. 20423, Phone (202) 275–7428.

ADDRESS: An original and 10 copies of any comment should be sent to: Office of the Secretary, Interstate Commerce Commission, Washington, D.C. 20423.

FOR FURTHER INFORMATION CONTACT: Ward L. Ginn, Jr., (202) 275–7489.

SUPPLEMENTARY INFORMATION: The purpose of this revision is to resolve those issues left pending in Ex Parte No. 393, *Standards for Railroad Revenue Adequacy*, 364 ICC 803 (1981).

The most significant change proposed is the adoption of inflation adjusted accounting procedures employing specific inflation indices developed internally by the Commission. Other changes to be considered include refining definitions of the railroad net investment base and operating income to include all transportation related elements and exclude non-transportation related items. In addition, it is proposed that normalized data be used over a four year period, in lieu of single year data to determine revenue adequacy. Finally, it is proposed to consider the inclusion of railroad affiliates in determining the revenue needs of railroad systems.

We seek comments from the parties on each of these issues to assist us in resolving them in this proceeding. Additionally, we request comments on possible implications of the Economic Recovery Tax Act of 1981 (ERTA) on future revenue adequacy determinations.

Regulatory Flexibility Act

The Commission certifies that these proposed standards will not have a significant economic impact on a substantial number of small entities. The rule changes considered in this proceeding affect only information already supplied by Class I railroads or available to them from their subsidiaries.

We seek comments on the various issues and approaches contained in this notice. In addition, while this action does not appear to affect significantly the quality of the human environment or conservation of energy resources, we invite comments on these subjects.

(49 U.S.C. 10321, 10701(e), 10704(a); section 205(a)(1), Pub. L. 96–448; 4 U.S.C. 553.)

Decided: February 10, 1983.

By the Commission, Chairman Taylor, Vice Chairman Gilliam, Commissioners Sterrett, Andre, Simmons, and Gradison. Commissioner Sterrett dissented in part with a separate expression. Commissioner Andre dissented with a separate expression. Vice Chairman Gilliam did not participate.

Agatha L. Mergenovich,

Secretary.

Commissioner Sterrett, dissenting in part:

The Commission's revenue adequacy standards have taken on greatly increased significance because a majority of the Commission is proposing, in Ex Parte No. 347 (Sub-No. 1), to use revenue adequacy as a constraint on pricing. Thus, it is imperative that the Commission be particularly careful in proposing changes to the existing revenue adequacy standards.

The Commission's stated purpose in this proceeding is "to provide a more accurate reflection of the profitability of railroad operations." Yet, three of the proposals made here would distort the real picture by including in the determination of a rail carrier's profitability (1) the financial results of certain non-carrier, but "transportation-related" affiliates; (2) the financial results of other railroads, related only by common control; and (3) the rail carrier's past financial results, instead of just its current performance. In short, whether a railroad is revenue adequate would be determined by considering the financial performance of non-carriers and other carriers, over past years. I question whether this is either legally or practically justifiable.

Commissioner Andre, dissenting

On the whole, the notice approved by the majority proposed worthwhile changes in the method of determining railroad return on investment.

I must, however, dissent from the majority's proposal to retreat from current use of the nominal (without inflation adjustment) cost of capital in determining the proper level of earnings. The majority proposes to reduce the nominal cost of capital to what it considers to be the "real" cost of capital by subtracting from the nominal cost of capital an estimate of the future rate of inflation. In my dissenting vote in the Notice of Rulemaking in Ex Parte No. 274 (Sub-No. 5), *Revision of Abandonment Regulations* (unprinted, served October 1, 1982), I opposed a similar deduction of an inflation estimate.

Briefly, I submit that sound policy requires us to focus upon the railroads' true opportunity cost of capital when we are setting their allowable return on investment. The railroads' opportunity cost of capital is the sum that the railroads must forgo by keeping their assets in railroad use instead of investing them elsewhere. It is the value of the railroads' investment multiplied by a percentage return figure which is a reasonable estimate of the return that a railroad could get by investing its funds elsewhere.

The railroads' investment is currently determined on a book or original cost basis. The use of original cost assumes that an investment in real assets is like a deposit of cash in an interest-bearing bank account, in that money value of the original investment does not change. An asset value at original cost, like a sum of money in a bank, will not increase in nominal value (or even real value) due to inflation.

In the real world, however, railroads put their money into real assets. Real assets can increase in nominal value due to inflation. (The majority would give proper recognition to inflationary changes in value by the proposal to use index numbers to develop an acceptable proxy for depreciated reproduction cost values.) Moreover, in the real world, a railroad could (in the absence of regulatory restraint) sell its assets at their (inflation-influenced) reproduction cost values and invest the proceeds *at market rates of return*, with no inflation adjustment of the type proposed by the majority. The sum that the railroads would receive if they were to do this is the true opportunity cost of capital, i.e., what other sectors of the economy are sacrificing when rail assets are kept in rail use.

The majority, however, ignores the true cost of capital when it uses the inflation rate deduction to allow less than the actual market rate of return to be used as the cost of

capital. In my vote in Ex Parte No. 274 (Sub-No. 5), supra, I explained why this deduction is not necessary to prevent railroads from "double counting" the effect of inflation on rate of return. The same reasoning applies here.

BILLING CODE 8116-01-M

DEPARTMENT OF JUSTICE

Proposed Consent Decree in Action To Enforce the Clean Air Act; Lehigh Carting Co.

In accordance with Departmental policy, 28 CFR 50.7, 38 FR 19029, notice is hereby given that on February 22, 1983, a proposed consent decree in *United States* v. *Lehigh Carting Company, Inc.*, Civil Action No. 83–C–2213 was lodged with the United States

District Court for the Eastern District of New York.

The proposed consent decree provides for compliance with both the New York State Implementation Plan (SIP) and the Clean Air Act. The decree enjoins open burning and waste incineration, requires the company to comply with future requests for information made by the Environmental Protection Agency pursuant to its statutory authority, grants EPA access to the company's property for inspection purposes, and orders payment by the company of a $4,000 civil penalty.

The Department of Justice will receive for a period of thirty (30) days from the date of this notice written comments relating to the proposed consent decree. Comments should be addressed to the Assistant Attorney General of the Land and Natural Resources Division, Department of Justice, Washington, D.C. 20530, and should refer to *United States v. Lehigh Carting Company, Inc.*, D.J. No. 90-5-2-1-565.

A proposed consent decree may be examined at the Office of the United States Attorney, Eastern District of New York, U.S. Courthouse, 225 Cadman Plaza East, Brooklyn, New York 11201; and the Environmental Protection Agency, 26 Federal Plaza, New York, New York 10278; and the Environmental Enforcement Section, Land and Natural Resources Division, United States Department of Justice, Room 1515, Ninth Street and Pennsylvania Avenue, NW., Washington, D.C. 20530. A copy of the proposed consent decree may be obtained in person or by mail from the Environmental Enforcement Section, Land and Natural Resources Division of the Department of Justice.

Carol E. Dinkins,

Assistant Attorney General, Land and Natural Resources Division.

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

Music Advisory Panel (Solo Recitalists); Meeting

Pursuant to Section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), as amended, notice is hereby given that a meeting of the Music Advisory Panel (Solo Recitalists) to the National Council on the Arts will be held on March 24-25, 1983, from 9:00 a.m.-5:30 p.m. in room 1426 of the Columbia Plaza Office Complex, 2401 E Street, NW., Washington, D.C. 20506.

This meeting is for the purpose of Panel review, discussion, evaluation, and recommendation on applications for financial assistance under the National Foundation on the Arts and the Humanities Act of 1965, as amended, including discussion of information given in confidence to the agency by grant applicants. In accordance with the determination of the Chairman published in the **Federal Register** of February 13, 1980, these sessions will be closed to the public pursuant to subsections (c)(4), (6) and 9(b) of section 552b of Title 5, United States Code.

Further information with reference to this meeting can be obtained from Mr. John H. Clark, Advisory Committee Management Officer, National Endowment for the Arts, Washington, D.C. 20506, or call (202) 634-6070.

John H. Clark,

Director, Office of Council and Panel Operations, National Endowment for the Arts.

March 2, 1983.

BILLING CODE 7537-01-M

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-213]

Connecticut Yankee Atomic Power Co.; Issuance of Amendment To Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 53 to Facility Operating License No. DPR-61 issued to Connecticut Yankee Atomic Power Company (the licensee), which revised the Technical Specifications for operation of the Haddam Neck Plant (the facility) located in Middlesex County, Connecticut. This amendment is effective as of its date of issuance.

The amendment approves changes to the Appendix A Technical Specifications to allow hydrostatic and leak testing of the primary system at lower temperatures.

The application for amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see: (1) The application for amendment dated February 1, 1982, and a revision thereto dated February 28, 1983, (2) Amendment No. 53 to License No. DPR-61, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C., and at the Russel Library, 119 Broad Street, Middletown, Connecticut 16457. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C., 2055, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland, this 4th day of March 1983.

For the Nuclear Regulatory Commission.

Thomas V. Wambach,

Acting Chief, Operating Reactors Branch #5, Division of Licensing.

BILLING CODE 7590-01-M

[ASLB No. 78-389-03 OL, 80-429-02 SP; Docket Nos. 50-329 OM, 50-330 OM; Docket Nos. 50-339 OL, 50-330 OL.]

Consumers Power Co. (Midland Plant, Units 1 and 2); Rescheduled Evidentiary Hearings

March 4, 1983.

Notice is hereby given that, as announced at a recent evidentiary hearing (Tr. 12162), hearings on QA/QC issues, previously scheduled for April 12–16 and 18–22, 1983 (see Order dated January 7, 1983), have been rescheduled for April 26–30 and May 2–6, 1983. The hearings will be held at Room E, Quality Inn, 1815 S. Saginaw Road, Midland, Michigan.

For the Atomic Safety and Licensing Board.

Charles Bechhoefer,

Chairman, Administrative Judge.

[FR Doc. 83-6166 Filed 3-9-83; 8:45 am]

BILLING CODE 7590-01-M

[Docket No. 50-322-OL]

Long Island Lighting Co. (Shoreham Nuclear Power Station, Unit 1); Schedule and Location for Resumption of Evidentiary Hearing

March 7, 1983.

As discussed with the affected parties during the conference call of March 2, 1983, the evidentiary hearing in this operating license proceeding will resume on Tuesday, April 5, 1983, at 10:30 a.m., at the: Riverhead Suffolk County Center, Legislative Hearing Room, Center Drive, Riverhead, New York 11901.

The hearing will continue until the completion of systems interaction and safety classification issues raised by Mr. Conran's affidavit, on a Tuesday through Friday schedule.

For the one day of Thursday, April 7, 1983, the hearing will be held at the: Riverhead Town Hall, 200 Howell Avenue, Riverhead, New York 11901.

The hearing will commence at 10:30 a.m. on Tuesdays, and at 9:00 a.m. on other days.

For the Atomic Safety and Licensing Board.

Lawrence Brenner,

Chairman, Administrative Judge.

March 7, 1983.

BILLING CODE 7590-01-M

[Dockets Nos. 50-277 and 50-278]

Philadelphia Electric Co., et al; Issuance of Amendments to Facility Operating Licenses

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendments Nos. 89 and 89 to Facility Operating Licenses Nos. DPR–44 and DPR–56, issued to Philadelphia Electric Company, Public Service Electric and Gas Company, Delmarva Power and Light Company, and Atlantic City Electric Company, which revised Technical Specifications (TSs) for operation of the Peach Bottom Atomic Power Station, Units Nos. 2 and 3 (the facility) located in York County, Pennsylvania. The amendments are effective as of the date of issuance.

The changes to the TSs reduce the Reactor Vessel Differential Pressure Alarm setpoint to permit proper alarm operation for detection of Core Spray Sparger pipe breaks within the reactor vessel annulus area.

The application for the amendments complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendments. Prior public notice of these amendments was not required since the amendments do not involve a significant hazards consideration.

The Commission has determined that the issuance of these amendments will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of these amendments.

For further details with respect to this action, see: (1) The application for amendments dated October 1, 1981, (2) Amendment No. 89 to License No. DPR–44 and Amendment No. 89 to License No. DPR–56 and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C., and at the Government Publications Section, State Library of Pennsylvania, Education Building, Commonwealth and Walnut Streets, Harrisburg, Pennsylvania. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland, this 1st day of March 1983.

For the Nuclear Regulatory Commission.

John F. Stolz,

Chief, Operating Reactors Branch #4, Division of Licensing.

BILLING CODE 7590-01-M

[Dockets Nos. 50-277 and 50-278]

Philadelphia Electric Co., et al., Issuance of Amendments To Facility Operating Licenses

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendments Nos. 90 and 90 to Facility Operating Licenses Nos. DPR–44 and DPR–56, issued to Philadelphia Electric Company, Public Service Electric and Gas Company, Delmarva Power and Light Company, and Atlantic City Electric Company, which revised Technical Specifications (TSs) for operation of the Peach Bottom Atomic Power Station, Units Nos. 2 and 3 (the facility) located in York County, Pennsylvania. The amendments are effective as of the date of issuance.

The revised TSs provide operability and surveillance requirements for the scram discharge volume vent and drain isolation valves.

The application for the amendments complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendments. Prior public notice of these amendments was not required since the amendments do not involve a significant hazards consideration.

The Commission has determined that the issuance of these amendments will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of these amendments.

For further details with respect to this action, see: (1) The application for amendments dated December 15, 1982, (2) Amendment No. 90 to License No. DPR–44 and Amendment No. 90 to License No. DPR–56, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C., and at the

BILLING CODE 7590-01-M

[Docket Nos. 50-445, 50-446]

Texas Utilities Generating Co., et al. (Comanche Peak Steam Electric Station, Units 1 and 2); Resumed Evidentiary Hearing

March 4, 1983.

I

Please take notice that the evidentiary hearing in this operating license proceeding will be resumed on Monday, April 4, 1983 at 9:30 a.m., local time, at the Metro Center Hotel, 600 Commerce Street, Fort Worth, Texas 76102 and will continue through April 8, 1983. The hearing will address matters in controversy that have not been completed, including both issues and evidentiary or testimonial proof previously described in our Memorandum and Order dated January 4, 1983.

The NRC Staff is hereby directed and ordered to prepare and serve subpoenas for the appearance as Board Witnesses, at 9 a.m. Monday, April 4, 1983, of the following persons: Richard Ice, Jim Hawkins, Donna Lewellen, Randy Smith, Gordon Purdy, Tom Brandt, Ron Tolson, David Chapman, Albert Boren and Chet Wright.

All parties to this proceeding and their attorneys, representatives and persons in privity with them are hereby directed to refrain from conferring with, discussing, talking to, or "preparing" any of these witnesses on matters related, directly or indirectly, to the Charles A. Atchison allegations concerning his wrongful discharge as a QC inspector at Comanche Peak facility, his job performance, the NRC investigation of the Atchison allegations, the evidentiary hearing on alleged illegal discharge conducted by the Department of Labor (DOL) resulting in a Recommended Decision in Case No. 82-ERA-9 filed by an Administrative Law Judge on December 3, 1982, and the evidence or testimony adduced at such DOL evidential hearing. The subpoenaed witnesses listed herein above are also directed to refrain from discussing the facts involved in the above-described Atchison allegations and hearings with each other, or with the parties to this proceeding and the parties' counsel or representatives, until after all such witnesses have testified before the Board as Board Witnesses on April 5, 1983.

II

The reasons for taking evidence from these Board Witnesses and the Board's own determination of its informational needs in that regard in order to resolve important factual and credibility issues, were set forth in our Orders dated January 4, 1983, September 30, 1982 and August 4, 1982. The Board has concluded that the circumstances surrounding the investigation and testimony of an NRC investigator that allegations of the wrongful discharge of a QC inspector were not substantiated (Staff Exhibits 197-199), should "be fully aired and resolved," regardless of "whether or not the parties are themselves otherwise interested in pursuing those matters." [1]

Some clarification is required as to the controversy between the legal Staff and the Board. The dispute is over the production of documents as ordered by the Board. These documents are the original, unaltered, signed witness statements taken by the NRC investigator when he interviewed the ten witnesses listed above. Theses witnesses are not Staff witnesses, and their identities were not dug up by the Staff investigation. They were chiefly supplied to the investigator by the original "whistleblower," Mr. Atchison, when he alleged that he had been wrongfully fired as a QC inspector at Comanche Peak because he tried to report serious construction defects and practices at the site.

The Licensing Board is well aware, as the Appeal Board found,[2] that the identities of the ten interviewees "had become public knowledge through the inequivocal testimony of a highly reliable applicants' witness." [3] However, it is necessary to develop a complete record in order to make findings concerning the adequacy and reliability of NRC investigations of serious safety allegations by a discharged QC inspector. The production for Board review of the original, signed witness statements would assist in developing a full record. The Staff's offer of heavily blacked out and thus censored copies is an unacceptable substitute for the original, unaltered documents.

Public confidence in the ability and willingness of NRC to investigate QC allegations by "whistleblowers" is very important to perceptions of the integrity of our adjudicatory process. As we have previously stated, it would be anomalous to have DOL and NRC investigators coming to opposite conclusions regarding the wrongful firing of a QC inspector when based upon substantially the same evidence or witness' statements.[4] Clearly the Board should be able to take additional direct evidence itself on these important matters of credibility without running into an "* * * 'unnecessary,' delay grounded in a Staff desire to perpetuate a now academic disagreement with the Licensing Board" (ALAB-716 at 7). In any event, the Board would not be perpetuating any dispute with the Staff, as it already has the names of the ten witnesses it wants to subpoena and interrogate directly. The Staff is required only to perform the ministerial task of preparing and serving subpoenas.[5] Most of the names of these witnesses were furnished initially by Mr. Atchison, and they were not the result of any Staff investigation or original promises of confidentiality. The latter argument appears to be a belated and self-serving effort by the Staff to obstruct the Board from determining whether or not QC "whistleblowers" were improperly fired, as found by the DOL Administrative Law Judge after a full adjudicatory hearing. Such finding, which was subsequent to the Staff's initial and continued refusal to furnish witness statements or names, constitutes additional necessity for the Board to clear the air by making an independent record on the issue of discharge of a QC inspector allegedly for disclosing construction defects. It should also be noted that a large number of I&E reports have been admitted into evidence at the request of both the Staff and Intervenor CASE. It will be necessary for the Board to determine the adequacy of such investigations as they relate to the QA/QC program. In that context, an

[1] Consumers Power Company (Midland Plant, Units 1 and 2), ALAB-458, 7 NRC 155, at 177, footnote 87 (1978).

[2] ALAB-714 (February 24, 1983), Slip Opinion at 6-7, 15-18.

[3] *Id.*, at 17.

[4] Memorandum and Order dated January 4, 1983, at 2-5.

[5] If the Commission does not grant the Staff's Application For A Stay Of The Effectiveness of ALAB-714, filed March 1, 1983, in such a manner as to relieve the Staff of its duty to produce unaltered witness statements, the Board will require the Staff to produce copies of the signed witness statements as expressly directed in its prior orders.

examination of the contemporaneous witness statements as well as the witnesses themselves will help the Board evaluate the quality of such investigations and the validity of their conclusions.

An independent examination of Board witnesses will enable the balance of the hearing on disputed contentions to proceed expeditiously without impacting adversely on the balance of the hearing schedule. This procedure, by providing for an early hearing of the Board's witnesses, takes into account the Licensing Board's concern that "the progress of this operating license proceeding might well be impeded" (ALAB-716, Slip Op. at 6). There is also no question that there is "a manifest need to avoid unnecessary delay in the completion of the proceeding" (*ibid*).

The procedure of directing all witnesses not to discuss the subject of their testimony in advance of their appearance as Board witnesses, was successfully followed in *Consumers Power Company* (Midland Plant, Units 1 and 2) (Remand Proceeding), LBP-81-63, 14 NRC 1968 (1981). The views of the Commission on disclosure in that proceeding are set forth in the Statement of the Commission, CLI-83-3 (February 18, 1983), which for convenience is attached hereto as Appendix 1. In addition, this procedure is not contrary to the so-called *Summer* doctrine regarding restrictions on expert witnesses being called by licensing boards, because a finding of necessity has been made by the Board. Also, the Staff has not offered to supply the testimony itself as it did in *Summer*, but rather has refused to do so.[6]

Finally, the Applicants and the Staff are hereby directed to file with the Board, and with the appropriate NRC Public Document Room, one copy each of the Transcript of the DOL evidentiary hearing in Case No. 82-ERA-9, wherein Charles A. Atchison was the complainant and Brown and Root, Inc., was the respondent on allegations of illegal discharge. Copies of the material core exhibits admitted into evidence by the DOL shall also be furnished if not unduly bulky or expensive. These documents and transcripts shall be filed and in the hands of the Board at its Bethesda, Maryland office by March 21, 1982.

It is so ordered.

Dated at Bethesda, Maryland this 4th day of March, 1983.

[Docket Nos. 50-445 and 50-446]

Texas Utilities Generating Co., et al. (Comanche Peak Steam Electric Station, Units 1 and 2); Receipt of Petition

Notice is hereby given that the Citizens Association for Sound Energy has filed a request for action pursuant to 10 CFR 2.206 with respect to the Comanche Peak Station which is being constructed by the Texas Utilities Generating Co. under construction permits issued by the Nuclear Regulatory Commission. The petition alleges that the company's failure to have certain design documents within its possession constitutes a violation of NRC regulations. Consequently, the petitioner requests that the Director, Office of Inspection and Enforcement issue an order to show cause why the licensee should not be found in violation of NRC regulations or, in the alternative, produce the documents.

In accordance with 10 CFR 2.206, appropriate action will be taken on the petition within a reasonable time. Copies of the petition are available for public inspection in the Commission's public document room at 1717 H Street, NW., DC 20555, and in the local public document rooms for the Comanche Peak Station at the Somerville County Public Library, On the Square, P.O. Box 1417, Glen Rose, Texas 76043 and the University of Texas Library, Arlington, Texas 76019.

Dated at Bethesda, Maryland this 3rd day of March 1983.

For the Nuclear Regulatory Commission.

Richard C. DeYoung,

Director, Office of Inspection and Enforcement.

BILLING CODE 7590-01-M

[Docket Nos. 50-280 and 50-281]

Virginia Electric and Power Co.; Issuance of Amendments to Facility Operating Licenses

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 84 to Facility Operating License No. DPR-32 and Amendment No. 85 to Facility Operating License No. DPR-37 issued to Virginia Electric and Power Company (the licensee), which revised Technical Specifications for operation of the Surry Power Station, Unit Nos. 1 and 2, respectively (the facilities), located in Surry County, Virginia. The amendments are effective as of the date of issuance.

The amendments revise the Technical Specifications to remove a restriction on moving a spent fuel cask into the Fuel Building. Requirements are added to install cask impact pads in the spent fuel pool and to not store spent fuel decayed less than 150 days in the first three rows of fuel racks adjacent to the Fuel Building Trolley Load Block.

The application for the amendments complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendments. Prior public notice of these amendments was not required since these amendments do not involve a significant hazards consideration.

The Commission has determined that the issuance of these amendments will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of these amendments.

For further details with respect to this action, see: (1) The application for amendments dated September 23, 1982, as supplemented January 17, 1983, (2) Amendment Nos. 84 and 85 to License Nos. DPR-32 and DPR-37, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. and at the Swem Library, College of William and Mary, Williamsburg, Virginia 23185. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland, this 4th day of March 1983.

For the Nuclear Regulatory Commission.

Steven A. Varga,

Chief, Operating Reactors Branch #1, Division of Licensing.

BILLING CODE 7590-01-M

NATIONAL TRANSPORTATION SAFETY BOARD

Reports, Recommendations; Availability

Reports Issued:

Marine Accident Report: Collision of the U.S. Barge Carrier SS DELTA NORTE and the Liberian Freighter M/V AFRICAN PIONEER in the Gulf of Mexico about 115 Nautical Miles Southeast of Galveston, Texas, February 19, 1982 (NTSB–MAR–82–6).

Aircraft Accident Report: Reeve Aleutian Airways Nihon YS–11A, N169RV, King Salmon, Alaska, February 16, 1982 (NTSB–AAR–82–14).

Pipeline Accident Report: The Gas Company of New Mexico, Natural Gas Explosion and Fire, Portales, New Mexico, June 28, 1982 (NTSB–PAR–83–1).

Aircraft Accident Reports: Brief Format, U.S. Civil Aviation Issue Number 9 of 1981 Accidents (NTSB–BA–82–11).

Aircraft Accident Reports: Brief Format, U.S. Civil Aviation Issue Number 11 of 1981 Accidents (NTSB–BA–82–13).

Recommendations to:

Aviation—*Federal Aviation Administration: Feb. 24: A–83–1:* Amend TSO C–100 to permit the use of any infant or child restraint device bearing a label in conformance with 49 CFR 571.213, S5.5.2(e) aboard aircraft during takeoff, landing, and in-flight operations, until such time as the Federal Aviation Administration and the National Highway Traffic Safety Administration issue standards for devices acceptable for use in both motor vehicles and aircraft.

Highway—*State of Arkansas: Jan. 20: H–83–1:* Develop a coordinated program with the railroad companies that operate within the State, to extend the Operation Lifesaver program to the rural communities where the majority of trackage and unprotected grade crossings are located by working directly with local officials, farm bureaus, and farming cooperative associations to promote grade crossing safety within rural communities. *H–83–2:* Encourage all railroad companies that operate within the State to develop a near miss data system that will permit them to promptly report to the State authorities all violators of grade crossing safety laws.

Missouri Pacific Railroad: Jan. 20: H–83–3: Expand the company's ongoing near miss reporting program in the Louisiana division to require that operating and engine crews also report vehicles other than hazardous material trucks and schoolbuses that violate grade crossing safety laws. *H–83–4:* Encourage company operating employees in all districts to increase their participation in the Operation Lifesaver program in order to disseminate to a wider section of the public their experiences with near misses and accidents that occur along the train line over which they operate.

American Association of Community and Junior Colleges: Feb. 24: H–83–5: Advise your members of the circumstances of the truck accident involving 66 students in Lynchburg, Virginia, on Oct. 6, 1982. *H–83–6:* Urge your members to establish a policy for the transportation of student groups to and from offcampus events that would: (1) Prohibit the use of trucks and other nonpassenger-carrying vehicles, (2) discourage the use of drivers who are members of the student group being transported, and (3) advocate the use of buses and trained, for-hire drivers.

Railroad—*Southern Pacific Transportation Company: Jan. 28: R–83–1:* Review, and modify if necessary, the evaluation process concerning track inspection defect data for tracks carrying passenger trains or trains with hazardous materials to better assure that rails having defects which might result in catastrophic failure are replaced. *R–83–2:* Improve current Total Operations Processing System Procedures to better assure that traincrews of trains carrying hazardous materials are furnished accurate information regarding the train consist and the appropriate emergency response for the hazardous material. *R–83–3:* Initiate procedures to require that waybills for Trailer-On-Flat-Car and Container-On-Flat-Car shipments containing hazardous material include accurate information regarding the contents of the trailer and/or containers. *R–83–4:* Require train crewmembers to review carefully all shipping documentation in their possession to determine whether any hazardous materials are present on the train.

Research and Special Programs Administration: Jan. 28: R–83–5: Require that all shipping papers accompanying hazardous materials in Trailer-On-Flat-Car or Container-On-Flat-Car shipments identify the originating shipper of the hazardous materials in order to facilitate access to technical emergency response information in the event of a hazardous material incident. *R–83–6:* In conjunction with the Association of American Railroads, the American Trucking Associations, Inc., the Federal Highway Administration, and the Federal Railroad Administration, develop, validate, and urge implementation of a model plan for use by railroads and motor carriers to make certain that waybills for Trailer-On-Flat-Car and Container-On-Flat-Car shipments containing hazardous materials include accurate information regarding the contents of the trailers and/or containers.

Association of American Railroads: Jan. 28: R–83–7 through –9: Inform its membership of the facts, conditions, and circumstances of the accident which occurred at Thermal, California, on January 7, 1982, and recommend to its member railroads that they: Review, and modify if necessary, their evaluation process concerning track inspection defect data for tracks carrying passenger trains or trains with hazardous materials to better assure that rails having defects which might result in catastrophic failure be replaced. (R–83–7) Assess their procedures to make certain that traincrews of trains carrying hazardous materials have in their possession accurate documentation of, and emergency response information for, all hazardous materials being carried. (R–83–8) In conjunction with the American Trucking Associations, Inc., the Federal Highway Administration, the Federal Railroad Administration, and the Research and Special Programs Administration, develop, validate, and urge implementation of a model plan for use by railroads and motor carriers to make certain that waybills for Trailer-On-Flat-Car and Container-On-Flat-Car shipments containing hazardous materials include accurate information regarding the contents of the trailers and/or containers. (R–83–9)

American Short Line Railroad Association: Jan. 28: R–83–10 and –11: Inform its membership of the facts, conditions, and circumstances of the accident which occurred at Thermal, California, on January 7, 1982, and recommend to its member railroads that they: Review, and modify if necessary, their evaluation process concerning track inspection defect data for tracks carrying passenger trains or trains with hazardous materials to better assure that rails having defects which might result in catastrophic failure be replaced. (R–83–10) Assess their procedures to make certain that traincrews of trains carrying hazardous materials have in their possession accurate documentation of, and emergency response information for, all hazardous materials being carried. (R–83–11)

American Trucking Associations, Inc.: Jan. 28: R–83–12: Inform its membership of the facts, conditions and circumstances of the accident which occurred at Thermal, California, on January 7, 1982, and recommend to its membership that they assess their procedures to make certain that waybills for Trailer-On-Flat Car and Container-On-Flat-Car shipments containing hazardous material include accurate information regarding the contents of the trailers and/or containers. *R–83–13:* In conjunction with the Association of American Railroads, the Federal Highway Administration, the Federal Railroad Administration, and the Research and Special Programs Administration, develop, validate, and urge implementation of a model plan for use by railroads and motor carriers to make certain that waybills for Trailer-On-Flat Car and Container-On-Flat-Car shipments containing hazardous materials include accurate information regarding the contents of the trailers and/or containers.

Federal Railroad Administration: Jan. 28: R–83–14: Develop, validate, and implement a model plan of recommended inspection practices containing clearly defined limits of allowable track structure conditions for the use of industry employed railroad track inspectors to facilitate uniform and knowledgeable appraisals of defective track structure conditions. *R–83–15:* In conjunction with the Association of American Railroads, the Federal Highway Administration, the American Trucking Association, Inc., and the Research and Special Programs Administration, develop, validate and urge implementation of a model plan for use by railroads and motor carriers to make certain that waybills for Trailer-On-Flat Car and Container-On-Flat-Car shipments containing hazardous materials include accurate information regarding the contents of the trailers and/or containers. *R–83–16:* In

conjunction with the Federal Highway Administration, initiate a regulatory compliance study which samples Trailer-On-Flat Car and Container-On-Flat-Car shipments designated as Freight-All-Kind to determine if those shipments contain hazardous materials and take enforcement action as required in those cases of noncompliance.

Federal Highway Administration: Jan. 28: R–83–17: In conjunction with the Federal Railroad Administration, initiate a regulatory compliance study which samples Trailer-On-Flat Car and Container-On-Flat-Car shipments designated as Freight-All-Kind to determine if those shipments contain hazardous materials and take enforcement action as required in those cases of noncompliance. *R–83–18:* In conjunction with the Association of American Railroads, the Federal Railroad Administration, the Research and Special Programs Administration, and the American Trucking Associations, Inc., develop, validate, and urge implementation of a model plan for use by railroads and motor carriers to make certain that waybills for Trailer-On-Flat Car and Container-On-Flat-Car shipments containing hazardous materials include accurate information regarding the contents of the trailers and/or containers.

Burlington Northern Railroad Company: Feb. 28: R–83–19: Adopt a system of professionally gathered and evaluated meteorological information to better assure timely knowledge of climatic conditions that may affect the safe operations of train movements. *R–83–20:* Review and revise, where necessary, the training provided to employees whose responsibilities may affect the protection of train movements during conditions of severe weather, to enable those employees to better assess climatic threats to safe train movements.

National Railroad Passenger Corporation (Amtrak): Feb. 28: R–83–21: Adopt a system of professionally gathered and evaluated meteorological information to better assure timely knowledge of climatic conditions that may affect the safe operation of passenger train movements for all Amtrak routes. *R–83–22:* Require that those railroads under contractual agreement to operate passenger trains adopt a system of professionally gathered and evaluated meteorological information to better assure timely knowledge of climatic conditions that may affect the safe operation of those passenger train movements. *R–83–23:* Provide copies of Amtrak's Emergency Evacuation Procedures booklet to all emergency response organizations not possessing those procedures from the original distribution, along all designated passenger train routes. *R–83–24:* Review and revise, where necessary, the training and retraining programs for onboard employees in emergency procedures, including the operation of emergency exits, to improve onboard employee competence to render effective assistance to passengers in emergency situations. *R–83–25:* Evaluate and modify, as necessary, emergency lighting systems in passenger-carrying cars to better protect the functioning of emergency lights in emergency situations. *R–83–26:* Formulate and implement an onboard briefing program for onboard passengers in methods of emergency evacuation.

Pipeline—*Research and Special Programs Administration: Jan. 27: P–83–1:* Discontinue its planned withdrawal of rulemaking in Docket PS–61 and expedite rulemaking to require pipeline operators to maintain maps and records necessary for the safe operation of their systems.

Gas Company of New Mexico: Jan. 27: P–83–2: Include accurate information on its system maps to identify the existence and location of all service lines. *P–83–3:* Revise its construction, maintenance, and emergency procedures and its training program, and develop explicit instructions for its employees to follow when repairing damaged gas facilities. Particular emphasis should be placed on investigating and testing for unseen pipe separation.

American Gas Association, the National L.P. Gas Association, and the American Public Gas Association: Jan. 27: P–83–4: Notify its member companies of the circumstances of the accident in Portales, New Mexico, on June 28, 1982, and urge them to include accurate information on their system maps sufficient to identify the existence and location of all their pipeline facilities, and to emphasize to their employees the importance of checking for unseen damage where their facilities have been damaged by excavation operations.

American Public Works Association: Jan. 27: P–83–5: Notify its members of the circumstances of the accident in Portales, New Mexico, on June 28, 1982, and urge them to cooperate with the pipeline operator in determining the extent of damage when pipeline facilities have been damaged.

City of Pryor, Oklahoma: Feb. 4: P–83–6: Immediately advise citizens to notify the gas company should they detect the odor of gas in a building and advise them regarding appropriate emergency procedures. Additionally, cause buried residential gas service lines to be inspected for corrosion damage and require the replacement of lines found to be hazardous. *P–83–7:* Develop a program to require periodic inspection of all buried residential service lines.

Marine—*U.S. Coast Guard: Feb. 16: M–83–1:* Review from a realistic, professional firefighting viewpoint the minimum number of self-contained breathing apparatus and spare charges that should be required on board cargo vessels which operate on international voyages and, based upon the results, amend the appropriate sections of Title 46, Code of Federal Regulations to reflect a more realistic quantity of that equipment required on board U.S. cargo vessels and work within the framework of the International Maritime Organization to obtain acceptance of a more realistic international standard as to the minimum number of self-contained breathing apparatus on cargo vessels. *M–83–2:* Within the framework of the International Maritime Organization, work to develop an international standard for conducting more meaningful shipboard fire drills. *M–83–3:* Propose adoption of a resolution by the International Maritime Organization to the effect that operating instructions for vital emergency equipment and vital ship data, such as stability information, be printed in a language which is readily understood by the ship's officers. *M–83–4:* Expedite the development of guidelines to Captains of the Port for coordinating multijurisdictional planning for various port disasters. *M–83–5:* Take the initiative in promoting the availability of a more rapid response to a shipboard fire in remote areas on the Columbia River with major firefighting resources. *M–83–6:* Require that COTP fire contingency plans define the lines of authority and responsibility for actually fighting a shipboard fire and that a pre-arranged, written agreement be formulated with the various local firefighting authorities within the COTP zone. *M–83–7:* Establish and execute a policy whereby private firefighting and marine salvage firms are summoned to take control of firefighting activities if the immediate extinguishment of a shipboard fire is beyond the capabilities of the local fire department, or if the fire occurs while the ship is located outside a municipal fire jurisdiction.

U.S. Coast Guard: Feb. 28: M–83–8: Expedite the promulgation of regulations regarding personnel qualifications and manning standards for mobile offshore drilling units. *M–83–9:* Require that the master and the person-in-charge of a mobile offshore drilling unit be licensed and that their licenses be endorsed as qualifed in mobile offshore drilling operations, including knowledge of U.S. Coast Guard regulations, stability characteristics of mobile offshore drilling units, the operation of ballast systems on mobile offshore drilling units, and the use of lifesaving equipment peculiar to mobile offshore drilling units. *M–83–10:* Require that the person-in-charge of a mobile offshore drilling unit also be a certified lifeboatman. *M–83–11:* Require that the station bill on mobile offshore drilling units identify by name the certified lifeboatmen required by the U.S. Coast Guard Certificate of Inspection. *M–83–12:* Provide guidance to officers-in-charge of marine inspection which relates the manning requirement for certificated lifeboatmen on a MODU to the size of the lifeboats and the number of nonmarine crew aboard a mobile offshore drilling unit and not to the mode of operation of the unit. *M–83–13:* Require that a control room operator on self-propelled and nonself-propelled semisubmersible mobile offshore drilling units be certificated or licensed and be qualified in the stability characteristics and ballasting procedures of mobile offshore drilling units and as a certificated lifeboatman. *M–83–14:* Require that the operating manual for a self-propelled or nonself-propelled semisubmersible mobile offshore drilling unit include guidance regarding: (1) Accidental flooding of empty or partially empty lower hull compartments or tanks and the appropriate countermeasures; (2) any limitations in the functioning of the ballast pumps due to trim or heel; and (3) precautions for preventing downflooding into chain lockers from wave action. *M–83–15:* Revise the stability standard for semisubmersible mobile offshore drilling units to include the capability of the drilling units to survive the flooding of any two

adjacent lower hull compartments or tanks and to pump out any of lower hull tanks after the assumed flooding. *M–83–16:* Urge that the International Maritime Organization review and amend or extend, as necessary, the following particulars of its 1979 Code for the Construction and Equipment of Mobile Offshore Drilling Units (MODU): (1) The stability standard for column stabilized units to include the capability of surviving flooding of any two adjacent lower hull compartments or tanks and to pump out any lower hull tanks after the assumed flooding; (2) requirements for lifeboat launching systems on MODU's; (3) inclusion in the lifesaving requirements for MODU's assignment at all times of a suitable vessel capable of retrieving persons from the water under severe weather conditions; and (4) inclusion in operating manuals guidance on the accidental flooding of empty or partially empty lower hull compartments or tanks on column stabilized units and the appropriate countermeasures. *M–83–17:* Evaluate the suitability of currently approved lifeboat, liferaft, and other launching systems, such as free fall lifeboats, under severe weather conditions on mobile offshore drilling units and require modifications if currently approved systems are found inadequate. *M–83–18:* Determine what caused the buoyancy chambers on the OCEAN RANGER liferafts to separate and upgrade U.S. Coast Guard liferaft specifications, as necessary. *M–83–19:* Review current Coast Guard instructions regarding approval of lifesaving equipment to determine if adequate safeguards exist to prevent equipment from being approved before the prototype has been approved and make appropriate modifications, if necessary. *M–83–20:* Require that a suitable vessel, capable of retrieving persons from the water under adverse weather conditions, be assigned to all U.S. mobile offshore drilling units at all times for the purpose of evacuating personnel from the unit in an emergency. *M–83–21:* Establish a system to determine when Certificates of Inspection of U.S. vessels are about to expire and to notify owners accordingly. *M–83–22:* Cancel the proposal to amend 46 CFR 107.289 which would discontinue reinspections of mobile offshore drilling units in international service and withdraw the policy guidance that suspended reinspections of mobile offshore drilling units in international service as of January 7, 1982. *M–83–23:* Evaluate the adequacy of existing standards for portlight installations in ballast control rooms and other critical locations in columns of semisubmersible mobile offshore drilling units and require that modifications be made, if necessary.

Ocean Drilling and Exploration Company: Feb. 28: M–83–24: Require that the station bill on ODECO mobile offshore drilling units identify by name the certificated lifeboatmen required by the U.S. Coast Guard Certificate of Inspection. *M–83–25:* Require that all regular and relief masters and the persons-in-charge be fully instructed and qualified in the operation of the ballast control system of semisubmersible mobile offshore drilling unit to which assigned. *M–83–26:* Define in detail the nonindustrial duties and responsibilities of the master and the person-in-charge on all ODECO mobile offshore drilling units in all modes of operation. *M–83–27:* Define in detail the necessary qualifications for ballast control room operators on ODECO semisubmersible mobile offshore drilling units, and require that the qualifications be met and that potential control room operators attend a stability school before being assigned to a MODU as a control room operator.

M–83–28: Review and revise the operating manuals for self-propelled and nonself-propelled semisubmersible mobile offshore drilling units to include general guidance on the duties of ballast control room operators and specific guidance regarding: (1) Accidental flooding of empty or partially empty lower hull compartments or tanks and the appropriate countermeasures; (2) any limitations in the functionings of the ballast pumps due to trim or heel; (3) precautions for preventing flooding into chain lockers from wave action; (4) the effect of random seas on the drilling unit's roll period; and (5) duties and responsibilities of ballast control room operators. *M–83–29:* Install a permanent pumping system to dewater the chain lockers on all new and existing mobile offshore drilling units. *M–83–30:* Include in the operating manuals for semisubmersible mobile offshore drilling units detailed operating instructions for emergency operation of the ballast system in the event that the primary control system fails. *M–83–31:* Install internal draft gauges with direct readouts in the ballast control rooms on semisubmersible mobile offshore drilling units. *M–83–32:* Establish procedures to ensure that requests to the U.S. Coast Guard for renewal of U.S. Coast Guard Certificates of Inspection are initiated in time to avoid lapse of U.S. Coast Guard Certificates of Inspection for mobile offshore drilling units, especially those operating in international service. *M–83–33:* Establish procedures to ensure that U.S. Coast Guard approved liferafts are serviced only at approved servicing facilities.

Mobil Oil Canada, Ltd.: Feb. 28: M–83–34: Require that vessels engaged as standby boats for mobile offshore drilling units be equipped with apparatus for recovering persons from the water under adverse sea conditions and that the crews of standby boats be provided with exposure suits designed for rescue operations. *M–83–35:* Revise the Contingency Plans and Emergency Procedures Manual for mobile offshore drilling units to include a detailed disaster action plan for heavy weather damage similar to the disaster action plans for fire, explosion, or collision.

American Bureau of Shipping: Feb. 28: M–83–36: Revise the stability criteria contained in the Rules for Building and Classing Mobile Offshore Drilling Units to require that semisubmersible mobile offshore drilling units include the capability to survive the flooding of any two adjacent lower hull compartments or tanks and to pump out any of the lower hull tanks after the assumed flooding.

International Association of Drilling Contractors: Feb. 28: M–83–37: Recommend that members review the suitability of lifeboat, liferaft, and other launching systems on mobile offshore drilling units under severe weather conditions, and promote the development of improved launching systems if the current systems are found inadequate.

Note.—Reports may be ordered from the National Technical Information Service, 5285 Port Royal Road, Springfield, Virginia 22161, for a fee covering the cost of printing, mailing, handling, and maintenance. For information on reports call 703–487–4650 and to order subscriptions to reports call 703–487–4630. Single copies of recommendation letters (identified by recommendation number) are free on written request to: Public Inquiries Section, National Transportation Safety Board, Washington, D.C. 20594.

Dated: March 3, 1983.

BILLING CODE 4910–59–M

PACIFIC NORTHWEST ELECTRIC POWER AND CONSERVATION PLANNING COUNCIL

Regional Conservation and Electric Power Plan; Additional Hearings

AGENCY: Pacific Northwest Electric Power and Conservation Planning Council.

ACTION: Notice of additional hearings.

SUMMARY: On January 26, 1983, the Pacific Northwest Electric Power and Conservation Planning Council ("the Council") adopted a draft regional conservation and electric power plan. The Council issued public notice of its hearings and opportunity to comment on the draft plan in the **Federal Register** (48 FR 5406) on February 4, 1983. Because of oversubscription of the scheduled public hearings, the Council has scheduled additional hearings to provide an opportunity for public comment to as many individuals and organizations as possible.

DATES AND ADDRESSES: The Council has scheduled additional hearings as follows:

1. March 17, 1983—Salem, Oregon, Employment Building Auditorium, 875 Union Street, N.E. (in Capitol Mall area), 9 a.m. to 5 p.m. and 7 p.m. to 9:30 p.m.;
2. March 17, 1983—Seattle, Washington, South Auditorium, Federal Building, 915 Second Avenue, 1 p.m. to 5:00 p.m. and 7 p.m. to 9:30 p.m.;
3. March 21, 1983—Portland, Oregon, Portland Hilton Hotel, 921 S.W. Sixth, 9 a.m. to 5:00 p.m. and 7 p.m. to 9:30 p.m.

Depending upon subscription at these additional hearings, the Council may continue the hearing at the Portland location beyond March 21 to accommodate those who cannot be

heard at the earlier hearings. Requests for time slots at any of the hearings should be made by calling Ms. Janie Pearcy at 1–800–222–3355 (toll free in Montana, Idaho, Washington and California), 1–800–452–2324 (toll free in Montana, Idaho, Washington and California), 1–800–452–2324 (toll free in Oregon) or 503–222–5161. Written requests should be directed to Ms. Pearcy at the Council's central office, 700 S.W. Taylor Street, Suite 200, Portland, Oregon 97205. Time slot requests must be received by the Council at least five (5) weekdays prior to the day of the hearing at which a time slot is requested, and in no case later than 5 p.m. Friday, March 11, 1983.

As explained in the previous public notice, all written comments on the Council's draft energy plan must be received in the Council's central office by 5 p.m. Monday, March 21, 1983. In the event additional hearings are held beyond that date, the Council's administrative record will be held open only to receive oral comments made at those hearings.

FOR FURTHER INFORMATION CONTACT: Ms. Torian Donohoe, Director of Public Involvement, 700 S.W. Taylor, Suite 200, Portland, Oregon 97205 (toll free 1–800–222–3355 in Montana, Idaho, Washington and California; 1–800–452–2324 toll free in Oregon; or 503–222–5161).

SUPPLEMENTARY INFORMATION: The Council welcomes public comments on its draft energy plan, and has scheduled these additional hearings to accommodate public participation. The Council urges speakers to use their hearing time to summarize written comments. Each interested agency, organization or individual will be permitted to speak at only one of the hearings. The Council reserves the right to limit or consolidate testimony in order to expedite the hearings. Council members will chair the additional hearings scheduled for Salem and Seattle. Council staff members will chair the additional hearing in Portland. Court reporters will compile a verbatim transcript of oral testimony at all public hearings on the Council's draft plan. Those transcripts will become part of the Council's administrative record, and copies will be available for review and copying between 9 a.m. and 4:30 p.m. at the Council's central office, 700 S.W. Taylor Street, Suite 200, Portland, Oregon 97205.

(Sec. 4 Pub. L. 96–501, 16 U.S.C. 839b)

Edward Sheets,
Executive Director.

PENSION BENEFIT GUARANTY CORPORATION

Pendency of Request for Exemption From Bond/Escrow Requirement Relating To Sale of Assets by an Employer That Contributes To a Multiemployer Plan; Heinemann's, Inc. et al.

AGENCY: Pension Benefit Guaranty Corporation.

ACTION: Notice of pendency of request.

SUMMARY: This notice advises interested persons that the Pension Benefit Guaranty Corporation has received a joint request from Heinemann's, Inc. and Davidson's, Inc. for an exemption from the bond/escrow requirement of section 4204(a)(1)(B) of the Employee Retirement Income Security Act of 1974. Section 4204(a)(1) provides that the sale of assets by an employer that contributes to a multiemployer pension plan will not constitute a complete or partial withdrawal from the plan if certain conditions are met. One of these conditions is that the purchaser post a bond or deposit money in escrow for a five plan year period beginning after the sale. The PBGC is authorized to grant individual and class exemptions from this requirement. Prior to granting an exemption, the PBGC is required to give interested persons an opportunity to comment on the exemption request. The effect of this notice is to advise interested persons of this exemption request and to solicit their views on it.

DATE: Comments must be submitted on or before April 25, 1983.

ADDRESSES: All written comments (at least three copies) should be addressed to: Assistant Executive Director for Policy and Planning (140), Pension Benefit Guaranty Corporation, 2020 K Street, NW., Washington, D.C. 20006. The request for exemption and the comments received will be available for public inspection at the PBGC Public Affairs Office, Suite 7100, at the above address, between the hours of 9:00 a.m. and 4:00 p.m.

FOR FURTHER INFORMATION CONTACT: James M. Graham, Office of the Executive Director, Policy and Planning (140), Pension Benefit Guaranty Corporation, 2020 K Street, N.W., Washington, D.C. 20006; (202) 254–4862. (This is not a toll-free number.)

SUPPLEMENTARY INFORMATION:

Background

Section 4204 of the Employee Retirement Income Security Act of 1974, as amended by the Multiemployer Pension Plan Amendments Act of 1980 (ERISA), 29 U.S.C. 1384, provides that a bona fide arm's-length sale of assets of a contributing employer to an unrelated party will not be considered a withdrawal if three conditions are met. These conditions, enumerated in section 4204(a)(1)(A)–(C), are that—

(A) The purchaser has an obligation to contribute to the plan for substantially the same number of contribution base units for which the seller was obligated to contribute;

(B) The purchaser obtains a bond or places an amount in escrow, for a period of five plan years after the sale, in an amount equal to the greater of the seller's average required annual contribution to the plan for the three plan years preceding the year in which the sale occurred or the seller's required annual contribution for the plan year preceding the year in which the sale occurred; and

(C) The contract of sale provides that if the purchaser withdraws from the plan within the first five plan years beginning after the sale and fails to pay any of its liability to the plan, the seller shall be secondarily liable for the liability it (the seller) would have had but for section 4204.

The bond or escrow described above would be paid to the plan if the purchaser withdraws from the plan or fails to make any required contributions to the plan within the first five plan years beginning after the sale.

Additionally, section 4204(b)(1) provides that if a sale of assets is covered by section 4204, the purchaser assumes by operation of law the contribution record of the seller for the plan year in which the sale occurred and the preceding four plan years.

Section 4204(c) of ERISA authorizes the Pension Benefit Guaranty Corporation ("PBGC") to grant individual or class variances or exemptions from the purchaser's bond/escrow requirement of section 4204(a)(1)(B) when warranted. The legislative history of section 4204 indicates a Congressional intent that the sales rules be administered in a manner that assures protection of the plan with the least practicable intrusion into normal business transactions. The granting of an exemption or variance from the requirements of section 4204(a)(1)(B) does not constitute a finding by PBGC that a particular

transaction satisfies the other requirements of section 4204(a)(1).

Under § 2643.3(a) of the PBGC's regulation on procedures for variances for sales of assets (46 FR 46127 (1981)), the PBGC shall approve a request for a variance or exemption if it determines that approval of the request is warranted, in that it—

(1) Would more effectively or equitably carry out the purposes of Title IV of the Act; and

(2) Would not significantly increase the risk of financial loss to the plan.

Section 4204(c) of ERISA and § 2643.3(b) of the regulation require the PBGC to publish a notice of the pendency of a request for a variance or exemption in the **Federal Register**, and to provide interested parties with an opportunity to comment on the proposed variance or exemption.

The Request

The PBGC has received a joint request from the purchaser, Heinemann's, Inc. ("Heinemann"), and the seller, Davidson's, Inc. (now known as Thorndale Corp.) ("Davidson") (collectively referred to as the "Parties") for an exemption from the requirement of ERISA section 4204(a)(1)(B). In the request, the Parties represent, among other things, that:

1. Effective August 2, 1982, Davidson sold its assests to Heinemann.

2. Heinemann has assumed the responsibilities of Davidson under a collective bargaining agreement with the United Food and Commercial Workers International Union, Local No. 1550, which required contributions to the United Food and Commercial Workers Unions and Employers Midwest Pension Fund (formerly known as the Retail Clerks Unions and Employers Midwest Pension Plan and Pension Fund) (the "Fund"). Davidson's potential withdrawal liability to the Fund has been estimated to be $47,662.

3. The amount of the bond or escrow reguired under ERISA section 420 (a)(1)(B) is $21,118 (the annual contribution required to be made by Davidson for the 1981 plan year, the plan year preceding the sale).

4. In the sale contract, Davidson agreed that, if the purchaser withdraws and fails to pay withdrawal liability within five years of the date of the sale, Davidson would be secondarily liable for any withdrawal liability it would have had to the Fund but for the operation of ERISA section 4204.

5. A copy of Heinemann's audited financial statements for the three fiscal years preceding the sale were submitted as part of the application. However, Heinemann has asseted that the financial information is exempt from disclosure under the Freedom of Information Act (5 U.S.C. 552(b)(4), and PBGC regulations, 29 CFR 2603.18).

6. The Parties assert that the request for a variance should be granted on a *de minimis* basis. Based on information provided by the fund, the average annual contributions made by all employers to the Fund for the three plan years preceding the plan year in which the sale occurred was $16.3 million. The amount of the bond/escrow ($21,118) which would be required in the absence of a variance is approximately one-eighth of one percent (0.12%) of that amount. Accordingly, the parties conclude that relief is warranted under section 4204(c). PBGC is considering granting this request for a variance on a *de minimis* basis.

7. A copy of this request has been sent by the Parties to the Fund and the collective bargaining representative of the seller's former employees.

Comment

All interested persons are invited to submit written comments on the pending class exemption to the above address, on or before April 25, 1983. All comments will be made a part of the record. Comments received, as well as the relevant information submitted in support of the application for exemption, will be available for public inspection at the address set forth above.

Issued at Washington, D.C. on this 4th day of March 1983.

Charles Tharp,

Acting Executive Director, Pension Benefit Guaranty Corporation.

BILLING CODE 7708-01-M

POSTAL RATE COMMISSION

[Docket No. A83-17]

John and Mildred Ernst, et al., Petitioners; Notice and Order of Filing of Appeal

March 1, 1983.

On February 22, 1983, the Commission received a letter from John and Mildred Ernst ("petitioners"), Grand Pass, Missouri 64501, indicating their opposition to the alleged plans of the United States Postal Service to close the Grand Pass, Missouri post office. Although the letter makes no reference to the Postal Reorganization Act and does not technically conform to the requirements of our Rules of Practice and Procedure, we believe it should be construed as a petition for review pursuant to section 404(b) of the Postal Reorganization Act (39 U.S.C. 404(b)). In our view, the petition sets forth the Potal Service action complained of in sufficient detail to warrant further inquiry to determine whether the Postal Service has complied with the applicable law and regulations relating to closings and consolidations of post offices.[1]

Specifically, the petitioners assert their belief that the needs of the Grand Pass citizens have not been fully considered. They point out that Grand Pass is a small community and that the post office facility is used both as a daily gathering place and also for the posting of community notices. Further, the petitioners suggest that the Postal Service should have considered alternatives to closing the post office, such as instituting shorter business hours.

In the interest of expediting this proceeding under the 120-day decisional deadline set forth by 39 U.S.C. 404(b)(5), the Postal Service is advised that the Commission reserves the right to request a legal memorandum from the Service on any issues of law disclosed by our review in this proceeding. In the event that the Commission finds such memorandum necessary, it will make its request by order, specifying the issues to be addressed. Following the issuance of such a request, the memorandum shall be due within 20 days and a copy of the memorandum shall be served upon the petitioners and all intervenors.

The Commission's rules of practice require that the Postal Service file the Administrative Record of the case within 15 days after the date upon which the petition for review has been filed with the Commission.[2]

A procedural schedule of the various phases of this docket is set forth as an appendix.

The Commission orders:

A. The letter received from John and Mildred Ernst constitutes a petition for review pursuant to section 104(b) of the Postal Reorganization Act (39 U.S.C. 404(b)).

B. The Secretary of the Commission shall publish this Notice and Order in the **Federal Register.**

By the Commission.

David F. Harris,

Secretary.

[1] The Commission has also received several other letters from residents of Grand Pass, some of which arguably constitute petitions for review. Therefore, we are consolidating those letters with the present appeal.

[2] 39 CFR 3001.113(a).

APPENDIX

Feb. 22, 1983	Filing of Petition.
Mar. 1, 1983	Notice and Order of Filing of Appeal.
Mar. 14, 1983	Last day for filing of petitions to intervene (see 39 CFR 3001.111(b)).
Mar. 24, 1983	Petitioners' Initial Brief (see 39 CFR 3001.115(a)).
Apr. 8, 1983	Postal Service Answering Brief (see 39 CFR 3001.115(b)).
Apr. 25, 1983	(1) Petitioners' Reply Brief should Petitioners choose to file one (see 39 CFR 3001.115(c)). (2) Deadline for motions by any party requesting oral argument. The Commission will exercise its discretion, as the interest of prompt and just decision may require, in scheduling or dispensing with oral argument.
June 22, 1983	Expiration of 120-day decisional schedule (see 39 U.S.C. 404(b)(5)).

BILLING CODE 7715-01-M

POSTAL RATE COMMISSION

[Docket No. A83-18; Order No. 489]

Madras, Georgia 30254 (Mrs. H. H. Rooks, Petitioner); Notice and Order of Filing of Appeal

Issued: March 1, 1983.

On February 20, 1983, the Commission received a petition from Mrs. H. H. Rooks of Madras, Georgia (hereinafter "petitioner") concerning the alleged United States Postal Service (hereinafter "Postal Service" or "Service") intent to consolidate Madras, Georgia post office. The petitioner contends that the Postal Service failed to consider the effect on the community and the level of service to be provided, in its proposal to consolidate the Madras, Georgia, post office.

The Act requires that the Service provide the affected community with at least 60 days notice prior to issuance of its Final Decision. The requirement is to "* * * ensure that such persons will have an opportunity to express their views." [1] The petition does not mention whether this notice was provided. Moreover, there is no explicit mention in the petition of any hearings, nor is there any indication of any Final Determination, in this matter, pursuant to 39 U.S.C. 404(b)(3).[2] Furthermore, petitioner has neither attached a copy of the Postal Service's Final Determination to his petition as is required by Commission rules of practices, nor made any specific reference to 39 U.S.C. 404(b), which gives the Postal Rate Commission jurisdiction in the matter.

However, the document does clearly indicate that petitioner is requesting the type of review provided by statute. Furthermore, petitioner has made a sufficient statement to enable the Commission to assume jurisdiction in this matter. Thus, we conclude that petitioner has substantially complied with Commssion rules of practice and his petition will be considered a petition for review pursuant to Section 404(b) of the Postal Reorganization Act (hereinafter "Act").

Applicable Law in This Proceeding

The Postal Reorganization Act states:

The Postal Service shall provide a maximum degree of effective and regular postal services to rural areas, communities, and small towns where post offices are not self-sustaining. No small postal office shall be closed solely for operating at a deficit, it being the specific intent of the Congress that effective postal services be insured to residents of both urban and rural communities.[3]

Section 404(b)(2)(C) of the Act specifically includes consideration of this goal in determination by the Postal Service to close or consolidate post offices. The effect on the community is also a mandatory consideration under Section 404(b)(1)(A) of the Act.

Upon preliminary inspection, the petitioners appear to raise the following issues of law:

1. Is the Postal Service's proposed closing of this post office consistent with the "maximum degree of effective and regular postal services" standard of Section 404(b)(2)(C)?

2. Has Postal Service adequately considered the effect of this proposed consolidation on the Madras, Georgia, community, as is required by Section 404(b)(2)(A)?

3. Must the Postal Service consider that the alternative post offices may be inaccessible to a number of Madras postal patrons as part of its treatment of the "maximum degree of effective and regular postal services" standard of Section 404(b)(2)(C)?

Other issues of law may become apparent when the Commission has had an opportunity to examine the determination made by the Postal Service. Such additional issues may emerge during Commission review of the Service's determination. Conversely, the determination may be found to resolve adequately one or more of the issues described above.

Commission Procedure in This Docket

In view of the statutory requirements, and in the interest of expedition of this proceeding under the 120-day decisional deadline imposed by section 404(b)(5), the Postal Service is advised that the Commission reserves the right to request a legal memorandum from the Service on one or more of the issues described above, and/or any further issues of law disclosed by the determination made in this case. In the event that the Commission finds such memorandum necessary to explain or clarify the Service's legal position or interpretation on any such issue, it will, within 20 days of receiving the Determination and record pursuant to section 113 of the rules of practices [4] make the request by order specifying the issues to be addressed. When such a request is issued, the memorandum shall be due within 20 days of the issuance, and a copy of the memorandum shall be served on Petitioner by the Service.

In addition, the Commission's rules of practice require the Postal Service to file the administrative record of the case within 15 days after the date on which the petition for review is filed with the Commission.[5]

In briefing the case, or in filing any motion to dismiss for want of prosecution, in appropriate circumstances, the Service may incorporate by reference all or any portion of a legal memorandum filed pursuant to such an order.

The Act does not contemplate appointment of an Officer of the Commission in section 404(b) cases, and noe is being appointed.[6]

(A) The petition from Mrs. H. H. Rooks shall be construed as a petition for review pursuant to section 404(b) of the Act (39 U.S.C. 404(b)).

(B) The Secretary of the Commission shall publish this Notice and Order in the **Federal Register.**

(C) The Postal Service shall file the administrative record in this case on or before March 9, 1983, pursuant to the Commission's rules of practice (39 CFR 3001.112(a)).

By the Commission.

David F. Harris,

Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 13064; 811-2129]

American Industry Share, Inc.; Application Filing

March 3, 1983.

In the matter of: AMERICAN INDUSTRY SHARES, INC., 405 Central Avenue, St. Petersburg, FL 33701; (811–2129); Notice of filing of an application pursuant to section 8(f) of the Act for an order declaring that applicant has ceased to be an investment company. Notice is hereby given that American Industry Shares, Inc. ("Applicant"), registered under the Investment Company Act of 1940 ("Act") as an open-end, non-diversified, management investment company, filed an application on December 14, 1982, and an amendment thereto on January 14, 1983, for an order pursuant to Section 8(f) of the Act declaring that applicant has ceased to be an investment company as defined in the Act. Interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below.

Applicant was organized as a Florida corporation. Applicant represents that it was originally registered under the Act as Qualidex Fund, Inc., and filed a registration statment pursuant to the Securities Act of 1933 with respect to 10,000 shares of its common stock. That registration became effective on July 31, 1972, and Applicant commenced the intial offering of its shares on October 1, 1972.

Applicant further represents that, on August 20, 1982, its board of directors adopted Articles of Merger and approved the proposed merger of Applicant into American Shares, Inc. ("American Shares"), which was ratified by Applicant's shareholders on September 22, 1982. Pursuant to the Articles of Merger, on November 1, 1982, all assets and liabilities of Applicant and Applicant's shares were exchanged for shares of American Shares on the basis of Applicant's net asset value per share on October 29, 1982. In addition, Applicant distributed as a dividend to its shareholders of record on October 29, 1982, all its undistributed, taxable net investment income for the 28-day period ended October 29, 1982.

According to the application, Applicant has taken the steps necessary to dissolve itself in accordance with the provisions of Florida law and now seeks an order of the Commisson terminating its registration as an investment company under the Act.

Applicant represents that it has no assets, liabilities or securityholders, and that it is not a party to any litigation or administrative proceedings. Applicant further represents that it is not now engaged, nor does it propose to engage, in any business activities.

Section 8(f) of the Act provides, in pertinent part, that when the Commission, upon application, finds that a registered investment company has ceased to be an investment company, it shall so declare by order and upon the effectiveness of such order, the registration of such company shall cease to be in effect.

Notice is further given that any interested person wishing to request a hearing on the application may, not later than March 28, 1983, at 5:30 p.m., do so by submitting a written request setting forth the nature of his interest, the reasons for his request, and the specific issues, if any, of fact or law that are disputed, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of the request should be served personally or by mail upon applicant at the address stated above. Proof of service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed with the request. Persons who request a hearing will receive any notices and orders issued in this matter. After said date an order disposing of the application will be issued unless the Commission orders a hearing upon request or upon its own motion.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[Release No. 13072, 812-5429]

Dean Witter Developing Growth Securities Trust; Application Filing

March 4, 1983.

In the matter of Dean Witter Developing Growth Securities Trust, Five World Trade Center, New York, NY 10048; (812–5429); notice of filing of application for an order pursuant to Section 6(c) of the Act granting exemptions from the provisions of Sections 2(a)(32), 2(a)(35), 22(c), and 22(d) and Rule 22c–1 thereunder.

Notice is hereby given that Dean Witter Developing Growth Securities Trust ("Applicant"), registered under the Investment Company Act of 1940 ("Act") as an open-end, diversified, management investment company, filed an application on January 18, 1980, requesting an order pursuant to Section 6(c) of the Act, exempting Applicant from the provisions of Sections 2(a)(32), 2(a)(35), 22(c), and 22(d) of the Act and Rule 22c–1 thereunder, to the extent necessary to permit Applicant to assess a contingent deferred sales charge on redemptions of its initial and future series of shares, and to permit Applicant to waive the contingent deferred sales charge under certain circumstances. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein which are summarized below and to the Act for the text of the provisions from which applicants seek to be exempted.

According to the application, Applicant was organized as a business trust under the laws of the Commonwealth of Massachusetts on December 28, 1982. Although Applicant presently consists of one initial series, and has no current intention to create and issue any additional series, it requests that the proposed exemptive relief extend to its initial series of shares and any additional series or classes of shares that may at any time hereafter be offered on substantially the same basis.

According to the Applicant, mutual funds sold with a sales charge have traditionally imposed a front-end charge, so that purchase payments are invested after the deduction of any applicable sales charge. Applicant proposes to offer its shares without

initial sales charge so that investors will have the entire amount of their purchase payments fully invested when made. However, Applicant also proposes to pay to the distributor a contingent deferred sale charge from the proceeds of certain redemptions of Applicant's shares. Applicant states that in no event could the amount of such charges, in the aggregate, exceed 5% of the aggregate purchase payments made by the investor.

Applicant represents that the contingent deferred sales charge would be imposed if an investor redeems an amount which causes the value of the investor's account with Applicant to fall below the total dollar amount of purchase payments made by the investor during the preceding six years. According to the application, no contingent sales charge is imposed to the extent that the net asset value of the shares redeemed does not exceed (i) the current net asset value of shares purchased more than six years prior to the redemption, plus (ii) the current net asset value of shares purchased through reinvestment of dividends or capital gains distributions, plus (iii) increases in the net asset value of the investor's shares above the total amount of payments for the purchase of Applicant's shares made during the preceding six years. Applicant also proposes that the imposition of the contingent deferred sales charge be waived on the following redemptions: (i) redemptions following the death or disability, as defined in Section 72(m)(7) of the Internal Revenue Code (the "Code"), of a shareholder, and (ii) redemptions in connection with certain distributions from Individual Retirement Accounts ("IRA's") or other qualified retirement plans.

Applicant states that in determining the applicability of a contingent deferred sales charge to each redemption, the amount which represents an increase in the net asset value of the investor's shares above the amount of the total payments for the purchase of shares within the last six years will be redeemed first. In the event the redemption amount exceeds such increase in value, Applicant states that the next portion of the amount redeemed will be the amount which represents the net asset value of the investor's shares purchased more than six years prior to the redemption and/or purchased through reinvestment of dividends or distributions. Any portion of the amount redeemed which exceeds an amount which represents both such increase in value and the value of shares purchased through reinvestment of dividends or distributions will be subject to a contingent deferred sales charge. Where a contingent deferred sales charge is imposed, the amount of the charge will depend on the number of years since the investor made the purchase payment from which an amount is being redeemed, according to the following table:

Year since purchase payment made	Contingent deferred sales charge as a percentage of amount redeemed
First	5.0
Second	4.0
Third	3.0
Fourth	2.0
Fifth	2.0
Sixth	1.0
Seventh and thereafter	None

The amount of the contingent deferred sales charge (if any) is calculated by determining the date on which the purchase payment which is the source of the redemption was made, and applying the appropriate percentage to the amount of the redemption subject to the charge.[1] The application contains the following example illustrating the operation of the proposed contingent deferred sales charge. Assuming an investor makes a purchase payment of $10,000 and that 2½ years later the value of the investor's account has grown through investment performance and reinvestment of distributions to $14,000, the investor may then redeem up to $4,000 ($14,000 minus $10,000) without incurring a contingent deferred sales charge. If the investor should redeem $5,000, and such redemption is not made either following the death or disability of the investor or is not a distribution from an IRA or other qualified retirement plan of the type described below, a contingent deferred sales charge will be imposed on $1,000 (the amount by which the value of the investor's shares after the redemption fell below the amount of the purchase payment). Since the redemption takes place in the third year after the purchase, the contingent deferred sales charge is imposed at the rate of 3.0% and amounts to $30.00.

Applicant states that in determining the rate of any applicable contingent deferred sales charge, it will be assumed that a redemption is made of shares held by the investor for the longest period of time within the applicable six year period. Applicant represents that this will result in any such charge being imposed at the lowest possible rate.

Applicant believes that the imposition of the contingent deferred sales charge is fair and is in the best interests of its shareholders. Applicant submits that the proposed transaction permits shareholders to have the advantages of greater investment dollars working for them from the time of their purchase of Applicant's shares. Moreover, Applicant states that because the contingent deferred sales charge applies only to redemptions of amounts representing purchase payments (during the first six years after the payments), it does not apply to increases in the value of a shareholder's account through increases in net asset value per share, or to amounts representing reinvestment of distributions.

Applicant proposes to finance its own distribution expenses pursuant to a distribution plan adopted under Rule 12b-1 under the Act. Under the proposed distribution plan, Applicant will pay an annual fee to its underwriter/distributor, Dean Witter Reynolds Inc. ("Dean Witter"), as reimbursement for expenses incurred by Dean Witter in connection with the offering of Applicant's shares. According to the application, these expenses include advertising and promotional costs, sales administration and related sales expenses, including the costs of printing and distributing prospectuses to prospective investors, and sales commissions and incentive compensation. Applicant's distribution fee is calculated on the basis of 1.0% per annum of aggregate purchase payments (subject to a cap at 1.0% of net assets). Thus, under the proposed plan, the annual distribution fee to be borne by Applicant is equal to 1.0% of the lesser of (i) aggregate gross sales of Applicant's shares since Applicant's inception (not including reinvestment of dividends or capital gain distributions), less the aggregate net asset value of Applicant's shares redeemed since Applicant's inception upon which a contingent deferred sales charge has been imposed or upon which such charge has been waived (as provided below), or (ii) Applicant's daily net assets. Applicant states that Dean Witter also will receive the proceeds of the contingent deferred sales charge imposed upon any redemption.

[1] Applicant states that solely for purposes of determining the number of years from the time of any payment for the purchase of shares, all payments during a month will be aggregated and deemed to have been made on the last day of the month.

Where amounts attributable to purchase payments are redeemed (and thus no longer contribute to the annual distribution charge) applicant believes that it is fair (1) to impose on the withdrawing shareholder a lump sum payment reflecting approximately the amount of distribution expense which has not been recovered through payments by Applicant and (2) to remove the assets on which the contingent deferred sales charge was imposed from the base amount on which Applicant's distribution fee is calculated. Applicant asserts that the amount, computation and timing of the contingent deferred salses charge thus are designed to promote fair treatment of all shareholders, while permitting Applicant to offer investors the advantage of having purchase payments fully invested on their behalf immediately. Applicant states that, in their review of its distribution plan pursuant to Rule 12b–1, Applicant's trustees will also consider the use by Dean Witter of revenues raised by the contingent deferred sales charge.

Applicant proposes to waive the contingent deferred sales charge on any redemption following the death or disability of a shereholder. An individual will be considered disabled for this purpose if he meets the definition thereof in Section 72(m)(7) of the Code, which in pertinent part defines a person as disabled if such person "is unable to engage in any substantial gainful activity by reason of any medically determinable physical or mental impairment which can be expected to result in death or to be of long-contained and indefinite duration."[2] Applicant states that the waiver is applicable where the decedent or disabled person is either an individual shereholder or owns the shares with his or her spouse as a joint tenant with right of survivorship, and where the redemption is made within one year of the death or initial determination of disability. This waiver of the contingent deferred sales charge applies to a total or partial redemption but only to redemptions of shares held at the time of the death or initial determination of disability.

Applicant also proposes to waive the contingent deferred sales charge when a total or partial redemption is made in connection with certain distributions from IRA's or other qualified retirement plans. It is proposed that the charge be waived for any redemption in connection with a lump-sum or other distribution following retirement or, in the case of an IRA or Keogh Plan or a custodial account pursuant to Section 403(b)(7) of the Code, after attaining age 59½. The charge also would be waived on any redemption which results from the tax-free return of an excess contribution pursuant to Section 408(d)(4) or (5) of the Code, or from the death or disability of the employee.

Applicant argues that the proposed contingent deferred sales charge is consistent with all provisions of the Act and that, but for the provision that the charge be waived on certain types of redemptions as specifically detailed above, no exemptive relief would be required in order to implement the proposed transactions. However, to avoid any possibility that questions may be raised as to the potential applicability of various definitional and regulatory sections of the Act and to permit the charge to be waived in connection with redemptions following the death or disability of a shareholder and redemptions in connection with certain distributions from an IRA or other qualified retirement plan, Applicant requests exemptions to the extent necessary, from the provisions of the Act detailed below.

Applicant submits the imposition of the proposed contingent deferred sales charge would not cause shares of Applicant to fall outside the definition of "redeemable securit(ies)" in Section 2(a)(32) of the Act, and Applicant believes, therefore, that it qualifies as an open-end company under Section 5(a)(1) of the Act. Applicant further believes that imposition of the proposed contingent deferred sales charge will in no way restrict a shareholder from receiving his proportionate share of Applicant's current net assets, but merely defers the deduction of a sales charge and makes it contingent upon an event which may never occur. Although the proposed contingent deferred sales charge is not a redemption charge in the ordinary sense, Applicant submits that the conditions of Section 10(d) of the Act contemplate that an investment company may both be an open-end company and impose a discount from net asset value on redemption of its shares. However, in order to avoid uncertainty in this regard, Applicant requests an exemption from the operation of Section 2(a)(32) of the Act to the extent necessary to permit implementation of the proposed contingent deferred sales charge.

Applicant asserts that the proposed contingent deferred sales charge is consistent with the intent of the definition of sales load contained in Section 2(a)(35) of the Act. The contingent deferred sales charge is paid to the underwriter/distributor to reimburse it solely for expenses related to offering Applicant's shares for sale to the public, and, therefore, Applicant submits that this arrangement is within the Section 2(a)(35) definition of sales load, but for the timing of the imposition of the charge. Applicant contends that the deferral of the sales charge, and its contingency upon the occurrence of an event which might not occur, does not change the basic nature of this charge, which is in every other respect a sales charge. However, Applicant requests an exemption from the provisions of Section 2(a)(35), to the extent necessary to implement the proposed charge.

Applicant asserts that implementation of the proposed contingent deferred sales charge is in no way violative of Section 22(c) or Rule 22c–1 thereunder. When a redemption of shares of Applicant is effected, the price of the shares on redemption will be based on current net asset value. The contingent deferred sales charge will merely be deducted at the time of redemption in arriving at the shareholder's proportionate redemption proceeds. However, in order to avoid any possibility that questions might be raised as to the potential applicability of Section 22(c) and Rule 22c–1, Applicant requests an exemption from the operation of the provisions of Rule 22c–1 to the extent necessary or appropriate to permit Applicant to implement the proposed contingent deferred sales charge.

Applicant contends that notwithstanding the fairness and rationality of imposing the contingent deferred sales charge with respect to all redemptions subject thereto, Applicant and Dean Witter have determined that it would be fair and equitable and in the public interest and in the interest of shareholders for the contingent deferred sales charge to be waived on certain types of redemptions. In each situation in which the charge would be waived, the redeeming shareholder is a member of a class of shareholders which is favored under the tax laws or the securities laws. Applicant further asserts that the proposed waiver is consistent with the purposes of Applicant. As stated in its prospectus, Applicant is designed for long-term investors, including those who wish to use its shares as the funding vehicle for IRA's or other tax-deferred retirement

[2] While applicant does not specifically adopt the balance of the Code definition which pertains to furnishing the Secretary of Treasury with such proof as he may require, Applicant contends that Dean Witter will require satisfactory proof of death or disability before it determines to waive the contingent deferred sales charge.

plans. The prospectus further states that Applicant is not designated for investors who intend to liquidate their investments after a short period. Applicant states that in situations in which the contingent deferred sale charge will be waived, the redemption is either unforeseen by the shareholder at the time of purchase (i.e., resulting from the extraordinary circumstances of death or disability) or is fully intended at the time of purchase (i.e., ordinary retirement plan). Accordingly, Applicant contends that neither situation would be inconsistent with Applicant's purpose or the investor's initial intention of making a long-term investment in Applicant.

Applicant submits that the requested order is fair to remaining shareholders because the Applicant will not be charged with any revenue lost as a result of waiver of the contingent deferred sales charge in the above circumstances. According to the application, amounts redeemed are removed from the base of aggregate purchase payments for purposes of calculating the distribution fee in connection with Applicant's proposed distribution plan where the redemption results in imposition of the contingent deferred sales charge. Applicant asserts this is because the charge is designed to recover through a lump sum payment the amount of distribution expense which has not been recovered through payment of distribution fees by Applicant with respect to the redeemed amount. As with all redemptions subject to the contingent deferred sales charge, Applicant represents that its distribution plan pursuant to Rule 12b–1 provides that amounts on which a contingent deferred sales charge would have been imposed but for the waiver of such charge pursuant to this provision are also removed from the base of purchase payments.

Applicant further contends that the waiver of the contingent deferred sales charge in the extraordinary circumstance of death or total disability of the investor is justified on basic considerations of fairness. Applicant asserts that waiving the charge on certain distributions from a qualified retirement plan is fully consistent with the policies reflected in (i) the Code provisions granting favored tax treatment to accumulations under such plans and imposing additional taxes on early distributions from IRA's and other plans and (ii) Rules 22d–1(a)(3) and 22d–1(b)(3) under the Act, which permit quantity discounts to plans qualified under Code Section 401, and Rule 22d–1(f) under the Act, which permits variations in the sales load for qualified and non-qualified employee benefit plans (which need not be based on realization of economies where the plans are qualified under Section 401 of the Code).

Section 6(c) of the Act provides that the Commission, by order upon application, may conditionally or unconditionally exempt any person, security, or transaction, or any class or classes of persons, securities or transactions from any provisions of the Act, if and to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Applicant assets that the exemptions it requests are appropriate and in the public interest, consistent with the protection of investors, and consistent with the purposes fairly intended by the Act. Applicant further submits that waiver of the contingent deferred sales charge under the above-described circumstances will not harm Applicant or its remaining shareholders or unfairly discriminate among shareholders or purchasers. Additionally, Applicant represents that it will fully disclose the waiver provision in its prospectus. Applicant therefore requests that the Commission issue an order under Section 6(c) as requested.

Notice is further given that any interested person wishing to request a hearing on the application may, not later than March 28, 1983, at 5:30 p.m., do so by submitting a written request setting forth the nature of his interest, the reasons for his request, and the specific issues, if any, of fact or law that are disputed, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of the request should be served personally or by mail upon Applicant at the address stated above. Proof of service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed with the request. Persons who request a hearing will receive any notices and orders issued in this matter. After said date an order disposing of the application will be issued unless the Commission orders a hearing upon request or upon its own motion.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[Release No. 13071; 812-5148]

E. W. Axe & Co., Inc, et al.; Application Filing

March 4, 1983.

In the matter of E. W. Axe & Co., Inc., Axe Securities Corporation, Axe-Houghton Income Fund, Inc., Axe-Houghton Fund B, Inc., Axe-Houghton Stock Fund, Inc., 400 Benedict Avenue, Tarrytown, New York 10591; (812–5148); Notice of filing of application pursuant to section 6(c) of the act for an amended order exempting application from the provisions of section 22(d) of the act and rule 22d–1 thereunder.

Notice is hereby given that Axe-Houghton Income Fund, Inc., Axe-Houghton Fund B, Inc., and Axe-Houghton Stock Fund, Inc, (the "Funds"), each of which is registered under the Investment Company Act of 1940 ("Act") as an open-end, diversified management investment company, E. W. Axe & Co., Inc. ("E. W. Axe"), the Fund's investment adviser and Axe Securities Corporation ("Axe Securities"), their principal underwriter (collectively the "Applicants"), filed an application on January 13, 1983, pursuant to Section 6(c) of the Act, for an order of the Commission amending an order previously issued by the Commission (Investment Company Act Release No. 12540, July 8, 1982). That order, pursuant to Section 6(c) of the Act, exempted from the provisions of Section 22(d) of the Act and Rule 22d–1 thereunder the offer and sale of the Funds' shares at prices which reflected reductions in the usual schedule of sales charges disclosed in the prospectus of each of the Funds. All interested persons are referred to the application on file with the commission for a statement of the representations contained therein, which are summarized below. Such persons are also referred to the Act and the Rules thereunder for the complete text of those provisions therein from which an exemption is being sought.

The application for the amended order states that, except as otherwise specifically indicated, all the facts and circumstances set forth in the prior notice (Investment Company Act Release No. 12479, June 10, 1982) and the prior order continue to be as stated in the prior application filed on March 30, 1982, and in such prior notice and order. Applications represent that the Funds currently offer their shares to the public at net asset value plus sales charges in accordance with the schedule of charges set forth in the proposectus of each Fund, and that Axe Securities, a wholly-owned subsidiary of E. W. Axe, acts as

the principal underwriter for each of the Funds pursuant to underwriting agreements which provide that Axe Securities, as agent, will use its best efforts to sell shares of the Funds.

The application states that since July 8, 1982, the effective date of the prior order, shares of the Funds have been acquired by persons associated with the National Rural Electric Cooperative Association ("NRECA") who are eligible to participate in a retirement program sponsored by NRECA ("Program Participants") at a reduced sales charge pursuant to the exemption provided by the prior order under the same terms as those which apply to purchases made by persons acquiring Fund shares through an "Eligible Retirement Program" as defined in the supplement dated March 29, 1982, to the prospectus of each of the Funds. Applicants state that approximately 90 Program Participants purchased shares of the Funds after March 28, 1982, and before July 8, 1982, in the mistaken belief that they qualified for the reduced sales charge of .5 percent. The application states that such Program Participants have informed Applicants that their erroneous belief resulted from statements made to them by the sales representative of Axe Securities, who was a vice president of Axe Securities and who negotiated the arrangement under which the offering of the Funds' shares was made to persons associated with NRECA by Axe Securities. The application further states that the officer left the employ of E. W. Axe and Axe Securities without notice in late October, 1982.

The application also states the E. W. Axe and Axe Securities belief that they have a moral and perhaps a legal obligation to "make whole" such Program Participants because, although the statements relied upon appear to have been inaccurate, they were made by a person upon whom the Program Participants were entitled to rely. It is represented that E. W. Axe and Axe Securities therefore wish to purchase from the Funds and creditto the accounts of the approximately 90 Program Participants who purchased shares of the Funds prior to the effective date of the prior order (but not earlier than March 29, 1982) that number of shares of the Funds as is equal to the number of shares that would have been credited to the account of each such Program Participant had a sales charge of .5 percent been applied to their purchases. The application states that counsel has advised Applicants, however, that to do so might be deemed inconsistent with the terms of the prior order, and therefore could be deemed a violation of Section 22(d) of the Act.

Section 6(c) of the Act provides that the Commission may conditionally or unconditionally exempt any person or transaction from any provision or provisions of the Act and the rules promulgated thereunder if such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act. Pursuant to section 6(c) of the Act, Applicants requested and received the prior order of the Commission permitting sales of shares of the Funds to Program Participants at a reduced sales charge. Applicants now request that such order be amended so as to permit E. W. Axe and Axe Securities to effect the remedy described above. In support of their application, Applicants represent that all expenses incurred in connection with the application and the actions contemplated thereby will be borne by E. W. Axe and/or Axe Securities and that neither the Funds not their shareholders will bear any expense related to this matter. Applicants further agree that the foregoing representations may be made a condition to the amended order.

Notice is further given that any interested person wishing to request a hearing on the application may, not later than March 29, 1983, at 5:30 p.m., do so by submitting a written request setting forth the nature of his interest, the reasons for his request, and the specific issues, if any, of fact or law that are disputed, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of the request should be served personally or by mail upon the Applicants at the address stated above. Proof of service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed with the request. Persons who request a hearing will receive any notices and orders issued in this matter. After said date an order disposing of the application will be issued unless the Commission orders a hearing upon request or upon its own motion.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[Release No. 13066; 812-5455]

Kuparuk Transportation Capital Corp.; Application Filing

March 3, 1983.

In the matter of Kuparuk Transportation Capital Corporation, c/o Atlantic Richfield Company, 515 South Flower Street, Los Angeles, California 90071; (812-5455); Notice of filing of an application pursuant to section 6(c) of the act for an order exempting applicant from all provisions of the act.

Notice is hereby given that Kuparuk Transportation Capital Corporation, a Delaware corporation ("Applicant"), filed an application on February 14, 1983, pursuant to Section 6(c) of the Investment Company Act of 1940 ("Act"), for an order of the Commission exempting Applicant from all the provisions of the Act. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below.

Applicant states that its only securities presently outstanding are one hundred shares of its capital stock, all of which are owned by Kuparuk Pipeline Company, a Delaware corporation ("Kuparuk") which is a wholly-owned subsidiary of Atlantic Richfield Company, a Pennsylvania corporation ("Atlantic"). Upon the formal creation of Kuparuk Transporation Company (the "Partnership"), a general partnership expected shortly to be formally created under the laws of the State of Alaska, all such shares shall be transferred by Kuparuk to the Partnership. The three general partners (the "Partners") of the Partnership will be BP Alaska Pipelines Inc., Kuparuk and Sohio Alaska Transportation Company. Each is a Delaware corporation. The Partners are wholly owned subsidiaries, respectively, of The British Petroleum Company p.l.c., an English corporation ("BP"), Atlantic, and The Standard Oil Company, an Ohio corporation ("Sohio"). BP, Atlantic and Sohio are integrated petroleum companies principally engaged in the exploration, production, transportation, refining and marketing of crude oil and its products.

The application states that the Partnership will be organized to construct, own and operate a 24-inch common carrier pipeline approximately 27 miles in length, smaller connecting pipelines and related facilities on the North Slope of Alaska (the "Pipeline") to transport crude oil from the Kuparuk River Unit Field to the existing Trans Alaska Pipeline System Pump Station No. 1. The currently projected cost of the

Pipeline is approximately $115,000,000 (including interest during construction). The Partnership anticipates that the Pipeline will be operational in December 1984.

Applicant states that it is a special purpose corporation formed to assist in financing the Pipeline and its only business will be the issuance of debt securities from time to time (the "Debt Securities") and the lending of the proceeds thereof to the Partnership. Loans by Applicant to the Partnership will be evidenced by one or more master notes ("Partnership Notes"). The principal of, premium, if any, and interest on the Partnership Notes will be equal to the principal of, premium, if any, and interest on Applicant's Debt Securities. All expenses of Applicant will be reimbursed to it by the Partnership.

Applicant further states that each series of Debt Securities issued by it will be secured, among other things, by the pledge of one or more Partnership Notes. The Partnership Notes will be secured by the several obligations of BP Alaska Exploration Inc., a Delaware corporation, ARCO Alaska, Inc.,[1] a Delaware corporation, and Sohio Alaska Petroleum Company, a Delaware corporation (collectively hereinafter called the "Throughput Obligors") under a Throughput and Deficiency Agreement (the "Throughput and Deficiency Agreement") to be entered into by the Throughput Obligors and the Partnership. The Throughput Obligors are, respectively, wholly owned subsidiaries of BP, Atlantic and Sohio. According to the application, each of BP, Atlantic and Sohio is guaranteeing the performance by its subsidiary of such subsidiary's obligations under the Throughput and Deficiency Agreement. Under the Throughput and Deficiency Agreement, if for any reason, whether prior to or after completion of construction of the Pipeline, the Partnership has a cash deficiency on the date that any payment is due with respect to debt service on the Partnership Notes, each Throughput Obligor will be severally and unconditionally obligated to advance in cash its percentage share of such cash deficiency.

Applicant represents that the initial series of its Debt Securities will be short term notes issued under a Trust Agreement between it and Morgan Guaranty Trust Company of New York, a banking corporation organized and existing under the laws of the State of New York, as trustee for the noteholders (the "Trustee"). Such notes will be issued in denominations of not less than $100,000, although the usual denomination is expected to be significantly larger. Such notes will not be advertised for sale to the general public but will be sold to Salomon Brothers Inc. or by Salomon Brothers Inc., in the commercial paper market only to institutional investors and other entities which normally purchase commercial paper in large denominations. Such notes will be issued as either discount or interest-bearing obligations payable to bearer with a maturity at the time of issuance not to exceed nine months, exclusive of days of grace. Such notes will not contain any provisions for payment on demand or for automatic "roll over". It is expected that these notes will be accorded the highest commercial paper rating by two nationally recognized rating agencies. The Partnership, through Applicant, may also issue intermediate or long-term debt securities, as market conditions permit or dictate, in the public or private debt markets.

Applicant further states that as security for the initial series of its Debt Securities (i) a related Partnership Note will be pledged to the Trustee and (ii) the rights of the Partnership under the Throughput and Deficiency Agreement and the related performance guarantees of BP, Atlantic and Sohio will be assigned to the Trustee. Future similar security arrangements with respect to other issues of Debt Securities of Applicant will be made on a *pari passu* basis without restriction and, as to assignments, without priority by reason of time of assignment or perfection or on a subordinated basis.

Applicant states that it may be deemed to be an "investment company" as defined in the Act (i) by reason of its proposed acquisition and holding of the Partnership Notes, which will constitute substantially all its assets, and (ii) because securities (other than short term notes) which it intends to offer may be held by more than 100 persons. Section 6(c) of the Act provides, in part, that the Commission may, by order upon application, exempt any person, security or transaction, or any class or classes of persons, securities or transactions from any provision or provisions of the Act or of any rule or regulation thereunder, if and to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

The application states that the sole purpose and only business of Applicant is to serve as a vehicle to facilitate debt financing for the Partnership. Applicant will not hold shares of capital stock of any other corporation. Once it has been formally established, the Partnership will maintain sole ownership of all the shares of Applicant's capital stock. Since Applicant's Debt Securities will be secured by the pledge of the related Partnership Notes, and by the assignment of the Parternership's rights under the Throughput and Deficiency Agreement and the related guarantees of BP, Atlantic and Sohio, it is contended that purchase of Applicant's Debt Securities will be substantially equivalent to a purchase of direct obligations of the Throughput Obligors, severally guaranteed by BP, Atlantic and Sohio as to the respective subsidiaries of each. It is further contended that, since it is intended that (i) the only significant assets of Applicant will be the Partnership Notes, (ii) Applicant will not sell, trade or otherwise deal in the Partnership Notes and will not sell, trade or otherwise deal in other securities (with the possible exception of purchases of its own securities to satisfy sinking fund obligations), (iii) none of the securities of Applicant (other than its Debt Securities) will be held by anyone other than the Partnership, and (iv) the purchase of Applicant's Debt Securities by investors will allegedly be substantially equivalent to purchasing obligations of BP, Atlantic and Sohio, it is not necessary or appropriate in the public interest or consistent with the protection of investors to regulate Applicant within the meaning of the Act.

Applicant agrees to the insertion in an exemptive order of one or more of or all the following conditions:

(1) Applicant will file with the Commission within 120 days after the close of its first fiscal year (a) information with respect to (i) persons in a control relationship with it (except with respect to persons under common control with it), (ii) persons and number of persons owning equity securities of Applicant and (iii) directors, officers, employees and legal counsel required by Items 11 and 12 of Form N–2 under the Act, and (b) a statement of financial position as of the close of such fiscal year, including a statement of income, paid-in surplus and retained earnings, and a schedule of investments as of the close of such fiscal year, and will notify the Commission promptly of any

[1] By letter dated February 22, 1983, counsel for Applicant advised that ARCO Kuparuk Shipping Company has been substituted for ARCO Alaska, Inc.

material change in such information or statement.

(2) Applicant will file with the Commission within 120 days of the close of its first fiscal year a schedule of the number of holders of its short-term or other bearer securities and of its securities in registered form as of the close of such fiscal year and the number of transfers of such registered securities during such fiscal year, and will notify the Commission promptly of any material change in such schedule.

(3) Applicant will not sell any equity securities other than to the Partnership or sell any Debt Securities other than debt securities which are to be held by the Partnership, the Partners, the Throughput Obligors, BP, Atlantic or Sohio, or which (i) are secured by a pledge of corresponding debt securities or other obligations of the Partnership which in turn are secured by an assignment of rights and proceeds under the Throughput and Deficiency Agreement and the performance guarantees hereinabove referred to and (ii) are (A) offered and sold in transactions not involving any public offering to institutions, located in the United States and elsewhere, which are not "underwriters" of the securities within the meaning of the Securities Act of 1933, (B) sold in offerings outside the United States pursuant to agreements and procedures reasonably designed to prevent such debt securities from coming into the hands of a United States national or resident, or (C) notes which arise out of current transactions or the proceeds of which have been or are to be used for current transactions, and which have a maturity at the time of issuance of not exceeding nine months, exclusive of days of grace, unless Applicant shall have first given written notice to the Commission describing the proposed issuance of such additional debt securities (including notice of a proposed filing of a registration statement under the Securities Act of 1933, as amended, pursuant to Commission Rule 415) not less than 60 days prior to the date of such proposed issuance, subject, however, to the right of the Commission, upon request of Applicant, to decrease such number of days. Applicant further agrees that if the Commission shall, after receipt of said written notice, determine that a substantial question exists as to whether or not the exemption granted by the order requested in the application should continue and the Commission shall, within 30 days after receipt by the Commission of such written notice from Applicant, mail or otherwise give notice to that effect to Applicant, in care of Kuparuk Pipeline Company, 515 South Flower Street, Los Angeles, CA 90071, Attention: Treasurer, Applicant will not issue such additional debt securities unless, after receipt by Applicant of such notice from the Commission and not less than 30 days prior to the issuance of such additional debt securities, Applicant shall mail or otherwise give written notice to the Commission stating its intention to issue such additional debt securities, and upon the giving of such notice by Applicant, the order requested in the application shall be deemed to have terminated as of the date the Applicant shall have mailed or otherwise given such notice to the Commission.

Notice is further given that any interested person wishing to request a hearing on the application may, not later than March 28, 1983, at 5:30 p.m., do so by submitting a written request setting forth the nature of his interest, the reasons for his request, and the specific issues, if any, of fact or law that are disputed, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of the request should be served personally or by mail upon Applicant at the address stated above. Proof of service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed with the request. Persons who request a hearing will receive any notices and orders issued in this matter. After said date an order disposing of the application will be issued unless the Commission orders a hearing upon request or upon its own motion.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[Release No. 13068; 812-5438]

Mount Isa Mines Ltd.; Application Filing

March 3, 1983.

In the matter of; Mount Isa Mines (Coal Finance) Limited c/o Cravath, Swaine & Moore, One Chase Manhattan Plaza, New York, New York 10005 (812-5438); Notice of filing of application pursuant to section 6(c) of the act exempting applicant from all provisions of the act.

Notice is hereby given that Mount Isa Mines (Coal Finance) Limited (the "Company") filed an application on January 24, 1983, for an order of the Commission, pursuant to Section 6(c) of the Investment Company Act of 1940 (the "Act"), exempting the Company from all provisions of the Act. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below.

The Company states that it is organized under the laws of the Australian Capital Territory and that its only securities currently outstanding are shares of its capital stock, all of which are beneficially owned by Mount Isa Mines Limited ("Isa"), a limited liability company organized under the laws of the State of Queensland, Australia. The Company states that Isa is a diversified mineral, coal and metal producer in Australia and that Isa is wholly-owned by M.I.M. Holdings Limited, a publicly-held limited liability company organized under the laws of the State of Queensland, Australia.

The Company represents that Isa intends to expand its existing coal mining operations in Collinsville, Queensland, Australia, and to develop, mine and exploit certain mining leases in Newlands, Queensland, Australia, for coal (the "Project"). The Company maintains that the current projected net outlay on the Project is approximately $832,000,000 (Australian dollars), including interest during construction and credit for net cash flow generated during construction. The Company further maintains that Isa anticipates that the Project will be completed in April, 1984. The completed Project, including existing coal mining operations in Collinsville, will have a production capacity of 6.3 million metric tons of coal per annum, most of which will be sold under long-term export contracts to non-Australian consumers.

The Company asserts that its sole purpose is to assist Isa in financing the Project by making loans to Isa, which loans will in turn be financed by (1) loans ("Project Loans") to be made to the Company be several groups of international banks (the "Project Loan Banks") and (2) issuances and sales by the Company of debt securities ("Bank Guaranteed Notes"), which will have the benefit of guarantees or letters of credit ("Project Credits") issued (or participated in) by other groups of United States and foreign banks ("the Project Credit Banks") for the account of the Company. The Company states that proceeds of the Project Loans and Bank Guaranteed Notes are currently expected to finance three-quarters of the $832,000,000 (Australian dollars) projected net outlay of the Project. The Company states further that, in

consideration of the Company lending to Isa the proceeds of Project Loans and of Bank Guaranteed Notes, Isa will agree, on a limited recourse basis, to discharge directly the Company's payment and reimbursement obligations, in respect of Project Loans, Bank Guaranteed Notes and all other costs and expenditures incurred by the Company in assisting in the financing of the Project.

The Company currently plans that the Project Loans will consist of borrowings from several bank groups in various currencies and that the Bank Guaranteed Notes will initially take the form of debt securities issued through a short-term revolving Euronote program in London, England, and a commercial paper program in the United States. The Company states that the sale of Bank Guaranteed Notes through each of these programs will be made possible by the Project Credits of the Project Credit Banks supporting the Company's payment obligations in respect of such Notes. The Company indicates that separate bank groups will issue or participate in the Project Credits issued in connection with the Euronote program and the commercial paper program. The Company may have the option to reduce the size of the Euronote program and/or the commercial paper program and to issue other types of Bank Guaranteed Notes in other markets similarly supported by Project Credits.

The Company states that a Production Loan and Credit Agreement (the "Credit Agreement") among the Company, Isa, the Project Credit Banks and the Project Loan Banks (jointly, the "Project Banks") will contain, among other things, (1) the commitments of the Project Banks to the Company to make Project Loans and to issue Project Credits, (2) the Company's agreement to make loans to Isa to assist Isa in financing the Project, and (3) Isa's agreement to be responsible, on a limited recourse basis, for the costs and expenditures incurred by the Company in so assisting Isa. The Company maintains that neither the Company's obligations to the Project Banks nor Isa's obligations to the Company, under the Credit Agreement, will be separately evidenced by a note or other instrument, except that a note will be issued by Isa to the Company to evidence the indebtedness from Isa to the Company arising from loans made by the Company to Isa out of the proceeds of the sale of commercial paper and a similar note may be issued in connection with the Euronote program (such notes are hereinafter called the "Isa Secured Notes"). The Company states that the principal and interest on each Isa Secured Note will be equal to the principal of and interest on the Company's outstanding Bank Guaranteed Notes to which such Isa Secured Note relates.

The Company represents that the Project Banks will have only limited recourse to the Company and Isa in respect of the Project Loans and the unreimbursed disbursements made by the Project Credit Banks under the Project Credits (which will be automatically converted into Project Loans), and the Company will have only limited recourse to Isa in respect of its loans to Isa (including but not limited to those evidenced by the Isa Secured Notes). The obligations of the Company and Isa to the Project Banks will, however, be secured by security documents ("Security Agreements"), pursuant to which Isa, together with certain of its affiliates (including the Company), will grant a security interest in certain Project assets, which may include coal sales contracts under which Isa will market Project coal and the shares of capital stock of the Company (the "Project Collateral"). The Company states that the Security Agreements will also secure the obligations of Isa in respect of the Isa Secured Notes *pari passu* with the Company's and Isa's obligations to the Project Banks.

The Company's United States commercial paper (the "Notes") will be issued under the Credit Agreement and an agreement between the Company and a United States bank, acting as issuing agent and depositary thereunder. The Company states that the Notes will (1) have muturities not exceeding 180 days, (2) be issued in denominations of not less than $100,000 (United States dollars), with the average denomination expected to be significantly larger, (3) not be advertised for sale to the general public and (4) be sold in the commercial paper market only to institutional investors or other entities which normally purchase commercial paper in large denominations. The Company states that the Notes will be supported by irrevocable letters of credit issued by a major United States bank (and unconditionally participated in by certain Project Credit Banks). The Company states that it will pledge the relevant Isa Secured Note to a commercial paper trustee as additional security for holders of the Notes. The Company states further that it will pledge the relevant Isa Secured Note, if any, to a Euronote trustee as additional security for the Euronote holders. According to the application, it is expected that the Notes will be accorded the commercial paper ratings of the bank which issues the letters of credit (currently the highest ratings granted). The Company represents that the Notes will be exempt from registration under the Securities Act of 1933 (the "1933 Act") pursuant to Section 3(a)(2) thereof.

In connection with the issuance and sale of the Notes, the Company will appoint a corporate entity which normally acts in such capacity to accept service of process in any action commenced in any State or Federal court in the United States by any holder of the Notes against the Company based on the Notes. The Company will expressly accept the jurisdiction of any State or Federal court in the City and State of New York in respect of any such action. Such appointment of an authorized agent to accept service of process and such consent to jurisdiction will be irrevocable until all amounts due and to become due in respect of the Notes shall be paid. The Company represents that it will also be subject to suit in any other court in the United States which would have jurisdiction because of the manner of the offering of the Notes.

The Company states that it may be deemed an "investment company" as defined by the Act because its only substantial assets will be its advances to Isa (evidenced in part by one or more Isa Secured Notes), which may be deemed to be securities under Section 2(a)(36) of the Act. Section 6(c) of the Act provides, in pertinent part, that the Commission, by order upon application, may conditionally or unconditionally exempt any person, security, or transaction, or any class or classes of persons, securities, or transactions, from any provision of the Act or of any rule or regulation under the Act, if and to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

The Company maintains that the exemption requested is appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act. The Company asserts that its sole purpose and only business is to serve as a vehicle to facilitate the funding of debt financing for the Project for Isa on favorable terms (the Project credit risk being borne by the Project Banks and the Bank Guaranteed Notes being essentially an additional funding mechanism). The Company further asserts that it will not

deal with the Isa Secured Notes after they have been pledged as security for the benefit of the holders of the Company's Bank Guaranteed Notes. The Company avers that it will not make any investment decisions on behalf of the holders of Bank Guaranteed Notes or the Project Banks.

The Company represents that it will not hold shares of capital stock of any other corporation. The Company represents further that since the Company's Bank Guaranteed Notes will have the benefit of the guarantees or letters of credit furnished by the Project Credit Banks, which Banks should they be called upon to honor such guarantees or letters of credit will have reimbursement rights which have the benefit of the Project Collateral, purchases of Bank Guaranteed Notes will be substantially the equivalent of purchasing bank-guaranteed limited recourse obligations of Isa.

The Company agrees that the following conditions may be imposed in any order of the Commission granting the exemptive relief requested:

(1) The Company will file with the Commission within 120 days after the close of the first fiscal year of the Company (a) information with respect to persons in a control relationship with the Company (except with respect to persons under common control with the Company), persons and number of persons owning equity securities of the Company and directors, officers, employees and legal counsel required by Items 11 and 12 of Form N–2 under the Act, (b) a statement of financial position as of the close of such fiscal year, including a statement of income, paid-in surplus and retained earnings, and (c) a schedule of investments as of the close of such fiscal year, and thereafter notify the Commission promptly of any material change in such information, statement or schedule.

(2) The Company will file with the Commission within 120 days of the close of the first fiscal year of the Company a schedule of the number of holders of its short-term or other bearer securities and of its securities in registered form as of the close of such fiscal year and the number of transfers of such registered securities during such fiscal year, and thereafter notify the Commission promptly of any material change in such schedule.

(3) The Company will not sell any equity securities other than to Isa or sell any debt securities other than debt securities (a) which are to be held by Isa, M.I.M. Holdings Limited or its affiliates, or (b) which (i) have the benefit of Project Collateral or the guarantees or letters of credit furnished by the Project Credit Banks (which Banks should they be called upon to honor such guarantees or letters of credit will have reimbursement rights which have the benefit of the Project Collateral) and (ii) are (A) offered and sold in transactions not involving any public offering to institutions, located in the United States and elsewhere, which are not "underwriters" of the securities within the meaning of the 1933 Act, (B) sold outside the United States pursuant to agreements and procedures reasonably designed to prevent such debt securities from coming into the hands of a United States national or resident, or (C) are exempt from the provisions of the 1933 Act by virtue of Section 3(a)(2) or Section 3(a)(3) thereof, unless the Company shall have first given written notice to the Commission describing the proposed issuance of such additional debt securities (including notice of a proposed filing of a registration statement under the 1933 Act, pursuant to Commission Rule 415 or otherwise) not less than 60 days prior to the date of such proposed issuance, subject, however, to the right of the Commission, upon request of the Company, to decrease such number of days. The Company further agrees that if the Commission shall, after receipt by the Commission of such written notice, determine that a substantial question exists as to whether or not the exemption granted by the requested order should continue and the Commission shall, within 30 days after receipt by the Commission of such written notice from the Company, mail or otherwise give notice to that effect to the Company, in care of Cravath, Swaine & Moore, One Chase Manhattan Plaza, New York, New York 10005, the Company will not issue such additional debt securities unless, after receipt by the Company of such notice from the Commission and not less than 30 days prior to the issuance of such additional debt securities, the Company shall mail or otherwise give written notice to the Commission stating its intention to issue such additional debt securities, and upon the giving of such notice by the Company the requested order shall be deemed to have terminated as of the date the Company shall have mailed or otherwise given such notice to the Commission.

Notice is further given that any interested person wishing to request a hearing on the application may, not later than March 25, 1983, at 5:30 p.m. do so by submitting a written request setting forth the nature of his/her interest, the reasons for his/her request, and the specific issues, if any, of fact or law that are disputed, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of the request should be served personally or by mail upon Applicant at the address stated above. Proof of service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed with the request. Persons who request a hearing will receive any notices and orders issued in this matter. After said date, an order disposing of the application will be issued unless the Commission orders a hearing upon request or upon its own motion.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[File No. 22-12297]

Standard Oil Company (an Indiana Corporation); Application and Opportunity for Hearing

March 4, 1983.

Notice is hereby given that Standard Oil Company, an Indiana corporation ("Standard") has filed an application pursuant to clause (ii) of Section 310(b)(1) of the Trust Indenture Act of 1939, as amended (the "Act") for a finding by the Securities and Exchange Commission (the "Commission") that the trusteeship of Citibank, N.A. ("Citibank") under an indenture between Standard and Citibank, as trustee, dated as of August 1, 1977 (the "1977 Indenture"), which was heretofore qualified under the Act, and the trusteeship by Citibank under an indenture among Amoco Australia Limited ("Amoco Australia"), Amoco Holdings Pty. Limited ("Holdings"), as Guarantor, and Citibank, as Trustee (the guarantee of Holdings being jointly and severally guaranteed by Standard and Amoco International Finance Corporation ("AIFC")), dated as of February 1, 1983 (the "1983 Indenture"), is not so likely to involve a material conflict of interest as to make it necessary in the public interest or for the protection of investors to disqualify Citibank from acting as trustee under the 1977 Indenture.

In support of its application, Standard alleges that:

(1) Standard has outstanding on the date hereof $400,000,000 aggregate principal amount of its 7¾% Debentures Due 2007 (the "7¾% Debentures") issued under the 1977 Indenture executed by Standard and Citibank, as Trustee. The 7¾% Debentures were registered under the Securities Act of

1933, as amended (File No. 2-50457), and the 1977 Indenture was qualified under the Trust Indenture Act of 1939, as amended (File No. 22-6282). Citibank is currently acting as trustee under the 1977 Indenture.

(2) Pursuant to the 1983 Indenture and the Guarantee Agreement, Amoco Australia issued $50,000,000 aggregate principal amount of 9⅛% Bearer Notes due 1990, which are guaranteed by Holdings (the "Guaranteed Notes"), which guarantee is jointly and severally guaranteed by Standard and AIFC (the "Joint and Several Guarantee"). Inasmuch as the Guaranteed Notes have been offered and sold outside the United States, its territories and possessions, to persons who are not nationals or residents thereof, the Guaranteed Notes have not been registered under the Securities Act of 1933 and the 1983 Indenture has not been qualified under the Act.

(3) Section 7.08 of the 1977 Indenture provides in part as follows:

Section 7.08 *Conflicting Interest of Trustee.* (a) If the Trustee has or shall acquire any conflicting interest, as defined in this Section 7.08, it shall, within ninety days after ascertaining that it has such conflicting interest, either eliminate such conflicting interest or resign in the manner and with the effect specified in Section 7.10.

(b) In the event that the Trustee shall fail to comply with the provisions of subsection (a) of this Section 7.08, the Trustee shall, within ten days after the expiration of such ninety-day period, transmit notice of such failure to all holders of Debentures, as the names and addresses of such holders appear upon the registration books of the Company.

(c) For the purposes of this Section 7.08 the Trustee shall be deemed to have a conflicting interest if

(1) The Trustee is trustee under another indenture under which any other securities, or certificates of interest or participation in any other securities, of the Company, are outstanding, unless such other indenture is a collateral trust indenture under which the only collateral consists of Debentures issued under this indenture; provided that there shall be excluded from the operation of this paragraph any indenture or indentures under which other securities, or certificates of interest or participation in other securities, of the Company, are outstanding if (i) this Indenture and such other indenture or indentures are wholly unsecured and such other indenture or indentures are hereafter qualified under the Trust Indenture Act of 1939, unless the Securities and Exchange Commission shall have found and declared by order pursuant to subsection (b) of Section 305 or subsection (c) of Section 307 of the Trust Indenture Act of 1939 that differences exist between the provisions of this Indenture and the provisions of such other indenture or indentures which are so likely to involve a material conflict of interest as to make it necessary in the public interest or for the protection of investors to disqualify the Trustee from acting as such under this Indenture and such other indenture or indentures, or (ii) the Company shall have sustained the burden of proving, on application to the Securities and Exchange Commission and after opportunity for hearing thereon, that the trusteeship under this Indenture and such other indenture is not so likely to involve a material conflict of interest as to make it necessary in the public interest or for the protection of investors to disqualify the Trustee from acting as such under one of such indentures."

(4) Execution of the 1983 Indenture could involve Citibank in a conflict of interest within the meaning of Section 7.08 of the 1977 Indenture since the 1983 Indenture is not qualified under the Act and is not the subject of any other proceeding of the Commission.

(5) The 1977 Indenture and the 1983 Indenture are wholly unsecured. The Joint and Several Guarantee given pursuant to the 1983 Indenture ranks equally with Standard's other unsecured and unsubordinated indebtedness, including the 7⅞% Debentures. The primary differences between the 1977 Indenture and the 1983 Indenture, and between the rights of the holders of the 7⅞% Debentures and the holders of the Guaranteed Notes as beneficiaries of the Joint and Several Guarantee, relate to aggregate principal amounts, dates of issue, denominations, events of default, maturity and interest payment dates, interest rates, places of payment of interest and principal, form of registration, redemption or prepayment procedures, Trustee's reports, restrictions on transferability, provisions relating to the non-United States offering of the Guaranteed Notes and other provisions of a similar nature. Any such difference and any other difference in the provisions of the 1977 Indenture and the 1983 Indenture and Guarantee Agreement are not so likely to involve any material conflict of interest between the respective trusteeships of Citibank under these Indentures so as to make it necessary in the public interest or for the protection of investors to disqualify Citibank from acting as trustee under the 1977 Indenture.

(6) Standard is not in default under the 1977 Indenture, the 1983 Indenture or the Guarantee Agreement.

Standard has filed an application which is on file in the offices of the Commission at 450 5th Street, NW., Judiciary Plaza, Washington, D.C. 20549, with respect to the matters of fact and law asserted herein.

Notice is further given that an order granting the application may be issued by the Commission at any time on or after April 1, 1983, unless prior thereto a hearing upon the application is ordered by the Commission, as provided in clause (ii) of Section 310(b)(1) of the Trust Indenture Act of 1939, as amended. Any interested person may, not later than April 1, 1983, at 5:30 P.M., Eastern Standard Time, in writing, submit to the Commission, his views or any additional facts bearing upon this application or the desirability of a hearing thereon. Any such communication or request should be addressed: Secretary, Securities and Exchange Commission, 450 5th Street, NW., Judiciary Plaza, Washington, D.C. 20549, and should state briefly the nature of the interest of the person submitting such information or requesting a hearing, the reasons for such request, and the issues of fact and law raised by the application which he desires to controvert.

For the Commission, by the Division of Corporate Finance, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[Release No. 34-19556; File No. SR-Amex-82-27]

Self-Regulatory Organizations; Proposed Rule Change by American Stock Exchange, Inc.; Relating to Amendment of Exchange Rule 950(k) Regarding Restrictions on Options Specialists

Pursuant to Section 19(b)(1) of the Securites Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on December 30, 1982, the American Stock Exchange filed with the Securites and Exchange Commission the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The American Stock Exchange is proposing to amend Rule 950(k) to permit a member organization which is affiliated with an options specialist to:

- Engage in non-material business transactions with the issuer or insiders of the issuer of a stock underlying a specialty option,
- Accept unsolicited orders in specialty options from pension and profit sharing funds with assets of less than five million dollars, and
- Perform certain types of research and advisory services with respect to stocks underlying options, provided certain conditions are met.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received

on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

(a) *Purpose.* For many years the Exchange has had rules restricting certain activities of a specialist so as to minimize potential conflicts of interest between the specialist's agency and dealer functions as well as to help assure fair and orderly markets. Amex rule 190 governing a specialist's transactions with public customers is one such rule.

At the inception of the Exchange's options program in the mid-1970's, these rules were applied to options specialists, with only minor changes. (Rule 190 was made applicable to options specialists by Rule 950(k)). At that time the Exchange expressed to the staff of the Securities and Exchange Commission its concern that specialist restrictions developed specifically for stocks might have to be revised or eliminated in the light of experience gained by trading options. In particular, it was stated that if these restrictions unnecessarily impinged upon the ability of the Exchange to attract major retail firms to specializing, the Exchange would reconsider their application to options.

The Exchange has concluded that Rule 950(k) indeed operates as a disincentive to diversified firms acting, or contemplating acting, as an options specialist. Among other things, this Rule prohibits such firms from engaging in any business transactions with the issuer (or its insiders) of a stock underlying a specialty option, from making recommendations for the purchase or sale of both the option and the underlying stock, and from accepting orders in specialty options from institutions. None of the other options exchanges impose equivalent restrictions.

Several months ago Exchange representatives met with Division of Market Regulation staff to discuss the problems experienced by options specialist firms and to review the ideas for the rule changes which are the subject of this filing.

A. Business Transactions

Rule 950(k) prohibits an options specialist firm from engaging in *any* business transaction with the issuer of an underlying stock or any of its insiders. This prohibition was specifically adopted to prevent the establishment of a relationship through which a specialist firm could obtain non-public corporate information from an issuer, or an issuer could obtain non-public market information from a specialist.

However, the scope of this Rule is so broad that, particularly when applied to options specialists, it precludes the establishment of specialist-issuer relationships in which the potential for abuse is, at best, remote. For example, because of the "business transactions" prohibition the Exchange has advised options specialists that they could not engage in the following activities:

- Handling brokerage accounts for the issuer, etc., whether or not the brokerage orders are for specialty or non-specialty securities,
- Handling a commodities trading account for an issuer,
- Allowing an account executive to continue to deal with a long standing customer who had become the chief executive officer of an issuer in whose options the firm specialized.

In each of the examples listed above the potential that one of the parties might obtain non-public information is remote because the transactions are not material in value to either party, and do not otherwise give either of the parties access to material, non-public information. The potential for abuse is further minimized by the very nature of options trading. Since options are derivative securities they respond primarily to price changes in the underlying security, and it is more difficult for an options specialist to affect short-term price movements in the option. Thus, there are compelling reasons in favor of the Exchange's modifying the business transaction prohibition with respect to its options specialists. The Exchange believes that it can accomplish this change without sacrificing its underlying need to bar the flow of non-public information between issuers and specialists.

Accordingly, the Exchange has amended the business transactions restriction so as to permit an options specialist firm to engage in non-material business transactions with the issuer of a stock underlying a specialty option or its insiders. A material transaction is defined as one which (a) is material in value to either party, or (b) provides access to material non-public information relating to the issuer or the specialist. By so defining materiality the Exchange will be able to preclude the establishment of specialist-issuer relationships in which there is a realistic potential for improper disclosure of inside information, while permitting those relationships which do not give rise to such a concern. It should be noted that even with this change, options specialist firms will still be prohibited from accepting option orders from the issuer of the underlying stock or its insiders.

B. Recommending Underlying Securities

Another long-standing restriction on a stock specialist is the prohibition against recommending the purchase or sale of a specialist security. This prohibition was enacted to avoid the resulting conflict that would be created between a specialist's marketmaking and other business activities. When options trading commenced, the Exchange not only applied this prohibition to options specialists—i.e. specified that they could not issue a recommendation in their specialty options—but expanded it so as to also preclude them from issuing recommendations in underlying securities. It is this expansion of the Rule which has engendered business difficulties for options specialist firms, particularly in light of the fact that the Rule applies not only to the individual specialists, but also to their firms, parent companies, and all of the officers, directors and employees associated with such firms.

The difficulties caused by the application of this restriction to options specialist firms can be broken down into two primary categories. The first is the inability of such firms to provide comprehensive research coverage of the industries which include their underlying securities. Thus, the Amex specialist in Gulf options cannot prepare an analysis of the oil industry which would include a discussion of Gulf. Inevitably, the research coverage provided by options specialist firms will suffer in comparison to that offered by other firms, a fact which will not go unnoticed by the investing public. The second difficulty engendered by this restriction is that an account executive, even acting in the absence of a firm-wide recommendation, cannot solicit orders in underlying stocks from *any* of his customers. This forces options specialist firms to include underlying securities on restricted lists and creates yet another competitive disadvantage for them.

The Exchange believes that the differences between stock and options trading are such that the regulatory interest served in maintaining this restriction in its present form is outweighed by the competitive

disadvantage it has placed upon options specialists firms. The Exchange therefore believes that it is appropriate to lift the absolute prohibition against recommendations in underlying securities if, as discussed below, the specialist firm adopts adequate procedures which will satisfy the Exchange's regulatory needs.

In view of the above, the Exchange has amended Rule 950(k) to permit an options specialist firm to make recommendations in underlying securities provided that the firm adopts procedures (which first must be filed with and approved by the Exchange) to preclude the flow of information between the individual specialist and the relevant non-specialist areas of the firm. These procedures—tantamount to a "Chinese wall"—must assure that the research and marketing areas of a firm will be precluded from gaining information concerning positions taken by the options specialist, and, conversely, that the specialist would be barred from obtaining information about his firm's forthcoming recommendations which might influence his market-making activities. The Exchange is confident that a structurally sound "Chinese wall," such as those which many firms have used for years to separate retail and investment banking functions, will serve to substantially reduce the possibility that information might flow between the specialist and other areas of a firm.

At a minimum, the procedures submitted for review must be sufficiently specific so as to enable the Exchange to evaluate their effectiveness in terms of the firm's structural and functional operation, and the maintenance and surveillance of the procedures must be specifically allocated to senior management within the firm. Any firm receiving Exchange approval will be required to fully disclose its status as specialist in any form of recommendation it makes, and will be apprised that its adoption of a "Chinese wall" will not insulate it from liability under the securities laws or the Exchange's own rules. For those firms which choose not to establish such procedures, and thus not to recommend underlying securities, the current restrictions will remain in place. The current restriction against recommendation of specialty options will also remain unchanged for all options specialist firms.

The Exchange will monitor compliance with this Rule change through its options surveillance program. The Exchange's surveillance procedures are designed to detect instances of trading on inside information, and will be used to check for breaches of the "Chinese wall." The Exchange's Trading Analysis Division which routinely reviews specialists' options and underlying stock activity will have primary responsibility for this surveillance. The Exchange will carefully monitor its surveillance program and will make any enhancements which may be necessary to ensure that this new procedure is not abused.

C. Orders From Small Pension and Profit-Sharing Plans

The final change which the Exchange has made relates to the prohibition against a specialist's accepting orders in his specialty securities from an institutional customer. This restriction was adopted to prevent a specialist from giving—or being pressured into giving—favored treatment to such orders. As applied to options trading, this restriction relates only to specialty options, i.e., it does not prohibit a specialist from accepting an institutional order in the underlying security. The Exchange has carved out a limited exception to this prohibition which would permit an options specialist to accept *unsolicited* orders in specialty options from pension and profit-sharing plans with assets of less than five million dollars.

Several factors support this change. First, plans of this size are too small to exercise coercive pressure on a specialist. Further, such plans are typically established for the benefit of an individual or small group of individuals (such as a doctor's profit-sharing or KEOGH plan) and are thus in reality more akin to individual accounts than institutional ones. This limited change will thus enable an options specialist firm to accept customer orders which raise no regulatory concern.

(b) *Basis.* The proposed amendments are consistent with Section 6(b) of the Exchange Act in general and further the objectives of Section 6(b)(5) in particular in that they are designed to remove impediments to, and perfect the mechanism of, a free and open market and to protect investors and the public interest by removing barriers to entry into specializing and encouraging competition in specializing.

B. Self-Regulatory Organization's Statement on Burden on Competition

The proposed rule changes are intended to reduce burdens on competition which were excessive since they created disincentives to options specializing without any offsetting regulatory benefits. Rule 950(k), as amended, does impose certain burdens on competition, but only for the purpose of satisfying the Exchange's regulatory interest. If necessary at a later date, the Exchange will readdress the Rule to ensure that this competitive balance is maintained.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) by order approve such proposed rule change, or

(B) institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 5th Street, NW., Washington, D.C. 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 5th Street, N.W., Washington, D.C. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted within 30 days after the date of this publication.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

Dated: March 1, 1983.

George A. Fitzsimmons,

Secretary.

Exhibit A—American Stock Exchange, Inc.

Proposed Amendment to Rule 950(k)

It is proposed that Rule 950(k) be amended as set forth below. (Brackets [ ] indicate words to be deleted; italics indicate words to be added.)

Rule 950. (k) The provisions of Rule 190 and Commentary thereto shall apply to the trading of option contracts with the addition of the following commentary:

* * * Commentary

.02 With respect to a specialist registered in one or more classes of options:

(1) Paragraph (a) of this Rule shall be deemed to prohibit any *material* business transactions with the company which is the issuer of the underlying stock that is the subject of any such class of options or with any officer, director or 10% stockholder of any such company. [; and] *A material transaction for purposes of this Commentary .02 is one which is material in value either to the issuer or the specialist; would provide access to material non-public information relating to the issuer; or would give rise to a control relationship between the issuer and the specialist.*

(2) Paragraph (b) of this Rule shall be deemed to prohibit the acceptance of any order for the purchase or sale of an option contract of any such class directly (1) from the company which is the issuer of the underlying stock that is the subject of any such class of options, (2) from any officer, director or 10% stockholder of any such company, (3) from any pension or profit-sharing fund *with assets exceeding $5,000,000*, or (4) from any bank, trust company, insurance company, investment company or similar institution. This Rule shall not be deemed to prohibit the acceptance of orders for the purchase or sale of the underlying stock from pension and profit-sharing funds, banks, trust companies, investment companies and similar institutions.

(3) It is contrary to good business practice for specialist or his member organization, or any member, officer, employee or approved person therein to make any recommendation in any such class of options or in the underlying stock that is the subject of any such class of options, except that recommendations in the underlyuing stock shall not be prohibited if the specialist organization has established and obtained Exchange approval of procedures designed (A) to preclude the flow of information regarding the activities and positions of the specialist and the activities of relevant non-specialist lines of business between the individual specialist and any member, officer, employee or approved person associated with the specialist who might, in the oridinary course of business, have knowledge of such recommendations and (B) to assure disclosure in connection with any such recommendation of the specialist's status as such in such class of options.

Any such proposed procedures submitted for the Exchange's approval shall, at a minimum provide:

(i) sufficient specificity to establish a basis for the Exchange to evaluate their effectiveness in the context of the specialist organization's structural and functional operation; and

(ii) specificity regarding responsiblity within the organization for maintenance and surveillance of such procedures.

BILLING CODE 8010-01-M

[Release No. 19562]

Proposed Rule Change Submitted by the National Securities Clearing Corporation ("NSCC"); Order Approving Proposed Rule Change

March 2, 1983.

On November 24, 1982, NSCC submitted a proposed rule change (SR–NSCC–82–27) under Section 19(b)(2) of the Securities Exchange Act of 1934 (the "Act") that would modify NSCC's rules regarding the terms of issuance of irrevocable letters of credit issued by banks to secure participants' clearing fund obligations. The Commission published notice of the proposal in the Federal Register on December 30, 1982, and invited persons to comment.[1] No letters of comment were recieved. NSCC received one letter of comment.[2]

Currently, NSCC's Rule 4, Section 1 provides that NSCC participants may secure, in part, the non-cash portion of their clearing fund contributions ("open account indebtedness") by depositing with NSCC irrevocable letters of credit.[3] NSCC accepts, under that Rule, letters of credit from qualified banks that execute contractual agreements with NSCC governing the terms and conditions of such letters of credit. More specifically, each agreement provides that the bank will establish irrevocable letters of credit in favor of NSCC, for the account of an NSCC participant, with an expiration date expresly stated in the agreement.[4] In addition, the agreement establishes a stated dollar amount that is payable to NSCC upon the presentation of a sight draft accompanied by a certification signed by NSCC stating that the claimed amount does not exceed the participant's liabilities to NSCC.[5] Finally, the agreement will be governed by Article 5 of the New York Uniform Commercial Code.

The proposed rule change would modify NSCC's rules to allow NSCC to accept an additional category of letters of credit. Under the proposal, NSCC would be authorized for the first time to accept letters of credit that can be terminated at the issuer's request, provided the issuer gives NSCC five days written notice.[6] As discussed above, NSCC currently accepts only letters of credit that cannot be terminated prior to their expiration date. More specifically, under the proposal NSCC would amend its contractual agreements to provide that letters of credit (i) can be terminated upon written notice from the issuing bank; and (ii) can be drawn down by NSCC at any time within five business days after NSCC's receipt of the banks termination notice. Moreover, in the event of such early termination, the issuer would not require NSCC to certify in writing that the participant, on whose behalf the letter of credit was issued, had defaulted in certain of its obligations to NSCC. The proposed rule change also would require that the participant replace the terminated letter of credit with other suitable collateral within such time as NSCC specifies upon its receipt of the termination notice. In addition, the proposal sets forth conforming amendments to NSCC's agreement with issuing banks.

NSCC stated in its filing that it believes the proposed rule change is necessary in view of changing industry practices. As a result of those changing

---

[1] Securities Exchange Act Release No. 19358, (December 21, 1982), 47 FR 56419 (December 30, 1982).

[2] Leonard Mayer of Mayer and Schweitzer, Inc. (a market maker firm), in a letter dated November 26, 1982, to NSCC, endorsed NSCC's proposal, citing cost efficiencies in the use of letters of credit for clearing members' contributions to the clearing fund and the need to accommodate issuers of letters of credit so that NSCC participants can obtain letters of credit for clearing fund purposes in the future.

[3] Under NSCC's existing rules, participants may secure their open account indebtedness by the pledge of (i) certain unmatured bearer bonds issued and guaranteed by the United States or a state or one of its subdivisions ("qualifying bonds"); (ii) letters of credit issued by a bank approved by NSCC; and (iii) certain corporate and debt securities (*See* Securities Exchange Act Release No. 19486, (February 9, 1983), 48 FR 7080 (February 17, 1983).

[4] The expiration date may not be more than twelve months from the date of issuance.

[5] Under NSCC's Rules and Procedures, NSCC may draw down a letter of credit issued in its behalf when the participant that has obtained the letter of credit defaults in its obligations to NSCC. The liability of NSCC's participants is determined in accordance with NSCC's Rules and Procedures. Under the Agreement, such obligations can be satisfied first from that participant's cash and/or qualifying bonds contributions to the Clearing Fund before NSCC may also draw down on deposited letters of credit. NSCC may also draw down an expiring letter of credit, under the agreement, if the participant fails, within 10 calendar days prior to expiration, to make a substitution for that letter of credit, as required by NSCC's Rules.

[6] The Options Clearing Corporation ("OCC") currently permits letters of credit issued for OCC margin purposes to be revoked by issuers upon two full days' notice to OCC.

practices, NSCC has been advised recently by issuers of letters of credit that they will no longer issue letters of credit unless NSCC permits such letters of credit to be terminated prior to the stated expiration date at the option of the issuing bank. NSCC further stated that the continued availbility of letters of credit to secure, in part, participants' clearing fund open account indebtedness is important because using letters of credit is less costly than using qualifying bonds.

The Commission believes that the proposed rule change is consistent with the requirements of Section 17A(b)(3)(F) of the Act. NSCC, as stated *supra*, has been advised that unless NSCC agrees to accept letters of credit that can be terminated by the issuer prior to the stated expiration date, those issuers will cease to issue new letters of credit on behalf of NSCC. It is particularly important that letters of credit continue to remain available to NSCC participants for clearing fund proposes, in light of the significant advantages that letters of credit afford both NSCC and its participants. Letters of credit provide participants with a means of securing clearing fund obligations at significant costs savings relative to other forms of collateral.[7] At the same time, NSCC's letter of credit program includes important regulatory controls that enable NSCC to accept certain letters of credit safely and efficiently.[8]

Furthermore, the Commission believes that the proposal provides important benefits to NSCC without exposing NSCC or its participants to any appreciable increase in risk. NSCC's proposal ensures that in the event an issuer of a letter of credit chooses to exercise its right to terminate an outstanding letter of credit, NSCC will nonetheless have time to secure alternative clearing fund deposits from the affected participant. Issuing banks will be obligated to notify NSCC five days prior to terminating the letter of credit. In addition, if substitute collateral is not obtained, NSCC will be permitted, during the five day period, to draw down immediately the letter of credit by presenting a sight draft to the issuer, without having to present accompanying documents that are ordinarily necessary.

In accordance with the foregoing, the Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to registered clearing agencies, and, in particular, the requirements of Section 17A of the Act.

It is therefore ordered, pursuant to Section 19(b)(2) of the Act, that the proposed rule change be, and hereby is, approved.

By the Commission, by the Division of Market Regulation pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

[FR Doc. 83-6100 Filed 3-9-83; 8:45 am]

BILLING CODE 8010-01-M

[7] A letter of credit may be obtained at a fraction of the cost of a cash clearing fund deposit. It should be noted, however, that clearing members that choose to deposit letters of credit must deposit $50,000 in cash, instead of the usual $10,000 deposit. *See* Securities Exchange Act Release No. 18772, (May 28, 1982), 47 FR 25085 (June 9, 1982) and Securities Exchange Act Release No. 16878 (June 6, 1980), 45 FR 40270, (June 13, 1980).

[8] Among other things, letters of credit, unlike government securities, are not subject to market fluctuation, and therefore, NSCC is adequately protected without having to reevaluate periodically the value of the deposited collateral. In contrast, during periods of rising interest rates, the market value of municipal and government securities can decline as interest rates rise. Because this loss of market value has the effect of reducing the liquidation value of clearing fund contributions that consist of municipal and government securities, NSCC must periodically reevaluate the sufficiency of those clearing fund contributions and ask for additional contributions when necessary.

[File No. 1-3314]

Alaska Airlines, Inc.; Application To Withdraw From Listing and Registration

March 4, 1983.

The above named issuer has filed an application with the Securities and Exchange Commission pursuant to Section 12(d) of the Securities Exchange Act of 1934 ("Act") and Rule 12d2-2(d) promulgated thereunder, to withdraw the specified security from listing and registration on the American Stock Exchange, Inc. ("Amex").

The reasons alleged in the application for withdrawing this security from listing and registration include the following:

1. The common stock of Alaska Airlines, Inc. ("Company") is listed and registered on the Amex. Pursuant to a Registration Statement on Form 8-A which became effective on February 4, 1983, the Company is also listed and registered on the New York Stock Exchange ("NYSE"). The Company has determined that the direct and indirect costs and expenses do not justify maintaining the dual listing of the common stock on the Amex and the NYSE.

2. This application relates solely to withdrawal of the common stock from listing and registration on the Amex and shall have no effect upon the continued listing of such stock on the NYSE. The Amex has posed no objection to this matter.

Any interested person may, on or before March 25, 1983, submit by letter to the Secretary of the Securities and Exchange Commission, Washington, D.C. 20549, facts bearing upon whether the application has been made in accordance with the rules of the Exchange and what terms, if any, should by imposed by the Commission for the protection of investors. The Commission, based on the information submitted to it, will issue an order granting the application after the date mentioned above, unless the Commission determines to order a hearing on the matter.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[Release No. 13062; (812-5441)]

Allied Capital Corp. and Allied Investment Corp.; Filing of Application

March 2, 1983.

In the matter of Allied Capital Corporation and Allied Investment Corporation, 1625 Eye Street, NW., Washington, D.C. 20006.

Notice is hereby given that Allied Capital Corporation ("ACC"), a closed-end, internally-managed investment company registered under the Investment Company Act of 1940 ("Act"), and its wholly-owned subsidiary, Allied Investment Corporation ("AIC"), a closed-end, internally-managed investment company licensed as a small business investment company under the Small Business Investment Act of 1958 (together, the "Applicants") filed an application on February 1, 1983, and an amendment thereto on February 15, 1983, for an order of the Commission pursuant to Sections 17(b) and 17(d) and Rule 17d-1 thereunder, exempting Applicants' proposed transaction from the provisions of Sections 17(a) and 17(d). All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below, and are referred to the Act and the rules thereunder for further information as to the provisions to which the exemption applies.

AIC has developed an opportunity to arrange a $2,500,000 debenture financing

for Southern Systems, Inc. ("Southern Systems") upon the terms summarized below. AIC has the capacity and proposes to participate in such financing to the extent of $500,000. Other venture capital investment entities who have agreed to participate in the financing, to the extent listed after their names, are the following:

Atlantic Venture Partners	$500,000
Heritage Capital Corporation	300,000
Kitty Hawk Capital, Ltd.	200,000
Teribe S.A.	1,000,000
Total	2,000,000

Since one of the participants in the Applicants' proposed transaction includes Teribe S.A. ("Teribe"), a Panamanian corporation and the parent of Alcap, Limited ("Alcap"), and since Alcap holds 17.7% of ACC's outstanding capital Stock, Teribe may be deemed an affiliate or an affiliate of an affiliate of ACC pursuant to Section 2(a)(3) of the Act.

Of ACC's outstanding capital stock, 237,000 shares (17.7%) are held by Alcap, a British Virgin Islands corporation, which is a wholly-owned subsidiary of Teribe. Teribe, in turn, is a second-tier subsidiary of Enterprises Quilmes, S.A. ("EQ"), a Luxembourg holding company listed on the Paris and Luxembourg Stock Exchange. Mr. Willem F.P. de Vogel, a vice president of Three Cities Research, Inc., New York, another EQ affiliate ("Three Cities"), serves as a director of ACC's and AIC's boards of directors. Under an agreement dated October 30, 1980, pursuant to which Alcap acquired its investment in ACC, Alcap has the right to nominate two persons for election to ACC's board of directors, but to date has chosen to nominate only one person, Mr. de Vogel. As a matter of practice, ACC elects all members of its own board of directors to constitute the board of directors of AIC.

The Applicant's proposed transaction involves Southern Systems, a Florida corporation primarily engaged in the business of manufacturing and selling impact printers, page printers, and interface electronics for printers to users of electronic data processing equipment. On November 30, 1982, Southern Systems had assets of approximately $4,227,700 and a net worth of approximately $792,100; for the year then ended it had sales of approximately $9,040,300 and its pre-tax earnings amounted to approximately $123,400. Mr. J. Joseph Horn, Jr., of Fort Lauderdale, Florida, who is Southern Systems' chief executive officer, and his spouse, own all of Southern Systems' outstanding capital stock. As part of its financing plan, Southern Systems has obtained a $2,000,000 secured, revolving line of credit from North Carolina National Bank, which is not affiliated with any other party to this transaction. The financing plan contemplates further that Southern Systems will sell to the participants of this proposal two series of debentures. The debentures of both series will bear interest at the rate of 13% per annum, payable monthly. During the first 36 months from closing, Southern Systems will, on the amount disbursed, pay interest only; in each of the succeeding 48 months it will pay an amount calculated to amortize the principal and interest in level payments over the four year period. The debentures will mature in any event at the end of seven years after closing, but may be prepaid in whole or in part at any time.

The debentures of the first series, in the aggregate principal amount of $1,500,000, are issuable at the closing. They will be convertible at any time through November 30, 1985, into a number of common shares of Southern Systems equal to 25% of its common equity after giving effect to the conversion. Thereafter, these debentures in part or in whole will be convertible into a percentage of Southern Systems' equity determined in accordance with a scale as a function of Southern Systems' earnings for its fiscal year ended November 30, 1985, varying from $500,000 principal amount of debentures for 35% of the equity if such earnings are less than $3,367,000 to $1,500,000 principal amount of debentures for 25% of the equity if such earnings are greater than $6,690,000. Such conversion right remains in effect for seven years after the closing and may be execised through the application of cash to the extent of payments on account of the debentures' principal prior to exercise. The debentures of the second series, in the aggregate principal amount of $1,000,000, are not convertible and are issuable only upon the attainment of certain sales targets prior to November 30, 1983.

The participants in the financing will participate in both series of debentures and the conversion privilge pro rata to their total commitment, as follows:

	Convertible debentures	Convertible into percent of equity	Non-convertible debentures
Allied Investment Corp. [1]	$300,000	5	$200,000
Atlantic Venture Partners	300,000	5	200,000
Heritage Capital Corp.	180,000	3	120,000
Kitty Hawk Capital, Ltd.	120,000	2	80,000
Teribe S.A. (1)	600,000	10	400,000
Total	1,500,000	[2]25	1,000,000

[1] Subject to the order requested herein.
[2] Subject to adjustment as previously described.

The investment agreement will contain provisions protecting the investors' equity in the event of a sale or outside offer to purchase the outstanding shares of Southern Systems or its assets; first refusal rights to participants in additional equity financing; demand and "piggy-back" registration rights; provisions for collateral, in which the rights of the debentureholders will be subordinated to those of North Carolina National Bank; and other representations, warranties, and covenants. Southern Systems will be required to pay all legal fees incident to the transaction and, in addition, a $20,000 financing fee to AIC which will not be shared with the other participants in the transaction regardless of whether AIC participates therein. Southern Systems will also pay as a fee to North Carolina National Bank an amount equal to 5% of each amount disbursed by the participants in the debenture financing. The Applicants state that the payment to AIC of a financing fee for services rendered by it in structuring and negotiating the transaction does not make the basis of its participation less advantageous than that of the other participants in contravention of Rule 17d–1.

Applicants acknowledge that participation by AIC in a transaction in which Teribe also participates might be considered a participation by AIC and Teribe in a joint enterprise in contravention of Section 17(d) of the Act and Rule 17d–1 thereunder unless authorized by order of the Commission. Applicants state that the terms of the transaction require disbursement of at least $1,500,000 of the financing around March 1, 1983. Realizing that the requested order could not be issued prior to that date, Teribe has agreed to buy for its own account the participation proposed for AIC, and to resell such participation to AIC at cost plus accrued interest (as long as the order is issued prior to March 31, 1983). Such resale would, however, contravene Section 17(a)(1) of the Act unless exempted therefrom by order of the Commission pursuant to Section 17(b).

Applicants represent that the proposed transaction meets the standards for exemption of both Section

17(b) and Rule 17d–1 and that an order of the Commission should therefore be issued authorizing the transaction.

Applicants represent that the board of directors of AIC (which is identical in composition with the board of directors of ACC) unanimously approved the proposed transaction and that the boards of directors include one representative of Alcap, one representative of another institutional investor not involved in the proposed transaction, and nine others. The ten directors unaffiliated with and not interested in Alcap, EQ, Teribe, Three Cities, or Southern Systems personally own, in the aggregate, a number of shares greater than the number owned by Alcap.

Applicants assert that the terms of the proposed transaction may be presumed to be fair and reasonable because they have been negotiated at arms-length by parties who are independent of one another. Applicants acknowledge that Nutter, McClennen & Fish ("NMF") represented the investor participants in the proposed transaction, that NMF currently represents ACC and its subsidiaries before the Commission, and that NMF has from time to time acted as special counsel to Teribe and its affiliates. Applicants submit that none of the participants in the proposed transaction has the economic power or other influence to overreach any of the other parties.

Applicants represent that the terms of AIC's participation in the Southern Systems financing are on a basis identical to that of the participation of all the other investors, with the exception of the payment to AIC of a financing fee for services rendered in structuring the transaction. As noted earlier, Applicants contend that such a financing fee does not make AIC's basis of participation less advantageous than that of the other participants.

Applicants submit that the proposed investment is consistent with the fundamental investment policies of AIC and, hence, of ACC (included in AIC's fundamental policies is the policy to make loans to and purchase convertible debentures from small business concerns as contemplated by the Small Business Investment Act of 1958). Applicants further submit that the proposed transaction is consistent with the general purposes of the Act.

Notice is further given that any interested person wishing to request a hearing on the application may, not later than March 28, 1983, at 5:30 p.m. do so by submitting a written request setting forth the nature of his/her interest, the reasons for his/her request, and the specific issues, if any, of fact or law that are disputed, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of the request should be served personally or by mail upon Applicant at the address stated above. Proof of service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed with the request. Persons who request a hearing will receive any notices and orders issued in this matter. After said date, an order disposing of the application will be issued unless the Commission orders a hearing upon request or upon its own motion.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[Release No. 22569; (70-5899)]

Columbia Gas System, Inc., Proposed Issuance of Common Stock Pursuant To Tax Reduction Employee Stock Ownership Plan

March 4, 1983.

In the matter of the Columbia Gas System, Inc., 20 Montchanin Road, Wilmington, Delaware 19807.

The Columbia Gas System, Inc. ("Columbia"), a registered holding company, has filed a post-effective amendment to a declaration previously filed with this Commission pursuant to Sections 6 and 7 of the Public Utility Holding Company Act of 1935 ("Act") and Rule 50 promulgated thereunder.

By prior order dated August 16, 1979 (HCAR No. 21189), this Commission authorized Columbia to issue shares of common stock pursant to its tax reduction employee stock ownership plan ("Plan") in which all domestic, wholly-owned subsidiaries of Columbia participate (collectively, the "System"). Provisions of the Internal Revenue Code have allowed special investment tax credits to provide the funds for this type of plan. With respect to the 1977 through 1983 Plan Years, Columbia was previously authorized to issue one million shares, 500,000 funded by a one percent investment tax credit and 500,000 by a combination of a one half percent credit and matching employee contributions. Columbia now seeks authorization to increase the number of shares provided for issuance for the 1982 Plan Year by 200,000 and to issue an additional 600,000 shares with respect to a new, payroll-based Plan in the years 1983 to 1987.

Under Columbia's current Plan, as well as the new, proposed Plan, the number of shares issued in any given year is determined by dividing the amount of the available tax credit by the average of the closing prices of Columbia's common stock on the New York Stock Exchange Composite tape for the twenty consecutive trading days immediately preceding the date of issue on which the stock in contributed to the Plan. In no case are shares issued for less than the $10 par value.

Of the 500,000 shares previously authorized with respect to the noncontributory feature of the current Plan, 106,793 shares remain. However, it is now estimated that 170,300 shares will be required to be issued for the 1982 Plan Year. This estimate is based on an available one percent tax credit of approximately $5,106,000 and an assumed average issue price of $30 per share. With respect to the contributory feature of the Plan, 147,010 shares remain. It is estimated that 170,300 shares will be required to be issued under this one half percent tax credit matched by voluntary empolyee contributions. In order to provide for possible changes in its estimates, such as variations in the common stock price, Columbia requests that the Commission authorize the issuance of an additional 100,000 shares of each feature of the current Plan for the 1982 Plan Year.

Beginning with the 1983 Plan Year, the investment tax credits of the current Plan have been terminated due to a change in federal tax laws and will be replaced by a new tax credit based on total payroll. For purposes of this credit, employee contributions are no longer permitted. For the 1983 and 1984 Plan Years the new credit will amount to 0.50% of employee compensation, and for the 1985–1987 Plan Years, the percentage will increase to 0.75%. It is estimated that System contributions for 1983 through 1987 will amount to aproximately $13,000,000. At an assumed average issuance price of $30 per share, 435,000 shares of stock would be required for issuance. To provide for possible changes in issuance price or in the amount of payroll, Columbia requests an additional 600,000 shares be authorized for issuance with respect to the years 1983–1987.

Dividends on shares held in the Plan will continue to be paid currently to the beneficial owners. As is presently the case, the trustee of the Plan will not be permitted to vote the shares it holds unless it shall have received voting instructions from participating employees.

The declaration, as amended by the post-effective amendment, and any further amendments are available for public inspection through the Commission's Office of Public Reference. Interested persons wishing to comment or request a hearing should submit their views in writing by March 29, 1983, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549, and serve a copy on the declarant at the address specified above. Proof of service [by affidavit or, in the case of an attorney at law, by certificate) should be filed with the request. Any request for a hearing shall identify specifically the issues of fact or law that are disputed. A person who so requests will be notified of any hearing, if ordered, and will receive a copy of any notice or order issued in this matter. After said date, the declaration, as now amended or as it may be further amended, may be permitted to become effective.

For the Commission, by the Division of Corporate Regulation, pursuant at delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[Release No. 13063; (812-5425)]

Mellon Bank Canada, Filing of Application

March 2, 1983.

In the matter of Mellon Bank Canada c/o Mellon Bank, N.A., Mellon Square, Room 3415, Pittsburgh, Pennsylvania 15230.

Notice is here given that Mellon Bank, N.A. ("Applicant"), a banking association organized under the laws of the United States and a wholly-owned subsidiary of Mellon National Corporation ("MNC"), a Pennsylvania corporation that is registered as a bank holding company under the Bank Holding Company Act of 1956, as amended, filed an application on January 17, 1983, pursuant to Section 6(c) of the Investment Company Act of 1940 ("Act") on behalf of Mellon Bank Canada ("MBC"), a corporation to be formed by Applicant under the laws of Canada, for an order of the Commission exempting MBC from all provisions of the Act, and the rules and regulations thereunder. All interested persons are referred to the application on file with the commission for a statement of the representations contained therein, which are summarized below.

Applicant states that all of the capital stock of MBC will be held by Mellon Bank International ("MBI"), a wholly-owned subsidiary of Applicant. It is stated that on July 28, 1982, the Board of Governors of the Federal Reserve System consented to the ownership of MBC by MBI, that Applicant has applied to the Canadian Government to establish MBC, and that approval of such application is expected in the first quarter of 1983. Applicant represents, in addition, that MNC is a one-bank holding company organized in August, 1971 under the laws of the State of Pennsylvania, having as of September 30, 1982 total assets of $21,709,278,000 and equity capital of $1,046,980,000, and that as of that date MNC was the 14th largest bank holding company in the United States in terms of assets, the 17th largest such entity in terms of deposits, and the 15th largest in terms of capital. It is stated further that Applicant, which with its predecessors has been engaged in business since 1869, and which became the principal wholly-owned subsidiary of MNC in November, 1972, ranked as the 14th largest U.S. commercial bank as of June 30, 1982, in terms of total assets, and the 10th largest in terms of total deposits. Applicant represents that it engages in worldwide commercial banking, trust banking and investment services as well as domestic retail banking, that it is a member of the Federal Reserve System, and that its deposits are insured by the Federal Deposit Insurance Corporation to the extent required by law.

Applicant also states that other wholly-owned subsidiaries of MNC engage in consumer financing, equipment leasing, mortgage banking and real estate financing. It is further stated that as of September 30, 1982, MNC had 113 domestic branches, seven domestic representative offices; international branches in Frankfurt, Grank Cayman, Hong Kong, London and Tokyo; international representative offices in eight countries and 151 domestic non-banking offices; and more than 7,500 employees and 8,000 shareholders world-wide.

Applicant represents, in addition, that on July 30, 1982, MNC and the Girard Company ("Girard"), a registered bank holding company, entered into a Plan of Merger whereby Girard would be merged into MNC. Applicant states that as of September 30, 1982, Girard had total assets of $4,662,749,000 and equity capital of $295,720,000. On November 8, 1982, Applicant states, the proposed merger was approved by the shareholders of MNC and Girard, subject to certain regulatory approvals.

Applicant states that as a United States national bank, it is subject to pervasive regulation by the Comptroller of the Currency, the Board of Governors of the Federal Reserve System and the Federal Deposit Insurance Corporation. It is stated further that the statutory source of this regulatory system is a series of federal statutes pertaining to national banks, banks that are members of the Federal Reserve System and banks with insured deposits.

Upon its formation, Applicant states, MBC will operate as a wholesale banking organization servicing Canadian companies by providing working capital financing, medium-term (5–8 year) financing for capital expansion, loans to Canadian importers and exporters in connection with their international trade financing, and short- and medium-term financing to Canadian energy companies. MCB, Applicant states, will operate and be chartered as a Canadian Bank.

Applicant states that as a bank under Canadian law, MBC will be regulated pursuant to the Banks and Banking Law Revision Act 1980, by the Canadian Federal Government, which has for many years exercised exclusive jurisdiction over the banking industry, and that such jurisdiction is exercised principally by the Bank of Canada and the Inspector General of Banks. It is further stated that the Bank of Canada, which is Canada's government-owned central bank, is charged with the principal function of regulating Canada's money supply and credit. Its primary tools for meeting these objectives, Applicant states, are adjusting the *rate* charged on funds loaned to chartered banks and imposing *reserve* requirements on bank deposits, functions which are similar to some of those undertaken by the Board of Governors of the Federal Reserve System in the United States. The Inspector General of Banks, it is also stated, is charged with, among other things, insuring that all banks are prudently managed and examining each bank at least annually.

Applicant further states that MBC proposes to issue and sell in Canada and the United States unsecured commercial paper notes ("notes"), which will be unconditionally guaranteed by Applicant. As direct liabilities of MBC, Applicant states, the notes will rank prior to equity securities and *pari passu* among themselves and equally with all other unsecured, unsubordinated indebtedness, including liabilities to depositors, except amounts due to the Government of Canada or to any province thereof, in trust or otherwise, which would rank above the notes. It is further stated that the notes will be prime quality and sold in minimum

denominations of $100,000, either directly by MBC, or through commercial paper dealers to institutional investors who normally purchase commercial paper in large quantities. Applicant represents that MBC will act to assure that the notes will not be advertised or otherwise offered for sale to the general public, that MBC and each dealer in the notes will provide each offeree, prior to purchase, with a memorandum describing Applicant's business as well as that of MBC and MNC, including the most recent publicly available fiscal year-end balance sheets and income statements for MBC and MNC and that these financial statements, shall have been audited in such manner as is customarily done for MNC by its United States auditors, and for MNC by its Canadian auditors. Such memorandum, Applicant states, will describe differences which are material to investors, if any, between Canadian accounting principles applicable to MBC and "generally accepted accounting principles" as employed by United States banks. Applicant further represents that such memorandum will be at least as comprehensive as those customarily used by United States banks or bank holding companies in offering commercial paper in the United States and will be updated promptly to reflect material changes in the financial condition of MBC and MNC.

It is stated, in addition, that the notes will be exempt from registration under the Securities Act of 1933 ("Securities Act") pursuant to Section 3(a)(2) thereof, which specifically exempts from registration the sale of notes "guaranteed by a bank" (e.g., Applicant). Applicant further states that although the notes will be prime quality, negotiable commercial paper, they will not necessarily qualify for the exemption from registration provided by Section 3(a)(3) of the Securities Act, which provides an exemption from registration for certain securities arising out of current transactions and having maturities limited to nine months. Applicant further represents that it will not issue and sell the notes until it has received an opinion of its United States counsel to the effect that, under the circumstances of the proposed offering, the notes would be entitled to an exemption from the Securities Act pursuant to Section 3(a)(2). It is also stated the MCB does not request Commission review or approval of United States counsel's opinion letter regarding the availability of an exemption under Section 3(a)(2) of the Securities Act.

Applicant represents, in addition, that the presently proposed issue of notes and all future issues of securities in the United States by MBC shall have received prior to issuance one of the three highest investment grades issued by one nationally recognized investment rating organization, and Applicant undertakes that either Applicant or MBC will certify to MBC's United States counsel that such a rating has been obtained prior to the issuance of the notes.

Applicant states that MBC will appoint Applicant or another bank in the United States to serve as its authorized agent to issue the notes in the United States, from time to time. MBC, it is further stated, will appoint Applicant, an affiliate, or some other United States person which normally acts in such capacity to accept any process which may be served in any action based on any note or with respect to the offer and sale of any note by means of the offering memorandum and instituted by the holder of such note in any State or Federal court. Applicant further states that MBC will expressly accept the jurisdiction of any State or Federal court in the City of Pittsburgh in the State of Pennsylvania in respect of any such action. It is stated further that such appointment of an authorized agent to accept service of process and such consent to jurisdiction will be irrevocable until all amounts due and to become due in respect of the notes have been paid. MBC, Applicant states, will also be subject to suit in any other court in the United States which would have jurisdiction because of the manner of the offering or otherwise. It is stated that the authorized agent will not be a trustee for the noteholders and will not have any responsibilities or duties to act for such holders as would a trustee.

Applicant represents, in addition, that MBC may, from time to time in the future offer other debt securities unconditionally guaranteed by Applicant (but not shares of MBC's capital stock). Further offerings by MBC of securities in the United States, Applicant states, will be made only pursuant to an applicable exemption from registration under the Securities Act, or pursuant to an effective registration statement under the Securities Act, and in general in accordance with the terms and conditions to which Applicant has agreed in connection with the presently proposed offering.

Section 3(a)(3) of the Act defines investment company to mean "any issuer which is engaged or proposes to engage in the business of investing, reinvesting, owning, holding, or trading in securities, and owns or proposes to acquire investment securities having a value exceeding 40 percent of the value of such issuer's total assets (exclusive of Government securities and cash items) on an unconsolidated basis.

Section 6(c) of the Act provides, in pertinent part, that the Commission by order upon application, may conditionally or unconditionally exempt any person, security, or transaction, or any class or classes of persons, securities, or transactions, from any provision or provisions of the Act or of any rule or regulation under the Act, if and to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Applicant requests an order pursuant to Section 6(c) of the Act exempting it from all provisions of the Act because of uncertainty as to whether a foreign commercial bank such as MBC would be considered an investment company as defined in the Act. Applicant asserts that, among other things, compliance by MBC with various provisions of the Act would conflict with its operation as a bank and would therefore effectively prevent MBC from selling securities in the United States if it were required to register as an investment company. Applicant further submits that an exemptive order pursuant to Section 6(c) of the Act would benefit institutional and other sophisticated investors in the United States because these investors would otherwise be precluded from purchasing MBC's commercial paper notes. Applicant additionally argues that the activities of MBC are extensively regulated by Canadian banking authorities and that the provisions of such banking laws will provide substantial protection to investors in its debt securities. As a closely regulated commercial bank, Applicant contends, MBC is different from the type of institution which Congress intended the Act to regulate, and that abuses of the type that the Act is designed to eliminate are not inherent in the business of commercial banking.

Applicant also asserts that it would be inequitable to permit the existence of impediments to the sale of securities in the United States by foreign banks under circumstances in which such impediments do not exist for domestic banks. Any such inequity, it is further asserted, would directly conflict with the purpose of the International Banking Act of 1978, which, it is stated, was intended to place domestic and foreign

banks on a basis of competitive equality in their transactions in the United States. It is noted, in addition, that the securities of MBC will be guaranteed by Applicant, a United States national bank subject to regulation by the Comptroller of the Currency, the Board of Governors of the Federal Reserve System and the Federal Deposit Insurance Corporation. Applicant therefore concludes that granting its requested exemptive order pursuant to Section 6(c) of the Act would be appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Notice is further given that any interested person wishing to request a hearing on the application may, not later than March 28, 1983, at 5:30 p.m., do so by submitting a written request setting forth the nature of his/her interest, the reasons for his/her request, and the specific issues, if any, of fact or law that are disputed, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of the request should be served personally or by mail upon Applicant at the address stated above. Proof of service (by affidavit or, in the case of an attorney at law, by certificate) shall be filed with the request. Persons who request a hearing will receive any notices and orders issued in this matter. After said date an order disposing of the application will be issued unless the Commission orders a hearing upon request or upon its own motion.

For the Commission, by the Division of Investment management, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[Release No. 22866; (70-6781)]

Montaup Electric Co., et al.; Proposed Issuance and Sale of Short-Term Notes to Banks

March 4, 1983.

In the matter of Montaup Electric Co., P.O. Box 391, Fall River, Massachusetts 02722; Eastern Edison Co., 110 Mulberry Street, Brockton, Massachusetts 02400; Blackstone Valley Electric Co., Washington Highway, P.O. Box 1111, Lincoln, Rhode Island 02865.

Eastern Edison Company ("Eastern Edison"), Montaup Electric Company ("Montaup"), and Blackstone Valley Electric Company ("Blackstone"), electric utility subsidiaries of Eastern Utilities Associates, a registered holding company, have filed with this Commission a post-effective amendment to a declaration, previously filed and amended, pursuant to Sections 6(a) and 7 of the Public Utility Holding Company Act of 1935 ("Act") and Rule 50(a)(2) promulgated thereunder.

By order dated December 22, 1982 (HCAR No. 22796), the Commission authorized Montaup, Eastern Edison, and Blackstone to issue and sell up to $28 million, $13 million, and $6 million, respectively, of short-term notes to banks from time to time until December 31, 1983. The terms of the bank credit line agreements include: (1) Borrowing at the prime rate or money market rates, if lower, with no formal compensating balances; (2) borrowing at the prime rate or money market rates, if lower, with compensating balances not exceeding 10%; and (3) borrowing at the prime rate or money market rates, if lower, together with a commitment fee not exceeding 6% of the prime rate on the credit line.

By post-effective amendment Eastern Edison and Montaup propose to increase their short-term borrowings from $13 million to $15 million and from $28 million to $35 million, respectively. The terms of the borrowings will remain the same as authorized in the order of December 22, 1982 (HCAR No. 22796). Under such terms and assuming full usage and a prime rate of 11.5%, the effective interest cost of the proposed borrowings would not exceed 12.8% resulting from compensating balances of 10%. Eastern Edison and Montaup are seeking the increases because in the period since the filing of the declaration in this matter in October 1982, certain changes have occurred with respect to the assumptions regarding 1983 construction expenditures and the 1983 financing program of the holding company system of Eastern Utilities Associates. First, the lead participant in the ongoing construction of two nuclear generating units at Seabrook, New Hampshire, in which Montaup has a 2.90% interest, announced substantial increases in the construction cost estimates of the units. Second, it is now expected that a major bond financing of Eastern Edison, which had been proposed for completion in April, will not be completed until May of 1983.

The funds to be derived by Eastern Edison and Montaup from the issuance of the Bank Notes will be applied, together with other funds available to these companies, to: (1) Renew outstanding notes payable to banks, as they become due; (2) finance their respective 1983 cash construction expenditures which are estimated to be approximately $11,300,000 in the case of Eastern, and $59,700,000 in the case of Montaup, and (3) provide funds to meet certain bond maturities and sinking fund requirements in the case of Eastern Edison.

The declaration as amended by the post-effective amendment and any amendments thereto are available for public inspection through the Commission's Office of Public Reference. Interested persons wishing to comment or request a hearing should submit their views in writing by March 28, 1983, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549, and serve a copy on the declarants at the addresses specified above. Proof of service (by affidavit or, in the case of an attorney at law, by certificate) should be filed with the request. Any request for a hearing shall identify specifically the issues of fact or law that are disputed. A person who so requests will be notified of any hearing, if ordered, and will receive a copy of any notice or order issued in this matter. After said date, the declaration, as amended by the post-effective amendment or as it may be further amended, may be granted and permitted to become effective.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

[FR Doc. 83-6204 Filed 3-9-83; 8:45 am]

BILLING CODE 8010-01-M

[Release No. 19564]

National Association of Securities Dealers, Inc.; Order Granting Extension of Exemption

March 3, 1983.

On March 23, 1982, the Commission issued an order granting the National Association of Securities Dealers, Inc. ("NASD"), among other things, two temporary exemptions from Rule 11Ac1–1 under the Securities Exchange Act of 1934 ("Act")[1] with respect to those over-the-counter ("OTC") securities that are designated as national market system securities ("NMS Securities")[2] pursuant to Rule 11Aa2–1 under the Act ("NMS Securities Rule").[3] Specifically, the

---

[1] Securities Exchange Act Release No. 18654 (March 23, 1982), 47 FR 13395.

[2] NMS Securities are "reported securities" as that term is defined in Rule 11Ac1–1(a)(6). As reported securities, NMS Securities are subject to, among other things, the Commission's quotation reporting and dissemination requirements contained in Rule 11Ac1–1.

[3] The NMS Securities Rule employs a two-tiered approach to determine which OTC securities are to be designated as NMS Securities. In this respect,

Commission granted the NASD a temporary exemption from making available to securities information vendors quotations and size for each market maker in an NMS Security until October 1, 1982, or until such time as: (1) A vendor has requested this data, (2) a suitable agreement with the vendor is negotiated, (3) appropriate charges are established, and (4) the NASDAQ system is modified accordingly, whichever comes first.[4]

On October 12, 1982, the Commission extended the NASD's temporary exemption from the requirement of making information available to vendors until March 1, 1983, in response to a NASD request. The Commission noted at that time its serious concern about the NASD's failure to complete the steps necessary to make information available, despite the timely request for the information by the Institutional Network's Corporation ("Instinet"). The Commission also noted the potential conflict of interest inherent in the NASD's role, through its NASDAQ subsidiary, as a neutral exclusive processor of NMS Securities data, and its role as a retail vendor of this data in competition with Instinet, and the Commission acknowledged its responsibility to ensure that the NASD negotiated in good faith with potential competitors. Nonetheless, the Commission decided to extend the NASD's exemption in view of the Commission's deferral of the implementation of Tier 2 until February 1, 1983, and to provide additional time for full discussions between the NASD and Instinet. The Commission indicated, however, that it would monitor these negotiations.

Although the negotiations between the NASD and Instinet have made some progress since October, 1982, they have not resulted in the agreement on an acceptible fee structure. Nor, in view of this lack of agreement, has the NASD made the necessary technical modifications to make NMS quotation information available. Consequently, on February 25, 1983, the NASD requested a further extension of the exemption until June 30, 1982,[5] arguing that the NASD's program to improve the reliability of the NASDAQ system had delayed the other modifications and prevented the NASD from completing these changes by the expiration of the exemption.

The Commission recognizes the importance of attaining improved NASDAQ service. Accordingly, the Commission has determined to grant the NASD a further extension of the temporary exemption until June 30, 1983. This extension is granted, however, for the sole purpose of allowing the NASD to complete its technical preparations to make the information available. Given the NASD's two prior extensions, the Commission cannot foresee any circumstances that would justify further extension of this exemption beyond June 30, 1983, and the Commission fully expects that, on or before that date, the NASD will provide to Instinet (or any other vendor who desires to receive the data) full quotation information, as envisioned by the Act and required pursuant to the NMS Securities Rule and Rule 11Ac1–1.

The Commission is extremely concerned regarding the lack of progress in the negotiations, particularly in light of the statutory duty imposed on the NASD to provide access to this information in at least a non-discriminatory manner and at a cost which does not impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act. In this connection, the Commission believes that any fees imposed regarding this information must be set at levels reasonably related to the costs entailed in providing the information to Instinet and other interested vendors. The Commission notes that lack of progress in the negotiations with Instinet or other vendors can not be used by the NASD as an excuse for failing to complete the preparations for making this information available, for the NASD is required by Commission rule to make the information available irrespective of any prior agreement with vendors. Notwithstanding this fact, however, the Commission urges the NASD and Instinet to complete their negotiations promptly to ensure cooperation in designing the means of providing the required data to vendors.

For the reasons discussed above, the Commission has determined that granting the NASD an extension of its temporary exemption from Rule 11Ac1–1 is consistent with the public interest, the protection of investors and the removal of impediments to, and perfection of the mechanisms of, a national market system.

Accordingly, the NASD is granted an extension of its temporary exemption from making available to quotation vendors quotations and size for each market maker in an NMS Security until June 30, 1983 or such earlier time as: (1) A vendor has requested this data, (2) a suitable agreement with the vendor is negotiated, (3) appropriate charges are established, and (4) the NASDAQ system is modified accordingly.

This exemption is subject to modification or revocation at any time if the Commission determines that such action is necessary or appropriate in light of progress made toward a national market system or otherwise in furtherance of the purposes of the Act.

By the Commission.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

---

pursuant to the Tier 1 criteria, which became effective on April 1, 1982, the most actively traded OTC securities were designated automatically as NMS Securities. In addition, the Rule currently permits those securities meeting the less stringent Tier 2 criteria to be designated as NMS Securities on or after February 1, 1983, if the issuers of those securities so elect. As of March 1, 1983, 184 OTC securities have been designated as NMS securities.

Northern States Power Co.; Plan for Simplification of Holding Company System

March 3, 1983.

In the matter of Northern States Power Co., 414 Nicollet Mall, Minneapolis, Minnesota 55401.

Northern States Power Company, Inc. ("Northern States"), a holding company registered for the limited purpose of achieving compliance with Section 11(b)(2) of the Public Utility Holding Company Act of 1935 ("Act") and Lake Superior District Power Company ("Lake Superior"), an electric utility subsidiary of Northern States, have filed a joint plan pursuant to Section 11(e) of the Act, providing for the retirement of the minority interest in the common stock of Lake Superior. Pursuant to a Commission order dated December 23, 1981 (HCAR No. 22334), Northern States acquired 97.18% of the common stock of Lake Superior by a tender offer to exchange 0.48 shares of Northern States common stock for one share of Lake Superior common stock. Lake Superior has outstanding 1,336,149 shares of common stock. There remain outstanding 37,724 unexchanged shares, held by 320 record owners. The minority stock will be retired on the same terms as under the tender offer, 0.48 shares of Northern States common stock for each share of Lake Superior common stock.

The plan provides for an effective date of the exchange, which shall be no

later than 30 days after expiration of the time for the appeal of the District Court's order approving and enforcing the plan pursuant to Section 11(e) of the Act. On the effective date, the holders of Lake Superior common stock, other than Northern States, shall cease to be shareholders of Lake Superior, and become owners of Northern States common stock under the terms of the plan. On surrender of the certificates for Lake Superior stock, the holder thereof shall be entitled to receive Northern States common shares plus accrued dividends and other distributions since the effective date of the plan. No fractional shares will issued, and cash will be paid therefor.

At least once a year for five years from the effective date of the plan, Northern States shall solicit, at their last known address, the holders of certificates for common stock of Lake Superior who have not surrendered these certificates for exchange, and will take other appropriate steps to locate holders of unsurrendered stock certificates of Lake Superior. After the fifth anniversary of the effective date, Northern States shall be entitled, with the approval of the Commission, to apply to the District Court, for an order finding that these actions have been taken and declaring the neither Northern States nor Lake Superior shall have any further obligation to solicit or locate holders of unsurrendered certificates. On the fifteenth anniversary of the effective date, such holders will have no claims against Northern States, Lake Superior, or any other person.

The plan and any amendments thereto are available for public inspection through the Commission's Office of Public Reference. Interested persons wishing to comment or request a hearing should submit their views in writing by March 31, 1983, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549, and serve a copy on the declarant at the address specified above. Proof of service (by affidavit or, in the case of an attorney at law, by certificate) should be filed with the request. Any request for a hearing shall identify specifically the issues of fact or law raised by the plan. A person who so requests will be notified of any hearing, if ordered, and will receive a copy of any notice or order issued in this matter. After said date, the plan, as amended or as it may be further amended, may be approved as provided in Section 11(e) of the Act or the Commission may take such other action as it may deem appropriate.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[Release No. 22967; (70-6832)]

Ohio Power Co. and Central Ohio Coal Co.; Proposed Capital Investments in Coal Mining Subsidiary and Issuance of Long-Term Notes by Subsidiary

March 3, 1983

In the matter of Ohio Power Co., Central Ohio Coal Co., 301 Cleveland Avenue, S.W., Canton, Ohio 44702.

Ohio Power Company ("Ohio Power"), an electric utility subsidiary of American Electric Power Company, Inc., a registered holding company, and Central Ohio Coal Company ("COCO"), a coal mining subsidiary of Ohio Power, have filed with this Commission an application-declaration and an amendment thereto pursuant to Sections 6, 7, 9, 10, and 12 of the Public Utility Holding Company Act of 1935 ("Act") and Rule 50(a)(3) promulgated thereunder.

Ohio Power has requested authorization to make additional capital investments totaling $20 million in COCO, its coal mining subsidiary. Such additional investments will be represented, in part, by unsecured promissory notes to be issued by COCO to Ohio Power.

COCO was incorporated in Ohio in 1946 for the purpose of conducting surface coal mining operations for Ohio Power. COCO operates the Muskingum Mine, a large surface coal mine which is located in the Ohio counties of Morgan, Muskingum and Noble, on lands owned or controlled by Ohio Power. In its surface mining operations, COCO utilizes equipment, known as draglines, to remove overburden at the mining site, thus enabling smaller equipment to load exposed coal. A major component of one dragline, a large base support structure, requires extensive overhaul or replacement. In light of various factors, including expected efficiencies, extended useful life of the machinery and a reduction in mining downtime, it has been determined that purchase of a new support structure is preferable to major overhaul. It is proposed that Ohio Power supply the necessary financing, estimated to be $9.2 million, which includes the cost of the support structure, related parts, labor, freight and provisions for contingencies.

The balance of the proposed capital investment, $10.8 million, would provide COCO with an increase in working capital required to operate the Muskingum mine at current levels. It is stated that COCO's increase in working capital needs results in part from normal inflation in operating cost and from the implementation of a new mining plan which requires handling a larger volume of overburden to maintain current production levels. Costs incurred to remove overburden are deferred as an element of inventory, and expensed when the exposed coal is actually mined. The average deferred costs applicable to the coal inventory are estimated to be $8.5 million.

The remaining working capital requirements, totaling $4.3 million, are attributable to the deferral of strike costs and to an increase in the material and supply inventory that COCO is required to maintain in connection with its modified mining plan. COCO has found it necessary to add a significant number of pieces of support equipment to implement the modified mining plan, and, in connection therewith, to maintain an inventory of production materials and spare parts.

It is proposed that Ohio Power's additional investment in COCO be represented by a combination of long-term loans and cash capital contributions in proportions equal to the debt-equity ratio of Ohio Power as of December 31, 1982. The ratio as of that date was 54.4% for debt and 45.6% for preferred and common equity. A method for calculating Ohio Power's imputed capital costs to the debt and equity components of the additional investments has been designed to reflect current costs of capital, whether or not Ohio Power has actually sold long-term debt or preferred stock contemporaneously with the making of such additional investment. This method, as hereinafter detailed, has been proposed in the instant case due to the sharp decline in capital costs since Ohio Power's last issuance of mortgage bonds and preferred stock in March 1982. Ohio Power also intends to employ this method of imputing capital costs to future investments in this subsidiary.

Each long-term loan by Ohio Power to COCO will be evidenced by an unsecured promissory note of COCO, payable December 31, 2012. The annual interest rate for each note will be determined as follows:

(1) If Ohio Power has issued and sold first mortgage bonds within a period of thirty days preceding or thirty days following any additional investment in COCO, then the rate per annum on the note issued by COCO shall equal the effective cost to Ohio Power of such

series of first mortgage bonds (the interest rate may initially be estimated and later adjusted when the precise effective rate is determined);

(2) If no such series of Ohio Power's first mortgage bonds have been issued and sold, then the rate per annum on each note shall equal the average effective cost of comparable quality first mortgage bonds issued and sold by other electric utility companies within the thirty-day period preceding each additional investment in COCO; if no such sales have occurred during this period, then reference shall be made to sales within the thirty-day period following each additional investment in COCO.

Each note issued by COCO may be repaid at any time without penalty.

The return on equity applicable to the proposed capital contribution of Ohio Power to COCO shall be based on, and shall equal, the weighted average of the effective costs of Ohio Power's preferred stock and the rate of return on common equity determined and allowed by the Federal Energy Regulatory Commission ("FERC") in the most recent wholesale rate proceeding involving Ohio Power. The effective cost of Ohio Power's preferred stock shall be equal to the cost determined in the following manner:

(1) If Ohio Power has issued and sold a series of preferred stock within a period of thirty days preceding or thirty days following any additional equity investment in COCO, then the effective cost of Ohio Power's preferred stock shall equal the effective cost of Ohio Power of such series of preferred stock (the effective cost may initially be estimated and later adjusted when the precise effective cost is determined);

(2) If no such series of Ohio Power's preferred stock has been sold, then the effective cost of Ohio Power's preferred stock shall equal the average effective cost of comparable quality series of preferred stock issued and sold by other electric utility companies in the thirty-day period preceding each equity investment in COCO; if no such sales have occurred within this period, then reference shall be made to sales within the thirty-day period following each additional investment in COCO.

Certificates filed pursuant to Rule 24 following each additional investment by Ohio Power in COCO will describe in reasonable detail the manner in which Ohio Power has imputed capital costs to the debt and equity components of each additional investment in COCO in accordance with the foregoing.

Calculation of the allowable return on the equity capital of COCO, excluding retained earnings, shall be based ordinarily on the latest FERC allowed return on common equity of Ohio Power as of the beginning of each calendar year. Because there is presently no such applicable order, and until such time, it is proposed that the return on equity shall be based on the return on common equity of Ohio Power allowed by the Public Utilities Commission of Ohio ("PUCO") in the most recent retail electric rate proceeding as of the beginning of each calendar year. Accordingly, it is proposed that for 1983 the rate of return on common equity be 15%, which does not exceed the most recent return allowed by PUCO. The return with repect to any particular calendar year would be at a single rate, to be adjusted only if necessary on Januray 1 of each succeeding calendar year.

The application-declaration and any amendments thereto are available for public inspection through the Commission's Office of Public Reference. Interested persons wishing to comment or request a hearing should submit their views in writing by March 28, 1983, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549, and serve a copy on the applicants-declarants at the address specified above. Proof of service (by affidavit or, in the case of an attorney at law, by certificate) should be filed with the request. Any request for a hearing shall identify specifically the issues of fact or law that are disputed. A person who so request will be notified of any hearing, if so ordered, and will receive a copy of any notice or order issued in this matter. After said date, the application-declaration, as amended, or as it may be further amended, may be granted and permitted to become effective.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[Release No. 34-19558; File No. SR PHLX 83-8]

Self-Regulatory Organizations; Philadelphia Stock Exchange, Inc.; Proposed Rule Change

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on February 18, 1983, Philadelphia Stock Exchange, Inc. filed with the Securities and Exchange Commission the proposed rule change as described in Items I, II and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

Pursuant to By-Laws 27-2 and 27-3, and Circular 82-1, the Philadelphia Stock Exchange, Inc., (Exchange) proposes to fix and impose a foreign currency options (FCO) user's fee of $1,000 per annum on a calendar year basis.

The FCO user's fee will be payable semi-annually in advance on January 1 (except for 1983) and July 1. In 1983, the first installment, pro rated, is to be payable on and after January 10th.

The user's fee is to be paid to the Exchange by each foreign currency options participant (FCOP) for the use of the equipment and facilities of the Exchange and for the particular services and privileges afforded.

Notwithstanding the foregoing, the yearly dues paid to the Exchange during a particular year by a member who is also an FCOP, shall be credited in their entirety against the FCO user's fee assessed against such a member during that year.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in sections (A), (B), and (C), below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis, for the Proposed Rule Change

The purpose of the rule change is to meet, in part, the costs of operating a foreign currency options market by imposing a fee on participants in the market for the use of the equipment, facilities and services of the Exchange. Since FCO participants who are also Exchange members will be supporting the Exchange financially by the payment of yearly membership dues, such dues paid by members are to be credited in their entirety against the FCO user's fee

assessed against those members during the same year.

The basis for the rule change is consistent with Section 6(b)(4) of the Act which requires exchange rules to provide for equitable allocation of reasonable fees among its members and other persons.

B. Self-Regulatory Organization's Statement on Burden on Competition

The proposed rule change imposes no burden on competition because the level of the fee is modest and reasonable in relation to the services and facilities afforded.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants or Others

No comments were solicited or received on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3) of the Securities Exchange Act of 1934 and subparagraph (e) of the Securities Exchange Act Rule 19b–4. At any time within 60 days of the filing of such proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Securities Exchange Act of 1934.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 5th Street, N.W., Washington, D.C. 20549. Copies of submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 5th Street, N.W., Washington, D.C. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submission should refer to the file number in the caption above and should be submitted within 21 days after the date of this publication.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

[FR Doc. 83-6307 Filed 3-9-83; 8:45 am]

BILLING CODE 8010-01-M

[Release No. 13065; (811-3222)]

PWC Money Market Fund, Inc.; Filing of Application

March 3, 1983.

In the matter of PWC Money Market Fund, Inc., 600 Cleveland Street, Clearwater, FL 33515.

Notice is hereby given that PWC Money Market Fund, Inc. ("Applicant"), registered under the Investment Company Act of 1940 ("Act") as an open-end, diversified, management investment company, filed an application on January 3, 1983, for an order of the Commission pursuant to Section 8(f) of the Act declaring that Applicant has ceased to be an investment company as defined in the Act. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below.

On July 13, 1981, Applicant, a Maryland corporation, filed its registration statement pursuant to Section 8(b) of the Act. Applicant represents that it has never made, and does not propose to make, a public offering of its securities.

Applicant represents that it has no debts or other outstanding liabilities and is not a party to any litigation or administrative proceeding. Applicant states that within the last 18 months it has not for any reason transferred any of its assets to a separate trust. Finally, Applicant states that it is not now engaged, and does not propose to engage, in any business activity.

Section 8(f) of the Act provides, in pertinent part, that whenever the Commission, upon application, finds that a registered investment company has ceased to be an investment company, it shall so declare by order, and upon the effectiveness of such order, the registration of such company under the Act shall cease to be in effect.

Notice is further given that any interested person wishing to request a hearing on the application may, not later than March 28, 1983, at 5:30 p.m., do so by submitting a written request setting forth the nature of his interest, the reasons for his request, and the specific issues, if any, of fact or law that are disputed, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of the request should be served personally or by mail upon Applicant at the address stated above. Proof of service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed with the request. Persons who request a hearing will receive any notices and orders issued in this matter. After said date an order disposing of the application will be issued unless the Commission orders a hearing upon request or upon its own motion.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

[FR Doc. 83-6308 Filed 3-9-83; 8:45 am]

BILLING CODE 8010-01-M

[Release No. 22570; (70-6342)]

Southern Co., et al.; Proposed Issuance and Sale of Notes to Banks and Commercial Paper to Dealers; Notes to Holding Company; Capital Contributions to Subsidiaries; Exception From Competitive Bidding

March 4, 1983.

In the matter of the Southern Company, 64 Perimeter Center East, Atlanta, Georgia 30346; Mississippi Power Company, 2992 West Beach, Gulfport, Mississippi 39501; Gulf Power Company, 75 North Pace Boulevard, Pensacola, Florida 32520; Southern Electric International, Inc., 41 Perimeter Center East, Atlanta, Georgia 30346.

The Southern Company ("Southern"), a registered holding company, and three of its subsidiaries, Mississippi Power Company ("Mississippi"), Gulf Power Company ("Gulf"), and Southern Electric International, Inc. ("International"), have filed an application-declaration, and an amendment thereto, pursuant to Sections 6, 7, and 12 of the Public Utility Holding Company Act of 1935 ("Act") and Rules 45, 50(a)(2), and 50(a)(5) promulgated thereunder.

Southern, Mississippi, and Gulf propose to issue and sell from time to time, prior to April 1, 1984, short-term notes to banks and commercial paper to dealers up to the aggregate principal amounts at any one time outstanding of $100 million for Southern, $65 million for Gulf and $90 million for Mississippi.

As funds are required, it is proposed that notes be issued, and if required,

renewed from time to time prior to April 1, 1984. The maximum short-term debt authorized for Gulf and Mississippi will be reduced by the amount of net-cash proceeds that these companies receive from the sale of long-term debt and/or preferred stock from April 1, 1983 to March 31, 1984. However, the short-term debt authorization will not be reduced below those amounts authorized under Section 6(b) of the Act.

Southern has obtained commitments aggregating $100 million consisting of $40 million from Barclays Bank International Limited and $20 million each from Credit Suisse, Swiss Bank Corporation and Union Bank of Switzerland. Each commitment currently matures December 31, 1983 and is subject to renewal in accordance with its term. A commitment fee of ⅛% per annum on undrawn amounts is payable for each commitment. At Southern's option, borrowings will bear interest at an effective rate of (a) ½% per annum over the lender's floating prime rate or (b) a margin over the London Interbank Offered Rate ("LIBOR"). Swiss Bank Corporation also offers borrowings at ½% per annum over its prime rate on the date of the advance, fixed for 90 days.

Borrowings under option (a) are prepayable by Southern at any time, without premium or penalty. In connection with option (b), advances from Credit Suisse and the Union Bank of Switzerland are not prepayable and advances from Barclays International Limited and the Swiss Bank Corporation are prepayable only if amounts prepaid are accompanied by a compensatory premium, usually equal to the amount by which interest that would have been earned on the amount prepaid through scheduled maturity exceeds that amount of interest either bank could earn on relending such amount through scheduled maturity.

Except in the case of the Swiss Bank Corporation, advances bearing interest at a rate related to the lender's floating prime rate may be for any term provided that they mature no later than the earlier of one year or the then current expiration date for the commitment. Advances by Swiss Bank Corporation based on its floating prime rate are to mature within 180 days but in any event no later than the date of expiration of the commitment.

A summary of the margins over LIBOR at which advances are available from these banks and the tenor of advances bearing interest based on LIBOR are as follows:

Bank	Margin over LIBOR (percent)	Tenor
Barclays Bank International Ltd.	⅛	Periods of 30 to 180 days.
Credit Suisse	⅛	Periods of 30, 60 or 90 days.
Swiss Bank Corp.	⅛	Periods of 30 to 180 days.
Union Bank of Switzerland.	⅛	Periods of 1 to 6 months.

Assuming 50% usage of the commitment of each bank, a prevailing prime interest rate and a LIBOR of 10%, the effective cost of borrowings (including commitment fees) under these facilities would be 10.75% from each bank under option (a), and option (b), 10.75% from Union Bank of Switzerland and 11.00% from the other banks. Southern would not use option (b) unless the LIBOR was such that the related cost was less than the cost under option (a).

In addition to the above-described specific bank borrowing arrangements, Mississippi and Gulf propose to borrow from other banks within the authorized limits. These bank borrowings will be evidenced by either notes dated as of the borrowing date or the initial borrowing date for master notes. The notes will mature 9 months or less after the date of issue, will be prepayable in whole or in part without penalty or premium, and will be at the prevailing prime rate plus the maintenance of compensating balances of up to 10% of the undrawn amounts and up to 20% of amounts borrowed (or comparable fees in lieu of balances). The maximum effective interest cost of amounts so borrowed under such a facility would be 12.5% based on an assumed prevailing prime interest rate of 10%. A list of these banks and the principal amount of borrowing from each bank will be provided to the Commission.

Southern, Mississippi, and Gulf propose to issue and sell commercial paper with the aggregate principal limit set forth above for each company. The commercial paper will be in the form of promissory notes of the issuing company with varying maturities not to exceed 270 days. Actual maturities will be determined by market conditions, the effective interest costs and the company's anticipated cash flow, including the proceeds of bank borrowings, at the time of issuance. The commercial paper notes will be issued in denominations of not less than $50,000 and not more than $5,000,000 and will not by their terms be prepayable prior to maturity.

The commercial paper will be sold by each of the issuers directly to or through a dealer (the "dealer"). The First Boston Corporation for Southern and A.G. Becker & Co., Incorporated for Gulf and Mississippi. The discount rate (or the interest rate in the case of interest bearing notes), including any commissions, will not be in excess of the discount rate per annum (or equivalent interest rate) prevailing at the date of issuance for prime commercial paper of comparable quality of the particular maturity sold by issuers thereof to commercial paper dealers; provided, however, no commercial paper notes will be issued having a maturity of more than 90 days at an effective interest cost which exceeds the effective interest cost at which the issuer could borrow from banks in an amount at least equal to the principal amount of such commercial paper.

No commission or fee will be payable in connection with the issuance and sale of commercial paper, except for a commission not to exceed ⅛ of 1% per annum payable to the dealer in respect of commercial paper sold through the dealer as principal for the issuing applicant. The dealer will reoffer such commercial paper at a discount rate of ⅛ of 1% per annum less than the prevailing interest rate to the issuer or at an equivalent cost if sold on an interest bearing basis.

The commercial paper of each company will be offered by the dealer to not more than 200 customers of the dealer identified and designated in a nonpublic list prepared in advance by the dealer. Such list will include commercial banks, insurance companies, corporate pension funds, investment trusts, foundations, colleges and universities, municipal and state benefit funds, and eleemosynary and non-financial corporations which invest surplus funds in commercial paper. No sale will be made to any such customer unless and until it has received from the dealer a current report as to the financial position of the issuer. No additions will be made to such list of customers. It is expected that the commercial paper of the companies will be held by customers to maturity; but, if they wish to resell prior thereto, the dealer will repurchase the commercial paper pursuant to a verbal repurchase agreement and reoffer the same to others on the customer lists.

International proposes to issue and sell unsecured notes to Southern, from time to time prior to April 1, 1984, with maturities no later than December 31, 1999, in an aggregate principal amount not to exceed $1,000,000 for the purpose of meeting its working capital requirements.

To the extent necessary, Southern proposes to use the proceeds of its borrowings, together with treasury funds and the proceeds from other external sources to make additional equity investments in the form of capital contributions through March 31, 1984 not to exceed $30 million to Gulf and $25 million to Mississippi, as well as not to exceed $120 million to Alabama Power Company and $395 million to Georgia Power Company, two other electric utility subsidiaries of Southern. Southern will also make loans to Southern Company Services, Inc. and International and for other corporate purposes.

The proceeds from short-term borrowings will be used by Gulf and Mississippi for lawful corporate purposes, including the financing in part of their future construction programs. Except as may be otherwise authorized by the Commission, part or all of the net proceeds of any long-term financing will be applied to pay or reduce the principal amount of outstanding short-term borrowings.

Except as may be otherwise authorized by the Commission, any short-term borrowings of the applicants outstanding hereunder after March 31, 1984 will be retired from internal cash resources, the proceeds of equity financings, or, in the case of Gulf and Mississippi, the proceeds of long-term debt.

The applicant-declarants seek an exception from the competitive bidding requirements of Rule 50(b) pursuant to subparagraph (a)(5) thereof for the issuance of commercial paper because the commercial paper will have maturities not in excess of 270 days, current commerical paper rates for prime borrowers are published in daily financial publications and it is impractical to invite competitive bids for commercial paper.

The application-declaration and any amendments thereto are available for public inspection through the Commission's Office of Public Reference. Interested persons wishing to comment or request a hearing should submit their views in writing by March 28, 1983, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549, and serve a copy on the applicant-declarants at the addresses specified above. Proof of service (by affidavit or, in the case of an attorney at law, by certificate) should be filed with the request. Any request for a hearing shall identify specifically the issues of fact or law that are disputed. A person who so requests will be notified of any hearing, if ordered, and will receive a copy of any notice or order issued in this matter. After said date, the application-declaration, as amended or as it may be further amended, may be granted and permitted to become effective.

For the Commission, by the Division of corporate Regulation, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

DEPARTMENT OF STATE

[Public Notice 850]

Agency Forms Submitted for OMB Review

AGENCY: Department of State.

ACTION: In accordance with the provisions of the Paperwork Reduction Act of 1980, the Department has submitted proposed collections of information to the Office of Management and Budget for review.

PURPOSE: The proposed information collections are for use by the Bureau of Politico-Military Affairs, Office of Munitions Control in the control of commercial exports, imports or sales of Munitions List articles; and the reporting of commissions paid in connection with the sale of defense articles or services.

SUMMARY: The following summarizes the information collection proposal submitted to OMB:

(1) Type of request—extension.
(2) Number of forms submitted—one.
(3) Form number—DSP–5.
(4) Title of information collection—Application/License for Permanent Export of unclassified Defense Articles and Related Unclassified Technical Data.
(5) Frequency—On occasion.
(6) Respondents—Exporters of items on the U.S. Munitions List.
(7) Estimated number of respondents—30,641.
(8) Estimated total number of hours needed to fill out form—7,660. The following summarizes the information collection proposal submitted to OMB:
(1) Type of request—extension.
(2) Number of forms submitted—one.
(3) Form number—DSP–9.
(4) Title of information collection—Application for Registration.
(5) Frequency—On occasion.
(6) Respondents—Manufacturers of and exporters of items on the U.S. Munitions List.
(7) Estimated number of respondents—1,754.
(8) Estimated total number of hours needed to fill out form—438. The following summarizes the information collection proposal submitted to OMB:
(1) Type of request—extension.
(2) Number forms submitted—one.
(3) Form number—DSP–61.
(4) Title of information collection—Application/License for Temporary Import of Unclassified Defense Articles.
(5) Frequency—On occasion.
(6) Respondents—Temporary importers of items on the U.S. Munitions List.
(7) Estimated number of respondents—2,853.
(8) Estimated total number of hours needed to fill out form—713. The following summarizes the information collection proposal submitted to OMB:
(1) Type of request—extension.
(2) Number of forms submitted—one.
(3) Form Number—DSP–73.
(4) Title of information collection—Application/License for Temporary Export of Unclassified Defense Articles.
(5) Frequency—On occasion.
(6) Respondents—Temporary exporters of items on the U.S. Munitions List.
(7) Estimated number of respondents—3,193.
(8) Estimated total number of hours needed to fill out form—798. The following summarizes the information collection proposal submitted to OMB:
(1) Type of request—extension.
(2) Number of forms submitted—one.
(3) Form number—DSP–83.
(4) Title of information collection—Nontransfer and Use Certificate.
(5) Frequency—On occasion.
(6) Respondents—Exporters of items on the U.S. Munitions List.
(7) Estimated number of respondents—2,500.
(8) Estimated total number of hours needed to fill out form—625. The following summarizes the information collection proposal submitted to OMB:
(1) Type of request—extension.
(2) Number of forms submitted—one.
(3) Form number—DSP–85.
(4) Title of information collection—Application/License for Permanent/Temporary Export or Temporary Import of Classified Defense Articles and Related Classified Technical Data.
(5) Frequency—On occasion.
(6) Respondents—Exporters/importers of items on the U.S. Munitions List.
(7) Estimated number of respondents—953.
(8) Estimated total number of hours needed to fill out form—238.
The following summarizes the information collection proposal submitted to OMB:
(1) Type of request—extension.

(2) Title of information collection—Political Contributions and Fees or Commissions in Connection with the Sale of Defense Articles or Services.

(3) Frequency—On occasion.

(4) Respondents—Exporters of items on the U.S. Munitions List.

(5) Estimated total number of hours needed to report—264,000.

(6) Estimated number of respondents—1,320. Section 3504(h) of Pub. L. 96–511 does not apply.

ADDITIONAL INFORMATION OR COMMENTS: Copies of the proposed study and supporting documents may be obtained from Gail J. Cook, Departmental Clearance Officer (202) 632–3602. Comments and questions should be directed to (OMB) Francine Picoult (202) 395–7231.

Dated: February 24, 1983.

Thomas M. Tracy,

Assistant Secretary for Administration.

BILLING CODE 4710-05-M

SYNTHETIC FUELS CORPORATION

Clarifications of the Competitive Solicitation for Oil Shale Projects

On January 20, 1983 the U.S. Synthetic Fuels Corporation issued a Competitive Solicitation for Oil Shale Projects (the "Solicitation"). Since that date, the Corporation has held discussions with prospective applicants to the Solicitation. These discussions have highlighted several areas appropriate for clarification which may also be of interest to all applicants. The corporation therefore wishes to notify all interested persons of these clarifications.

1. Definition of "Project"—Appendix A

In order to be eligible for loan or price guarantees under the Solicitation, the upgrading process or processes necessary to achieve the shale oil product specifications set forth in section 1.4 must be integrated with the retorting process or processes proposed at a specific geographic location in the United States.

The Corporation will apply these requirements on a case specific basis. In determining whether processes are "integrated" the Corporation will consider the extent to which the various processes are operationally dependent, including examination of such factors as physical connection, relative capacity and utilization, process flow relationship and management structure. With respect to the determination of whether the facility incorporating the integrated process or processes is "at a specific geographic location", factors the Corporation will consider, among others, are distance, technical and economic reasons for, and interrelationships among, process locations, topological and geographical characteristics of the area, infrastructure requirements, environmentals, socioeconomic and permitting needs.

2. Definition of "Project"—Appendix A

In order to be eligible for any form of financial assistance under the Solicitation, facilities for expanded production, must meet all specifications included in the Solicitation and sponsors must submit the information required by Appendix B to the Solicitation with respect to the entire project, including such expansion facilities. The Corporation must be able to make the required findings and determinations with respect to the entire project, including without limitation, with respect to the committment of sponsors. All documentation with respect to Corporation financial assistance will address the entire project.

3. Maximum Loan Guarantees—Sections C.2.1 and C.3.2

The Maximum Corporation Liability refers to the maximum liability of the Corporation to guaranteed lenders arising out of the guaranteed loan. This limitation applies to the sum of (a) the Corporation's liability for principal (including funds borrowed to pay interest capitalized during construction and startup) and (b) a reserve for the amount of accrued but unpaid interest (up to a nine month period between the date of the last interest payment and the date of payment on the guarantee). Applicants for loan guarantees must include this total amount of liability in their competitive parameter; in no event can it exceed 75% of the Baseline Cost Estimate.

4. Resources

In accordance with section 112(18)(A)(ii) of the Act only land and mineral rights required directly for use in connection with the facilities for the production of synthetic fuels can be included in the synthetic fuel project. Therefore only such land and mineral rights Synthetic fuel project. Therefore only such land and mineral rights (which may include mineral rights necessary for reasonable contingency reserves) as are required for the life of the project for which assistance is applied for under the Solicitation may be included. To the extent that such interests are contributed by persons with an ownership or profit interest in the project, section 131(m) of the Act requires that they be valued at the lower of fair market value (exclusive of any value attributable to the prospect of receiving financial assistance from the Corporation) or cost to the project. Such valuation will be determined by the Corporation on the factors and circumstances specifically applicable to each project.

5. Section 1.3—Project Scale

10,000 barrels per stream day nominal design capacity means that the plant has been designed, specified and will be constructed for the purpose and intent of producing 10,000 barrels of Eligible Product each operating day of the plant based on the average grade of the shale to be mined over the project life.

6. Appendix B—Section B.6.1

The requirement for proposers to provide information on the "Source of each proposed technology and status of licensing" means that proposers should list or tabulate the proposed processing technologies intended to be utilized to:

—Convert oil shale into specification grade product.
—Process all incoming utilities streams.
—Process all effluent solid, liquid and gaseous streams.

For each listed technology, proposer should indicate whether proprietary or otherwise commercial, the licensor of the proprietary technology and the status of licensing agreements from technology owners. If the proposer owns a technology, that should be so stated.

Dated: March 7, 1983.

United States Synthetic Fuels Corporation.

Charles A. Cowan, Jr.,

Senior Vice President for Projects.

Competitive Solicitation for Oil Shale Projects

AGENCY: U.S. Synthetic Fuels Corporation.

ACTION: Issuance of clarifications of the competitive solicitation for oil shale projects.

SUMMARY: Notice is hereby given that on March 7, 1983, the United States Synthetic Fuels Corporation issued a Statement of Clarifications of the Competitive Solicitation for Oil Shale Projects issued by the Corporation on January 20, 1983.

EFFECTIVE DATE: March 7, 1983.

FOR FURTHER INFORMATION CONTACT: Ralph L. Bayrer, Vice President for Projects, United States Synthetic Fuels

Corporation, 2121 K Street, NW., Washington, D.C. 20586; (202) 822–6436.

For Copies of the Clarifications of the Solicitation, Contact: Catherine McMillan, Director of Public Disclosure, United States Synthetic Fuels Corporation, 2121 K Street, NW., Washington, D.C. 20586; (202) 822–6460.

Dated: March 7, 1983.

United States Synthetic Fuels Corporation.

Jimmie R. Bowden,

Executive Vice President.

BILLING CODE 6820-SS-M

DEPARTMENT OF TRANSPORATATION

Federal Aviation Administration

[Summary Notice No. PE–83–6]

Petitions for Exemption; Summary of Petitions Received; Dispositions of Petitions Issued

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of petitions for exemption received and of dispositions of prior petitions.

SUMMARY: Pursuant to FAA's rulemaking provisions governing the application, processing, and disposition of petitions for exemption (14 CFR Part 11), this notice contains a summary of certain petitions seeking relief from specified requirements of the Federal Aviation Regulations (14 CFR Chapter I), dispositions of certain petitions previously received and corrections. The purpose of this notice is to improve the public's awareness of, and participation in, this aspect of FAA's regulatory activities. Neither publication of this notice nor the inclusion or omission of information in the summary is intended to affect the legal status of any petition or its final disposition.

DATE: Comments on petitions received must identify the petition docket number involved and must be received on or before March 30, 1983,

ADDRESS: Send comments on any petition in triplicate to: Federal Aviation Administration, Office of the Chief Counsel, Attn: Rules Docket (AGC–204), Petition Docket No. ——, 800 Independence Avenue, SW., Washington, D.C. 20591.

FOR FURTHER INFORMATION CONTACT: The petition, any comments received and a copy of any final disposition are filed in the assigned regulatory docket and are available for examination in the Rule Docket (AGC–204), Room 916, FAA Headquarters Building (FOB 10A), 800 Independence Avenue, SW., Washington, D.C. 20591; telephone (202) 426–3644.

This notice is published pursuant to paragraphs (c), (e), and (g) of § 11.27 of Part 11 of the Federal Aviation Regulations (14 CFR Part 11).

Issued in Washington, D.C. on March 4, 1983.

John H. Cassady,

Assistant Chief Counsel, Regulations and Enforcement Division.

Petitions for Exemption

Docket No.	Petitioner	Regulations affected	Description of relief sought
23480	San Juan Airlines	14 CFR 135.244	To permit petitioner to apply operating experience obtained in the Cessna 207 toward experience gained in the Cessna 172 and 182 aircraft.
23209	Bell Helicopter, Textron, Inc.	14 CFR 133.1(b) & 133.45(a)(3)	To permit petitioner to operate its helicopters in external-load operations to exercise the Dallas/Ft. Worth Metroplex Helicopter Emergency Lifesaver Plan (HELP). This operation involves lifting personnel in a suspended Billy Pugh safety net.
23536	Southern Air Transport, Inc.	14 CFR 65.71(a)(2)	To permit James B. Barrow to apply for a mechanic certificate and associated ratings although he does not meet the specific eligibility requirements. Mr. Barrow is a deaf mute.
21779	Hawaiian Air Tour Service	14 CFR 135.158	Renewal of Exemption 3379 to permit petitioner to operate its DeHavilland 114–2X aircraft without an operable pilot heat indicating system.
23537	Frank B. Angarola	14 CFR 61.16(b)	To permit petitioner to apply for an airline transport pilot certificate with a rotocraft rating although he has not flown 1,200 hours of flight time as pilot within the past 8 years.
22532	Squadron Aviation, Inc.	14 CFR 159.53	To allow a person to operate a civil aircraft at Dulles Int'l. Airport, including touch and go operations, without the necessity of that person holding at least a private pilot certificate.

Dispositions of Petitions for Exemption

Docket No.	Petitioner	Regulations affected	Description of relief sought disposition
23242	Stephen A. Fellows	14 CFR 91.47	To permit petitioner to use a Lockheed L–18 aircraft for the purpose of sport parachute jumping, carrying 24 properly equipped and trained parachute jumpers and 2 crewmembers. *Denied 2/25/83.*
19892	American Airlines Training Corp	§ 141.33(a)(3)	To renew Exemption 2920, as amended, to permit petitioner to use instructors who do not possess flight instructor certificates for flight or ground instruction in courses approved under Part 141 that lead to the issuance of a type rating, provided they have airline transport pilot certificates with appropriate type rating. *Granted 3/1/83.*
23366	Mid Pacific Airlines, Inc.	14 CFR 121.371(a), & 121.378	To permit petitioner to utilize Toa Domestic Airlines (TDA), an FAA-certified foreign repair station, and Nitto Maintenance Co. for the inspection, overhaul, and repair of its YS–11 aircraft. *Granted 2/28/83.*
23241	Air Tractor, Inc	14 CFR 45.29(b)(1)	To permit all types of aircraft licensed in restricted category and used primarily for agriculture and pest control to display 3-inch registration marks. *Denied 2/28/83.*
20846	Braniff Airways, Inc.	14 CFR Part 121, portion of Appendix H	To extend current Exemption No. 3147 to permit petitioner to conduct training and checking as permitted under the Phase II simulator requirements without meeting the continuous minimum visual field-of-view requirement. *Granted 2/28/83.*

DISPOSITIONS OF PETITIONS FOR EXEMPTION—Continued

Docket No.	Petitioner	Regulations affected	Description of relief sought disposition
16787	Petroleum Helicopters Inc.	14 CFR 133.1(b) & 122.34(a)	To amend Exemption 2834, as amended, to permit petitioner to use, for hire, its Bell 212 and Puma SA-330 helicopters to lower and hoist harbor pilots on an external hoist, to and from ships at sea, on a test basis. The amendment would include petitioner's Bell 214ST helicopter. *Granted 3/2/83.*
20465	Everts Air Fuel	14 CFR 91.31(a)	To permit petitioner to operate its DC-6B aircraft, N161, at a 5 percent increase in zero fuel and landing weight for the purpose of transporting diesel fuel to isolated native villages and seismic exploration teams in the Alaskan back country. *Granted 3/2/83.*
22809	Karm-Air, Inc.	14 CFR 135.261	To extend the December 31, 1982, termination date of Exemption 3466 to allow petitioner to continue to operate helicopters in emergency medical evacuation service from Shands Teaching Hospital, Gainesville, FL, without complying with the flight and duty time requirements of the section. *Granted 3/2/83.*
22926	Guyana Airways Corp. (GAC)	14 CFR 11.25(b)(1)	To amend Exemption 3434A to reinstate the inclusion of a leased U.S.-registered B-707-321B Advanced aircraft, N860PA, the use of which was terminated on December 31, 1982. Exemption 3434A permits GAC to operate certain aircraft using an FAA-approved minimum equipment list (MEL). *Granted 2/25/83.*

BILLING CODE 4910-13-M

Radio Technical Commission for Aeronautics (RTCA); Study Group on Airborne Thunderstorm Detection Equipment; Meeting

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463; 5 U.S.C. App. I) notice is hereby given of a meeting of the Study Group on Airborne Thunderstorm Detection Equipment to be held on April 5-6, 1983 in RTCA Conference Room, One McPherson Square, 1425 K Street NW., Suite 500, Washington, D.C. commencing at 9:30 a.m.

The Agenda for this meeting is as follows: (1) Chairman's Introductory Remarks; (2) Approval of Minutes of the Second Meeting Held on February 6-8, 1983; (3) Review Initial Draft of Study Group Report; (4) Develop Recommendations to the RTCA Executive Committee; and (5) other Business.

Attendance is open to the interested public but limited to space available. With the approval of the Chairman, members of the public may present oral statements at the meeting. Persons wishing to present statements or obtain information should contact the RTCA Secretariat, One McPherson Square, 1425 K Street, NW., Suite 500, Washington, D.C. 20005; (202) 682-0266. Any member of the public may present a written statement to the Committee at any time.

Issued in Washington, D.C. on March 4, 1983.

Karl F. Bierach,
Designated Officer.

BILLING CODE 4910-13-M

Federal Highway Administration

Environmental Impact Statement; Clarke-Oconee Counties, Georgia

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice of intent.

SUMMARY: The FHWA is issuing this notice to advise the public that an environmental impact statement will be prepared for a proposed highway project in Clarke-Oconee Counties, Georgia.

FOR FURTHER INFORMATION CONTACT: James Erickson, District Engineer, Federal Highway Administration, Suite 700, 1422 West Peachtree Street, NE., Atlanta, Georgia 30309, telephone (404) 881-4758, or Peter Malphurs, State Environmental Analysis Engineer, Georgia Department of Transportation, Office of Environmental Analysis, 65 Aviation Circle, Atlanta, Georgia 30336, telephone (404) 696-4634.

SUPPLEMENTARY INFORMATION: The FHWA, in cooperation with the Georgia Department of Transportaion (Georgia DOT) will prepare an environmental impact statement (EIS) on a proposal to construct the Athens South Bypass. The Bypass is proposed to be a partially controlled access, four-lane divided highway with a 40' median, beginning at S.R. 10 (U.S. 78) and the Athens North Bypass (U.S. 29), and extending in a southeasterly and easterly direction on new location for approximately 7.78 miles, terminating at S.R. 72 (U.S. 441) just east of Whitehall Road. Access points are proposed at public roads only in accordance with the Department's policy. Timothy Road is proposed to be grade separated over the Bypass Mainline with no access provided. An interchange will be completed at the beginning and ending of this project. Right-of-way width of 200' to 300' will be required throughout portions of this project.

Alternatives under consideration include: one build alternate, and a no-build alternate.

Letters describing the proposed action and soliciting comments have been sent to appropriate Federal, State and local agencies, and to private organizations and citizens who have previously expressed interest in this proposal. No formal scoping meeting have been scheduled at this time, on the local level. A series of public meetings will be held, if requested, during the progress of the proposed project. In addition, a public hearing will be held. Public notice will be given of the time and place of the meetings and hearing.

To ensure that the full range of issues related to this proposed project are addressed and all significant issues identified, comments and suggestions are invited from all interested parties. Comments or questions concerning this proposed action and the EIS should be directed to the FHWA at the address provided above.

The Catalog of Federal Domestic Assistance Program Number is 20.205, *Highway Research, Planning and Construction.* The provisions of OMB Circular No. A-95 regarding State and local clearinghouse review of Federal and federally assisted programs and projects apply to this program.

James Erickson,
District Engineer, Atlanta, Georgia.

[FR Doc. 83-6087 Filed 3-9-83; 8:45 am]
BILLING CODE 4910-22-M

Environmental Impact Statement; Jefferson, Bullitt, Spencer, Nelson Counties, Kentucky

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice of intent.

SUMMARY: The FHWA is issuing this notice to advise the public that an environmental impact statement is being prepared for a proposed highway project in Jefferson, Bullitt, Spencer, Nelson Counties, Kentucky.

FOR FURTHER INFORMATION CONTACT: Robert E. Johnson, Division Administrator, Federal Highway Administration, 330 West Broadway, Frankfort, Kentucky 40601 or Donald L Ecton, Director, Division of Project Development, Kentucky Transportation Cabinet, 419 Ann Street, Frankfort, Kentucky 40622.

SUPPLEMENTARY INFORMATION: The FHWA, in cooperation with the Kentucky Transportation Cabinet, is preparing an environmental impact statement for a highway project located in Jefferson, Bullitt, Spencer, and Nelson Counties, Kentucky. The proposed improvement involves the reconstruction of US 31E/150 from southeast of Louisville in Jefferson County, southward to northern Nelson County, a distance of approximately 14 miles. Improvements to the corridor are considered necessary to provide for existing and future traffic demand as well as for safety needs. An integral part of the proposal is a bypass of the city of Mount Washington in Bullitt County.

Possible alternatives under consideration include the (1) do-nothing alternative, (2) alternative transportation modes, (3) project postponement, (4) design alternatives within the corridor with various design options.

This project has been under development for several years and public meetings, and Interdisciplinary Team Meetings have been held. The project has been coordinated with various federal, state, and local agencies and officials and other private organizations and parties identified as being impacted by this project or having an interest in its development. No formal scoping meeting is planned. A combination corridor/design public hearing will be held.

It is estimated that the Draft EIS will be ready for public review and comment in late April 1983.

Issued on: March 3, 1983.

Robert E. Johnson,

Division Administrator, Frankfort, Kentucky.

[FR Doc. 83-6060 Filed 3-9-83; 8:45 am]

BILLING CODE 4910-22-M

Environmental Impact Statement; Honolulu, Hawaii

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice of Intent.

SUMMARY: The FHWA is issuing this notice to advise the public that an environmental impact statement will be prepared for a proposed highway project in Honolulu, Hawaii.

FOR FURTHER INFORMATION CONTACT: H. Kusumoto, Division Administrator, Federal Highway Administration, Box 50206, Honolulu, Hawaii 96850.

SUPPLEMENTARY INFORMATION: The FHWA, in cooperation with the Hawaii Department of Transportation, will prepare an environmental impact statement (EIS) on a proposal to improve Kahekili Highway (FAP 83) in Honolulu, Hawaii. The proposed improvement would involve the widening of the existing FAP 83 between Kamehameha Highway and Likelike Highway for a distance of about 4 miles. Also included in this proposal is the construction of an interchange with Likelike Highway. These improvements are considered necessary to provide for the existing and projected traffic demand.

Alternatives under consideration other than widening the existing roadway include (1) taking no action; and (2) improving alternate corridors.

Letters describing the proposed action and soliciting comments will be sent to appropriate Federal, State, and local agencies, and to private organizations and citizens who have previously expressed interest in this proposal. A series of public meetings will be held in Kaneohe during 1983 and early 1984. In addition, a public hearing will be held. Public notice will be given of the time and place of the meetings and hearing. The draft EIS will be available for public and agency review and comment. No formal scoping meeting is planned at this time.

To ensure that the full range of issues related to this proposed action are addressed and all significant issues identified, comments and suggestions are invited from all interested parties. Comments or questions concerning this proposed action and the EIS should be directed to the FHWA at the address provided above.

H. Kusumoto,

Division Administrator, Honolulu, Hawaii.

[FR Doc. 83-6142 Filed 3-9-83; 8:45 am]

BILLING CODE 4910-22-M

Research and Special Programs Administration

Applications for Renewal or Modification of Exemptions or Applications To Become a Party to an Exemption

AGENCY: Materials Transportation Bureau, DOT

ACTION: List of applications for renewal or modification of exemptions or application to become a party to an exemption.

SUMMARY: In accordance with the procedures governing the application for, and the processing of, exemptions from the Department of Transportation's Hazardous Materials Regulations (49 FR Part 107, Subpart B), notice is hereby given that the Office of Hazardous Materials Regulation of the Materials Transportation Bureau has received the applications described herein. This notice is abbreviated to expedite docketing and public notice. Because the sections affected, modes of transportation, and the nature of application have been shown in earlier Federal Register publications, they are not repeated here. Except as otherwise noted, renewal applications are for extension of the exemption terms only. Where changes are requested (e.g. to provide for additional hazardous materials, packaging design changes, additional mode of transportation, etc.) they are described in footnotes to the application number. Application numbers with the suffix "X" denote renewal; application numbers with the suffix "P" denote party to. These applications have been separated from the new applications for exemptions to facilitate processing.

DATE: Comment period closes March 24, 1983.

ADDRESS: Address comments to: Dockets Branch, Office of Regulatory Planning and Analysis, Materials Transportation Bureau, U.S. Department of Transportation, Washington, DC 20590.

Comments should refer to the application number and be submitted in triplicate.

FOR FURTHER INFORMATION: Copies of the applications are available for inspection in the Dockets Branch, Room 8426, Nassif Building, 400 7th Street, SW., Washington, DC.

[1] Request renewal and to authorize two MC-331 cargo tanks with the option of effecting certain improvements.
[2] To authorize 43 additional cargo tanks under the terms of the exemption.
[3] To renew, and to expand on present packaging requirements and to add additional commodities.
[4] To use NOL ring testing instead of tensile testing and to modify cycling test requirements.
[5] To expand exemption to allow servicing of other pipeline sources.
[6] To reissue exemption to a shipper instead of a carrier.
[7] To remove private carriage restriction, handling of cargo by Olin employees only, limitation of 30 miles radius and to allow an alternate corrugated square drum container.
[8] To authorize water as an additional mode of transportation.

BILLING CODE 4910-60-M

Applications for Exemptions

AGENCY: Materials Transportation Bureau, DOT.

ACTION: List of applicants for exemptions.

SUMMARY: In accordance with the procedures governing the application for, and the processing of, exemptions from the Department of Transportation's Hazardous Materials Regulations (49 CFR Part 107, Subpart B), notice is hereby given that the Office of Hazardous Materials Regulation of the Materials Transportation Bureau has received the applications described herein. Each mode of transportation for which a particular exemption is requested is indicated by a number in the "Nature of Application" portion of the table below as follows: 1—Motor vehicle, 2—Rail freight, 3—Cargo vessel, 4—Cargo-only aircraft, 5—Passenger-carrying aircraft.

DATE: Comment period closes April 12, 1983.

ADDRESSES: Address Comment to: Dockets Branch, Office of Regulatory Planning and Analysis, Materials Transportation Bureau, U.S. Department of Transportation, Washington, DC 20590.

Comments should refer to the application number and be submitted in triplicate.

FOR FURTHER INFORMATION CONTACT: Copies of the applications are available for inspection in the Dockets Branch, Room 8426, Nassif Building, 400 7th Street, SW., Washington, DC.

New Exemptions

Application number	Applicant	Regulation(s) affected	Nature of exemption thereof
8008-N	Oil-Air Industries, Inc., Brookshire, TX	49 CFR 173.302(a)(1), 175.3	To manufacture, mark and sell seamless hydraulic accumulators having a capacity of not over 40 gallons with a design pressure of either 3,000 psi or 5,000 psi, for shipment of nitrogen, classed as a nonflammable gas. (modes 1, 2, 3, 4)
8009-N	Scott Aviation Div. of Figgie International, Inc., Lancaster, NY.	49 CFR 172.200-172.205(b), 175.30, 175.85	To manufacture, mark and sell an emergency escape breathing device containing an oxidizer, corrosive material and a Class C explosive described as oxidizer, n.o.s. to be shipped without shipping paper, and carried in the cabin of passenger aircrafts. (modes 1, 2, 4, 5)
8001-N	Chesterfield Cylinder Company, Inc., Enid, OK	49 CFR 178.46	To manufacture, mark and sell non-DOT specification steel cylinders similar to DOT Specification 3T except one end is not concaved to pressure, the water capacity is less than 99 pounds, and the wall thickness is 0.21, for shipment of those gases authorized in DOT-3AA and 3T cylinders. (mode 1)
8002-N	PepsiCo, Inc., Purchase, NY	49 CFR 178.210-10	To authorize shipment of certain corrosive liquids, n.o.s. (flavoring components) in four one-gallon Specification 2E container with a tamper-evident plastic cap, overpacked in DOT Specification 12A fiberboard boxes, to be exempt from side drop tests. (modes 1, 2, 3)
8003-N	General Electric Company, San Jose, CA	All CFR 173.306	To authorize a one-time shipment of sodium metal in non-DOT specification steel portable tanks. (mode 1)
8004-N	Matric Corporation, Tulsa, OK	49 CFR 173.119, 173.304, 173.315	To manufacture, mark and sell mechanical displacement meter proving units affixed to a truck or trailer used to calibrate meters containing liquid hdyrocarbon products. (mode 1)
8005-N	Emerald Air, Austin, TX	49 CFR 172.101, 172.204(c)(3), 173.27, 175.30(a)(1), 175.320(b), Part 107, Appendix B.	To authorize carriage of various Class A, B and C explosives not permitted for air shipment or in quantities greater than those prescribed for air shipment. (mode 4)
8006-N	Infilco Degremont Inc., Richmond, VA	49 CFR 173.266, 175.3	To authorize shipment of not exceeding 70% nitric acid in minute quantities contained in glass ampules/polystyrene clam shell/fiberboard box configuration. (modes 1, 2, 4)
8007-N	U.S. Environmental Protection Agency, Washington, DC.	49 CFR 173.302, 175.3	To authorize shipment of compressed air samples which may or may not contain radioactive materials, in non-DOT specification steel cylinders. (mode 4)
8008-N	Reynolds Manufacturing Company, McAllen, TX	49 CFR 173.119(a)(17), 173.245(a)(30), 173.245(a)(31), 173.346(a), 178.340-7, 178.342-5, 178.343-5.	To manufacture, mark and sell non-DOT specification cargo tanks complying generally with DOT Specification MC-307/312 except for bottom outlet valve variations, for transportation of waste flammable, corrosive or poison B liquids or semi-solids. (mode 1)
8009-N	Stauffer Chemical Company, Westport, CT	49 CFR 173.356	To authorize shipment of thiophosgene, poison B, in DOT Specification 6C stainless steel drums. (modes 1, 2, 3)
8010-N	United Technologies Chemical Systems, Sunnyvale, CA.	49 CFR 173.86(e)(2)(ii), 173.62	To authorize shipment of rocket motors, Class B explosive in a specially designed container to be shipped in a propulsive state (mode 1)
8011-N	Inland Steel Container, Chicago, IL	49 CFR 175.3, 178.100-11, 178.115-12, 178.116-12, 178.117-13, 178.118-12, 178.80-13, 178.81-13, 178.82-13, 178.99-11, 178.99-11.	To authorize certain DOT Specification 5, 6 and 17 series drums constructed of stainless steel, nickel or monel to be exempted from certain steel drum test requirements, for shipment of those commodities presently authorized for each drum. (modes 1, 2, 3, 4)
8012-N	Thiokol Corporation, Brigham City, UT	49 CFR 173.182, 173.239a	To authorize shipment of ammonium perchlorate and sodium nitrate, classed as oxidizers in DOT Specification 5B aluminum portable tanks modified to incorporate a pressure equalizing apparatus. (modes 1, 2)
8013-N	Monsanto Company, St. Louis, MO	49 CFR 173.286	To authorize benzyl chloride, corrosive material, in 18 gauge 55-gallon DOT Specification 17E steel drums with a corrosion resistant lining and recently developed triple seam chimes. (modes 1, 2, 3)
8014-N	Hunter Drums Limited, Burlington, Ont., Canada	49 CFR 173.119, 173.125, 173.256, 173.266(b), 178.19, Part 173, Subpart F.	To manufacture, mark and sell non-DOT specification 55-gallon polyethylene drums comparable to DOT Specification 34, for shipment of corrosive liquids authorized in Specification 34, hydrogen peroxide, methyl alcohol solutions or mixtures (thereof, and cleaning compound containing hydrofluoric acid. (modes 1, 2, 3)
8015-N	Monsanto Company, St. Louis, MO	49 CFR 173.217	To authorize shipment of trichloro-s-triazinetrione, classed as an oxidizer, in non-DOT specification flexible semi-bulk bags of 2,000 pound capacity. (modes 1, 2, 3)
8016-N	Van Leer Verpackungen, GmbH, Hamburg, West Germany.	49 CFR 173.127, 173.175, 173.184	To manufacture, mark and sell non-DOT specification fiber drums not to exceed 55-gallon capacity, for shipment of certain flammable liquids and flammable solids. (modes 1, 2, 3)
8017-N	EVA, Eisenbahn-Verkehrsmittel, GmbH, Dusseldorf, West Germany.	49 CFR 173.264	To authorize shipment of hydrogen fluoride anhydrous, classed as corrosive material, in non-DOT specification IMO Type portable tank comparable to DOT Specification 51. (modes 1, 2, 3)

NEW EXEMPTIONS—Continued

Application number	Applicant	Regulation(s) affected	Nature of exemption thereof
9018-N	Schering, Aktiengesellschaft, Berghamen, West Germany.	49 CFR 173.134	To authorize shipment of pyrophoric liquids, n.o.s., classed as flammable liquid, in non-DOT specification IMO Type portable tanks comparable to DOT Specification 51. (modes 1, 2, 3)

This notice of receipt of applications for new exemptions is published in accordance with Section 107 of the Hazardous Materials Transportation Act (49 U.S.C. 1806; 49 CFR 1.53(e)).

Issued in Washington, DC, on March 2, 1983.

Joseph T. Herring,

Chief, Exemptions and Approvals Division, Office of Hazardous Materials Regulation, Materials Transportation Bureau.

BILLING CODE 4910-60-M

Hazardous Materials Regulations; Alcoholic Beverages; Interpretation

AGENCY: Materials Transportation Bureau (MTB), Research and Special Programs Administration (RSPA), Department of Transportation.

ACTION: Notice of withdrawal of interpretation.

SUMMARY: The MTB hereby withdraws a letter of interpretation of § 173.118(c) of the Hazardous Materials Regulations (49 CFR 173.118(c)) concerning the regulation of "alcoholic beverages" as that term is defined in the regulations of the Bureau of Alcohol, Tobacco, and Firearms of the Internal Revenue Service (27 CFR 4.10 and 5.11). As written, the letter of interpretation (which was not published in the **Federal Register**) could be construed to apply to numerous products other than beverages and beverage components thereby effectively deregulating them—a regulatory action the MTB believes should only be accomplished in accordance with its rulemaking procedures.

DATE: Withdrawal of the letter of interpretation cited in this document is effective upon publication in the **Federal Register**.

FOR FURTHER INFORMATION CONTACT: Alan I. Roberts, Associate Director for Hazardous Materials Regulation, Materials Transportation Bureau, 400 7th Street, SW., Washington, D.C. 20590; telephone (202) 426–0656.

SUPPLEMENTARY INFORMATION: In accordance with MTB's exemption procedures, I notified an exemption applicant on October 1, 1982, of denial of its application for an exemption to permit the transportation of a concentrated flavoring component which includes 65% alcohol in units of one gallon or less as an ORM–E. The reason for the denial was that the exemption was unnecessary since the applicant's commodity was within the exception prescribed in § 178.118(c), and thus not regulated. It has come to the attention of the MTB that this response received wide dissemination among formulators of various products who use alcohol as a primary constituent.

Subsequently, on December 28, 1982, in response to a request for an interpretation of § 173.118(c) designed to expand on the interpretation cited above, I issued, by letter, the following interpretation of the term "alcoholic beverages" (wines and distilled spirits as defined in 27 CFR 4.10 and 5.11) as used in § 172.118(c):

> Under the above-referenced section(s) of Title 27, the Bureau of Alcohol, Tobacco and Firearms of the Internal Revenue Service limits the wine and distilled spirits referenced therein to those "for non-industrial use", i.e., for use as beverages but not those used "in the manufacture of . . . flavoring extracts, syrups, or food products". From a transportation safety perspective, wine and distilled spirits have the same characteristics regardless of end use. Consequently, we interpret section 173.118 to except from the HMR all wines and distilled spirits as defined in the referenced ATF regulations, whether for industrial or non-industrial use.

The intent of this interpretation was to remove the industrial/non-industrial distinction created by the BATF with respect to alcoholic beverages and beverage components only, in recognition that the distinction bore no relationship to transportation safety. However, in removing that distinction, the interpretation had the unintended effect of expanding the exception stated in § 173.118(c) to include, as provided in 27 CFR 2.12,—

(a) Medicinal, pharmaceutical, or antiseptic products, including prescriptions compounded by retail druggists;

(b) Toilet preparations;

(c) Flavoring extracts, syrups, or food products; or

(d) Scientific, chemical, mechanical or industrial products.

As thus expanded, the effects of the interpretation go far beyond the MTB's intent in issuing it. The net result is deregulation of hundreds of formulations containing alcohol. Clearly, such an impact should only be dealt with through rulemaking, and accordingly, the interpretation discussed in this Notice is hereby withdrawn. In taking this action, the MTB is aware that some product formulators may have begun to act in reliance on the interpretation. To help minimize any adverse impacts from such reliance, the MTB will notify each of the operating administrations within DOT having hazardous materials enforcement responsibility that the interpretation was duly issued but has since been withdrawn. For a reasonable period of time, and depending on the merits of a given case, such action should be sufficient to insulate from enforcement action persons who have acted in good faith out of reliance on the interpretation.

Issued: March 4, 1983.

Alan I. Roberts,

Associate Director for Hazardous Materials Regulation, Materials Transportation Bureau.

DEPARTMENT OF THE TREASURY

Customs Service

[TMK-2 CO:R:E:E]

Application for Recordation of Trade Name "CHAMS DE BARON LTD."

Application has been filed pursuant to § 133.21 Customs Regulations (19 CFR 133.21), for the recordation under section 42 of the Act of July 5, 1946, as amended (15 U.S.C. 1124), of the trade name "CHAMS DE BARON LTD.", used by

Chams De Baron Ltd., a corporation organized under the laws of the State of New York, located at 1350 Broadway, New York, New York 10018.

The application states that the trade name is used in connection with the following merchandise which is manufactured in Taiwan, Hong Kong, South Korea and the Philippines: Men's and Women's wearing apparel, including shirts, tops, sweaters, jackets and pants in the U.S. Patent and Trademark Office Class 39. Appropriate acompanying papers were submitted with the application.

Before final action is taken on the application, consideration will be given to any relevant data, views, or arguments submitted in writing by any person in opposition to the recordation of this trade name. Any such submission should be addressed to the Commissioner of Customs, Entry, Licensing and Restricted Merchandise Branch, Washington, D.C. 20229, in time to be received no later than 60 days from the date of publication of this notice in the Federal Register.

FOR FURTHER INFORMATION CONTACT: Harriet Lane, Entry Licensing and Restricted Merchandise Branch, U.S. Customs Service, 1301 Constitution Avenue, NW., Washington, D.C. 20229 (202–566–5765).

Notice of the action taken on the application for recordation of this trade name will be published in the Federal Register.

Dated: January 28, 1983.

A. Piazza,

Acting Director, Entry Procedures and Penalties Division.

BILLING CODE 4820-02-M

VETERANS ADMINISTRATION

Agency Form Under OMB Review

AGENCY: Veterans Administration.

ACTION: Notice.

SUMMARY: The Veterans Administration has submitted to OMB for review the following proposal for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35). This document consists of a revised form. The entry contains the following information: (1) The department or staff office issuing the form; (2) The title of the form; (3) The agency form number, if applicable; (4) How often the form must be filled out; (5) Who will be required or asked to report; (6) An estimate of the number of responses; (7) An estimate of the total number of hours needed to fill out the form; and (8) An indication of whether section 3504(H) of Pub. L. 96–511 applies.

ADDRESSES: Copies of the proposed form and supporting documents may be obtained from Patricia Viers, Agency Clearance Officer (004A2), Veterans Administration, 810 Vermont Avenue, NW, Washington DC, 20420 (202) 389–2146. Comments and questions about the items on this list should be directed to the VA's OMB Desk Officer, Joseph Lackey, Office of Management and Budget, 726 Jackson Place, NW., Washington, DC 20503, (202) 395–7316.

DATE: Comments on the form should be directed to the OMB Desk Officer within 60 days of this notice.

Dated: March 4, 1983.

Dominick Onorato,

Associate Deputy Administrator for Information Resources Management.

Revised Form

(1) Department of Medicine and Surgery.

(2) Application for Furnishing Nursing Home Care to Beneficiaries of the VA.

(3) VA Form 10–1170.

(4) Once per applicant.

(5) Any applicant for a nursing home care contract with the VA.

(6) 800 responses per annum.

(7) 800 hours.

(8) Not applicable under 3504(H).

FEDERAL DEPOSIT INSURANCE CORPORATION

Change in Subject Matter of Agency Meeting

Pursuant to the provisions of subsection (e)(2) of the "Government in the Sunshine Act" (5 U.S.C. 552b(e)(2)), notice is hereby given that at its close meeting held at 2:30 p.m. on Monday, March 7, 1983, the Corporation's Board of Directors determined, on motion of Chairman William M. Isaac, seconded by Director Irvine H. Sprague (Appointive), concurred in by Mr. Doyle L. Arnold, acting in the place and stead of Director C. T. Conover (Comptroller of the Currency), that Corporation business required the addition to the agenda for consideration at the meeting, on less than seven days' notice to the public of the following matter:

Recommendation regarding the liquidation of a bank's assets acquired by the Corporation in its capacity as receiver, liquidator, or liquidating agent of those assets:

Case No. 45,607–L—Franklin National Bank, New York, New York

The Board further determined, by the same majority vote, that no earlier notice of the change in the subject matter of the meeting was practicable; that the public interest did not require consideration of the matter in a meeting open to public observation; and that the matter could be considered in a closed meeting by authority of subsections (c)(4), (c)(6), (c)(9)(B), and (c)(10) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(4), (c)(6), (c)(9)(B), and (c)(10)).

Dated: March 7, 1983.

Federal Deposit Insurance Corporation.

Hoyle L. Robinson,

Executive Secretary.

FEDERAL DEPOSIT INSURANCE CORPORATION

Changes in Subject Matter of Agency Meeting

Pursuant to the provisions of subsection (e)(2) of the "Government in the Sunshine Act" (5 U.S.C. 552b(e)(2)), notice is hereby given that at its open meeting held at 2:00 p.m. on Monday, March 7, 1983, the Corporation's Board of Directors determined, on motion of Chairman William M. Isaac, seconded by Director Irvine H. Sprague (Appointive), concurred in by Mr. Doyle L. Arnold, acting in the place and stead of Director C. T. Conover (Comptroller of the Currency), that Corporation business required the addition to the agenda for consideration at the meeting, on less than seven days' notice to the public, of the following matters:

Recommendations regarding the liquidation of a bank's assets acquired by the Corporation in its capacity as receiver, liquidator, or liquidating agent of those assets:

Case No. 45,603–L—American City Bank &Trust Company, National Association, Milwaukee, Wisconsin

Case No. 45,608—The Greenwich Savings Bank New York, New York

Case No. 45,609–NR—Penn Square Bank, National Association, Oklahoma City, Oklahoma

Case No. 45,616–L—Banco Credito y Ahorro Ponceno, Ponce, Puerto Rico

By the same majority vote, the Board further determined that no earlier notice of the changes in the subject matter of the meeting was practicable.

Dated: March 7, 1983.

Federal Deposit Insurance Corporation.

Hoyle L. Robinson,

Executive Secretary.

FEDERAL ELECTION COMMISSION

DATE AND TIME: Tuesday, March 15, 1983, 10 a.m.

PLACE: 1325 K Street NW., Washington, D.C.

STATUS: This meeting will be closed to the plublic.

MATTERS TO BE CONSIDERED:

Compliance. Personnel. Litigation. Audits.

* * * * *

DATE AND TIME: Thursday, March 17, 1983, 10 a.m.

PLACE: 1325 K Street NW., Washington, D.C. (fifth flobr).

STATUS: This meeting will be open to the plublic.

MATTERS TO BE CONSIDERED:

Setting of dates for future meetings
Correction and approval of minutes
Proposed notice of rulemaking for general election regulations
Finance Committee report
Routine Administrative Matters

PERSON TO CONTACT FOR INFORMATION: Mr. Fred Eiland, Information Officer, telephone 202–523–4065.

Marjorie W. Emmons,

Secretary of the Commission.

LEGAL SERVICES CORPORATION

Meeting of the Board of Directors

STATUS OF MEETING: Open (Portion of Meeting is to be closed to discuss personnel and litigation matters under 45 CFR 1622.5 (a)(3) and (h). Vote and certification of authorization for closing are as follows:

The Executive Session in item 1 of this agenda is called pursuant to the vote of the five Directors presently in office to adopt the following resolution:

"Upon motion of Board member, Robert McCarthy, duly seconded, the Legal Services Corporation hereby closes the initial portion of the Board Meeting of March 15, 1983, pursuant to the provisions of 45 CFR 1622.6, in order to discuss matters falling under 45 CFR 1622.5 (a), (e), and (h)."

The members of the Board voted as follows:

Frank Donatelli, aye
Robert McCarthy, aye
Milton Masson, aye
Daniel Rathbun, aye
Donald Santarelli, aye

Certification

As General Counsel of the Legal Services Corporation, I hereby certify that a majority of the members of the Board of Directors of the Legal Services Corporation have approved closing the initial portion of the Board meeting to be held March 15, 1983, to discuss internal personnel procedures and personnel matters and litigation concerning the Corporation. I hereby certify that in my opinion the closing of this portion of the meeting is authorized by the Government in Sunshine Act, 5 U.S.C. 552b(c) (2), (6) and (10), and under the Legal Services Corporation relations, 45 CFR 1622.5 (a), (e) and (h).

Alan R. Swendiman,

General Counsel.

Dated: March 7, 1983.

PLACE:

Executive Session: Legal Services Corporation, 733 15th Street NW., Washington, D.C. 20005;
Public Portion: GSA Central Office Auditorium, 18th and F Streets NW., Washington, D.C.

TIME AND DATE: Executive Session: 9:30 a.m., Public Portion: 10:30 a.m., Tuesday, March 15, 1983.

MATTERS TO BE CONSIDERED:

1. Adoption of Agenda.
2. Election of Chairman and Vice Chairman.
3. Public Ratification of Meeting Closure/Report from Executive Session.
4. Approval of Minutes.
5. Organization of Committees.
6. Report from President—Hill Testimony.
7. Report from General Counsel/Approval of Final Lobbying Regulations.
8. Report from Office of Government Relations.
9. Report on Field Programs by Acting Director of Office of Field Services and Acting Director of Information Management.
10. Report from Comptroller:
   A. Budget Review/Modification.
   B. Appointment of Independent Accountants.
11. Adjournment.

CONTACT PERSON FOR MORE INFORMATION: LeaAnne Bernstein, Secretary of the Corporation, (202) 272–4040.

Dated: March 7, 1983.

Donald P. Bogard,

President.

PACIFIC NORTHWEST ELECTRIC POWER AND CONSERVATION PLANNING COUNCIL (Northwest Power Planning Council)

ACTION: Meeting notice.

STATUS: Open.

TIME AND DATE: At the conclusion of daytime session of scheduled public hearing (approximately 5 p.m.), March 14, 1983.

PLACE: North Shore Hotel, North Star Plaza, Coeur d'Alene, Idaho.

MATTERS TO BE CONSIDERED:

- Selection of Fish Propagation Panel members.
- Ratification of Council comments on responses to Bonneville Power Administration Notice of Program Interest.
- Ratification of Intergovernmental Agreement with Bonneville Power Administration.
- Approval of Council minutes.
- Council administrative matters.

FOR FURTHER INFORMATION CONTACT: Ms. Bess Wong (503) 222–5161.

Edward Sheets,

Executive Director.

Department of Transportation

Research and Special Programs Administration

Requirements for Transportation of Radioactive Materials

DEPARTMENT OF TRANSPORTATION

Research and Special Programs Administration

49 CFR Parts 171, 172, 173, 174, 175, 176, 177, and 178

[Docket No. HM-169; Amdt. Nos. 171-71, 172-78, 173-162, 174-42, 175-26, 176-15, 177-57, 178-75]

Requirements for Transportation of Radioactive Materials

AGENCY: Materials Transportation Bureau (MTB), Research and Special Programs Administration, DOT.

ACTION: Final rule.

SUMMARY: This final rule revises requirements of the Hazardous Materials Regulations concerning radioactive materials to make them compatible with the latest revised international standards for transport of radioactive materials as promulgated by the International Atomic Energy Agency (IAEA). A parallel amendment by the U.S. Nuclear Regulatory Commission (NRC), to Title 10 CFR Part 71, "Packaging of Radioactive Materials for Transport and Transportation of Radioactive Materials Under Certain Conditions" will be published in the Federal Register at a future date.

EFFECTIVE DATE: July 1, 1983, unless otherwise specified by the regulations adopted under this rulemaking, except for revised proper shipping names and identification numbers appearing in § 172.101 which may be used immediately, and except for §§ 173.415, 173.425 (b) and (c), 173.441(c), 173.477(b) and 173.478 (b) and (c) which contain information collection requirements which are under review at OMB. This effective date may be extended depending on the publication and effective date of corresponding amendments to 10 CFR, Part 71, by the Nuclear Regulatory Commission.

FOR FURTHER INFORMATION CONTACT: R. R. Rawl, Office of Hazardous Materials Regulation, Materials Transportation Bureau, U.S. Department of Transportation, 400 Seventh Street SW., Washington, D.C. 20590, Telephone (202) 426-2311.

SUPPLEMENTARY INFORMATION:

I. Background

In keeping with MTB's commitment to maintain harmony between the international and U.S. regulations for the transportation of hazardous materials, this docket changes the requirements pertaining to radioactive materials. These changes will ensure essential uniformity between the Hazardous Materials Regulations dealing with radioactive materials and the latest international regulations, the International Atomic Energy Agency's (IAEA) "Regulations for the Safe Transport of Radioactive Materials, Safety Series No. 6, 1973 Revised Edition (as amended)." Detailed information of the U.S. participation in the development of these international regulations was given in the preambulatory text of the notice of proposed rulemaking (NPRM) for this docket (44 FR 1852, January 8, 1979).

Since certain aspects of the transportation of radioactive materials are regulated by the NRC, changes in their regulations necessary to maintain compatibility will be published in the future in the Federal Register. Those changes to 10 CFR Part 71 will deal with Type B and fissile radioactive materials packages and NRC licensee requirements.

The NPRM for this docket contained several proposed requirements which met with substantial objection by the commenters. In some cases a review of the costs and safety benefits involved has resulted in either modification or deletion of the proposed requirement. In another case, a provision has been made to eliminate unnecessary duplicative requirements for import and export shipments which must meet both DOT and IAEA requirements.

II. Substantive Changes

The first four of the substantive changes adopted in this amendment follow closely the proposed requirements in the notice. The other substantive changes are either modified versions of the proposed requirements or are new. Any new changes included here have been determined to have a very positive effect on reducing the cost of complying with the regulations with no adverse effect on transportation safety.

A. Individualized Type A Quantities

The system by which radionuclides have been divided, for the purpose of specifying the number of curies permitted in Type A packages, into seven transport groups according to their radiotoxicity has been eliminated. Under the previous system, the allowable number of curies for each radionuclide in a group or radionuclides is the same as the allowable number of curies for the most restrictive radionuclide. In some cases the least restrictive nuclides have a maximum permissible body burden more than ten times that of the most radiotoxic members.

The amendments have deleted the concept of transport groups. Instead, for each radionuclide two values, A_1 and A_2, are assigned which represent the maximum number of curies pemitted in Type A packages in special form and normal form, respectively. The A_1 and A_2 values for various radionuclides are listed in § 173.435. Methods by which these values were established are described in IAEA Safety Series No. 37, "Advisory Material for the Application of the IAEA Transport Regulations."

The value of A_1 for special form material is based on the possible external radiation dose to individuals if the contents of the package are released, except that an upper limit of 1,000 curies is imposed. Under the revised regulations, special form material must also be nondispersible, as determined by certain stringent criteria (which differ somewhat from present criteria for special form) described in § 173.469.

The bases for the A_2 value for normal form material (that is, all forms other than special form) are: (1) an accident of moderate severity might release 0.1% of the contents of a Type A package, and 0.1% of the amount released might then be taken into the body of a human being in the vicinity; this intake should not exceed half the maximum permissible annual intake for workers as given in IAEA Safety Series No. 9, 1967 Edition; and (2) A_2 shall not exceed A_1. Intake values are based on International Commission on Radiological Protection (ICRP) 1966 recommended limits for radiation exposure. It is expected that the IAEA will be producing new A_1 and A_2 values based on the latest ICRP data and models and these will be published at a later date for comment.

This change will sometimes permit a single Type A package to replace two or more present packages. Also, some of the small Type B packages with contents near the lower limit for Type B could be reclassified as Type A. The net effect of this clarification is expected to be insignificant with respect to the number of Type A packages or the total amount of material in Type A packages.

For special form material, some limits are increased and some are decreased. As a result of a number of comments, the previously specified value has been retained for americium and plutonium contained in special form americium-beryllium or plutonium-beryllium neutron sources or in nuclear-powered pacemakers which will not be exported. There are a large number of special form sources in existence which were fabricated to the 20 curie limit and have been safely transported in Type A packages. It is believed that the expense involved in transporting these sources in Type B packages or replacing them with sources of lower content is not justified

in light of the marginal safety gains. Consequently, for domestic shipments the existing 20 curie limit is retained for these types of neutron sources. For import and export shipments, however, the IAEA limits, which are lower, have been adopted to foster compliance with the IAEA regulations which are applied in all other major countries. The exception for domestic special form neutron sources is found in § 173.435, footnote 1. Consequently, the changes in the number of such packages should be small.

B. Requirements for Special Form Radioactive Material

The qualification tests for special-form radioactive material have been modified, primarily by adding a bending test, providing more detailed instructions for the immersion or leaching procedure, and changing the maximum loss by leaching to 0.05 microcurie in each of two determinations rather than the present 0.005% by weight for a single determination. Long, slender objects are more likely to suffer bending under rough handling or accident conditions than are short or large-diameter objects. A minimum length of 10 centimeters and a minimum length-to-width ratio of 10 have been selected for application of the bending test. The leaching test specified by the IAEA regulations has been selected as suitable and should yield uniform results. An absolute amount of activity leached is better related to the hazard than is a fixed percentage of weight. Although 0.05 microcurie is much smaller than any of the A_1 quantities, in this case it is specified as a measure of the indispersibility and is equivalent to the maximum permissible nonfixed surface contamination on 500 square centimeters of a package surface.

Previous regulations required that "special form radioactive material" have either: (1) No dimension less than 0.5 millimeters, or (2) at least one dimension greater than 5 millimeters. It is now required that special form radioactive material must have at least one dimension not less than 5 millimeters. The first option has been removed because of the possible difficulty of identifying, for safe handling, an object as small as 0.5 millimeters in every dimension.

The proposed definition for special form would have required all encapsulations to be "so constructed that it can be opened only by destructive means." This phrase was intended to clarify the IAEA requirement which states that an encapsulation must be "so constructed that it can be opened only by destroying the capsule". Comments received indicated that IAEA wording was less subject to varying interpretations and so it has been incorporated in the definition of special form. Commenters pointed out some difficulties which would result from performing cutting and welding or brazing operations in the closed environment of a glove-box or hot cell, but these objections were not quantified to any degree and are routinely performed in certain industries. It was not established by the commenters that the proposed requirement could not be met or that it would be too costly to meet the requirement.

An option has been added to the requirements dealing with leak testing of special form capsules. The proposal only specified a leaching assessment method whereby the test specimen is immersed in water and stored in air with subsequent water immersion. The activity leached by the water immersion determines if the source is leakfree. As an option to this test, which takes over one week, a volumetric leak rate of 10^{-4} torr-liter/second for solids and 10^{-6} torr-liter/second for liquid and gaseous contents is specified as being equivalent to passing the leaching test. However, this volumetric leak test is only suitable for sources with an internal void volume of at least 0.10 milliliter and is restricted to these source designs. Providing this optional acceptance criteria allows the tester to utilize a number of different testing methods which are sensitive enough to detect volumetric leak rates of this magnitude.

A phase out period of two years has been provided in § 173.403(z) for special form capsule designs which are not requalified under the special form requirements in order to provide for the construction of additional capsules to existing designs. These capsules may continue to be transported to the end of their useful life. Two years following the effective date of this publication all new designs and all new construction must meet the current requirements.

C. Addition of Lead-201

In response to a petition for rulemaking by Diagnostic Isotopes, Inc., to the NRC, lead-201 (201-Pb) is added to the table of radionuclides found in § 173.435. The daughter radionuclide resulting from the decay of 201-Pb is thallium-201 which is useful in nuclear medicine and clinical diagnosis. The details of the calculations for the A_1 and A_2 values for 201-Pb are found in Appendix B of the Environmental Impact Appraisal of Changes to Radioactive Material Packaging and Transportation Regulations, prepared by the NRC.

D. Metrication

The metric system, as represented by the International System of Units (SI), has been employed to the extent practicable in the revised regulations. Rounded-off values of equivalents for the English system are given in parentheses, except in a few cases where the conversion seems unnecessary or inappropriate. In some cases conventional units have been retained to prevent the confusion which would result from using SI units which are used very little as of this date, e.g., the millirem is retained instead of converting to Sieverts.

E. Low Specific Activity (LSA) Materials and Low Level Solid (LLS) Materials

The proposed regulations for LSA and LLS were in accord with the 1973 IAEA regulations in many regards but would have imposed more stringent packaging requirements. Many commenters objected to the increased costs which would have been incurred in upgrading or phasing out many existing package designs. Several commenters were of the opinion that more stringent packaging requirements and the associated costs would not significantly improve the safety of these materials in transportation.

Additionally, the NRC, with MTB cooperation, is studying the regulatory requirements and basis for LSA and LLS materials. This study is addressing the hazards, packaging requirements and costs involved in shipping these materials.

The IAEA has proposed an extensive revision of the LSA and LLS requirements including the imposition of additional radiation level limitations and more stringent packaging. These proposals are not expected to be adopted before mid-1984.

As a result of these current activities concerning LSA, MTB believes that the most prudent course of action is to make no substantive changes in the LSA packaging requirements at this time. Subsequently, the packaging requirements and any other identified concerns pertaining to LSA will be addressed in a future rulemaking. Consequently, this HM-169 final rule is greatly simplified over its proposal as many LSA requirements which were proposed have been deleted including the LLS category and such defined terms as the "transport index for low specific activity material or low level solid material transported as a full load. . . ."

The definition of LSA materials has been modified since the transport group system of radionuclide classification has been replaced by the A_1/A_2 system. LSA materials which are not specifically listed by name are classified according to the A_2 value for the nuclide or nuclides present in the LSA. For uniform mixtures of nuclides the following formula will determine if the mixture is defined as LSA:

$$\frac{APG_1}{0.0001} + \frac{APG_2}{0.005} + \frac{APG_3}{0.3} < 1$$

Where:

APG_1 = the total activity per gram of material of all nuclides present with an A_2 value of less than 0.05 curie.

APG_2 = the total activity per gram of material of all nuclides present with an A_2 value of more than 0.05 but less than 1.0 curie.

APG_3 = the total activity per gram of material of all nuclides present with an A_2 value exceeding 1.0 curie.

If the above summation for a given uniform mixture is less than or equal to 1 then the mixture may be classified as LSA.

The breakpoint values of 0.05 and 1.0 curie have been chosen to maintain as closely as possible the results obtained using the old transport group system with those obtained under the A_1/A_2 system.

F. Empty Packaging

A modification has been made to the provisions for shipping radioactive materials packagings which have been emptied of contents but still contain some residual material. Previously, § 173.29(b) prescribed the conditions under which packages could be shipped as "empty." These requirements in many respects were the same as for "limited quantities," that is, no significant external contamination and no radiation levels exceeding 0.5 millirem per hour at the packaging surface. In keeping with the excepted nature of these empty packagings the total residual radioactivity with the packaging was not to exceed a limited quantity as previously specified in § 173.391(a).

This presented a serious problem to shippers of these packagings in that in many instances it is not practical to determine the exact amount of residual radioactive material in the packaging. This is particularly true when the internal contamination is a combination of removable and fixed contamination. The removable constituents can be quantified by smear or wipe sampling but the fixed contamination is extremely difficult to quantify accurately unless the exact radionuclide mix is known. Consequently, there were only a few instances when it was possible to ship packages as empty.

The IAEA has adopted criteria for empty packages which eliminate this problem, while still ensuring that these packages represent no significant hazard during transportation, by placing limits on the:

(1) Removable external surface contamination;

(2) Removable internal contamination; and,

(3) Radiation level at the external surface of the packaging.

These three controls make it unnecessary to limit the total radioactivity present per se. The removable contamination limits ensure safety in handling and limit consequences in the event the packaging is damaged or opened. The radiation level limits ensure that exposures are extremely low and effectively places a limit on the amount of fixed contamination that may be present.

MTB believes that the IAEA criteria, as adopted in § 173.427, will provide for the continued safe shipping of empty packagings while providing needed flexibility in making these shipments.

G. Import/Export Shipments

Section 171.12 has been revised to permit the shipment of radioactive materials packages, in international commerce, which conform with the IAEA "Regulations for the Safe Transport of Radioactive Materials, Safety Series No. 6, 1973 Revised Edition" (as amended) with certain restrictions. Prior to this amendment, such provisions were only available to packages not exceeding a Type A quantity, low specific activity radioactive materials, and non-fissile radioactive materials. Extending this authorization to fissile radioactive materials and shipments requiring a Type B packaging will greatly facilitate the through movement of these packages by reducing the administrative burden on shippers and carriers to comply with varying requirements between the U.S. and the international community, without a sacrifice in safety. However, certain requirements designed to aid in emergency response activities do remain—detailed shipping papers and placarding for "highway route controlled quantities" (see H., below) for example. In addition, for a shipper to qualify under this section its packages must be certified as being approved for use by the country of origin and foreign-designed packages must be revalidated or endorsed by MTB as is already required. This certification process addresses activity limits, authorized contents, suitability of package design, special handling controls, and other areas which focus on the acceptability of packages for shipment, thereby assuring their ability to safely contain radioactive materials in transport. The MTB revalidation procedure is being maintained in order to ensure essentially equivalent levels of safety between import shipments and domestic shipments. MTB believes that this change will not decrease safety in any way because many of the differences still existing between the 1973 IAEA regulations and this rulemaking result from the IAEA regulations being too restrictive or imposing what MTB believes to be unnecessary requirements. One example is large freight container placarding. The U.S. regulations require placarding only under the three conditions presented in § 172.504, Table 1. The IAEA requires large freight container labeling and placarding for all radioactive materials except for limited quantities. However, in cases like this it is believed that there is no detriment in displaying the labels and placards and the provisions of § 171.12 relieve a significant burden on the shipper who otherwise must add or remove placards and labels at the border. The other existing differences between the U.S. and IAEA regulations are of a similar nature and allowing import and export shipments to move with minimal delay and expense with no detrimental effect on safety is believed to be in the public interest.

H. Designation of Highway Route Controlled Quantities

The adoption of the A_1/A_2 system to replace the transport group system of classifying radionuclides has removed the basis on which the term "large quantity" (§ 173.389(b)) was defined. The term "large quantity" was originally used to: (1) designate quantities of radioactive materials which generate sufficient decay heat to warrant consideration of heat dissipation in the package design and approval; and (2) identify packages whose contents are sufficient to require supplemental operational controls such as periodic venting of pressure or use of an active cooling system. This concept was embodied in the 1961, 1964 and 1967 IAEA transport regulations. Consequently the term was still in the Hazardous Materials Regulations as a vestige of the earlier IAEA versions.

Present practice in the U.S. is that all Type B packages are approved for specified contents and are limited to these specific contents. Decay heat rejection is one of the considerations taken into account in approving the

contents for a package design. This is a superior approach to the earlier, somewhat arbitrary establishment of "across the board" large quantity designations because decay heat rejection is in fact a contents *and* package dependent consideration. For example, a relatively small heat source could be thermally degraded if the package was an extremely good insulator and did not allow the generated heat to be rejected. Current practice in the U.S. is in line with the current (1973) IAEA approach which is to consider heat removal in *all* Type B package approvals.

The use of operational controls is another concept which has essentially been abandoned in the U.S. as well as world-wide. Current practice is to require that the package itself be capable of maintaining its integrity and meeting the hypothetical accident conditions without human intervention.

As a result of the evolution of the package approval process over the last 15 years the concept of a "large quantity" package design is now superfluous as it pertains to Type B package designs, approvals, and contents limitations. Currently, all Type B package designs meet the criteria which were, at one time, required only for high activity content packages.

The only remaining use for the term "large quantity" has been as a result of Docket HM–164 (46 FR 5298, January 19, 1981) which established rules governing the highway routing of radioactive materials shipments. Any vehicle transporting a Type B package contining a "large quantity" of radioactive materials is subject to additional requirements including specific routing criteria. Obviously, some provisions must be made for the continuity of this rule, a fact that was noted at the time the HM–164 rule was proposed (See 45 FR 7152, January 31, 1980) as well as when the final HM–164 rule was published (See 46 FR 5298, January 19, 1981).

The MTB, in conjunction with the NRC, has selected new criteria based on the A_1/A_2 system which will duplicate the "large quantity" criteria as closely as practical. The criteria selected also reflect some of the IAEA criteria for determining which shipments shall be subjected to additional administrative controls. The following criteria determine whether a particular amount of radioactive material within a single package shall be subjected to the additional administrative controls required by the HM–164 rules:

(1) 3,000 × A_1 for special form material;

(2) 3,000 × A_2 for normal form material; or

(3) 30,000 curies, whichever is least.

For any particular radionuclide or mixture, these values correspond to 3,000 times the contents permitted in a Type A package, or in the case of nuclides with an A_1 or A_2 (as appropriate) value of more than 10 curies, a designation of 30,000 curies as the value. In order to make these values as easy to understand and use as possible, the term "highway route controlled quantity" has been adopted. MTB believes that the term avoids confusion with the previously used term "large quantity" which means different things to different people and which is now obsolete.

There are some differences between the old values for "large quantity" and the new values for "highway route controlled quantity." The most significant differences occur for special form materials and alpha-emitting transuranic elements. For most special form materials, the new values are higher than the old value of 5,000 curies. This reflects the fact that the new values are directly related to the radiation source strength rather than an "across-the-board" value based on decay heat generation. The majority of special form shipments which will be relieved from specific routing requirements are medical and industrial shipments of cobalt-60 and cesium-137 irradiation sources. These sources typically fall into the range of 5,000–10,000 curies and are used in a variety of medical and industrial applications where medium strength sources are needed. It should be noted that while these sources are of significant activity when compared to "normal form" values, special form materials are essentially nondispersible. The integrity of the sources is high since the capsules themselves must be capable of withstanding severe accident conditions (30 foot drop, 1,475°F heat, percussion and immersion). This provides what is essentially a "Type B within a Type B" package, thus ensuring an extremely high level of integrity. Of the 140 shipments reported to MTB by October 31, 1982, as required by § 173.22(c), 42 of these would be relieved from the HM–164 routing and reporting requirements. The MTB believes this is a justified reduction of costs and delays given the integrity of the materials and in some cases the time-critical nature of the shipments. It should be noted that no irradiated reactor fuel is expected to fall into this category and be relieved from these requirements.

For some normal form alpha-emitting nuclides the new A_2 values are lower than the old 20 curie limit for Transport Group I nuclides. There are 9 of these nuclides which will have lower highway route controlled quantities than before and some additional shipments of these materials would be subjected to the HM–164 requirements. Except for the thorium and plutonium nuclides, the affected nuclides which have lower values are not frequently shipped and the effect of lowering the values will be very small. For the thorium and plutonium isotopes, the result of the new values will also be small because these nuclides are generally shipped in mixtures which are very high in activity and will simply continue to be covered by HM–164 requirements or are in forms which are of such low specific activity that they are not covered under either the new or old criteria.

There are some shipments of normal form materials which have been reported to MTB which would be relieved from HM–164 requirements and these can be characterized as research related. These materials are generally mixtures destined for analysis or further research and generally fall into the range of 20 to 1,000 curies. The number of these shipments is low by virtue of their nature.

The MTB is convinced that the new highway route controlled quantities are superior to the old large quantity values for the purpose of HM–164 requirements. The new values more accurately reflect a uniform level of hazard for the contents. It is recognized that while some values will go higher and some will be lower, the net result will be a positive safety benefit and more accurately relates the package contents to the additional administrative controls imposed by HM–164.

III. Minor Changes

A. Marking of Limited Quantities and Devices

The Notice contained proposals concerning marking limited quantities and devices as required by the 1973 IAEA regulations. Several commenters objected to this, basically for two reasons:

(1) For limited quantities, the proposal that the packaging bear the marking "Radioactive" in such a manner as to be visible upon opening would require marking in several places since the shipper has no control over how the package is opened; and

(2) For radioactive devices, it is highly impractical to mark many devices (such as electron tubes) which contain minute amounts of radioactive material.

The MTB agrees with these comments and has removed the proposed marking

requirements for these materials, retaining the previously existing marking requirements (§ 173.391(a)) which are reasonable. Export or import shipments which need to comply with the 1973 IAEA regulations may be so marked and exported or imported in accordance with § 171.12(e).

B. DOT Specification 55 Packaging

As amended herein, the use of existing DOT Specification-55 (Spec 55) packages will be discontinued two years after the effective date of these amendments. As a result of prior rulemaking in Docket HM–111 (39 FR 45238), published on December 31, 1974, construction of Spec. 55 packages after March 31, 1975, has not been authorized. As was stated in the preamble to the notice of proposed rulemaking in Docket HM–111 (39 FR 29483, October 25, 1973), the Department announced its intention to phase out the Spec. 55 as a "limited Type B" packaging at some later date. Future use of such packagings two years after the effective date of this amendment to Part 173 will be contingent upon the user either requalifying the package design as a DOT Specification 7A (for Type A shipments), using the existing Specification 55's in conjunction with DOT Specification 20 WC or 21 WC wooden or wooden/steel outer packagings, or having the packaging approved by the NRC. This change from the proposal will still result in the phase out of Specification 55 packagings per se but will allow their continued use when requalified, reapproved, or used in conjunction with 20 WC and 21 WC outer packaging. The existence of these options significantly reduce the cost of this discontinuance and yet will ensure that the Spec 55's will meet the performance standards required of all other packages in order to ensure public safety.

C. DOT Specification 7A Packaging

Since the tests required for Specification 7A packagings are somewhat different than the previously required tests, a two year period has been established for shippers to adapt to the new test requirements.

Existing packagings may continue to be used as long as they will meet the previously existing Specification 7A test requirements. New packagings may be constructed to existing designs for a period of two years from the effective date of the amendment. The provisions allow for the continued use of existing packagings throughout their useful life and allows construction of new packagings to the "old" designs for two years.

Two years following the effective date of this publication all new packaging designs and all new packaging construction must meet the requirements of § 178.350 adopted herein and, consequently, the test requirements of § 173.465.

D. Labeling Requirements

In keeping with MTB's objective of simplifying and clarifying the regulations whenever possible, § 172.403 has been rewritten to include a table for use in determining the proper label to place on radioactive materials packages. The requirements pertaining to labeling have not been changed but the tabular presentation is believed to be an improvement over the previous text.

E. Redesignation of Subpart I in Part 173

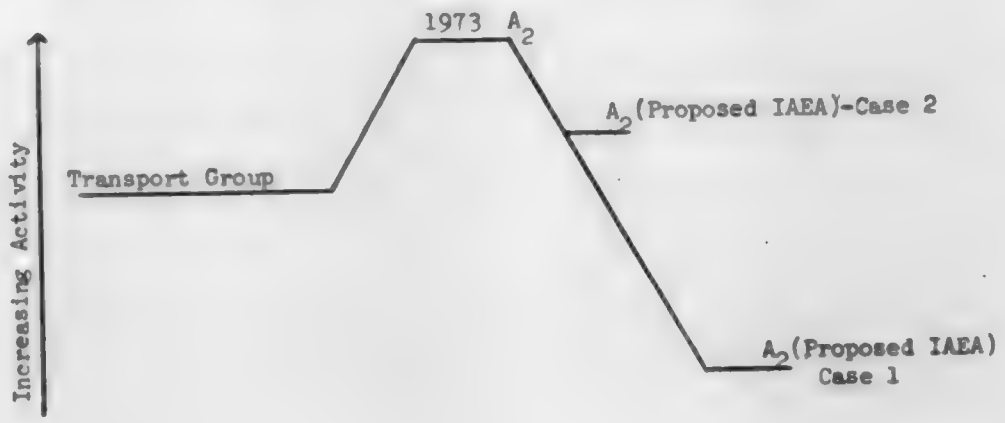
Although the notice of proposed rulemaking considered reissuance of the radioactive materials regulations in a new Part 127 it has subsequently been determined to retain these requirements in Part 173, but in a separately identified subpart. Subpart I is the most logical choice since the regulations pertaining to radioactive materials will retain their same relative position in the Hazardous Materials Regulations with respect to the other hazard classes, and since the Special Requirements for Certain Rail Shipments or Movements will have greater visibility in Subpart A. Consequently, §§ 173.426 and 173.432 are recodified at §§ 173.9 and 173.10, respectively. The heading of Subpart I is changed to read "Radioactive Materials."

F. Type A Limits for Certain Beta-Emitting Radionuclides

The IAEA, as part of its effort to maintain the continued adequacy of the regulations, has adopted a modified system for determining A_1 and A_2 values. This new system will be incorporated in the 1984 revision of the IAEA regulations which is being prepared. The system was adopted in principle by the IAEA at the March 1982, Advisory Group on the revision and it was subsequently refined by a special Working Group which met in August 1982. When the IAEA circulates the "3rd Draft" version of the regulations, DOT will be making it available and will seek public comment.

It has become apparent to MTB that the new system incorporates a radiological exposure pathway which has not been considered previously. This pathway involves consideration of the dose to the skin of a person contaminated with a radionuclide. For most radionuclides this is not a limiting pathway as other considerations in both the present and proposed systems are generally more limiting. Examples of the other more limiting considerations are radiation levels from unshielded material and internal pathways such as inhalation. For some beta-emitting nuclides, however, the contaminated skin consideration is limiting. In some cases the Type A limits calculated under the newly adopted system are significantly lower than the previously accepted A_2 values and some are even lower than the earlier Transport Group values.

The MTB believes that it cannot ignore the contribution that the contaminated skin consideration makes toward a complete system for calculating Type A values. This is particularly true for radionuclides which have high A_2 values under the 1973 IAEA regulations and would have considerably lower A_2 values under the new IAEA system due to their potential for significant dose to contaminated skin. Of the radionuclides which would have lower values under the new IAEA system, some have values below the old transport group values (case 1) and some have values between the old transport group and the 1973 IAEA values (case 2). These two cases can be represented graphically as:



The MTB believes that it is prudent to both accept this new pathway as necessary to provide a complete system for setting Type A values and to minimize unnecessary fluctuations in the Type A limits. While there is some uncertainty as to the exact values which will result from the final, accepted new IAEA system the MTB is confident that the values now available are conservative and will most probably not be lowered. Therefore, for those nuclides which are limited by the skin exposure pathway values have been selected as follows:

Case 1: The transport group values are adopted as the new A_2 values.

Case 2: The values now available are adopted in lieu of the 1973 IAEA values.

The radionuclides which are affected in case 1 are:

Ag-111	Nd-147	Sb-31
As-77	Nd-149	Sm-153
Au-198	Os-193	Te-127M
Cd-115	Pd-109	Te-127
Ce-143	Pm-149	Te-129
Dy-165	Pr-143	W-187
Er-171	Pt-197m	Zn-69m
Gd-159	Pt-197	Zn-69
In-115m	Re-186	
Mo-99	Sc-47	

The radionuclides which are affected in case 2 are:

Au-199	Eu-155	Rb-105
Br-77	Hf-181	Ru-103
C-14	Hg-203	S-35
Ca-45	I-133	Sb-125
Ce-141	In-111	Sr-89
Cl-36	Ir-192	Tb-160
Cs-134m	K-43	Tc-99
Cs-135	Lu-177	Te-129m
Cs-137	N-13	Th-231
Cu-64	Np-239	Tl-204
Cu-67	O_s-191	Tm-170
Er-169	Pm-147	W-185
Eu-152	Rb-81	Yb-175

In both cases the values adopted herein are no lower than the previously existing transport group values and yet are lower than the previously proposed 1973 IAEA A_2 values. For the radionuclides listed under case 1, the A_2 is set at the old limit of 20 curies as each nuclide was previously in transport group IV which had this limit. The nuclides listed in case 2 have been assigned the currently available values under the new IAEA system. These values are between the old transport group and the 1973 IAEA values. When the new IAEA system is fully implemented by the IAEA and the skin exposure pathway is taken into due account then MTB expects to complete the alignment of A_2 values between the U.S. and the IAEA.

IV. Classification of Rule; Reporting Requirements; and Impact on Small Entities

A. Non-major rule

The Materials Transportation Bureau has determined that this regulatory amendment is not a major rule under terms of Executive Order 12291 or significant under DOT regulatory procedures (44 FR 11034) and does not require a Regulatory Impact Analysis, nor does it require an environmental impact statement under the National Environmental Policy Act (42 U.S.C. 4321 et. seq.).

This determination is made on the basis that: (1) The final rule will have an annual effect on the economy not exceeding $100 million, (2) there will be no major increase in costs or prices for consumers, individual industries, Federal, State, or local governmental agencies, or geographic regions, and (3) it will not result in significant adverse effects on competition, employment, investment, productivity, innovation, or the ability of U.S.-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The Department has determined under Council of Environmental Quality guidelines not to prepare an environmental impact statement for the amendment herein.

Concurrently with the publication of this rulemaking document, the Department is making available in its Dockets Branch at the address indicated above, an "Environmental Impact Assessment of Changes to Radioactive Materials Transport Regulations" intended to support a negative declaration. This assessment was prepared by the U.S. Nuclear Regulatory Commission in support of its changes to 10 CFR Part 71 which are to be published in a subsequent issue of the **Federal Register**. Its analyses and conclusions are considered directly applicable to the proposals by the Department herein, in support of this negative declaration.

B. Paperwork Reduction Act

In accordance with the Paperwork Reduction Act of 1980 (P.L. 96–511), certain reporting or recordkeeping provisions that are included in this regulation have been submitted for approval to the Office of Management and Budget (OMB). They are not effective until OMB approval has been obtained and the public notified to that effect through a technical amendment to this regulation. Other information collection requirements contained in this regulation (§§ 173.471 (a), (d), and (f), 173.472 (b) and (e), 173.473(a), 173.476 (a) and (b), and 173.478(a)) have been approved by OMB and assigned control numbers indicated in the regulatory text of this document.

C. Impact on Small Entities

Based on limited information available concerning size and nature of entities likely to be affected, I certify that this amendment will not, as promulgated, have a significant economic impact on a substantial number of small entities. Small businesses potentially affected include manufacturers, distributors, carriers, and users of: (1) Radiopharmaceuticals; (2) measuring, detecting, and calibrating devices which employ radioactive materials; and (3) packagings specifically designed for use in the transportation of radioactive materials. The economic impact on such small entities will be minimal.

V. List of Subjects

49 CFR Part 171

Exports, hazardous materials transportation, Imports.

49 CFR Part 172

Hazardous materials transportation, Labeling.

49 CFR Part 173

Hazardous materials transportation, Packaging and containers.

49 CFR Part 174

Hazardous materials transportation, Railroad safety.

49 CFR Part 175

Hazardous materials transportation, Air carriers, Radioactive materials.

49 CFR Part 176

Hazardous materials transportation, Maritime carriers.

49 CFR Part 177

Hazardous materials transportation, Motor carriers.

49 CFR Part 178

Hazardous materials transportation, Packaging and containers.

In consideration of the foregoing, Parts 171, 172, 173, 174, 175, 176, 177, and 178 of Title 49, Code of Federal Regulations are amended as follows:

PART 171—GENERAL INFORMATION, REGULATIONS, AND DEFINITIONS

1. In § 171.7, paragraphs (c)(15), (d)(10) and (d)(11) are revised to read as follows, and paragraph (c)(25) is removed and reserved.

§ 171.7 Matter incorporated by reference.

* * * * *

(c) * * *

(15) IAEA: International Atomic Energy Agency, Wagramerstrasse 5, P.O. Box 100, A–1400, Vienna, Austria

* * *

* * * * *

(25) [Reserved]

* * * * *

(d) * * *

(10) IAEA "Regulations for the Safe Transport of Radioactive Materials, Safety Series No. 6, 1973 Revised Edition (as amended)."

(11) United States Nuclear Regulatory Commission (USNRC) 10 CFR Part 71, "Packaging of Radioactive Material for Transport and Transportation of Radioactive Material Under Certain Conditions."

* * * * *

2. In § 171.8, the entry for "full load" is removed, a definition for "IAEA" is added in its proper alphabetical sequence, and the following definitions are revised to read as follows:

§ 171.8 Definitions and abbreviations.

* * * * *

"IAEA" means International Atomic Energy Agency.

* * * * *

"Package" or "Outside Package" means a packaging plus its contents. For radioactive materials, see § 173.403 of this subchapter. "Packaging" means the assembly of one or more containers and any other components necessary to assure compliance with the minimum packaging requirements of this subchapter and includes containers (other than freight containers or overpacks), portable tanks, cargo tanks, tank cars, and multi-unit tank car tanks. For radioactive materials, see § 173.403 of this subchapter.

* * * * *

"Preferred route" or "Preferred highway" is a highway for shipment of "highway route controlled quantities" of radioactive materials so designated by a State routing agency, and any Interstate System highway for which an alternative highway has not been designated by such State agency as provided by § 177.825(b) of this subchapter.

* * * * *

"Radioactive materials" See § 173.403 of this subchapter for definitions relating to radioactive materials.

* * * * *

2a. In § 171.11, paragraph (d)(6)(ii), is amended by removing section reference "§ 173.393(b)" and inserting in its place "§ 173.471, 173.472 and 173.473"; paragraph (d)(6)(iii) is amended by removing section reference "173.393 (p)(q) and (r)(3)" and inserting in its place "173.448 (e)(f) and (g)(3)"; paragraph (d)(6)(iv) is amended by removing section reference "§ 173.391" and inserting in its place "§§ 173.421, 173.422 or 173.424, as appropriate"; and paragraph (d)(6)(v) is revised to read as follows:

§ 171.11 Use of ICAO Technical Instructions.

* * * * *

(d) * * *

(6) * * *

(v) Type A package contents shall be limited in accordance with § 173.431 of this subchapter.

* * * * *

3. In § 171.12, paragraph (e) is revised to read as follows:

§ 171.12 Import and export shipments.

* * * * *

(e) Radioactive materials being imported into or exported from the United States, or passing through the United States in the course of being shipped between places outside the United States, may be offered and accepted for transportation when packaged, marked, labeled and otherwise prepared for shipment in accordance with IAEA "Regulations for the Safe Transport of Radioactive Materials, Safety Series No. 6, 1973 Revised Edition (as amended)", if:

(1) The radioactive material is offered and accepted in accordance with the requirements of Subparts C and F of Part 172 of this subchapter pertaining to shipping papers and placarding;

(2) For fissile materials and Type B packages, the competent authority certifiction and any necessary revalidation is obtained from the appropriate competent authorites as specified in §§ 173.471, 173.472 and 173.473 of this subchapter; and all requirements of the certificates and revalidations are met;

(3) Type A package contents shall be limited in accordance with § 173.431 of this subchapter; and

(4) The country of origin for the shipment has adopted the IAEA "Regulations for the Safe Transport of Radioactive Materials, Safety Series No. 6, 1973 Revised Edition (as amended)."

PART 172—HAZARDOUS MATERIALS TABLES AND HAZARDOUS MATERIALS COMMUNICATIONS REGULATIONS

4. The Hazardous Materials Table to § 172.101 is amended as follows:

§ 172.101 Purpose and use of hazardous materials table.

* * * * *

§ 172.101 Hazardous Materials Table

(1)	(2)	(3)	(3A)	(4)	(5)		(6)		(7)

5. In § 172.203, paragraph (d)(1)(i) is amended by removing section reference "§ 173.390" and inserting in its place "§ 173.435"; paragraph (d)(1)(vi)(A) is amended by removing section reference "§ 173.396(a)" and inserting in its place "§ 173.453"; paragraph (d)(1)(vi)(B) is amended by removing section reference "§ 173.389(a)" and inserting in its place "§ 173.455"; paragraph (d)(1)(vii) is amended by removing the phrases "U.S. Energy Research and Development Administration (ERDA)" and "ERDA", and inserting in their appropriate place "U.S. Department of Energy (DOE)" and "DOE", and by removing section reference "§ 173.393a" and inserting in its place "§ 173.471"; paragraph (d)(1)(viii) is amended by removing section reference "§ 173.393b(a)(3)" and inserting in its place "§ 173.473"; paragraph (d)(1)(ix) is removed; and the last sentence of paragraph (d)(1)(iii) is amended to read as follows:

§ 172.203 Additional description requirements.

* * * * *

(d) * * *

(1) * * *

(iii) * * * For the shipment of a package containing a highway route controlled quantity of radioactive

materials (see § 173.403(1) of this subchapter), the words "Highway route controlled quantity" must be entered in association with the basic description.

* * * * *

§ 172.204 [Amended]

6. In § 172.204, paragraph (c)(4) is amended by removing section reference "§ 173.391(a)(b) or (c)" and inserting in its place "§§ 173.421, 173.422, 173.424."

§ 172.310 [Amended]

7. In § 172.310, paragraph (a)(2) is amended by removing section reference "§§ 173.389(j) and (k) and 173.398(b) and (c)" and inserting in its place "§ 173.403"; and paragraph (a)(3) is amended by removing section reference "§§ 173.393a and 173.393b" and inserting in its place §§ 173.471, 173.472, and 173.473."

8. In § 172.400, paragraph (b)(10) is revised to read as follows:

§ 172.400 General labeling requirements.

* * * * *

(b) * * *

(10) Package of low specific activity radioactive material, when being transported in a transport vehicle assigned for exclusive use of the consignor under § 173.425(b) of this subchapter.

* * * * *

9. In § 172.403, paragraph (a) is amended by removing section reference "§ 173.391 or § 173.392" and inserting in its place "§§ 173.421 through 173.425"; paragraph (g)(1) is amended by removing section reference "§ 173.390" and inserting in its place "§ 173.435"; paragraph (g)(2) is amended by removing the phrase "Number of curies" and inserting in its place "Activity"; paragraph (g)(3) is amended by removing the section reference "§ 173.389(i)" and inserting in its place "§ 173.403"; paragraph (d) is removed and reserved; and paragraphs (b) and (c) are revised to read as follows:

§ 172.403 Radioactive material.

* * * * *

(b) The proper label to affix to a package of radioactive material is based on the radiation level at the surface of the package, the transport index (§ 173.403 of this subchapter) and, if appropriate, the fissile characteristics of the package. The proper category of label shall be determined in accordance with paragraph (c) of this section. The label to be applied shall be the highest category required for any of the three determining conditions for the package. Radioactive White-I is the lowest category and Radioactive Yellow-III is the highest. For example: a package with a transport index of 0.8 and a maximum surface radiation level of 60 millirem per hour which contains no fissile material must bear a Radioactive Yellow-III label.

(c) Category of Label to be Applied to Radioactive Materials Packages:

Transport index (T.I.)	Radiation level at package surface (RL)	Fissile criteria	Label category.[1]
T.I. = 0	RL ≤ 0.5 millirem per hour [mrem/h]	Fissile class I only, no fissile class II or III.	White-I.
T.I. ≤ 1.0	0.5 mrem/h < RL ≤ 50	Fissile class I, fissile class II, with T.I. ≤ 1.0, no fissile class III.	Yellow-II.
1.0 < T.I.	50 mrem/h < RL	Fissile class II with 1.0 < T.I., fissile class III.	Yellow-III.

[1] Any package containing a "highway route controlled quantity" (§ 173.403 of this subchapter) must be labeled as Radioactive Yellow-III.

(d) [Reserved]

* * * * *

§ 172.504 [Amended]

10. In § 172.504, footnote 5 to Table 1 is amended by removing section reference "§§ 173.389(c) and 173.389(o)" and inserting in its place "§ 173.403", and by removing section reference "§ 173.392(b)" and inserting in its place "§ 173.425(b)".

10a. Section 172.507 is revised to read as follows:

§ 172.507 Special placarding provisions: Highway.

Each motor vehicle used to transport a package of highway route controlled quantity radioactive materials (see § 173.403(l) of this subchapter) must have the required RADIOACTIVE warning placard placed on a square background as described in § 172.527.

§ 172.510 [Amended]

10b. In § 172.510, paragraph (d) is amended by removing section reference "173.426" and inserting, in its place, "173.9".

§ 172.527 [Amended]

10c. In § 172.527, paragraph (a) is amended by removing the term "large quantity" and inserting in its place "highway route controlled quantity".

PART 173—SHIPPERS—GENERAL REQUIREMENTS FOR SHIPMENTS AND PACKAGINGS

§ 173.7 [Amended]

10d. In §173.7, paragraph (d) is amended by removing section reference "§§ 173.393a and 173.394 through 173.396" and inserting in its place, "§§ 173.416 and 173.417".

§ 173.22 [Amended]

10e. In § 173.22, paragraph (c) is amended by removing the phrase "large quantity packages of radioactive material (see § 173.389 of this subchapter)" and inserting in its place "highway route controlled quantity packages of radioactive materials (see § 173.403)"; and paragraph (d) is amended by removing the phrase "large quantity of radioactive material (see § 173.389(b))" and inserting in its place "highway route controlled quantity of radioactive material (see § 173.403(1))".

§ 173.29 [Amended]

11. In § 173.29, paragraph (b) is removed and reserved.

§ 173.121 [Amended]

11a. In § 173.121, paragraph (a)(6) is amended by removing section reference "173.432" and inserting in its place "173.10."

§ 173.123 [Amended]

11b. In § 173.123, paragraph (a)(5) is amended by removing section reference "173.432" and inserting in its place "173.10".

§ 173.226 [Reserved]

12. Section 173.226 is removed and reserved.

§ 173.389 through 173.398 [Reserved]

13. Sections 173.389 through 173.398 are removed and reserved.

§ 173.9 [Redesignated from § 173.426]

13a. Section 173.426 is transferred to Subpart A and redesignated as § 173.9.

§ 173.10 [Redesignated from § 173.432]

13b. Section 173.432 is transferred to Subpart A and redesignated as § 173.10.

14. Subpart I is revised to read as follows:

Subpart I—Radioactive Materials

Sec.

173.401 Scope.
173.403 Definitions.
173.411 General design requirements.
173.412 Additional design requirements for Type A packages.
173.413 Requirements for Type B packages.
173.415 Authorized Type A packages.
173.416 Authorized Type B packages.
173.417 Authorized packaging—fissile materials.
173.418 Authorized packaging—pyrophoric radioactive materials.
173.419 Authorized packaging—oxidizing radioactive materials.
173.421 Limited quantities of radioactive materials.

Sec.
173.422 Exceptions for instruments and articles.
173.423 Table of activity limits—excepted quantities and devices.
173.424 Excepted article containing natural uranium or thorium.
173.425 Transport requirements for low specific activity (LSA) radioactive materials.
173.427 Empty radioactive materials packaging.
173.431 Activity limits for Type A and Type B packages.
173.433 Requirements for determination of A_1 and A_2 values for radionuclides.
173.435 Table of A_1 and A_2 values for radionuclides.
173.441 Radiation level limitations.
173.442 Thermal limitations.
173.443 Contamination control.
173.444 Labeling requirements.
173.446 Placarding requirements.
173.447 Storage incident to transportation—general requirements.
173.448 General transportation requirements.
173.451 Fissile materials—general requirements.
173.453 Fissile materials—exceptions.
173.455 Classification of fissile materials packages.
173.457 Transportation of Fissile Class III shipments—specific requirements.
173.459 Mixing of fissile material packages.
173.461 Demonstration of compliance with tests.
173.462 Preparation of specimens for testing.
173.463 Packaging and shielding—testing for integrity.
173.465 Tests for proposed packagings designed for normal conditions of transportation.
173.466 Additional tests for Type A packagings designed for liquids and gases.
173.467 Tests for demonstrating the ability of Type B and fissile radioactive materials packagings to withstand accident conditions in transportation.
173.469 Tests for special form radioactive materials.
173.471 Requirements for U.S. Nuclear Regulatory Commission approved packages.
173.472 Requirements for exporting DOT specification Type B and fissile packages.
173.473 Requirements for foreign-made packages.
173.474 Quality control for construction of packaging.
173.475 Quality control requirements prior to each shipment of radioactive materials.
173.476 Approval of special form radioactive materials.
173.477 Approval for export shipments.
173.478 Notification to competent authorities for export shipments.

Subpart I—Radioactive Materials

§ 173.401 Scope.

(a) This subpart sets forth requirements for the transportation of radioactive materials by carriers and shippers subject to this subchapter. The requirements prescribed in this subpart are in addition to, but not in lieu of, other requirements set forth in this subchapter and in 10 CFR Part 71 for the packaging and transportation of radioactive materials.

(b) This subpart does not apply to—

(1) Radioactive materials produced, used, transported, or stored within an establishment other than during the course of transportation.

(2) Radioactive materials contained in a medical device, such as a heart pacemaker, which is implanted in a human being or live animal.

(3) Radiopharmaceuticals that have been injected into, or ingested by, and are still in human beings or live animals.

§ 173.403 Definitions.

In this subpart:

(a) "A_1" means the maximum activity of special form radioactive material permitted in a Type A package.

(b) "A_2" means the maximum activity of radioactive material, other than special form or low specific activity radioactive material, permitted in a Type A package. These values are either listed in § 173.435 or may be derived in accordance with the procedure prescribed in § 173.433.

(c) "Closed transport vehicle" means a vehicle equipped with a securely attached exterior enclosure that during normal transportation restricts the access of authorized persons to the cargo space containing the radioactive materials. The enclosure may be either temporary or permanent, and in the case of packaged materials may be of the "see-through" type, and must limit access from top, sides, and ends.

(d) "Containment system" means the components of the packaging intended to retain the radioactive contents during transportation.

(e) "Conveyance" means any vehicle, aircraft, vessel, freight container, or hold, compartment or defined deck area of an inland waterway craft or seagoing vessel.

(f) "Depleted uranium" means uranium containing less uranium-235 than the naturally occurring distribution of uranium isotopes.

(g) "Design" means the description of a special form material, a package, or a packaging, that enables those items to be fully identified. The description may include specifications, engineering drawings, reports showing compliance with regulatory requirements, and other relevent documentation.

(h) "Enriched uranium" means uranium containing more uranium-235 than the naturally occurring distribution of uranium isotopes.

(i) "Exclusive use" (also referred to in other regulations as "sole use" or "full load") means the sole use of a conveyance by a single consignor and for which all initial, intermediate, and final loading and unloading are carried out in accordance with the direction of the consignor or consignee.

(j) "Fissile material" means any material consisting of or containing one or more fissile radionuclides. Fissile radionuclides are plutonium-238, plutonium-239, plutonium-241, uranium-233 and uranium-235. Neither natural nor depleted uranium are fissile material. Fissile materials are classified according to the controls needed to provide nuclear criticality safety during transportation, as provided in § 173.455. Certain exclusions are provided in § 173.453.

(k) "Freight container" means a reusable container having a volume of 1.81 cubic meters (64 cubic feet) or more, designed and constructed to permit being lifted with its contents intact and intended primarily for containment of packages in unit form during transportation. A small freight container is one which has either one outer dimension less than 1.5 meters (4.9 feet) or an internal volume of not more than 3.0 cubic meters (106 cubic feet). All other are designated as "large freight containers."

(l) "Highway route controlled quantity" means a quantity within a single package which exceeds:

(1) 3000 times the A_1 value of the radionuclides as specified in § 173.433 for special form radioactive material;

(2) 3000 times the A_2 value of the radionuclides as specified in § 173.433 for special form radioactive material; or

(3) 30,000 curies, whichever is least.

(m) "Limited quantity of radioactive materials" means a quantity of radioactive material not exceeding the limits given in § 173.423.

(n) "Low specific activity material (LSA)" means any of the following:

(1) Uranium or thorium ores and physical or chemical concentrates of those ores.

(2) Unirradiated natural or depleted uranium or unirradiated natural thorium.

(3) Tritium oxide in aqueous solutions provided the concentration does not exceed 5.0 millicuries per milliliter.

(4) Material in which the radioactivity is essentially uniformly distributed and in which the estimated average concentration per gram of contents does not exceed:

(i) 0.0001 millicurie of radionuclides for which the A_2 quantity is not more than .05 curie;

(ii) 0.005 millicurie of radionuclides for which the A_s quantity is more than .05 curie, but not more than 1 curie; or

(iii) 0.3 millicurie of radionuclides for which the A_s quantity is more than 1 curie.

(5) Objects of nonradioactive material externally contaminated with radioactive material, provided that the radioactive material is not readily dispersible and the surface contamination, when averaged over an area of 1 square meter, does not exceed 0.0001 millicurie (220,000 disintegrations per minute) per square centimeter of radionuclides for which the A_s quantity is not more than .05 curie, or 0.0001 millicurie (2,200,000 disintegrations per minute) per square centimeter for other radionuclides.

(o) "Multilateral approval" means approval by both the appropriate competent authority of the country of origin and of each country through or into which the shipment is to be transported. This definition does not imply approval from countries over which radioactive materials are carried in aircraft, if there is no scheduled stop in that country.

(p) "Natural thorium" means thorium with the naturally occuring distribution of thorium isotopes (essentially 100 weight percent thorium-232).

(q) "Natural uranium" means uranium with the naturally occuring distribution of uranium isotopes (approximately 0.711 weight percent uranium-235 and the remainder essentially uranium-238).

(r) "Non-fixed radioactive contamination" means radioactive contamination that can be readily removed from a surface by wiping with an absorbent material. Non-fixed (removable) radioactive contamination is not significant if it does not exceed the limits specified in § 173.443.

(s) "Normal form radioactive material" means radioactive material which has not been demonstrated to qualify as "special form radioactive material."

(t) "Package" means, for radioactive materials, the packaging together with its radioactive contents as presented for transport.

(u) "Packaging" means, for radioactive materials, the assembly of components necessary to ensure compliance with the packaging requirements of this subpart. It may consist of one or more receptacles, absorbent materials, spacing structures, thermal insulation, radiation shielding, and devices for cooling or absorbing mechanical shocks. The vehicle, tie-down system, and auxiliary equipment may sometimes be designated as part of the packaging.

(v) "Radiation level" means the radiation dose-equivalent rate expressed in millirem per hour (mrem/h). Neutron flux densities may be converted into radiation levels according to Table 1:

TABLE 1.—NEUTRON FLUX DENSITIES TO BE REGARDED AS EQUIVALENT TO A RADIATION LEVEL OF 1 MILLIREM PER HOUR (MREM/H)[1]

Energy of neutron	Flux density equivalent to 1 mrem/h (Neutrons per square centimeter per second(n/cm²/s))
Thermal	[illegible]
5 keV	220.0
[illegible]keV	112.0
100 keV	32.0
500 keV	16.0
1 MeV	7.2
5 MeV	7.2
10 MeV	6.8

[1] Flux densities equivalent for energies between those listed above may be obtained by linear interpolation.

(w) "Radioactive article" means any manufactured device such as an instrument, clock, electronic tube or apparatus, or similar device having radioactive material as a component part.

(x) "Radioactive contents" means the radioactive material, together with any contaminated liquids or gases, within the package.

(y)"Radioactive material" means any material having a specific activity greater than 0.002 microcuries per gram (uCi/g)(see definition of "specific activity").

(z) "Special form radioactive material" means radioactive material which satisfies the following conditions:

(1) It is either a single solid piece or is contained in a sealed capsule that can be opened only by destroying the capsule;

(2) The piece or capsule has at least one dimension not less than 5 millimeters (0.197 inch); and

(3) It satisfies the test requirements of § 173.469. Special form encapsulations designed in accordance with the requirements of § 173.389(g) in effect on June 30, 1983, and constructed prior to July 1, 1985 may continue to be used. Special form encapsulations either designed or constructed after June 30, 1985 must meet the requirements of this paragraph.

(aa) "Specific activity" of a radionuclide, means the activity of the radionuclide per unit mass of that nuclide. The specific activity of a material in which the radionuclide is essentially uniformly distributed is the activity per unit mass of the material.

(bb) "Transport index" means the dimensionless number (rounded up to the first decimal place) placed on the label of a package to designate the degree of control to be exercised by the carrier during transportation. The transport index is determined as follows:

(1) The number expressing the maximum radiation level in millirem per hour at one meter (3.3 feet) from the external surface of the package; or

(2) For Fissile Class II packages or packages in a Fissile Class III shipment, the number expressing the maximum radiation level at one meter (3.3 feet) from the external surface of the package, or the number obtained by dividing 50 by the allowable number of packages which may be transported together, whichever is larger.

(cc) "Type A package" means a Type A packaging together with its limited radioactive contents. A Type A package does not require competent authority approval, since its contents are limited to A_1 or A_2.

(dd) "Type B package" means a Type B packaging together with its radioactive contents.

(ee) "Type B(M)" means a Type B packaging, together with its radioactive contents, that for international shipments requires multilateral approval of the package design, and may require approval of the conditions of shipment. Type B(M) packages are those Type B package designs which have a maximum normal operating pressure of more than 7 kilograms per square centimeter (100 pounds per square inch) gauge or a relief device which would allow the release of radioactive material to the environment under the hypothetical accident conditions specified in 10 CFR Part 71.

(ff) "Type B(U) package" means a Type B packaging, together with its radioactive contents, that for international shipments, requires unilateral approval only of the package design and of any stowage provisions that may be necessary for heat dissipation.

(gg) "Type A packaging" means a packaging designed to retain the integrity of containment and shielding required by this part under normal conditions of transport as demonstrated by the tests set forth in §§ 173.465 or 173.466, as appropriate.

(hh) "Type B packaging" means a packaging designed to retain the integrity of containment and shielding required by this part when subjected to the normal conditions of transport and hypothetical accident test conditions set forth in 10 CFR Part 71.

(ii) "Uncompressed gas" means, for the purposes of this subpart, gas at a pressure not exceeding the ambient

atmospheric pressure at the time and location the containment system is closed. All other radioactive gases are considered to be compressed.

(jj) "Unilateral approval" means approval by the competent authority of the country of origin only.

(kk) "Unirradiated thorium" means thorium containing not more than 10^{-7} grams uranium-233 per gram of thorium-232.

(ll) "Unirradiated uranium" means uranium containing not more than 10^{-6} grams plutonium per gram of uranium-235 and a fission product activity of not more than 0.25 millicuries of fission products per gram of uranium-235.

§ 173.411 General design requirements.

Except for a package that contains a limited quantity or excepted device under §§ 173.421 through 173.424, each package used for shipment of radioactive materials shall be designed so that—

(a) The package can be easily handled and properly secured in or on a conveyance during transport;

(b) A package with a gross weight exceeding 10 kilograms [22 pounds) and up to 50 kilograms [110 pounds) has a means for manual handling;

(c) A package with a gross weight of 50 kilograms (110 pounds) or more can be safely handled by mechanical means;

(d) Each lifting attachment on the package, when used in the intended manner, with a minimum safety factor of three, does not impose an unsafe stress on the structure of the package. In addition, the lifting attachment shall be so designed that failure under excessive load would not impair the ability of the package to meet all other requirements of this subpart. Each attachment or other feature on the outer surface of the packaging that could be used to lift the package must be removable or otherwise capable of being made inoperable for transport, or shall be designed with strength equivalent to that required for lifting attachments;

(e) The external surface, as far as practicable, may be easily decontaminated;

(f) The outer layer of packaging will avoid, as far as practicable, pockets or crevices where water might collect; and

(g) Each feature that is added to the package at the time of transport, and that is not a part of the package, will not reduce the safety of the package.

§ 173.412 Additional design requirements for Type A packages.

In addition to meeting the general design requirements prescribed in § 173.411, each Type A packaging shall be designed so that:

(a) The smallest overall external dimension of the package is not less than 10 centimeters (4 inches);

(b) The outside of the packaging incorporates a feature, such as a seal, that is not readily breakable, and that, while intact, is evidence that the package has not been opened. In the case of packages shipped in exclusive use closed transport vehicles, the cargo compartment may be sealed instead of the individual packages;

(c) As far as practicable, the external surfaces are free from protrusions and are designed and finished so that they can be easily decontaminated;

(d) Containment and shielding would be maintained during transportation and storage in a temperature range of −40°C (−40°F) to 70°C (158°F) with account being taken of the possibility of brittle fracture;

(e) It is able to withstand the effects of any acceleration, vibration, or vibration resonance that may arise during normal transportation, without any deterioration of the effectiveness of closing devices or of the integrity of the package as a whole and without loosening or unintentional release of nuts, bolts, or other securing devices even after repeated use;

(f) It includes a containment system securely closed by a positive fastening device that cannot be opened unintentionally or by pressure that may arise within the package during normal transport. Special form, as demonstrated in accordance with § 173.469 may be considered as a component of the containment system;

(g) The materials of the packaging and any components or structures are physically and chemically compatible with each other and with the contents, taking into account the behavior of each under irradiation;

(h) For each component of the containment system account is taken, where applicable, of radiolytic decomposition of materials and the generation of gas by chemical reaction and radiolysis;

(i) The containment system will retain its radioactive contents under the reduction of ambient pressure to .25 kilograms per square centimeter [3.5 pounds per square inch);

(j) Each valve through which the radioactive contents could otherwise escape is protected against damage and unauthorized operation and, except for a pressure relief device, has an enclosure to retain any leakage;

(k) Any radiation shield that encloses a component of the packaging specified as part of the containment system will prevent the unintentional escape of that component from the shield;

(l) Failure of any tie down attachment on the packaging under excessive load will not impair the ability of the package to meet other requirements of this subpart;

(m) When subjected to the tests specified in § 173.465 or evaluated against these tests by any of the methods authorized by § 173.461(a), the packaging will prevent—

(1) Loss or dispersal of the radioactive contents; and

(2) Any significant increase in the maximum radiation level recorded or calculated at the external surface for the condition before the test;

(n) Each packaging designed for liquids will—

(1) Meet the conditions prescribed in paragraph (m) of this section when subjected to the tests specified in § 173.465 or evaluated against these tests by any of the methods authorized by § 173.461(a);

(2) For any package with a liquid volume not exceeding 50 cubic centimeters (1.7 fluid ounces), have sufficient suitable absorbent material to absorb twice the volume of the liquid contents. The absorbent material shall be compatible with the package contents and suitably positioned to contact the liquid in the event of leakage; and

(3) For any package with a liquid volume exceeding 50 cubic centimeters (1.7 fluid ounces), either;

(i) Have sufficient absorbent material as prescribed in paragraph (n)(2) of this section; or

(ii) Have a containment system composed of primary inner and secondary outer containment components designed to assure retention of the liquid contents within the secondary outer components in the event that the primary inner components leak; and

(o) Each package designed for compressed or uncompressed gases other than tritium or argon-37 not exceeding 200 curies will be able to prevent loss of contents when the package is subjected to the tests prescribed in § 173.465 or evaluated against these tests by any of the methods authorized by § 173.461(a).

§ 173.413 Requirements for Type B packages.

Each Type B(U) or Type B(M) package must be designed and constructed to meet the applicable requirements in 10 CFR Part 71.

§ 173.415 Authorized Type A packages.

The following packages are authorized for shipment, if they do not

contain quantities exceeding A_1 or A_2 as appropriate:

(a) U.S. Department of Transportation (DOT) Specification 7A (§ 178.350 of this subchapter) Type A general packaging. Each shipper of a Specification 7A package must maintain on file for at least one year after the latest shipment, and shall provide to DOT on request, a complete documentation of tests and an engineering evaluation or comparative data showing that the construction methods, packaging design, and materials of construction comply with that specification. Specification 7A packagings designed in accordance with the requirements of § 178.350 in effect on June 30, 1983, and constructed prior to July 1, 1985, may continue to be used. Packagings either designed or constructed after June 30, 1985, must meet the requirements of § 178.350 applicable at the time of their design or construction.

(b) DOT Specification 55 metal-encased shielded packaging constructed before April 1, 1975. Such packaging constructed after March 31, 1975 is not authorized unless it is requalified under DOT Specification 7A. Each packaging designed for liquids must also meet the requirements of § 173.412 (m) and (n). Use of this packaging as DOT Specification 55 is not authorized after June 30, 1985.

(c) Any Type B(U) or B(M) packaging, pursuant to § 173.416.

(d) Any foreign made packaging that bears the marking "Type A" and complies with the regulations of the country of origin applicable to Type A packages.

§ 173.416 Authorized Type B packages.

Each of the following packages is authorized for shipment of quantities exceeding A_1 or A_2, as appropriate:

(a) DOT Specification 55 metal-encased shielded packaging constructed before April 1, 1975, for domestic shipments only of special form radioactive materials of 300 curies or less. Such packaging constructed after March 31, 1975 may not be designated as DOT Specification 55. Use of this packaging is not authorized after June 30, 1985 unless approved in accordance with paragraph (b) of this section.

(b) Any Type B(U) or Type B(M) packaging that meets the applicable requirements in the regulations of the U.S. Nuclear Regulatory Commission (10 CFR Part 71) and that has been approved by that Commission may be shipped pursuant to § 173.471.

(c) Any type B(U) or B(M) packaging that meets the applicable requirements of the regulations of the International Atomic Energy Agency (IAEA) in its "Regulations for the Safe Transport of Radioactive Materials, Safety Series No. 6; 1973 Revised Edition (as amended)" and for which the foreign competent authority certificate has been revalidated by DOT pursuant to § 173.472. Authorized only for export and import shipments.

(d) DOT Specification 6M (§ 178.104 of this subchapter) metal packaging, only for solid or gaseous radioactive materials that will not undergo pressure generating decomposition at temperatures up to 121°C (250° F) and that do not generate more than 10 watts of radioactive decay heat.

(e) For contents in other than special form; DOT Specification 20 WC (§ 178.194 of this subchapter), wooden protective jacket, when used with a single, snug-fitting inner DOT Specification 2R (§ 178.34 of this subchapter), or a DOT Specification 55 container constructed prior to April 1, 1975. Such packagings constructed after March 31, 1975, may not be designated as DOT Specification 55. For liquid contents, the inner packaging must comply with § 173.412 (m) and (n).

(f) For contents in special form only; DOT Specification 20WC (§ 178.194 of this subchapter), wooden protective jacket, with a single snug-fitting inner Type A packaging that has a metal outer wall and conforms to § 178.350 of this subchapter, or an inner DOT Specification 55 packaging constructed prior to April 1, 1975. Such packagings constructed after March 31, 1975, may not be designated as DOT Specification 55. Radioactive decay heat may not exceed 100 watts.

(g) For contents in special form only; DOT Specification 21WC (§ 178.195 of this subchapter), wooden protective overpack, with a single inner DOT Specification 2R (§ 178.34 of this subchapter) or an inner DOT Specification 55 container constructed prior to April 1, 1975. Such packagings constructed after March 31, 1975, may not be designated as DOT Specification 55. Contents shall be loaded within the inner packaging in such a manner as to prevent loose movement during transportation. The inner packaging shall be securely positioned and centered within the overpack so that there will be no significant displacement of the inner packaging if subjected to the 9 meter (30 feet) drop test described in 10 CFR Part 71.

§ 173.417 Authorized packaging—Fissile materials.

(a) Except as provided in § 173.453, fissile materials containing not more than A_1 or A_2 as appropriate, shall be packaged in one of the following packagings:

(1) DOT Specification 6L (§ 178.103 of this subchapter), metal packaging, for materials prescribed in paragraph (b)(1) of this section.

(2) DOT Specification 6M (§ 178.104 of this subchapter), metal packaging, for materials prescribed in paragraph (b)(2) of this section.

(3) Any packaging listed in § 173.415, limited to the following radioactive materials:

(i) 500 grams of uranium-235 in a single shipment as Fissile Class III or not more than 40 grams of uranium-235 per package as Fissile Class II. For Fissile Class II shipments, the transport index assigned to each package shall not be less than 0.4 for each gram of uranium-235 above 15 grams up to the maximum of 40 grams (transport index of 10).

(ii) 320 grams of plutonium-239 as plutonium-beryllium neutron sources in special form. Total radioactivity content may not exceed 20 curies. The transport index to be assigned to each package must be 0.5 of each 20 grams, or fraction thereof, of fissile plutonium.

(4) Any other Type A or Type B packaging for fissile radioactive materials that also meets the applicable standards for fissile materials in the regulations of the U.S. Nuclear Regulatory Commission (10 CFR Part 71), and is used in accordance with § 173.471.

(5) Any other Type A or Type B packaging that also meets the applicable requirements for fissile material packaging in Section VI of the International Atomic Energy Agency "Regulations for the Safe Transport of Radioactive Materials, Safety Series No. 6, 1973 Revised Edition (as amended)", and for which the foreign competent authority certificate has been revalidated by the Associate Director for HMR, in accordance with § 173.472. Authorized only for export and import shipments.

(6) A DOT Specification 6J (§ 178.100 of this subchapter) or 17H (§ 178.118 of this subchapter) 55-gallon steel drum, subject to the following conditions:

(i) The quantity may not exceed 350 grams of uranium-235 in any non-pyrophoric form, enriched to any degree in the uranium-235 isotope.

(ii) Each drum must have a minimum 18 gauge body and bottom head and 16 gauge removable top head with one or more corrugations in the cover near the periphery.

(iii) Closure must conform to § 178.103–5(a) of this subchapter.

(iv) At least four equally spaced 12 millimeter (0.5 inch) diameter vent holes shall be provided on the sides of the drum near the top, each covered with weatherproof tape or equivalent device.

(v) Appropriate primary inner containment of the contents and sufficient packaging material, such as plastic or metal jars or cans shall be provided such that Specification 7A (§ 173.350 of this subchapter) provisions are satisfied by the inner packaging.

(vi) Each inner container shall be capable of venting if subjected to the thermal test described in 10 CFR Part 71.

(vii) Liquid contents shall be packaged in accordance with § 173.412(m) and (n).

(viii) The maximum weight of contents including internal packaging may not exceed 91 kilograms (200 pounds) with fissile material content limited as shown in Table 2:

TABLE 2.—FISSILE MATERIAL CONTENT AND TRANSPORT INDEX FOR SPECIFICATION 6J OR 17H PACKAGES

Maximum U-235 per package (grams)	Minimum transport index per package as Fissile Class II	Maximum packages per transport vehicle as Fissile Class III
350	1.8	72
300	1.0	129
250	0.5	256
200	0.3	500
150	0.1	500
100	0.1	500
50	(1)	(1)

[1] Fissile Class I.

(7) Any metal cylinder that meets the performance requirements of §§ 173.415 and 178.350 of this subchapter for Specification 7A Type A packaging may be used as a Fissile Class I package for the transport of residual "heels" of enriched solid uranium hexafluoride without a protective overpack in accordance with Table 3:

TABLE 3.—ALLOWABLE CONTENT OF URANIUM HEXAFLUORIDE (UF_6) "HEELS" IN A SPECIFICATION 7A CYLINDER

Maximum cylinder diameter		Cylinder volume		Maximum Uranium-235 enrichment (weight percent)	Maximum "heel" weight per cylinder			
					UF_6		Uranium-235	
Inches	Centimeters	Cubic Feet	Liters		kg	(lb)	kg	(lb)
5	12.7	0.311	8.8	100.0	0.045	0.1	0.031	0.07
8	20.3	1.359	39	12.5	0.227	0.5	.019	0.04
12	30.3	2.410	68	5.0	0.454	1.0	.015	0.03
30	76	25.64	725	5.0	11.3	25.0	.365	0.84
48	122	106.9 (10 ton)	3084	4.5	22.7	50	.690	1.52
		142.7 (14 ton)	4041					

(8) DOT Specifications 20PF–1, 20PF–2, or 20PF–3 (§ 178.120 of this subchapter) or Specifications 21PF–1 or 21PF–2 (§ 178.121 of this subchapter) phenolic-foam insulated overpack with snug fitting inner metal cylinders, for materials prescribed in paragraph (b)(5) of this section.

(b) Fissile radioactive materials with radioactive content exceeding A_1 or A_2 shall be packaged in one of the following packagings:

(1) DOT Specification 6L (§ 178.103 of this subchapter), metal packaging. Authorized only for uranium-235, plutonium-239 or plutonium-241, as metal, oxide, or compounds that do not decompose at temperatures up to 149°C (300°F). Radioactive decay heat output may not exceed 5 watts. Radioactive materials in normal form shall be packaged in one or more tightly sealed metal cans or polyethylene bottles within a DOT Specification 2R (§ 178.34 of this subchapter) containment vessel. Packages are authorized as Fissile Class II and III with materials limited in accordance with Table 4:

TABLE 4.—AUTHORIZED CONTENTS IN KILOGRAMS (KG) AND CONDITIONS FOR SPECIFICATION 6L PACKAGES

Uranium-235		Plutonium-[1]			
H/X<3 [2]	3<H/X<10	H/X<10	10<H/X<20	Fissile class II transport index	Fissile class III maximum number of packages per transport vehicle
14	[3]3.6	2.5	2.4	1.3 1.8	80 50

[1] Plutonium solutions are not authorized.
[2] H/X is the ratio of hydrogen to fissile atoms in the inner containment with all sources of hydrogen in the containment considered.
[3] Volume not to exceed 3.6 liters.

(2) DOT Specification 6M (§ 178.104 of this subchapter), metal packaging. Authorized only for solid radioactive materials that will not decompose at temperatures up to 121°C(250°F). Radioactive decay heat output may not exceed 10 watts. Radioactive materials in other than special form shall be packaged in one or more tightly sealed metal cans or polyethylene bottles within a DOT Specification 2R (§ 178.34 of this subchapter) containment vessel. For fissile materials:

(i) Fissile Class I packages are limited to the following amounts of fissile radioactive materials: 1.6 kilograms of uranium-235; 0.9 kilograms of plutonium (except that due to the 10-watt thermal decay heat limitation, the limit for plutonium-238 is 0.02 kilograms); and 0.5 kilograms of uranium-233. The maximum ratio of hydrogen to fissile material must not exceed three, including all of the sources of hydrogen within the DOT Specification 2R containment vessel.

(ii) Maximum quantities of fissile material for Fissile Class II and Fissile Class III, and other restrictions are given in Table 5. For a Fissile Class II package, the minimum transport index to be assigned is shown in Table 5 and for a Fissile Class III shipment, the allowable number of similar packages per transport vehicle is shown. Each Fissile Class III shipment is also subject to the requirements in § 173.457. Where a maximum ratio of hydrogen to fissile material is specified in Table 5, only the hydrogen interspersed with the fissile material need be considered. For a uranium-233 shipment, the maximum inside diameter of the inner containment vessel must not exceed 12.1 centimeters (4.75 inches). Where necessary, a tight fitting steel insert shall be used to

reduce a larger diameter inner containment vessel specified in § 178.104–3(b) of this subchapter to the 12 centimeter (4.75 inch) limit.

TABLE 5.—AUTHORIZED CONTENTS FOR SPECIFICATION 6M PACKAGES[1]

Uranium-233[2]			Uranium-235[2 7]			Plutonium[2 3 4]			Fissile class II transport index	Fissile class III maximum number of packages per transport vehicle
Metal or alloy	Compounds		Metal or alloy	Compounds		Metal or alloy	Compounds

.....	.....	.....	13.8	16.0	10.1	4.5	.....	.....	1.0	125
.....	.....	.....	.....	26.0	16.1	.....	.....	.....	5.0	25
.....	.....	.....	.....	32.0	19.8	.....	.....	.....	10.0	12

[1] Quantity in kilograms.
[2] Minimum percentage of plutonium-240 is 5 weight percent.
[3] 4.5 kilogram limitation of plutonium due to 10 watt decay heat limitation.
[4] For a mixture of uranium-235 and plutonium an equal amount of uranium-235 may be substituted for any portion of plutonium authorized.
[5] Maximum inside diameter of Specification 2R containment vessel not to exceed 12 centimeter (4.75 inch) (see par. (b)(2)(ii) of this section).
[6] Granulated or powdered metal with any particle less than 6 millimeter (0.25 inch) in the smallest dimension is not authorized.
[7] Maximum permitted uranium-235 enrichment is 93.5 percent.
[8] H/X is the ratio of hydrogen to fissile atoms in the inner containment with all sources of hydrogen in the containment considered.

(3) Type B(U) or B(M) packaging that meets the standards for packaging of fissile materials in 10 CFR Part 71, and is approved by the U.S. Nuclear Regulatory Commission in accordance with § 173.471.

(4) Type B(U) or B(M) packaging that meets the applicable requirements for fissile radioactive materials in Section VI of the IAEA "Regulations for the Safe Transport of Radioactive Materials, Safety Series No. 6, 1973 Revised Edition (as amended)" and for which the foreign competent authority certificate has been revalidated by the Associate Director for HMR in accordance with § 173.472. Authorized only for import and export shipments.

(5) DOT Specification 20PF–1, 20PF–2, or 20PF–3 (§ 178.120 of this subchapter) or Specification 21PF–1 or 21PF–2 (§ 178.121 of this subchapter) phenolic-foam insulated protective overpacks, with snugfitting inner metal cylinders meeting all of the applicable requirements of §§ 173.24, 173.411, and 173.412. Handling procedures and packaging criteria shall be in accordance with U.S. Department of Energy Report No. ORO–651 or ANSI Standard N–14.1–1971. Quantities of uranium; hexafluroide are authorized as shown in Table 6, with each package to be shipped as Fissile Class II, and assigned a minimum transport index as also shown:

TABLE 6.—AUTHORIZED QUANTITIES OF URANIUM HEXAFLUORIDE (UF_6) AS FISSILE CLASS II

Protective overpack specification number	Maximum inner cylinder diameter		Maximum weight of UF_6 contents		Maximum U-235 enrichment (weight percent)	Fissile Class II transport index
	Centimeter	Inch	Kilograms	Pounds		
20PF–1	12.7	5	25	55	100.0	0.1
20PF–2	20.3	8	114	250	12.5	4.0
20PF–3	30.5	12	209	460	5.0	1.1
21PF–1 [1]	[2]76	[3]30	2,247	4,950	5.0	5.0
	[2]76	[3]32	2,279	5,020	5.0	5.0
21PF–2 [1]	[2]76	[3]30	2,247	4,950	5.0	5.0
	[2]76	[3]30	2,279	5,020	5.0	5.0

[1] For 76 centimeter cylinders, the maximum permitted H/U atomic ratio is 0.088.
[2] Model 30A inner cylinder (Reference: ORO–651).
[3] Model 30B inner cylinder (Reference: ORO–651).

§ 173.418 Authorized packaging-pyrophoric radioactive materials.

(a) Pyrophoric radioactive materials, as referenced in § 172.101 of this subchapter, in quantities not exceeding A_2 per package shall be packaged in Type A packagings which are constructed of materials which will not react nor be decomposed by the contents. Contents must be:

(1) In solid form and must not be fissile unless excepted by § 173.453;

(2) Contained in sealed and corrosion resistant receptacles with positive closures (friction or slip-fit covers or stoppers are not authorized);

(3) Free of water and any contaminants which would increase the reactivity of the material; and

(4) Made inert to prevent self-ignition during transport by either:

(i) Mixing with large volumes of inerting materials such as graphite or dry sand, or other suitable inerting material, or blended into a matrix of hardened concrete; or

(ii) By filling the innermost receptacle with an appropriate inert gas.

(b) In addition to the applicable requirements of § 173.24 each package must be capable of passing the test conditions of § 173.465 without leakage of contents.

§ 173.419 Authorized packaging-oxidizing radioactive materials.

Certain oxidizing radioactive materials, as referenced in § 172.101 of this subchapter, and which are not fissile materials and not in quantities exceeding A_2, shall be packed in suitable inside packagings of glass, metal or compatible plastic and suitably cushioned with a material which will not react with the contents. Inner packaging and cushioning shall be enclosed within an outside packaging of wood, metal, or plastic. The package shall be capable of meeting the applicable test requirements of § 173.465 without leakage of contents. For shipment by air, the maximum quantity in any package may not exceed 11.3 kilograms (25 pounds).

§ 173.421 Limited quantities of radioactive materials.

Radioactive materials whose activity per package does not exceed the limits specified in § 173.423 are excepted from the specification packaging, marking, and labeling requirements of this subchapter and requirements of this subpart if—

(a) The materials are packaged in strong, tight packages that will not leak any of the radioactive materials during conditions normally incident to transportation;

(b) The radiation level at any point on the external surface of the package does not exceed 0.5 millirem per hour;

(c) The nonfixed (removable) radioactive surface contamination on the external surface of the package does not exceed the limits specified in § 173.443(a);

(d) The outside of the inner packaging or if there is no inner packaging, the outside of the packaging itself bears the marking "Radioactive"; and

(e) Except as provided in § 173.424, the package does not contain more than 15 grams of uranium-235.

§ 173.422 Exceptions for instruments and articles.

Instruments and manufactured articles (including clocks, electronic tubes or apparatus) or similar devices having radioactive materials in gaseous or non-dispersible solid form as a component part are excepted from the specification packaging, marking and labeling requirements of this subchapter and requirements of this subpart, if—

(a) The activity of the instrument or device does not exceed the relevant limit listed in the table in § 173.423;

(b) The total activity per package does not exceed the relevant limit listed in Table 7 in § 173.423;

(c) The radiation level at 10 centimeters (4 inches) from any point on the external surface of any unpackaged instrument or device does not exceed 10 millirem per hour;

(d) The radiation level at any point on the external surface of a package bearing the device or instrument does not exceed 0.5 millirem per hour, or, for exclusive use domestic shipments, 2 millirem per hour;

(e) The nonfixed (removable) radioactive surface contamination on the external surface of the package does not exceed the limits specified in § 173.443(a);

(f) Except as provided in § 173.424, the package does not contain more than 15 grams of uranium-235; and

(g) At least one external dimension of the package is not less than 10 centimeters (4 inches).

§ 173.423 Table of activity limits—excepted quantities and devices.

The limits applicable to instruments, devices, and limited quantities subject to exceptions under §§ 173.421 and 173.422 are shown in Table 7:

TABLE 7.—ACTIVITY LIMITS FOR LIMITED QUANTITIES, INSTRUMENTS, AND DEVICES

Nature of contents	Instruments and devices		Materials package limits
	Instrument and article limits [1]	Package limits	
Solids:			
Special form	$10^{-2}A_1$	A_1	$10^{-2}A_1$.
Other forms	$10^{-2}A_2$	A_2	$10^{-3}A_2$
Liquids:			
Tritiated water:			
<0.1 Ci/liter			1000 Curies.
0.1 Ci to 1.0 Ci/l			100 Curies.
>1.0 Ci/liter			1 Curie.
Other liquids	$10^{-3}A_1$	$10^{-4}A_1$	$10^{-4}A_2$
Gases:			
Tritium [2]	2 Curies	200 Curies	20 Curies.
Special form	$10^{-3}A_1$	$10^{-2}A_1$	$10^{-3}A_1$.
Other forms	$10^{-3}A_2$	$10^{-2}A_2$	$10^{-3}A_2$.

[1] For mixture of radionuclides see § 173.433(b).
[2] These values also apply to tritium in activated luminous paint and tritium adsorbed on solid carriers.

§ 173.424 Excepted articles containing natural uranium or thorium.

Manufactured articles in which the sole radioactive material content is natural or depleted uranium or natural thorium are excepted from the specification packaging, marking and labeling requirements of this subchapter and requirements of this subpart if—

(a) The outer surface of the uranium or thorium is enclosed in an inactive sheath made of metal or other protective material; and

(b) The conditions specified in § 173.421 (b), (c), and (d) are met.

§ 173.425 Transport requirements for low specific activity (LSA) radioactive materials.

In addition to other applicable requirements specified in this subchapter, low specific activity (LSA) materials shall be transported in accordance with paragraph (a) of this section, or if transported as exclusive-use may be transported in accordance with paragraph (b) or (c) of this section.

(a) DOT Specification 7A (§ 178.350 of this subchapter) Type A package. The requirements of § 173.412 (a), (b), (d), and (n) do not apply.

(b) Packaged shipments of LSA material consigned as exclusive use shall either be in accordance with paragraph (a) of this section or shall comply with the following in which case they are excepted from specification packaging, marking and labeling:

(1) Materials must be packaged in strong, tight packages so that there will be no leakage of radioactive material under conditions normally incident to transportation.

(2) Packages must not have any significant removable surface contamination (see § 173.443).

(3) External radiation levels must comply with § 173.441.

(4) Shipments must be loaded by consignor and unloaded by consignee from the transport vehicle in which originally loaded.

(5) There must be no loose radioactive material in the car or vehicle.

(6) Shipment must be braced so as to prevent shifting of lading under conditions normally incident to transportation.

(7) Except for shipments of unconcentrated uranium or thorium ores, the transport vehicle must be placarded with the placards prescribed in accordance with Subpart F of Part 172 of this subchapter, as appropriate.

(8) The exterior of each outside package must be stenciled or otherwise marked "Radioactive—LSA".

(9) Specific instructions for maintenance of exclusive use shipment controls must be provided by the shipper to the carrier. Such instructions must be included with the shipping paper information.

(10) Transportation by aircraft is prohibited.

(c) Unpackaged (bulk) shipments of LSA materials shall be transported only in exclusive use closed transport vehicles and shall comply with the following:

(1) Authorized materials are limited to the following:

(i) Uranium or thorium ores and physical or chemical concentrates of those ores.

(ii) Uranium metal or natural thorium metal, or alloys of these materials.

(iii) Materials of low radioactive concentration, if the average estimated radioactivity concentration does not exceed 0.001 millicurie per gram and the contribution from materials with an A_2 value (see § 173.435) of less than 0.05 curie does not exceed one percent of the total radioactivity.

(iv) Objects of nonradioactive material externally contaminated with radioactive material, if the radioactive material is not readily dispersible and the surface contamination, when averaged over one square meter, does not exceed 0.0001 millicurie per square centimeter of radionuclides for which the A_2 value is less than 0.05 or 0.0001 milicurie per square centimeter of other radionuclides. Such objects must be suitably wrapped or enclosed.

(2) Bulk liquids must be transported in the following: (i) Specification 103CW, 111A60W7 (§§ 179.200, 179.201, 179.202 of this subchapter) tank cars. Bottom openings in tanks prohibited.

(ii) Specification MC 310, MC 311, MC 312, or MC 331 (§§ 178.343 or 178.337 of this subchapter) cargo tanks. Authorized only where the radioactivity

concentration does not exceed 10 percent of the specified low specific activity levels (see § 173.403(n)). The requirements of § 173.412(n) do not apply to these cargo tanks. Bottom fittings and valves are not authorized. Trailer-on-flat-car service is not authorized.

(3) External radiation levels must comply with § 173.441(b).

(4) Shipments must be loaded by the consignor, and unloaded by the consignee from the transport vehicle in which originally loaded.

(5) Except for shipments of unconcentrated uranium or thorium ores, the transport vehicle must be placarded with the placards prescribed in Subpart F of Part 172 of this subchapter, as appropriate.

(6) There must be no leakage of radioactive materials from the vehicle.

(7) Specific instructions for maintenance of exclusive use shipment controls must be provided by the shipper to the carrier. Such instructions must be included with the shipping paper information.

(8) Transportation by aircraft is prohibited.

§ 173.427 Empty radioactive materials packaging.

Any packaging which previously contained radioactive materials and has been emptied of contents as far as practical, is excepted from marking and labeling requirements of this subchapter and from requirements of this subpart, provided that:

(a) It complies with the requirements of § 173.421(b), (c) and (e);

(b) The packaging is in unimpaired condition and is securely closed so that there will be no leakage of radioactive material under conditions normally incident to transportation;

(c) Internal contamination does not exceed 1000 times the limits specified in § 173.443, Table 10; and

(d) Any labels previously applied in conformance with Subpart E of Part 172 of this subchapter are removed, obliterated or covered and the "Empty" label prescribed in § 172.450 is affixed to the packaging.

§ 173.431 Activity for Type A and Type B packages.

(a) A Type A package shall not contain radioactive contents with an activity greater than the following, as listed in § 173.435, or for other materials as determined under § 173.433:

(1) For special form radioactive materials, A_1; or

(2) For all other radioactive materials, A_2.

(b) The limits on activity contained in a Type B(U) and Type B(M) package are those prescribed in § 173.416 or in the applicable approval recertificate under §§ 173.471 and 173.472.

§ 173.433 Requirements for determination of A_1 and A_2 values for radionuclides.

(a) *Single radionuclides.*

(1) For single radionuclides of known identity, the values of A_1 and A_2 are those given in the table in § 173.435. The values of A_1 and A_2 are also applicable for radionuclides contained in (α,n) or (γ,n) neutron sources.

(2) For any single radionuclide of known identity, which is not listed in § 173.435, the values of A_1 and A_2 shall be determined in accordance with the following:

(i) If the radionuclide emits only one type of radiation, A_1 is determined in accordance with paragraphs (A), (B), (C), and (D) of this subparagraph. For radionuclides emitting different kinds of radiation, A_1 is the most restrictive value of those determined for each kind of radiation. However, in both cases, A_1 is restricted to a maximum of 1000 curies. If a parent nuclide decays into a shorter lived daughter, of a half-life not greater than 10 days, A_1 is calculated for both the parent and the daughter, and the more limiting of the two values is assigned to the parent nuclide.

(A) For gamma emitters, A_1 is determined by the expression: $A_1 = 9\,\Gamma$ curie

where Γ is the gamma-ray constant, corresponding to the dose in roentgens per hour at 1 meter per curie; the number 9 results from the choice of 1 rem per hour at a distance of 3 meters as the reference dose-equivalent rate.

(B) For x-ray emitters, A_1 is determined by the atomic number (Z) of the nuclide:

$Z < 55 \qquad A_1 = 1000$ curies

for $Z > 55 \qquad A_1 = 200$ curies

(C) For beta emitters, A_1 is determined by the maximum beta energy (E_{max}) according to Table 8:

TABLE 8.—A_1 for Beta Emitters

E_{max} (MeV)	A_1 (curies)
<0.5	1000
0.5-<1.0	300
1.0-<1.5	100
1.5-<2.0	50
>2.0	10

(D) For alpha emitters, A_1 is determined by the expression:

$A_1 = 1000\ A_2$

where A_2 is the value listed in Table 9:

TABLE 9.—A_2 for Alpha Emitters

	A_2		
Atomic number	Half-life less than 1,000 days	Half-life 1,000 days to 10^9 years	Half-life greater than 10^9 years
1 to 81	3 curies	30 millicuries	3 curies.
82 and above.	2 millicuries	2 millicuries	3 curies.

(ii) For assignment of A_2 values, A_2 is the more restrictive of the following values:

(A) The corresponding A_1.

(B) The value A_2 obtained from Table 9.

(3) For any single radionuclide whose identity is unknown, the value of A_1 is 2 curies and the value of A_2 is 0.002 curies. However, if the atomic number of the radionuclide is less than 82, the value of A_1 is 10 curies and the value of A_2 is 0.4 curies.

(b) *Mixture of radionuclides, including radioactive decay chains.*

(1) For mixed fission products, where a detailed analysis of the mixture is not carried out, the following activity limits apply:

(i) $A_1 = 10$ curies.

(ii) $A_2 = 0.4$ curies.

(2) A single radioactive decay chain is considered to be a single radionuclide when the radionuclides are present in their naturally occurring portions and no daughter nuclide has a half-life either longer than 10 days or longer than that of the parent nuclide. The activity to be taken into account and the A_1 or A_2 value to be applied are those corresponding to the parent nuclide of that chain. When calculating A_1 or A_2 values, radiation emitted by daughters must be taken into account. However, in the case of radioactive decay chains in which any daughter nuclide has a half-life either longer than 10 days or greater than that of the parent nuclide, the parent and daughter nuclides are considered to be mixtures of different nuclides.

(3) In the case of a mixture of different radionuclides, where the identity and activity of each radionuclide is known, the permissible activity of each radionuclide $R_1, R_2, \ldots R_n$ must be such that $F_1 + F_2 + \ldots F_n$ is not greater than unity, when—

$$F_1 = \frac{\text{Total activity of } R_1}{A_1(R_1)}$$

$$F_2 = \frac{\text{Total activity of } R_2}{A_1(R_2)}$$

$$F_n = \frac{\text{Total activity of } R_n}{A_1 R_n}$$

Where A_1 (R_1, R_2 . . . R_n) is the value of A_1 or A_2 as appropriate for the nuclide R_1, R_2 . . . R_n.

(4) When the identity of each radionuclide is known but the individual activities of some of the radionuclides are not known, the formula given in subparagraph (3) of this paragraph must be applied to establish the values of A_1 or A_2 as appropriate. All the radionuclides whose individual activities are not known (but whose total activity is known) must be classed in a single group and the most restrictive value of A_1 or A_2 applicable to any one of them shall be used as the value of A_1 and A_2 in the denominator of the fraction.

(5) Were the identity of each radionuclide is known but the individual activity of the radionuclides is not known, the most restrictive value of A_1 or A_2 applicable to any one of the radionuclides present is the applicable value.

(6) When the identity of the radionuclides is not known, the value of A_1 is 2 curies and the value of A_2 is 0.002 curies. However, if alpha emitters are known to be absent, the value of A_2 is 0.4 curies.

§ 173.434 Activity-mass relationships for uranium and natural thorium.[1]

Radioactive material	Curies per gram	Grams per curie
Uranium—(Wt% ^{235}U present):		
0.45	5.0×10^{-7}	2.0×10^{6}
0.72 (natural)	7.08×10^{-7}	1.42×10^{6}
1.0	7.6×10^{-7}	1.3×10^{6}
1.5	1.0×10^{-6}	1.0×10^{6}
5.0	2.7×10^{-6}	3.7×10^{5}
10.0	4.8×10^{-6}	2.1×10^{5}
20.0	1.0×10^{-5}	1.0×10^{5}
35.0	2.0×10^{-5}	5.0×10^{4}
50.0	2.5×10^{-5}	4.0×10^{4}
85.0	5.8×10^{-5}	1.7×10^{4}
93.0	7.0×10^{-5}	1.4×10^{4}
95.0	9.1×10^{-5}	1.1×10^{4}
Natural thorium	2.2×10^{-7}	4.6×10^{6}

[1] The figures for uranium include representative values for the activity of uranium-234 which is concentrated during the enrichment process. The activity for thorium includes the equilibrium concentration of thorium-228.

§ 173.435 Table of A_1 and A_2 values for radionuclides.

Symbol of radionuclide	Element and atomic number	A_1(Ci)	A_2(Ci)	Specific activity (Ci/g)
^{227}Ac	Actinium (89)	1000	0.005	7.2×10.
^{228}Ac		10	4	2.2×10^{4}
^{105}Ag	Silver (47)	40	40	3.1×10^{4}
^{110m}Ag		7	7	4.7×10^{2}
^{111}Ag		100	20	1.6×10^{3}
^{241}Am	Americium (95)[1]	5	0.008	3.2.
^{243}Am		5	0.008	1.9×10^{-1}.
^{37}Ar (compressed or uncompressed)	Argon (18)	1000	1000	1.0×10^{5}
^{41}Ar (uncompressed)		20	20	4.3×10^{2}

[1] For shipments solely within the United States the A_1 value is 20 curies for americium and plutonium contained in Am-Be or Pu-Be neutron sources or in nuclear-powered pacemakers.
[2] The values of A_1 and A_2 must be calculated in accordance with the procedure specified in § 173.433 of this subchapter, taking into account the activity of the fission products and of the uranium-233 in addition to that of the thorium.
[3] The values of A_1 and A_2 must be calculated in accordance with the procedure specified in § 173.433 of this subchapter, taking into account the activity of the fission products and plutonium isotopes in addition to that of the uranium.

§ 173.441 Radiation level limitations.

(a) Except as provided in paragraph (b) of this section, each package of radioactive materials offered for transportation shall be designed and prepared for shipment so that under conditions normally incident to transportation the radiation level does not exceed 200 millirem per hour at any point on the external surface of the package, and the transport index does not exceed 10.

(b) Except for shipments by air, a shipment which exceeds the radiation level limits specified in paragraph (a) of this section, may be transported as an exclusive use shipment if the radiation level does not exceed any of the following at any time during transportation:

(1) 200 millirem per hour on the accessible external surface of the package unless the following conditions are met, in which case the limit is 1000 millirem per hour:

(i) The shipment is made in a closed transport vehicle;

(ii) Provisions are made to secure the package so that its position within the vehicle remains fixed during transportation; and

(iii) There are no loading or unloading operations between the beginning and end of the transportation;

(2) 200 millirem per hour at any point on the outer surface of the vehicle, including the upper and lower surfaces, or, in the case of an open vehicle, at any point on the vertical planes projected from the outer edges of the vehicle, on the upper surface of the load, and on the lower external surface of the vehicle;

(3) 10 millirem per hour at any point 2 meters (6.6 feet) from the vertical planes represented by the outer lateral surfaces of the vehicle, or, in the case of an open vehicle, at any point 2 meters from the vertical planes projected from the outer edges of the conveyance; and

(4) 2 millirem per hour in any normally occupied position in the car or vehicle, except that this provision does not apply to private motor carriers when the personnel are operating under a radiation protection program and wear radiation exposure monitoring devices.

(c) For shipments made under the provisions of paragraph (b) of this section, the shipper shall provide specific written instructions for maintenance of the exclusive use shipment controls to the carrier. The instructions shall be included with the shipping paper information.

§ 173.442 Thermal limitations.

Each package of radioactive material shall be designed, constructed, and loaded so that—

(a) The heat generated within the package because of the radioactive contents will not, at any time during transportation, affect the integrity of the package under conditions normally incident to transportation; and

(b) The temperature of the accessible external surfaces of the loaded package will not, assuming still air in the shade at an ambient temperature of 38° C (100° F), exceed either—

(1) 50°C (122°F) in other than an exclusive use shipment; or

(2) 82°C (180°F) in an exclusive use shipment.

§ 173.443 Contamination control.

(a) The level of non-fixed (removable) radioactive contamination on the external surfaces of each package offered for shipment shall be kept as low as practicable. The level of non-fixed radioactive contamination may be determined by wiping an area of 300 square centimeters of the surface concerned with an absorbent material, using moderate pressure, and measuring the activity on the wiping material. Sufficient measurements shall be taken in the most appropriate locations to yield a representative assessment of the non-fixed contamination levels. Except as provided in paragraph (b) of this section, the amount of radioactivity measured on any single wiping material when averaged over the surface wiped shall not exceed the limits given in Table 10 at any time during transport. Other methods of assessment of equal or greater efficiency may be used. When other methods are used the detection efficiency of the method used shall be taken into account and in no case shall the non-fixed contamination on the external surfaces of the package exceed ten times the limits listed in Table 10.

TABLE 10.—REMOVABLE EXTERNAL RADIOACTIVE CONTAMINATION LIMITS

Contaminant	Maximum permissible limits	
	μCi/cm²	dpm/cm²
Beta-gamma emitting radionuclides; all radionuclides with half-lives less than ten days; natural uranium; natural thorium; uranium-235; uranium-238; thorium-232; thorium-228 and thorium-230 when contained in ores or physical concentrates	10^{-5}	22
All other alpha emitting radionuclides	10^{-5}	2.2

(b) Except as provided in paragraph (d) of this section, in the case of packages transported as exclusive use shipments by rail or highway only, the removable (non-fixed) radioactive contamination at any time during transport shall not exceed ten times the levels prescribed in paragraph (a) of this section.

(c) Except as provided in paragraph (d) of this section, each transport vehicle used for transporting radioactive materials as an exclusive use shipment which utilizes the provisions of paragraph (b) of this section shall be surveyed with appropriate radiation detection instruments after each use. A vehicle shall not be returned to service until the radiation dose rate at each accessible surface is 0.5 millirem per hour or less, and there is no significant removable (non-fixed) radioactive surface contamination as specified in paragraph (a) of this section.

(d) Paragraph (b) and (c) of this section do not apply to any closed transport vehicle used solely for the transportation of radioactive material packages with contamination levels that do not exceed 10 times the levels prescribed in paragraph (a) of this section if—

(1) A survey of the interior surfaces of the empty vehicle shows that the radiation dose rate at any point does not exceed 10 millirem per hour at the surface or 2 millirem per hour at 1 meter (3.3. feet) from the surface;

(2) Each vehicle is stenciled with the words "For Radioactive Materials Use Only" in letters at least 76 millimeters (3 inches) high in a conspicuous place on both sides of the exterior of the vehicle; and

(3) Each vehicle is kept closed the except for loading or unloading.

§ 173.444 Labeling requirements.

Each package of radioactive materials, unless excepted by §§ 173.421, 173.422, 173.424, 173.425(b), or 173.427 shall be labeled as provided in Subpart E of Part 172 of this subchapter.

§ 173.446 Placarding requirements.

See Subpart F of Part 172 of this subchapter.

§ 173.447 Storage incident to transportation-general requirements.

The following requirements apply to temporary storage during the course of transportation but not to Nuclear Regulatory Commission or Agreement State licensed facilities or U.S. Government owned or contracted facilities.

(a) The number of packages bearing Radioactive Yellow II or Radioactive Yellow III labels stored in any one storage area, such as a transit area, terminal building, store-room, or assembly yard, shall be limited so that the sum of the transport indexes in any individual group of packages does not exceed 50. Groups of these packages must be stored so as to maintain a spacing of at least 6 meters (20 feet) from other groups of packages containing radioactive materials.

(b) Mixing of different kinds of packages, including Fissile Class I packages with Fissile Class II packages, is authorized in accordance with § 173.459 of this subchapter.

§ 173.448 General transportation requirements.

(a) Each shipment of radioactive materials shall be secured in order to prevent shifting during normal transportation conditions.

(b) Except as may be specifically required by the competent authority in the applicable certificate, a package of radioactive materials may be carried among packaged general cargo without special stowage provisions, if:

(1) The heat output in watts does not exceed 0.1 times the minimum package dimension in centimeters; or

(2) The average surface heat flux of the package does not exceed 15 watts per square meter and the immediately surrounding cargo is not in sacks or bags or otherwise in a form that would seriously impede air circulation for heat removal.

(c) Packages bearing labels prescribed in § 172.403 of this subchapter may not be carried in compartments occupied by passengers, except in those compartments exclusively reserved for couriers accompanying those packages.

(d) Mixing of different kinds of packages, including Fissile Class I packages with Fissile Class II packages, is authorized in accordance with § 173.459.

(e) No person shall offer for transportation aboard a passenger-carrying aircraft any single package with a transport index greater than 3.0 or an overpack with a transport index greater than 3.0.

(f) No person shall offer for transportation aboard a passenger carrying aircraft any radioactive material unless that material is intended for use in, or incident to, research, or medical diagnosis or treatment, or is excepted under the provisions of § 175.10 of this subchapter.

(g) If an overpack is used to consolidate individual packages of radioactive materials, the packages shall comply with the packaging, marking, and labeling requirements of this subchapter, and the following:

(1) The overpack shall be labeled as prescribed in § 172.403 of this subchapter except as follows:

(i) the "contents" entry on the label may state "mixed" unless each inside package contains the same radionuclide(s).

(ii) The "number of curies" entry on the label must be determined by adding together the number of curies of the radioactive materials packages contained therein.

(iii) For a non-rigid overpack, the required label together with required package markings shall be affixed to the overpack by means of a securely attached, durable tag. The transport index shall be determined by adding together the transport indexes of the radioactive materials packages contained therein.

(iv) For a rigid overpack, the transport index shall be determined by—

(A) Adding together the transport indexes of the radioactive materials packages contained in the overpack; or

(B) Except for fissile radioactive materials, direct measurements as prescribed in § 173.403(bb) which have been taken by the person initially offering the packages contained within the overpack for shipment.

(2) The overpack shall be marked as prescribed in Subpart D of Part 172 of this subchapter and § 173.25(a).

(3) The transport index of the overpack shall not exceed 3.0 for passenger-carrying aircraft shipments, or 10.0 for cargo-only aircraft shipments.

§ 173.451 Fissile materials—general requirements.

(a) Except as provided in § 173.453, each package containing fissile radioactive materials must comply with §§ 173.451 through 173.459.

§ 173.453 Fissile materials—exceptions.

The requirements of §§ 173.451 through 173.459 do not apply to—

(a) A package containing not more than 15 grams of fissile radionuclides. If

the material is transported in bulk, the quantity limitation applies to the conveyance;

(b) A package containing irradiated natural or depleted uranium including the products of irradiation if the irradiation has taken place only in the thermal reactor;

(c) A package containing homogeneous solutions or mixtures where:

(1) The minimum ratio of the number of hydrogen atoms to the number of atoms of fissile radionuclides (H/X) is 5200;

(2) The maximum concentration of fissile radionuclides is 5 grams per liter; and

(3) The maximum mass of fissile radionuclides in the package is 500 grams, except for a mixture where the total mass of plutonium and uranium-233 does not exceed 1% of the mass of uranium-235 the limit is 800 grams. If the material is transported in bulk, the quantity limitations apply to the conveyance;

(d) A package containing uranium enriched in uranium-235 to a maximum of 1% by weight, and with a total plutonium and uranium-233 content of up to 1% of the mass of uranium-235, if the fissile radionuclides are distributed homogeneously throughout the package contents, and do not form a lattice arrangement within the package;

(e) A package containing any fissile material if it does not contain more than 5 grams of fissile radionuclides in any 10-liter volume, and if the material is packaged so as to maintain this limit of fissile radionuclide concentration during normal transport;

(f) A package containing not more than one kilogram of plutonium of which not more than 20% by mass may consist of plutonium-238, plutonium-241, or any combination of those radionuclides;

(g) A package containing liquid solutions of uranyl nitrate enriched in uranium-235 to a maximum of 2% by weight, with total plutonium and uranium-233 not more than 0.1% of the mass of uranium-235; or

(h) A package containing thorium or uranium with not more than 0.72% by weight of fissile material used for shipment solely within the United States.

§ 173.455 Classification of fissile materials packages.

(a) Except as provided in § 173.453, each package of fissile materials shall be classified as follows:

(1) *Fissile Class I.* Packages that may be transported in unlimited number, and in any arrangement, and that require no nuclear criticality safety controls during transportation. A transport index is not assigned to Fissile Class I packages for the purposes of nuclear criticality safety control, although, the external radiation levels may require a transport index number.

(2) *Fissile Class II.* Packages that may be transported together in any arrangement but in numbers that do not exceed an aggregate transport index of 50. For the purposes of nuclear criticality safety control, individual packages may have a transport index of not less than 0.1 and not more than 10. However, the external radiation levels may require a higher transport index number. These shipments require no nuclear criticality safety control by the shipper during transportation.

(3) *Fissile Class III.* Shipments of packages of fissile materials that do not meet the requirements of Fissile Class I or Fissile Class II and that are controlled in transportation as prescribed in § 173.457 by appropriate arrangements between the shipper and the carrier.

(b) The numerical values for package assignments as Fissile Class I, the transport indexes for Fissile Class II packages, and the vehicle limitations for Fissile Class III shipments shall be determined in accordance with 10 CFR Part 71.

§ 173.457 Transportation of Fissile Class III shipments-specific requirements.

(a) Fissile Class III shipments shall incorporate transportation controls which are performed by the shipper or carrier, as appropriate, and which:

(1) Provide nuclear criticality safety;

(2) Protect against loading, storing, or transporting that shipment with any other fissile material; and

(3) Include in the shipping papers the description required by § 172.203(d) of this subchapter.

(b) Fissile Class III shipments shall be transported:

(1) In a transport vehicle assigned to the exclusive use of the shipper with a specific restriction for the exclusive use to be provided in the appropriate arrangements between shipper and carrier and with instructions to that effect issued with the shipping papers;

(2) Except for shipments by aircraft, with an escort in a vehicle having the capability, equipment, authority, and instructions to provide administrative controls necessary to assure compliance with this section;

(3) In a transport vehicle containing no other packages of radioactive material that are required to bear one of the labels prescribed in § 172.403 of this subchapter. Specific arrangements must be made between the shipper and the carrier, with instructions to that effect issued with the shipping papers; or

(4) Under any other procedure specifically authorized by the Associate Director for HMR in accordance with Part 107 of this subchapter.

§ 173.459 Mixing of fissile material packages.

Shipments of fissile materials packages and the commingling of fissile materials packages with other radioactive materials packages shall be in accordance with the provisions of this section.

(a) Mixing of fissile material packages with other types of radioactive materials, including Fissile Class I with Fissile Class II packages is authorized if the total transport index in any transport vehicle or storage location does not exceed 50.

(b) For Fissile Class II packages shipped under the exclusive use provisions of § 173.441(b), the transport index number which is calculated for nuclear criticality control purposes shall not exceed 10 for any single package nor a total of 50 for the load.

(c) Fissile Class II packages may be shipped with an external radiation level greater than 10 millirem per hour at 1 meter (3.3 feet), and combined with other packages of the same or different designs in a Fissile Class III shipment, under the conditions prescribed in § 173.457, if:

(1) Each package in the shipment has been assigned a transport index for criticality control purposes in accordance with the Fissile Class II criteria;

(2) The transport index which has been assigned in the package approval for nuclear criticality control purposes does not exceed 10 for any single package;

(3) The total transport index for nuclear criticality control purposes does not exceed 100 for all packages in the shipment;

(4) The shipment complies with § 173.441(b); and

(5) The shipment is not transported by vessel.

(d) A Fissile Class III shipment of packages may be combined with other packages of the same or different design when each package has been assigned a transport index for nuclear criticality control purposes in accordance with Fissile Class II criteria, and may be combined with Fissile Class II packages into a Fissile Class III shipment under the conditions prescribed in § 173.457, if:

(1) The transport index which has been assigned in the package approval for nuclear criticality control purposes

does not exceed 50 for any single package;

(2) The total transport index for nuclear criticality control purposes for all packages in the shipment does not exceed 100;

(3) The shipment satisfies the provisions of § 173.441(b) if any package has a radiation level exceeding 10 millirem per hour at 1 meter (3.3 feet) from any accessible external surface of the package; and

(4) The shipment is not transported by vessel.

§ 173.461 Demonstration of compliance with tests.

(a) Compliance with the test requirements in §§ 173.463 through 173.469 shall be shown by any of the methods prescribed in this paragraph, or by a combination of these methods appropriate for the particular feature being evaluated:

(1) By performance of tests with prototypes or samples of the packaging as normally presented for transportation, in which case the contents of the packaging for the test shall simulate as closely as practicable the expected normal radioactive contents;

(2) By reference to a previous, satisfactory demonstration of compliance of a sufficiently similar nature;

(3) By performance of tests with models of appropriate scale incorporating those features that are significant with respect to the item under investigation, when engineering experience has shown results of those tests to be suitable for design purposes. When a scale model is used, the need for adjusting certain test parameters, such as the penetrator diameter or the compressive load, must be taken into account; or

(4) By engineering evaluation or comparative data.

(b) With respect to the initial conditions for the tests under §§ 173.463 through 173.469, except for the water immersion tests, compliance shall be based upon the assumption that the package is in equilibrium at an ambient temperature of 38°C (100°F).

§ 173.462 Preparation of specimens for testing.

(a) Each specimen (i.e., sample, prototype or scale model) shall be examined before testing to identify and record faults or damage, including:

(1) Divergence from the specifications or drawings;

(2) Defects in construction;

(3) Corrosion or other deterioration; and

(4) Distortion of features.

(b) Any deviation found under paragraph (a) of this section from the specified design shall be corrected or suitably taken into account in the subsequent evaluation.

(c) The containment system of the packaging shall be clearly specified.

(d) The external features of the specimen shall be clearly identified so that reference may be made to any part of it.

§ 173.463 Packaging and shielding—testing for integrity.

After each of the applicable tests specified in § 173.465 and § 173.466, the integrity of the packaging, or of the packaging and its shielding, shall be retained to the extent required by § 173.412(m) for the packaging being tested.

§ 173.465 Tests for proposed packagings designed for normal conditions of transportation.

(a) The proposed packaging must be capable of withstanding the tests prescribed in this section. One prototype may be used for all tests if the requirements of paragraph (b) of this section are complied with.

(b) *Water spray test.* The water spray test must precede each test or test sequence prescribed in this section. The water spray test shall simulate exposure to rainfall of approximately 5 centimers (2 inches) per hour for at least one hour. The time interval between the end of the water spray test and the beginning of the next test shall be such that the water has soaked-in to the maximum extent without appreciable drying of the exterior of the specimen. In the absence of evidence to the contrary, this interval may be assumed to be two hours if the water spray is applied from four different directions simultaneously. However, no time interval may elapse if the water spray is applied from each of the four directions consecutively.

(c) *Free drop test.* The free drop test consists of a fall onto the target in a manner that causes maximum damage to the safety features being tested, and:

(1) For packages weighing 5,000 kilograms (11,000) pounds) or less, the distance of the fall measured from the lowest point of the packaging to the upper surface of the target shall not be less than 1.2 meters (4 feet).

(2) For packages weighing more than 5,000 kilograms (11,000 pounds), the distance of the fall shall not be less than the distance specified in Table 11, for the applicable packaging weight:

TABLE 11.—FREE-FALL DISTANCE FOR PACKAGINGS WEIGHING MORE THAN 5,000 KILOGRAMS

Packaging weight		Free-fall distance	
Kilograms	Pounds	Feet	Meters
5,000 to 10,000	11,000 to 22,000	3	0.9
10,000 to 15,000	22,000 to 33,000	2	0.6
More than 15,000	More than 33,000	1	0.3

(3) For Fissile Class II packagings, the free drop specified in subparagraph (1) or (2) of this paragraph shall be preceded by a free drop from a height of .3 meter (1 foot) on each corner. For cylindrical packagings, the .3 meter (1 foot) drop shall be onto each of the quarters of each rim.

(4) For fiberboard or wood rectangular packages not exceeding 50 kilograms (110 pounds) in weight, a separate specimen of the proposed packaging shall be subjected to a free drop onto each corner from a height of .3 meter (1 foot).

(5) For fiberboard cylindrical packages weighing not more than 100 kilograms (220 pounds) a separate specimen of the proposed packaging shall be subjected to a free drop onto each of the quarters of each rim from a height of .3 meter (1 foot).

(6) The target shall have a flat, horizontal surface of such mass and rigidity that any increase in its resistance to displacement or deformation upon impact by the specimen would not significantly increase the damage to the specimen.

(d) *Compression test.* The compression test shall last for a period of at least 24 hours and consists of a compressive load equivalent to the greater of the following:

(1) Five times the weight of the actual package; or

(2) 1300 kilograms per square meter (225 pounds per square foot) multiplied by the vertically projected area of the package. The compressive load shall be applied uniformly to two opposite sides of the packaging specimen, one of which must be the base on which the package would normally stand.

(e) *Penetration test.* For the penetration test the packaging specimen shall be placed on a rigid, flat, horizontal surface that will not move while the test is being performed. The test shall consist of:

(1) A bar of 3.2 centimeters (1.25 inches) in diameter with a hemispherical end, weighing 6 kilograms (13.2 pounds) being dropped with its longitudinal axis vertical, onto the center of the weakest part of the packaging specimen, so that, if it penetrates far enough, it will hit the

containment system. The bar must not be deformed by the test; and

(2) The distance of the fall of the bar measured from its lower end to the upper surface of the packaging specimen shall not be less than 1 meter (3.3 feet).

§ 173.466 Additional tests for Type A packagings designed for liquids and gases.

(a) In addition to the tests prescribed in § 173.465, Type A packagings designed for liquids and gases shall be capable of withstanding the following tests:

(1) *Free drop test.* The packaging specimen shall fall onto the target in a manner which will cause it to suffer the maximum damage to its containment. The distance of the fall measured from the lowest part of the packaging specimen to the upper surface of the target shall be not less than 9 meters (30 feet).

(2) *Penetration test.* The specimen must be subjected to the test specified in § 173.465(e) except that the distance of the fall shall be 1.7 meters (5.5 feet).

§ 173.467 Tests for demonstrating the ability of Type B and fissile radioactive materials packagings to withstand accident conditions in transportation.

Each Type B packaging or packaging for fissile material shall meet the test requirements prescribed in 10 CFR Part 71 for ability to withstand accident conditions in transportation.

§ 173.469 Tests for special form radioactive materials.

(a) Special form radioactive materials must meet the test requirements of paragraph (b) of this section. Each solid radioactive material or capsule specimen to be tested shall be manufactured or fabricated so that it is representative of the actual solid material or capsule which will be transported with the proposed radioactive content duplicated as closely as practicable. Any differences between the material to be transported and the test material shall be taken into account. In addition:

(1) A different specimen may be used for each of the tests;

(2) The specimen must not break or shatter when subjected to the impact, percussion, or bending tests;

(3) The specimen must not melt or disperse when subjected to the heat test; and

(4) After each test, leaktightness or indispersibility of the specimen shall be determined by a method no less sensitive than the leaching assessment prescribed in paragraph (c) of this section. For a capsule resistant to corrosion by water, and which has an internal void volume greater than 0.1 milliliters, an alternative to the leaching assessment is a demonstration of leaktightness of 10^{-4} torr-l/s (1.3×10^{-4} atm-cm^3/s) based on air at 25°C (77°F) and one atmosphere differential pressure for solid radioactive content, or 10^{-6} torr-l/s (1.3×10^{-6} atm-cm^3/s) for liquid or gaseous radioactive content.

(b) *Test methods:*

(1) *Impact Test.* The specimen must fall onto the target from a height of not less than 9 meter (30 feet). The target must be as specified in § 173.465(c)(6);

(2) *Percussion Test.* (i) The specimen shall be placed on a sheet of lead that is supported by a smooth solid surface, and be struck by the flat face of a steel billet so as to produce an impact equivalent to that resulting from a free fall of 1.4 kilograms (3 pounds) through 1 meter (3.3 feet);

(ii) The flat face of the billet shall be 25 millimeters (1 inch) in diameter with the edges rounded off to a radius of 3 millimeters ±0.3 millimeters (.12 inch ±.012 inch);

(iii) The lead shall be of a hardness within 3.5 to 4.5 on the Vickers scale, and not more than 25 millimeters (1 inch) thick, and shall cover an area greater than that covered by the specimen;

(iv) A fresh surface to lead shall be used for each impact; and

(v) The billet must strike the specimen in a manner that causes maximum damage.

(3) *Bending test.* (i) This test applies only to long, slender sources with a length of 10 centimeters (4 inches) or more and with a length at least 10 times the minimum width;

(ii) The specimen must be securely clamped in a horizontal position so that one half of its length protrudes from the face of the clamp;

(iii) The position of the specimen must be such that it will suffer maximum damage when its free end is struck by the flat face of a steel billet;

(iv) The billet must strike the specimen in a manner that produces an impact equivalent to that resulting from a free vertical fall of 1.4 kilograms (3 pounds) through 1 meter (3.3 feet); and

(v) The flat face of the billet must be 25 millimeters (1 inch) in diameter with the edges rounded off to a radius of 3 millimeters (.12 inch) ±0.3 millimeters (.012 inch).

(4) *Heat test.* The specimen shall be heated in air to a temperature of not less than 800°C (1472°F), held at that temperature for a period of 10 minutes, and then allowed to cool.

(c) *Leaching assessment methods.* (1) For indispersible solid material—(i) The specimen shall be immersed for seven days in water at ambient temperature. The water must have a pH of 6–8 and a maximum conductivity of 10 micromho per centimeter at 20°C (68°F);

(ii) The water and specimen shall then be heated to a temperature of 50°C±5° (122°F±9°) and maintained at this temperature for four hours;

(iii) The activity of the water shall then be determined;

(iv) The specimen shall then be stored for at least seven days in still air with humidity not less than 90 percent at 30°C (86°F);

(v) The specimen shall then be immersed in water with the same pH and maximum conductivity specifications as in subparagraph (1)(i) of this paragraph. The water and specimen must be heated to 50°C±5° (122°F±9°) and maintained at that temperature for four hours;

(vi) The activity of the water shall then be determined. The activities determined in subparagraph (1)(iii) and this subparagraph shall not exceed 0.05 microcuries.

(2) For encapsulated material—(i) The specimen shall be immersed in water at ambient temperature. The water must have a pH of 6–8 and a maximum conductivity of 10 micromho per centimeter. The water and specimen shall be heated to a temperature of 50°C±5° (122°F±9°) and maintained at this temperature for four hours;

(ii) The activity of the water shall then be determined;

(iii) The specimen shall then be stored for at least seven days in still air at a temperature not less than 30°C (86°F);

(iv) Step (i) shall be repeated; and

(v) The activity of the water shall be determined. The activities determined in paragraph (c)(2)(ii) and this paragraph (c)(2)(v) shall not exceed 0.05 microcuries.

§ 173.471 Requirements for U.S. Nuclear Regulatory Commission approved packages.

In addition to the applicable requirements of the U.S. Nuclear Regulatory Commission (USNRC) and Parts 171–177 of this subchapter, any shipper of a Type B or fissile material package that has been approved by the USNRC in accordance with 10 CFR Part 71 shall also comply with the following requirements:

(a) The shipper shall be registered with the USNRC as a party to the approval, and the shipment must be made in compliance with the terms of the approval;

(Approved by the Office of Management and Budget under OMB control number 2137-0513)

(b) The outside of each package shall be durably and legibly marked with the package identification marking indicated in the USNRC approval;

(c) Each shipping paper related to the shipment of the package shall bear the package identification marking indicated in the USNRC approval;

(d) Before the first export shipment of the package, the shipper shall obtain a U.S. Competent Authority Certificate for that package design or if one has already been issued, the shipper shall register with the U.S. Competent Authority as a user of the certificate. Upon registration as a user of the certificate the shipper will be furnished with a copy of it. The shipper shall then submit a copy of the U.S. Competent Authority Certificate applying to that package design to the national competent authority of each country into or through which the package will be transported, unless a copy has already been furnished;

(Approved by the Office of Management and Budget under OMB control numbers 2137–0514 and 2137–0515)

(e) The U.S. Competent Authority responsible for administering the requirements of Section VIII of the IAEA "Regulations for the Safe Transport of Radioactive Materials, Safety Series No. 6, 1973 Revised Edition (as amended)," is the—

Materials Transportation Bureau, Office of Hazardous Materials Regulation (OHMR), U.S. Department of Transportation, Washington, D.C. 20590.

(f) Each request for a U.S. Competent Authority Certificate as required by the IAEA regulations shall be submitted in writing to the address set forth in paragraph (e) of this section. The request shall be in duplicate and include copies of the applicable USNRC approval and a reproducible drawing showing the make-up of the package. Each request is considered in the order in which it is received. To allow sufficient consideration by OHMR, requests should be received at least 45 days before the requested effective date; and

(Approved by the Office of Management and Budget under OMB control number 2137–0514)

(g) Import and export shipments may be made in accordance with § 171.12 of this subchapter.

§ 173.472 Requirements for exporting DOT specification Type B and fissile packages.

(a) Any shipper who exports a DOT specification Type B or fissile material package authorized by §§ 173.416 or 173.417 shall comply with paragraphs (b) through (f) of this section.

(b) The shipper shall register with the U.S. Competent Authority as a user of the appropriate U.S. Competent Authority Certificate and the shipment shall be made in accordance with the certificate;

(Approved by the Office of Management and Budget under OMB control number 2137–0515)

(c) The outside of each package must be durably and legibly marked with the package identification marking indicated in the U.S. Competent Authority Certificate;

(d) Each shipping paper related to the shipment of the package must bear the package identification marking indicated in the U.S. Competent Authority Certificate;

(e) Before the first export shipment of the package, the shipper must submit a copy of the U.S. Competent Authority Certificate applying to that package design to the national competent authority of each country into or through which the package will be transported, unless a copy has already been furnished; and

(Approved by the Office of Management and Budget under OMB control number 2137–0515)

(f) Import and export shipments may be made in accordance with § 171.12 of this subchapter.

§ 173.473 Requirements for foreign-made packages.

In addition to the applicable requirements of Parts 171 through 177 of this subchapter, each shipper of a foreign-made Type B or fissile material package for which a competent authority certificate is required by the IAEA "Regulations for the Safe Transport of Radioactive Materials, Safety Series No. 6, 1973 Revised Edition (as amended)" shall also comply with the following requirements:

(a) Prior to the first shipment of such a package of radioactive materials into or from the U.S., the shipper shall:

(1) Have the foreign competent authority certificate revalidated by the U.S. Competent Authority, unless this has been done previously. The request must be in duplicate and contain all the information required by Section VIII of the IAEA regulations. Each request is considered in the order in which it is received. To allow sufficient consideration by OHMR, requests should be received at least 45 days before the requested effective date.

(2) Submit a copy in English of the foreign competent authority certificate with the request for revalidation;

(3) Register its identity in writing with the U.S. Competent Authority as a user of the package covered by the foreign competent authority certificate and its revalidation. If the shipper is requesting the revalidation, this is automatically done by OHMR; and

(4) Supply to the carrier, upon request, the applicable competent authority certificates. However, the competent authority certificates are not required to accompany the packages to which they apply.

(Approved by the Office of Management and Budget under OMB control number 2137–0517.)

(b) The outside of each package shall be durably and legibly marked with the same competent authority identification marking indicated on the competent authority certificate and revalidation;

(c) Each shipping paper for a shipment of radioactive materials shall bear a notation of the package identification marking indicated on the competent authority certificate or revalidation; and

(d) Import and export shipments may be made in accordance with § 171.12 of this subchapter.

§ 173.474 Quality control for construction of packaging.

(a) Prior to the first use of any packaging for the shipment of radioactive material, the shipper shall determine, that—

(1) The packaging meets the quality of design and construction requirements as specified in this subchapter; and

(2) The effectiveness of the shielding, containment, and, when required, the heat transfer characteristics of the package, are within the limits specified for the package design.

§ 173.475 Quality control requirements prior to each shipment of radioactive materials.

Before each shipment of any radioactive materials package, the shipper shall ensure by examination or appropriate tests, that—

(a) The packaging is proper for the contents to be shipped;

(b) The packaging is in unimpaired physical condition, except for superficial marks;

(c) Each closure device of the packaging, including any required gasket, is properly installed, secured, and free of defects;

(d) For fissile material, each moderator and neutron absorber, if required, is present and in proper condition;

(e) Each special instruction for filling, closing, and preparation of the

packaging for shipment has been followed;

(f) Each closure, valve, or other opening of the containment system through which the radioactive content might escape is improperly closed and sealed;

(g) Each packaging containing liquid in excess of an A_2 quantity and intended for air shipment has been tested to show that it will not leak under an ambient atmospheric pressure of not more than 0.25 atmosphere, absolute, (0.25 kilograms per square centimeter or 3.6 psia). The test must be conducted on the entire containment system, or on any receptacle or vessel within the containment system, to determine compliance with this requirement;

(h) The internal pressure of the containment system will not exceed the design pressure during transportation; and

(i) External radiation and contamination levels are within the allowable limits specified in this subchapter.

§ 173.476 Approval of special form radioactive materials.

(a) Each shipper of special form radioactive materials shall maintain on file for at least one year after the latest shipment, and provide to the MTB on request, a complete safety analysis, including documentation of any tests, demonstrating that the special form material meets the requirements of § 173.469.

(Approved by the Office of Management and Budget under OMB control number 2137-0510.)

(b) Prior to the first export shipment of a special form radioactive material from the United States, each shipper shall obtain a U.S. Competent Authority Certificate for the specific material. Each petition shall be submitted in accordance with § 173.471(e) and must include the following information:

(1) A detailed description of the material or if a capsule, a detailed description of the contents. Particular reference must be made to both physical and chemical states;

(2) If a capsule is to be used, a detailed statement of its design and dimensions, including complete engineering drawings and schedules of material, and methods of construction; and

(3) A statement of the tests that have been made and their results; evidence based on calculative methods to show that the material is able to pass the tests; or other evidence that the special form radioactive material complies with § 173.469.

(Approved by the Office of Management and Budget under OMB control number 2137-0510.)

(c) Paragraphs (a) and (b) of this section do not apply in those cases where A_1 equals A_2 and the material is not described on the shipping papers as "Radioactive Material Special Form, n.o.s."

§ 173.477 Approval for export shipments.

(a) Each export shipment of a package for which an IAEA certificate of competent authority has been issued or revalidated in accordance with §§ 173.471, 173.472, or 173.473 shall have multilateral approval, if the shipment includes—

(1) A vented Type B(M) package;

(2) A Type B(M) packaging containing radioactive materials with an activity greater than 3×10^3 A_1, or 3×10^3 A_2, as appropriate, or 3×10^4 curies, whichever is less;

(3) A Fissile Class III shipment; or

(4) Transportation by special arrangement.

(b) Each application for shipment approval shall contain—

(1) The period of time for which the approval is sought;

(2) A description of the contents, the expected modes of transportation, the type of vehicle to be used, and the proposed route; and

(3) An explanation of how the special precautions and special administrative and operational controls referred to in the package design certificates are to be put into effect.

(c) The packaging and shipment approvals may be combined into a single approval issued in accordance with §§ 173.471, 173.472 or 173.473.

(d) Approval by competent authorities is not required for packagings designed for materials covered by §§ 173.421 through 173.427 nor for Type A packagings designed for non-fissile radioactive materials.

§ 173.478 Notification to competent authorities for export shipments.

(a) Before the first export shipment of any packaging with contents exceeding A_1 or A_2, the shipper shall ensure that copies of each applicable competent authority certificate issued in accordance with §§ 173.471, 173.472, or 173.473 have been submitted to the competent authority of each country through which or into which it is to be transported. The shipper is not required to await an acknowledgment from the competent authority prior to shipping the radioactive material, nor is the competent authority required to acknowledge receipt of the certificate.

(Approved by the Office of Management and Budget under OMB control number 2137-0515.)

(b) For each of the shipments described in this paragraph, the shipper shall notify the competent authority of each country through which or into which the shipment is to be transported. This notification must be received by each competent authority at least 15 days before the shipment starts for the following:

(1) Type B(U) packagings containing radioactive materials with an activity greater than 3×10^3 A_1, 3×10^3 A_2, as appropriate, or 3×10^4 curies, whichever is the least;

(2) Type B(M) packages;

(3) Fissile Class III shipments under Section VIII of the IAEA "Regulations for the Safe Transport of Radioactive Materials, Safety Series No. 6, 1973 Revised Edition (as amended)"; or

(4) Transportation by special arrangements.

(c) The shipper notification must include—

(1) Sufficient information to enable the packaging to be identified, including all applicable certificate numbers and identification marks; and

(2) Information as to the date of shipment, the expected date of arrival, and the proposed routing.

(d) The shipper is not required to send a separate notification if the required information has been included in the application for shipment approval.

PART 174—CARRIAGE BY RAIL

§ 174.208 [Amended]

14a. In § 174.208, paragraph (b) is amended by removing section reference "173.426" and inserting, in its place, "173.9".

15. In § 174.700, paragraph (a) is amended by removing section reference "§ 173.389(c) and § 173.392" and inserting in their respective places "§§173.403 and 173.425"; paragraph (b) is amended by removing section reference "§ 173.389(i)" and inserting in its place "§ 173.403(bb)"; and by removing section references "§§ 173.389(o) and 173.392, 173.393(j), or 173.396(f)" and inserting in their respective places "§§ 173.403, 173.425, 173.441, and 173.457"; paragraph (d) is amended by removing section references "§ 173.389(a)(3) and § 173.396(g)" and inserting in their respective places "§ 173.455(a) (3) and § 173.457"; and a new paragraph (g) is added to read as follows:

§ 174.700 Special handling requirements for radioactive materials.

* * * * *

(g) In the case of packages shipped under the exclusive use provisions of § 173.441(b) for packages with external radiation levels in excess of 200 millirem per hour at the package surface:

(1) The rail car shall meet the requirements for a closed transport vehicle (§ 173.403 of this subchapter); and

(2) Provisions must be made to secure the packages so that their position within the vehicle remains fixed under conditions normally incident to transportation.

§ 174.715 [Amended]

16. In § 174.715, paragraph (a) is amended by removing section reference "§ 173.389(o)" and inserting in its place "§ 173.403"; and by removing section reference "§ 173.397(a)" and inserting in its place "§ 173.443".

§ 174.750 [Amended]

17. In § 174.750, paragraph (a) is amended by removing section reference "§ 173.387" and inserting in its place "§ 173.443."

PART 175—CARRIAGE BY AIRCRAFT

§ 175.710 [Amended]

18. In § 175.10, paragraph (a)(6) is amended by removing section reference "§ 173.391 (a), (b), or (c)" and inserting in its place "§§ 173.421, 173.422, or 173.424."

19. In § 175.700, the section heading is revised; paragraph (b) is amended by removing section reference "§ 173.397" and inserting in its place "§ 173.443"; paragraph (c) is amended by removing section reference "§ 173.391 (a), (b), or (c)" and inserting in its place "§§ 173.421, 173.422, or 173.424"; and a new paragraph (d) is added to read as follows:

§ 175.700 Special limitations and requirements for radioactive materials.

* * * * *

(d) Type B(M) packages may not be offered or accepted for transportation, nor transported, on passenger-carrying aircraft.

20. In § 175.703, paragraph (b) is amended by removing section reference "§ 173.393(r)" and inserting in its place "§ 173.448(g)"; paragraph (c) is amended by removing section reference "§ 173.389(a)(3)" and inserting in its place "§ 173.455(a)(3)"; and paragraphs (d) and (e) are added to read as follows:

§ 175.703 Other special requirements for the acceptance and carriage of packages containing radioactive materials.

* * * * * *

(d) No person may offer or accept for transportation, nor transport, by air:

(1) Any Type B(U) or Type B(M) package with an accessible surface temperature in excess of 50°C (122°F);

(2) Continuously vented Type B(M) packages, packages which require external cooling by an ancillary cooling system or packages subject to operational controls during transport; or

(3) Liquid pyrophoric radioactive materials.

(e) Exclusive use shipments of packages having a surface radiation level in excess of 200 millirem per hour may not be transported by air except by special arrangement approved by MTB.

PART 176—CARRIAGE BY VESSEL

21. In Part 176, Subpart M is revised to read as follows:

Subpart M—Detailed Requirements for Radioactive Materials

Sec.

176.700 General stowage requirements.
176.704 Requirements relating to transport.
176.706 Segregation distance table.
176.710 Care following leakage or sifting of radioactive materials.
176.715 Contamination control.

Subpart M—Detailed Requirements for Radioactive Materials

§ 176.700 General stowage requirements.

(a) Radioactive materials must not be stowed in the same hold with mail bags.

(b) A package of radioactive materials which in still air has a surface temperature more than 5°C (9°F) above the ambient air may not be overstowed with any other cargo. If the package is stowed under deck, the hold or compartment in which it is stowed must be ventilated.

(c) Each Fissile Class III shipment must be stowed in a separate hold, compartment, or defined deck area and be separated by a distance of at least six meters (20 feet) from all other Radioactive Category II or III-Yellow labeled packages. For a shipment of radioactive materials requiring supplemental operational procedures, the shipper must furnish the master or person in charge of the vessel a copy of the necessary operational instructions.

(Paperwork requirement excepted from Office of Management and Budget approval)

(d) A person may not remain unnecessarily in a hold or compartment or in the immediate vicinity of any package on deck containing radioactive materials.

§ 176.704 Requirements relating to transport indexes.

(a) The sum of the transport indexes for all packages of radioactive materials not in freight container on board a vessel, may not exceed 200.

(b) Except as provided in paragraph (e) of this section, the sum of transport indexes for packages not in a freight container may not exceed 50 in any hold, compartment, or defined deck area. Each group of radioactive material packages must be separated by a distance of at least six meters (20 feet) at all times.

(c) Except as provided in paragraph (e) of this section, the number of freight containers with packages of radioactive materials contained therein must be limited so that the total sum of the transport indexes in the containers in any hold or defined deck area does not exceed 200, and:

(1) The sum of transport indexes for any individual freight container, or group of freight containers, does not exceed 50; and

(2) Each freight container or group of freight containers is handled and stowed in such a manner that groups are separated from each other by a distance of at least six meters (20 feet).

(d) The limitations specified in paragraphs (a), (b), and (c) of this section do not apply to consignments of low specific activity materials if the packages are marked "RADIOACTIVE LSA" and no Fissile Class II or Fissile Class III radioactive materials are included in the shipment.

(e) For exclusive use shipments, the limitations specified in paragraphs (b) and (c) of this section do not apply if—

(1) For packages not in freight containers, the sum of the transport indexes of Fissile Class II packages does not exceed 50 in each hold;

(2) For packages in freight containers, the radiation level does not exceed 200 millirem per hour at any point on the surface and 10 millirem at two meters (6 feet) from the outside surface of the freight container and the sum of transport indexes of Fissile Class II packages does not exceed 50 in each freight container and 200 in each hold or defined deck area; and

(3) Each group of Fissile Class II packages is separated from other radioactive material by a distance of at least six meters (20 feet) at all times.

(f) The limitations specified in paragraphs (a) through (e) of this section do not apply when the entire vessel is reserved or chartered for use by a single shipper under exclusive use conditions if the number of Fissile Class II and Fissile Class III packages of radioactive

materials aboard the vessel does not exceed the amount authorized in §§ 173.451 through 173.459 of this subchapter. The entire shipment operation must be approved by the Office of Hazardous Materials Regulation (OHMR) in advance.

§ 176.704 Segregation distance table.

(a) Table III applies to the stowage of packages of radioactive materials on board a vessel with regard to transport index numbers which are shown on the labels of individual packages. Radioactive Category II or III-Yellow labeled packages may not be stowed any closer to living accommodations, regularly occupied working spaces, spaces that may be continually occupied by any person (except those spaces exclusively reserved for couriers specifically authorized to accompany such packages), and undeveloped film than the distance specified to Table III. Where only one consignment of a radioactive substance is to be loaded on board a vessel under exclusive use conditions, the appropriate segregation distance may be established by demonstrating that the direct measurement of the radiation level at regularly occupied working spaces and living quarters is less than 0.75 millirem per hour. More than one consignment may be loaded onboard a vessel with the appropriate segregation distance established by demonstrating that direct measurement of the radiation level at regularly occupied working spaces and living quarters is less than 0.75 millirem per hour, provided that the vessel has been chartered for the exclusive use of a competent person specialized in the carriage of radioactive material. Stowage arrangements shall be predetermined for the entire voyage, including any radioactive substances to be loaded at ports of call enroute. The radiation level shall be measured by a responsible person skilled in the use of monitoring instruments.

TABLE III

Sum of transport indexes of the packages	Minimum distance in feet from living accommodation or regularly occupied working space	Minimum distance in feet from undeveloped film and plates																								
		1 day voyage			2 day voyage			4 day voyage			10 day voyage			20 day voyage			30 day voyage			40 day voyage			50 day voyage

Note:
(1) X—indicates that thickness of screening cargo is sufficient without any additional segregation distance.
(2) By using 6 feet of intervening unit density cargo for persons and 10 feet for film and plates, no distance shielding is necessary for any length of voyage specified.
(3) Using 1 steel bulkhead or steel deck—multiply segregation distance by 0.8. Using 2 steel bulkheads or steel decks—multiply segregation distance by 0.64.
(4) "Cargo of Unit Density" means cargo stowed at a density of 1 ton (long) per 36 cubic feet; where the density is less than this the depth of cargo specified must be increased in proportion.
(5) "Minimum distance" means the least in any direction whether vertical or horizontal from the outer surface of the nearest package.
(6) The total consignment on board at any time must not exceed transport indexes totalling 200 except if carried under the provisions of § 176.704(l). The figures below the double line of the table should be used in such a contingency.
(7) Not to be carried unless screening by other cargo and bulkheads can be arranged in accordance with the other columns.

Note:
(1) X—indicates that thickness of screening cargo is sufficient without any additional segregation distance.
(2) By using 2 meters of intervening unit density cargo for persons and 3 meters for film and plates, no distance shielding is necessary for any length of voyage specified.
(3) Using 1 steel bulkhead or steel deck—multiply segregation distance by 0.8. using 2 steel bulkheads or steel decks—multiply segregation distance by 0.64.
(4) "Cargo of Unit Density" means cargo stowed at a density of 1 ton (metric) per cubic meter, where the density is less than the the depth cargo specified must be increased in proportion.
(5) "Minimum distance" means the least in any direction whether vertical or horizontal from the outer surface of the nearest package.
(6) The total consignment on board at any time must not exceed transport indexes totalling 200, unless carried under the provisions of § 176.704(l). The figures below the double line of the table should be used in such a contingency.
(7) Not to be carried unless screening by other cargo and bulkheads can be arranged in accordance with the other columns.

§ 176.710 Care following leakage or sifting of radioactive materials.

(a) In case of fire, collision, or breakage involving any shipment of radioactive materials, other than materials of low specific activity, the radioactive materials must be segregated from unnecessary contact with personnel. In case of obvious leakage, or if the inside container appears to be damaged, the stowage area (hold, compartment, or deck area) containing this cargo must be isolated as much as possible to prevent radioactive material from entering any person's body through contact, inhalation, or ingestion. No person may handle the material or remain in the vicinity unless supervised by a qualified person.

(b) A hold or compartment in which leakage of radioactive materials has occurred may not be used for other cargo until it is decontaminated in accordance with the requirements of § 176.715.

(c) For reporting requirements, see § 171.15 of this subchapter.

§ 176.715 Contamination control.

(a) Each hold, compartment, or deck area used for the transportation of low specific activity radioactive materials under exclusive use conditions shall be surveyed with appropriate radiation detection instruments after each use. Such holds, compartments, and deck areas may not be used again until the radiation dose rate at any accessible surface is less than 0.5 millirem per hour, and the removable (non-fixed) radioactive surface contamination is not greater than the limits prescribed in § 173.443 of this subchapter.

PART 177—CARRIAGE BY PUBLIC HIGHWAY

§ 177.825 [Amended]

21a. In § 177.825, paragraphs (b), (c), and (d) are amended by removing the phrase "large quantity radioactive material as defined in § 173.389(b)" and inserting in its place "highway route controlled quantity radioactive materials as defined in § 173.403(l)"; and paragraphs (b)(2)(iii) and (d)(2)(iv) are amended by removing the term "large quantity" and inserting in its place "highway route controlled quantity."

22. In § 177.842, paragraph (a) is amended by removing section references "§ 173.389(i), § 173.393(j), § 173.398(f) and § 173.392", and inserting in their respective places "§§ 173.403, § 173.441(b), § 173.457, and § 173.425"; paragraph (c) is amended by removing section references "§ 173.389(c) and § 173.392", and inserting in their respective places §§ 173.403 and § 173.425"; paragraph (f) is amended by removing section references "§ 173.389(a)(3) and § 173.398(g)", and inserting in their respective places "§§ 173.455(a)(3) and 173.457"; and paragraph (g) is added to read as follows:

§ 177.842 Radioactive material.

* * * * *

(g) For shipments transported under exclusive use conditions the radiation dose rate must not exceed 2 millirem per hour in any position normally occupied in the vehicle. For shipments transported as exclusive use under the provisions of § 173.441(b) for packages with external radiation levels in excess of 200 millirem per hour at the package surface, the vehicle must meet the requirements of a closed transport vehicle (§ 173.403 of this subchapter).

23. In § 177.843, paragraph (a) is revised to read as follows:

§ 177.843 Contamination of vehicles.

(a) Each motor vehicle used for transporting radioactive materials under exclusive use conditions in accordance with §§ 173.425(c) or 173.443(c) shall be surveyed with radiation detection instruments afer each use. A vehicle may not be returned to service until the radiation dose rate at each accessible surface is 0.5 millirem per hour or less and the removable (non-fixed) radioactive surface contamination is not greater than the level prescribed in § 173.443(a).

* * * * *

§ 177.861 [Amended]

24. In § 177.861, paragraph (a) is amended by removing section reference § 173.397 and inserting in its place § 173.443.

Appendix A—[Amended]

24a. In Appendix A, all references to "large quantity" throughout Appendix A are changed to read "highway route controlled quantity".

PART 178—SHIPPING CONTAINER SPECIFICATIONS

§ 178.350–2 [Amended]

25. In § 178.350–2, paragraph (a) is amended by removing section references "§ 173.389(j) and § 173.398(b)", and inserting in their respective places §§ 173.403 and § 173.465".

Part III

Water Resources Council

Repeal of Water and Related Land Resources Planning Principles, Standards and Procedures; and Adoption of Economic and Environmental Principles and Guidelines for Water and Related Land Resources Implementation Studies

WATER RESOURCES COUNCIL

18 CFR Parts 711, 713, 714, and 716

Water and Related Land Resources Planning Principles, Standards and Procedures; Repeal of Regulations

AGENCY: Water Resources Council.

ACTION: Repeal of rules.

SUMMARY: This document repeals 18 CFR Parts 711, 713, 714, and 716 which contain the Water Resources Council Principles, Standards and Procedures for Water and Related Land Resources Planning. The purpose of the repeal is to reduce the burden on agencies in complying with detailed and legally binding technical rules for formulation and evaluation of water and related land resources plans and projects.

EFFECTIVE DATE: This repeal becomes effective July 8, 1983.

FOR FURTHER INFORMATION CONTACT: Jonathan P. Deason, Department of the Interior (202) 343–3150.

SUPPLEMENTARY INFORMATION:

1. Background

A notice of proposed repeal of the Principles, Standards and Procedures (PS&P) in 18 CFR Part 711, 713, 714 and 716 was published on September 11, 1981, at 46 FR 45368. Many commenters requested the opportunity to review the proposed replacement, the Economic and Environmental Principles and Guidelines for Water and Related Land Resources Implementation Studies (P&G), to assist them in commenting on repeal of the existing rules. In response, the comment period was re-opened on March 22, at which time proposed P&G were published at 47 FR 12297. Comments were requested on repeal of the PS&P and on adoption of the proposed P&G, including the procedures for evaluating national economic development (NED) and environmental quality (EQ). This document contains the discussion of and addresses the comments received on both proposals.

2. Issuance of the P&G

The proposed P&G were reappraised by the Water Resources Council (WRC) in light of comments received during the initial and re-opened public review periods. A discussion of the comments received and WRC responses is presented in Section 4 below.

The P&G, as revised in response to public comments, have been established by the WRC, and a notice announcing their adoption and availability is published in today's Federal Register. This action implements the requirement of the Water Resources Planning Act (Pub. L. 89–80) that the WRC establish principles, standards and procedures for planning water and related land resources projects. The Principles and the Guidelines have been approved by the President and the Chairman of the WRC, respectively.

3. Required Analyses

It has been determined that the repeal of the PS&P is not a major rule under Executive Order 12291 and that therefore a regulatory impact analysis is not required. The repeal of the PS&P will reduce the costs attributable to water resources planning by Federal agencies and have an estimated economic effect of significantly less than $100 million. The repeal of the PS&P is not expected to increase costs or prices of goods and services in the private sector, or have other adverse economic effects.

It has also been determined that the repeal of the PS&P will not have a significant economic effect on a substantial number of small entities and that therefore a regulatory flexibility analysis is not required under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). The repeal of the PS&P is expected to reduce the type and quantity of data requested from small units of government by Federal water resources agencies, and have only a limited effect on the provision of services by small businesses. The repeal of the PS&P is not expected to significantly affect the type or number of water resources projects that are undertaken.

Based on an environmental assessment prepared in accordance with 40 CFR 1500–1508, the WRC has determined that repeal of the PS&P and issuance of the new P&G will not significantly affect the quality of the human environment.

Copies of the environmental assessment and the finding of no significant impact may be obtained from the Chairman of the Water Resources Council, Department of the Interior, Washington, D.C. 20240.

4. Response to Comments

During the initial and re-opened comment periods, 948 comments were received. The comments addressed subjects ranging from fundamental policy issues to technical corrections in evaluation procedures.

Numerous changes have been made throughout the P&G to improve clarity, correct technical points, and respond to issues raised by the public. Minor changes, including improvements in editorial style and technical corrections, are not individually addressed in the comment summaries and responses that follow.

Many simplifying changes have been made. However, several of the evaluation procedures remain complex and detailed. Where possible, a simplified alternative procedure has been developed for use under limited conditions. The final P&G represent a balance between the need for flexibility and simplicity and the need for theoretically sound and thorough analysis.

The following discussion summarizes significant and/or frequent comments and explains the responses to them reflected in the P&G.

Removal From Status as Regulations

Comment: Many commenters stated that the Principles, Standards and Procedures (PS&P) should be retained as rules. Others supported repeal and stated that the PS&P should never have been made rules.

Response: The task confronting the government has been to develop principles, standards and procedures that relate to functions of a number of agencies. Each agency operates under distinct legislative authorizations and, therefore, the programs for which each is responsible are to some extent unique. The water resource plans to which the principles and standards must apply, therefore, are varied in nature, size and expense, ranging from small soil conservation projects, which can be planned and constructed over a short period of time, to massive regional projects that require years of planning and take years to construct.

The ultimate goal of principles and standards then, is to establish uniform methods by which the agencies will plan and evaluate those projects, while at the same time permit agencies the necessary flexibility to vary the analysis to more appropriately fit the plan under evaluation. Decisionmakers require uniformity to allow appropriate comparisons and to ensure that alternatives have been adequately planned and evaluated. Flexibility is required so that planners may use only those steps and procedures necessary to evaluate a plan. Flexibility also avoids the expenditure of time and money in unnecessary or inappropriate analysis.

Promulgation of principles and standards as regulations provides a basis for uniformity. Such regulations could also provide a basis for flexibility. However, to provide flexibility either they would have to be very complex, or they would have to provide for exceptions that would require only

necessary planning and analysis on any given project.

Flexibility in regulations will also present problems if litigation occurs. Recent history demonstrates that litigation over water projects is frequent. In many cases, the issue of compliance with appropriate regulations is raised. If the necessary flexibility is built into regulations, questions will be raised as to whether appropriate regulations have been followed and whether in the planning it was appropriate for exceptions to have been allowed. These uncertainties change the focus of planners from performing the appropriate analysis to mechanical compliance with regulations to avoid difficulties in litigation. Thus, time and money are expended on matters unnecessary to the planning process.

The purpose of the change from regulations to guidelines is to keep the focus on the performance of appropriate planning and analysis. Uniform, professionally accepted procedures form the general basis of the planning process.

Moreover, they will be flexible because they are guidelines. As guidelines they can be less complex because explicit provision for exceptions to general planning procedures will be unnecessary. The change from regulations to guidelines also removes or reduces the threat of litigation for failure to comply, thus permitting planners to focus on the appropriate task and not on a concern for mechanical compliance with complex and detailed regulations.

Comment: Repeal will result in violation of environmental protection laws and regulations.

Response: This is not a correct assertion. The changes proposed will not affect any environmental laws or regulations. Those laws and regulations remain, so compliance with them is still required.

Comment: The right of the public to enforce the Principles, Standards and Procedures (or Principles and Guidelines) may be impaired. Planners should be held accountable for their analysis.

Response: The P&G will continue to provide a basis to make planners accountable for their analysis. Plans will undergo rigorous review within each responsible agency, by States and other Federal agencies, and in the review process of the Office of Management and Budget. Public enforcement through litigation is not contemplated in the planning process. The P&G permit planners to focus on the task at hand, which is appropriate planning, not avoidance of litigation. Public participation in the formulation and evaluation of alternative plans is not diminished through the proposed change.

Comment: Rather than repeal the PS&P, amend them as necessary to decrease the burden and increase flexibility.

Response: As discussed above, in order to provide the flexibility required in the PS&P as regulations, it would be necessary either to provide separate regulations for each type of planning situation or to provide in the regulations that in appropriate circumstances exceptions could be made. The first method leads to very complex regulations. The second increases uncertainty on the part of planners as to whether they have complied with the regulations. Moreover, since regulations may be subject to litigation, the uncertainty created by either greater complexity or broader exceptions will create greater potential for litigation. With the PS&P as regulations it is difficult to decrease the burdens and yet provide the necessary flexibility.

Comment: Some commenters urged retaining the PS&P as rules to achieve uniformity, a more proper goal than flexibility. Others stated that all uniform planning procedures since 1973 should be disregarded.

Response: The need for uniformity is recognized, and it is not intended that uniformity be foregone. The P&G set forth general uniform requirements for the planning process substantially the same as those in the existing PS&P. The intent is to provide flexibility within those broad guidelines, such as in the scope of data collection or the level of detail required, depending upon the plan being evaluated. Moreover, absolute uniformity fails to account for the differences in the scope and magnitude of the alternative plans that would be studied under the P&G or the PS&P.

Comment: Repeal the procedures but not the P&S, because only the procedures are burdensome.

Response: The procedures, as now issued in the P&G, reflect the fact that they are intended to be a more detailed explication of how to comply with principles and standards (Chapter 1 of the P&G). While repealing only the procedures as rules would permit some greater flexibility, it would not resolve the problem, since consistency is necessary between the principles and standards and these procedures. A greater measure of flexibility results from changing the principles and standards to guidelines.

Comment: Repeal means that future changes in the P&G can be made with no public involvement whatsoever.

Response: Although no particular process is specified, public participation in future revisions to the P&G is not precluded. Continuing public review and comment will assist in consideration of possible future improvements in the P&G.

Comment: The P&G contain professionally accepted methods for formulating and evaluating plans, so compliance should be legally required.

Response: It is agreed that the P&G contain accepted methods for formulation and evaluation of plans. These methods reflect the state of the art in this type of analysis. However, the threat of litigation on minor technical points misdirects the focus of the planner. (See response above concerning accountability.) The change to guidelines permits planners to use those methods as applicable. These are widely accepted technical methods and will be followed by agency planners.

The Single Federal Objective

Comment: Several commenters wrote that the establishment of only one objective for water and related land resources project planning will result in inadequate consideration of environmental values. Conversely, several commenters wrote that the Federal objective of Principle #2 was appropriate.

Response: Principle #2 states that: "The Federal objective of water and related land resources project planning is to contribute to national economic development consistent with protecting the Nation's environment, pursuant to national environmental statutes, applicable executive orders, and other Federal planning requirements."

Thus, the objective is not without constraints; it includes consideration of Federal responsibilities for protecting the Nation's environment, as reflected in Federal law and regulation. This single objective is consistent with the change that reduced the P&G coverage to the four primary water resources development agencies. Planning activities of other programs are not constrained by the P&G. In addition, Principle #5 allows plans to be formulated to address State and local concerns not adequately addressed by the NED plan. These concerns may include environmental concerns.

Comment: Several commenters stated that emphasis upon national economic development in planning will result in projects that are inconsistent with State and local needs.

Response: A fundamental premise of the P&G is that Federal water resources planning is to be responsive to State and

local concerns. This has been explicitly stated in Principle #3. This includes all State and local concerns, not just those related to national economic development. Principle #5 provides increased flexibility for planners to formulate water development plans that address State and local concerns not fully addressed by the NED plan. The P&G and NEPA require development and display of all significant effects of alternative plans, including environmental, regional, and social effects. Also, Chapter I, Paragraph 1.6.2(c), provides that each plan should be formulated in consideration of four criteria: completeness, effectiveness, efficiency, and acceptability. Acceptability is defined as the workability and viability of a plan with respect to acceptance by State and local entities and the public and compatibility with existing laws, regulations, and public policies.

Comment: The principles are not in accord with the congressional statement, contained in Section 209 of the Flood Control Act of 1970, that four objectives (regional economic development, the quality of the total environment, the well-being of the people and national economic development) were to guide water project planning.

Response: The Flood Control Act of 1970 gives no operational definition to its statement of objectives. The P&G define operationally the National Economic Development (NED) objective. The expression of State and local concerns in the planning of individual projects will provide guidance for addressing the other objectives stated in the 1970 Act.

Plan Selection Principle

Comment: Selection of the plan with the "greatest net economic benefit" does not ensure that the recommended plan will make a net overall contribution when all social and environmental costs are considered.

Response: Agree. It is for this reason that the P&G provides for exception to the NED plan selection rule when consideration of effects of a plan indicate that there are overriding reasons for selecting another plan. Changes have been made to ensure that every recommended plan will, in the judgment of the responsible decisionmaker, produce overall beneficial effects that outweigh its overall adverse effects.

Comment: Selection of plans should not involve the Cabinet Council on Natural Resources and Environment.

Response: Neither the March 22, 1982, proposal nor the final P&G envisions a plan selection role for the Cabinet Council on Natural Resources and Environment. An earlier draft proposal did, however, consider such a role.

Comment: The selected plan should be the alternative that "reasonably maximizes" net economic benefits, not the one with the greatest net economic benefits.

Response: The text has been revised to clarify that the plan with the greatest net economic benefits, that is the NED plan, is the one that reasonably maximizes net economic benefit.

Comment: Requiring the recommended plan normally to be the one with the greatest net economic benefits is overly restrictive and does not recognize the State and local concerns addressed in plan formulation. Certainly, such a requirement is inappropriate when the project is to be entirely paid for by nonfederal interests.

Response: The requirement normally to recommend the plan with the greatest net economic benefits emphasizes the commitment of the Federal Government to the economic efficiency criteria in water project planning and selection. The provision for recommendation of another plan when overriding conditions warrant recognizes that concerns of State and local governments are to be fully addressed and balanced against the Federal objective in the planning process. Even if a project is to be paid for entirely by nonfederal interests, the fact that there is Federal involvement requires a balancing of net national economic development benefits and other benefits in selecting the overall best plan.

Comment: Responsibility for plan selection should rest with the responsible regional agency official, not the Secretary of a Department.

Response: The responsible field-level agency official would tentatively recommend a plan in every case under the P&G. If a plan other than the NED plan were recommended, that recommendation would become the agency's position only if the agency head grants an exception. This procedure recognizes that the highest-ranking official of an agency is ultimately responsible for the agency's activities and is to be involved in the selection of plans not fully responsive to the Federal objective.

Comment: Absent guiding criteria or appeal procedures, the exception clause allows the Secretary of a department or head of an independent agency an inordinate amount of discretion.

Response: Because of the subjective nature of the tradeoffs required in deciding whether to grant an exception, no specific criteria are appropriate other than the directive that there be overriding reasons. Chapter I of the Guidelines states that: "The basis for selection of the recommended plan should be fully reported, including considerations used in the selection process."

Agency Coverage

Comment: Comments took various positions on what agency programs should be subject to the P&G. The positions were: In favor of continued coverage of eight agency programs; in favor of expansion of coverage to include additional agencies; and support for the proposal to reduce coverage to the four primary water resource development agencies.

Response: The P&G are for use in planning water projects. Reducing coverage to the four primary water resource development agencies (Corps of Engineers, Bureau of Reclamation, Soil Conservation Service, and Tennessee Valley Authority) is consistent with the content and degree of specificity in the P&G, and especially with the stated Federal objective. Expansion of agency coverage could be accomplished only with fundamental changes in the P&G planning framework. This would introduce undesirable complexity into the P&G.

Applicability

Comment: The definition of and extent of "water resource project plans" subject to the P&G should be clarified.

Response: Water resources project plans of the four agencies covered by the P&G include all pre- and postauthorization project formulation and evaluation studies that are not approved by the agencies' field officers within 120 days of this action. Guidance provided in Section 1.1.1(d) intends broad applicability to both pre- and postauthorization planning of the agencies covered. Limitation of applicability to certain types of water project studies was not intended.

Comment: While some comments supported the absence of a "grandfather" provision that would exempt certain studies, others stated that studies of projects previously authorized for construction should be excluded from coverage.

Response: No change has been made from the March proposal in the applicability of the P&G. All studies completed more than 120 days after the P&G take effect will be covered, so that future studies will contain consistent and comparable evaluations, regardless of the status of the project for which the study is done.

Relationship to Administration's Fiscal Policies

Comment: Some commenters stated that the proposed action was inconsistent with the Administration's policies for fiscal restraint. Others stated that the proposed action supported efforts to reduce costs associated with Federal programs.

Response: The emphasis in the P&G on national economic development is intended to improve water project investment decisions and is, therefore, consistent with the President's fiscal policies.

Cost Sharing

Comment: Cost sharing policies should apply only to projects not yet authorized, and should reflect the degree to which the selected plan addressed desires of Federal, State, and local governments.

Response: Neither the PS&P nor the P&G establish cost sharing and, therefore, that subject is beyond the scope of this action. As stated in Principle #11, cost sharing policies for water projects will be addressed separately.

Compliance With the National Environmental Policy Act

Comment: Several commenters pointed to changes proposed in the P&G that had not been addressed in the preliminary environmental assessment (EA). Others stated that the EA was generally inadequate.

Response: Response to these comments is reflected in the amended environmental assessment.

Compliance With WRC Regulations and Pub. L. 89-80

Comment: WRC administrative regulations require that decisions affecting the authorities and programs of agencies that are not voting members of WRC are to be made in formal meetings. The proposed repeal decision, which was made in a written WRC Action Memorandum, should have been made at a formal recorded meeting of the WRC.

Response: WRC's administrative regulations call for decisions affecting nonmember agencies to be made in formal meetings of the Council. After review of comments received during the initial 30-day comment period and the 60-day extension, the final decision whether to repeal the PS&P was made by the WRC members in a formal meeting, in accordance with WRC regulations.

Clarification of WRC Status

Comment: It is unclear what the future role of the WRC will be, because the proposed Guidelines would be issued under the Water Resources Planning Act authority, and they include references to the WRC.

Response: The Administration has proposed no future funding for a separate WRC staff or for its programs. As long as the Water Resources Planning Act (Pub. L. 89-80) is in effect, the policymaking Council, made up of eight agency heads, has the statutory responsibility for establishing principles, standards, and procedures for planning water resources projects, subject to the approval of the President. The P&G, including the procedures in chapters II and III, constitute, "principles, standards, and procedures," as required by law. Administrative activities formerly carried out by the WRC staff have been or will be assigned to other agencies or to ad hoc interagency groups.

General Comments on Chapter I—Standards

Comment: Clarification is needed that, although "implementation studies" includes both plan formulation and plan evaluation, only the Guideline sections addressing evaluation apply when restudies do not include plan reformulation.

Response: Chapter I has been changed to clarify this point. An example of when this would occur is the updating of financial and economic material to re-examine plan feasibility.

Discount Rate

Comment: Given that the discount rate may change annually, what is the appropriate rate to be used in studies formulated or evaluated over a period of more than one year?

Response: The appropriate discount rate is the rate currently in effect. It changes over time. Such changes must be accommodated in the planning process.

Prices

Comment: The prices used for evaluation should reflect real exchange values. The sections on relative and general prices should be changed to emphasize this.

Response: Section 1.4.10 of the P&G has been changed for clarity and to reflect this comment.

Appraisal of Plan Effects

Comment: The judgment involved in the appraisal process should apply to evaluation of NED effects as well as to evaluation of environmental and social effects.

Response: It is recognized that judgments are necessary to identify the best overall plan. However, the term "appraisal," as used in the P&G, is defined as the process of assigning social values other than dollars to effects of alternative plans.

Mitigation

Comment: Section 6.1(g) overemphasizes the mitigation concept, and fails to provide for recognition of potential benefits for enhancement of the environment.

Response: Environmental enhancement measures may be included in alternative plans if they address State or local concerns or produce net NED benefits.

Comment: Some commenters stated that Section 6.1(g), which deals with mitigation, should be deleted because mitigation requirements allow project opponents to impose unreasonable conditions as a price of withdrawing opposition. Other commenters wanted to strengthen this section by deleting "where practical," in order to ensure that wildlife conservation and enhancement receive equal consideration. Some commenters also pointed out that the Fish and Wildlife Coordination Act does not apply to the Watershed Protection and Flood Prevention Act. One commenter pointed out the fact that all alternatives do not require mitigation.

Response: Fish and wildlife and other mitigation is appropriate and consistent with the Federal objective of contributing to national economic development consistent with protecting the Nation's environment. This section has been retained with editorial changes.

Comment: Section 6.2(b) suggests that incremental mitigation measures not providing net beneficial NED effects cannot be included in the NED plan.

Response: Mitigation measures are not required to produce net NED benefits. Each increment of the NED plan, with its appropriate mitigation measures, must produce net NED benefits. The language has been modified to clarify this point.

Nonstructural Measures

Comment: Many commenters urged retention of the requirement for a primarily nonstructural plan in all cases. Similarly, one commenter stated that consideration of nonstructural measures should be required because nonstructural alternative analysis is critical if an acceptable range of choices

is to be considered. Another commenter stated the opposing view that nonstructural measures should be deleted since they do not provide the same results as structural measures. Other commenters supported deletion of the nonstructural plan requirement as a simplification of the planning process.

Response: While there is no requirement to formulate a separate, primarily nonstructural alternative, nonstructural measures are to be considered in alternative plans (see Section 6.1(f)). The consideration of nonstructural measures in alternatives—alone or in combination with structural measures—is retained, since they sometimes offer more efficient and effective solutions to problems.

Formulation of Alternative Plans

Comment: Section 6.1(e) is overly specific with regard to its stated concern for water demand and supply, since the intended concept applies to other concerns as well, such as flood protection. A range of practical possibilities must be evaluated if alternative plans are to be developed.

Response: Section 6.1(e) has been changed for a more general application.

Comment: Language should be returned to Section 6.1(e) to state that water conservation is to be fully integrated into plan formulation. The provision that drew a clear contrast between water conservation elements and storage facilities is conspicuously absent.

Response: The whole planning process is appropriately concerned with the conservation of water and other resources. Section 6.1(e)(4) was added in the proposal to make it clear that the development and management of water supplies are elements of conservation.

Comment: Section 6.2(b) allows formulation of plans that do not provide net NED benefits, but only if they are cost effective measures. This should be broadened to allow consideration of nonmonetary costs.

Response: Measures which are included to address concerns other than the Federal objective should be those measures that are most cost effective and meet the four criteria of completeness, effectiveness, efficiency, and acceptability. It is proper (when we are trying to hold down Federal expenditures to improve the Nation's economy) to invest in the least costly solutions to problems.

Comment: Section 6.4(c) requires the development of plans in direct conflict with existing laws. This should be optional.

Response: This section has been rewritten to provide flexibility. It now states that alternative plans that include removal of institutional barriers should be presented where such plans are implementable.

Accounts, General

Comment: In the display of effects discussed in section 7.1(e), add "wetlands protection, related terrestrial habitats," between "ground water" and "instream flow."

Response: This is not necessary. The proposed categories are covered by section 6.1(g), *Mitigation.*

Comment: Are significant EQ effects (Section 7.3(c)) part of the EIS?

Response: Yes. Preparation of the EIS is an integral part of the planning process.

Comment: The EQ procedures referenced in Section 7.3(a)(4) should be the required procedure and not simply a "suggested" one, in order to assure uniformity of comparison between alternative plans.

Response: The EQ procedures provide only a conceptual framework for evaluation of EQ effects. Other procedures that include measurement techniques may be superior to these procedures in certain instances; therefore, the use of other evaluation procedures remains an option.

Comment: There is no requirement for a State economic development account. A separate accounting would be helpful to State and local government entities.

Response: Such an accounting is not precluded. A State may be treated as a region if such an accounting is needed for decisionmaking purposes.

Comment: Flexibility should be provided to allow the use of State projections in evaluating regional economic development effects.

Response: The regional analysis addresses impacts in more than one region. A meaningful presentation requires the use of consistent projections for all regions.

Comment: The proposals in Section 7.5 (other social effects account) dilute this section to the point of ineffectiveness.

Response: Flexibility has been added in order to focus the evaluation on the effects that have a material bearing on the decisionmaking process.

Comment: The discussion of other social effects (section 7.5(e)) states that agricultural land is a renewable resource. For all practical purposes this is not true. Agricultural land is a nonrenewable resource.

Response: The text has been changed to remove this distinction.

The NED Account

Comment: The NED account is the only required account. Some commenters favored two accounts—NED and EQ. Others favored all four accounts—NED, EQ, OSE and RED—for consistency purposes. They stated that too much emphasis is placed on NED and not enough is placed on other effects of alternative plans. One commenter stated that NEPA is the basis for the EQ account. Other commenters stated that it is sufficient to establish the NED account and questioned the need for the details of the other accounts.

Response: The flexibility of using either the remaining accounts (EQ, RED and OSE) or some other appropriate format for presentation of effects is retained. This satisfies NEPA and the requirement of displaying significant effects for decisionmaking purposes. The proper emphasis is placed on the NED account since it displays information relevant to the Federal objective. The evaluation and display of effects is limited to those which would have a material bearing on the decisionmaking process. This helps to eliminate wasteful inventory and evaluation work and improves the planning process by placing the focus on significant issues.

Comment: The full employment assumption in sections 7.2(c)(3) and 4.9(c) is not consistent with benefit values associated with the use of otherwise unemployed or underemployed labor.

Response: Even in a full employment economy there are areas with persistent unemployment problems due to labor immobility in the short run. It is appropriate to claim employment benefits in such areas if unemployment is substantial and persistent at the time of authorization or new start appropriation decisions.

Comment: Why is the net income approach not utilized to estimate unemployed or underemployed labor benefits?

Response: It is used. Section 7.2(e)(1) has been changed to clarify this.

Comment: Limiting unemployed or underemployed labor benefits to labor employed on site during construction underestimates beneficial effects.

Response: The benefit procedure is consistent with the current state of the art, and it provides a reasonable estimate of the benefits.

Comment: Benefits of employment should not be restricted to construction employment. The greatest long-term benefit will be permanent new jobs.

Response: There are no valid techniques for estimating long-run employment benefits. Also, a basic assumption in benefit-cost analysis is that in the long run there are no unemployed labor resources.

Comment: Section 7.2(e)(1), which discusses the opportunity costs of otherwise unemployed and underemployed labor, is confusing, controversial, and partly unnecessary.

Response: The section has been changed to increase clarity and brevity.

Comment: How do the procedures account for the difference in willingness to pay among various planning regions?

Response: The value of goods and services to the Nation is defined as the willingness of users to pay for each increment of output. Thus, the value of project outputs is the willingness of users in the benefiting region to pay for that increment of project output they will receive.

Comment: Clarification is needed that estimates of benefits should be based on costs of the most likely alternative only when there is evidence that the alternative would be implemented.

Response: Clarification has been provided in the procedures which utilize the cost of the most likely alternative as a means to estimate the willingness of users to pay. There must be evidence that the alternative would be implemented in the absence of any of the alternative plans under consideration (the without-project condition).

Comment: The statement is made that "the external economies in the NED account do not include decreases in the price of products or service, * * *" yet in section 7.2(f)(2) and g(4) these external economies are specifically allowed to be included in the accounts.

Response: The referenced sections covered external *diseconomies;* therefore, they were conceptually sound. However, the problem has been resolved by removing these vague categories of benefits and costs and replacing them with a category called "other direct effects."

Comment: In section 7.2(g)(1), the statement that "these costs do not include transfer payments such as replacement housing, assistance payment, * * *" is not consistent with section 9.1(b).

Response: The difference in the two sections occurs because Section 7 deals with NED costs (net economic costs), while Section 9 deals with financial costs (implementation outlays).

Comment: Water quality should be included in the category of goods and services in the NED account.

Response: The beneficial and adverse effects of water quality changes are contained in the categories of benefits and costs associated with water use, for example, recreation and water supply.

Comment: Low flow augmentation can produce benefits and should be included in the list of goods and services.

Response: The economic benefits of low flow augmentation are contained in the categories of benefits associated with water use, e.g., recreation and water supply.

Comment: NED benefits should include fish and wildlife management benefits.

Response: Where fish and wildlife benefits can be quantified in monetary terms, they are included in the recreation and commercial fishing categories.

Comment: Administratively established values, such as for recreation, have been historically grossly understated. Such value should be the minimum Federal wage times eight hours per day.

Response: The commenter offers a measure of the value of leisure. However, the willingness to pay for use of the particular site under consideration in an evaluation cannot be directly related to labor income foregone. In addition to the unit-day values schedule, alternative techniques are provided to estimate the value of a visitor-day of recreation use. They are considered to provide more accurate estimates, but at the expense of added complexity.

Displays

Comment: The concept of a "candidate plan" should be retained. Use of this concept ensured the availability of alternative plans with very different priorities.

Response: The term "candidate plans" has been eliminated as a simplifying change. However, the concept is retained in the requirement that alternative plans be formulated to address not only the Federal objective, but also other State and local concerns.

Comment: Effects should be displayed in the four account system. Section 8.2(b)(3) should eliminate the "some other appropriate format" language.

Response: The language has been retained in the interest of flexibility. Other display methods are equally valid for making consistent comparisons of alternative plans.

Comment: The table formerly required under 711.71(c)(2) of the PS&P should be retained. The proposed section does not substitute for the determination of a plan's compliance with environmental statutes.

Response: Such a table is not needed. The P&G require that each alternative plan comply with all environmental statutes.

Cost Allocation

Comment: Is the proposed cost allocation method the same as the separable costs/remaining benefits (SC/RB) method?

Response: Yes, except as otherwise provided in Section 1.9.3(b) of Chapter I, by which joint costs may be allocated in proportion to the use of facilities.

Comment: Some commenters proposed broadening the use of alternative costs in the cost allocation procedure.

Response: The section addressing use of alternative costs was expanded to indicate that an alternative cost approach is to be used whenever costs would be incurred for a purpose not addressing the NED objective, e.g., a State or local concern.

Comment: One commenter stated that there was ambiguity in the definition of financial costs to be allocated.

Response: The section on cost allocation has been clarified to include the value of contributed lands used for a plan.

Plan Selection

Comment: In order to eliminate confusion it should be made clear that the plan with the greatest net economic benefit is the NED plan. Suggest "The plan with the greatest net economic benefit (the NED plan) is to be selected * * *"

Response: This change has been made.

Comment: There is a conflict between Section 10.2(a), which states that the plan with the greatest net economic benefit is to be selected "unless the Secretary of a department or head of an independent agency grants an exception * * *," and Section 10.2(c), which states that selection of the recommended plan should be made by the agency decisionmaker.

Response: The Secretary of a department or head of an independent agency is the agency decisionmaker for these purposes.

Comment: The selected plan must be consistent with State water management plans and policies. The Governor of the affected States must concur in the final plan selection.

Response: Consistency with State water management plans and policies is an indicator of a plan's acceptability. Concurrence by the Governors of affected States is also a measure of a plan's acceptability. The NED plan is to

be formulated in consideration of the acceptability criterion, i.e., acceptance by State and local entities and compatibility with existing laws, regulations and policies. This is adequately covered in Section 6.2(c). Another indicator of the plan's acceptability is the willingness of nonfederal sponsors to sign agreements to provide financing, lands, easements, and rights-of-way.

Comment: Section 10.2(c) indicates that selection of the recommended plan should be made by State or local sponsors for federally-assisted projects. Section 10.2(a) requires selection of the NED plan unless the Secretary of a department grants an exception. This is an inconsistency. There is also an inconsistency in requiring formulation of alternative plans to respond to State and local concerns, but requiring selection of the NED plan.

Response: Section 10.2(c) has been modified to recognize that State and local sponsors may recommend the selection of a plan other than the NED plan. However, plan selection is to be made by the agency decisionmaker for both Federal and federally-assisted programs.

General Comments on Procedures

Comment: The degree of flexibility in the procedures should be increased in order to be consistent with the change from rules to guidelines.

Response: The Guidelines state in Section 1.7.2(a)(4) that the NED procedures can be abbreviated when appropriate, but that planners are expected to use the approved procedures unless or until more accurate alternative methods have been approved by the Water Resources Council or, if policy changes are involved, the Cabinet Council on Natural Resources and Environment. Additional analyses can also be presented for comparison. This policy is reflected in the NED procedures. The EQ procedures are included as one alternative evaluation system that may be used by affected Federal agencies.

NED Procedures, General (Subparts A and B)

Comment: Subparts A and B should be deleted because they do not include benefit evaluation procedures, and the material is adequately addressed in Chapter I of the Guidelines.

Response: It is agreed that this material does not include procedures for measuring NED benefit categories. Material that was adequately covered in Chapter I has been removed. The material on risk and uncertainty has been edited to be general guidance on how to treat risk and uncertainty and has been moved to a supplemental Chapter I. This change also recognizes the fact that considerations of risk and uncertainty apply not only to NED analysis, but also to environmental quality, regional, and social effects analyses.

Comment: The calculation of net NED benefits in this section should be presented in average annual equivalent (annualized) terms, rather than in present value terms.

Response: Agree. In the interest of consistency, the presentation of net NED benefits in this section has been changed from "present value" to "average annual equivalent" terms. This is the normal presentation of benefits in agency reports.

Comment: The definition of the period of analysis needs to be clarified.

Response: Agree. The language in old section 2.1.2(c) has been revised to provide clarification and consistency.

M&I Water Supply (Subpart C)

Comment: The Federal discount rate should not be used in valuing the most likely nonfederal alternative M&I project, because it undervalues the costs that would be incurred in nonfederal development.

Response: In order to assess comparable value of all alternatives on a common basis, the Federal discount rate is used in evaluations. This ensures that the unrelated element of variable financing will not bias the evaluation toward Federal, rather than local or private, investment.

Agriculture (Subparts D, E and F)

Comment: Some commenters objected to the sole use of ten basic crops (rice, cotton, corn, soybeans, wheat, milo, barley, oats, hay, and pasture) in the analysis of intensification benefits for agricultural floodwater, erosion, sedimentation, drainage, and irrigation. They stated that this is unnecessarily arbitrary and restrictive and may result in an understatement of the actual NED benefit. On the other hand, another commenter stated that if crop restrictions are eliminated, NED benefits will be overstated because benefit claims will be made for transfers in production from one area to another.

Response: The theory underlying the distinction between basic crops and other crops has been clarified. In a national context, the production of crops other than basic crops is seldom limited by the availability of suitable land. The limitations on production are generally market demand, risk aversion, and other supply factors. When suitable lands are already available, making additional land available will not lead to a national increase in production. Rather, it will lead to transfers of production from one area to another. The area losing production of these other crops would switch to production of basic crops. As a result, national benefits from a project would accrue from any decreases in the cost of production of these other crops and from the increased production of basic crops.

However, it is agreed that the designation of certain crops as basic for the analysis of all projects is an overly simple solution to what is in reality a complex empirical problem. Therefore, a test has been added to the procedure to determine whether the absence of suitable land is constraining production in a proposed project area. When it can be demonstrated that crops not considered basic crops are land constrained, they may be evaluated as basic crops in the determination of agricultural intensification benefits.

Comment: Why not circumvent the problem of crop selection by going directly to the change in land value associated with irrigation, rather than focusing on which crops should be included or excluded from the agricultural benefit calculations?

Response: An alternative procedure has been added in which intensification benefits from a plan are based on differences in the market value of land. This procedure is to be implemented by qualified land appraisers. The land value procedure can be substituted for an income calculation of intensification benefits associated with a plan. It is recognized that in some cases obstacles to proper land evaluation analysis may prohibit use of this procedure.

Comment: Increased returns to family labor and to farm management should be counted as benefits rather than as costs. This is because the opportunity cost of additional effort for most farm areas is almost zero due to the immobility of these factors. Furthermore, the level of management charge is arbitrary and inflexible.

Response: The procedures are designed to evaluate the benefits of the project measure that remain after accounting for all costs of implementation. These costs include project costs and associated on-farm costs such as family labor and management. Although these costs are not financial outlays, they are opportunity costs and must be counted to properly evaluate a plan. It is unrealistic to infer that farm labor and management will be immobile over the long life of a water project and, thus, to assign them zero opportunity cost. The

existing treatment of farm labor is proper. However, in the case of management the procedure has been modified to allow the use of a range of charges appropriate to the type of farming operation.

Comment: One commenter has indicated that the procedures are inconsistent in the treatment of benefits from increases in yields due to future improvements in technology. They are permitted for damage reduction benefits, but not in the analysis of intensification benefits.

Response: Agree. Increases in yields due to changes in technology, as well as the costs associated with those changes, should be included in intensification benefits, since realization of the benefits from improved technology is dependent on the installation of the water resources project. This change results in consistent treatment of benefits from changes in technology.

Comment: Benefit should be allowed in computing net farm income for marketing field crops through livestock.

Response: The current procedures recognize that irrigated crops are appropriately valued at their market price regardless of the form in which they are ultimately marketed. That is, the crop and livestock activities are considered to be independent. However, in geographically isolated locations, increased livestock production may depend on the development of the project. Where this can be demonstrated, net income from additional livestock production may be included as a benefit. All costs associated with the increased livestock production, including the value of the feed and forage from the project used in feeding the livestock, must be included as costs in the evaluation.

Hydropower (Subpart H)

Comment: Simplified procedures for small-scale hydropower projects should apply to projects of 100 MW capacity or less.

Response: The procedures have been revised to permit the use of simplified evaluations for single-purpose projects of 80 MW capacity or less at existing Federal facilities. This capacity was selected because it is defined as small-scale under the Public Utility Regulatory Practices Act of 1978.

For projects at undeveloped sites, which involve more uncertainties and generally have higher unit costs, the simplified evaluation will continue to apply to projects of 25 MW or less capacity.

Comment: The procedures should allow use of market data in evaluating hydropower projects.

Response: In recognition of the fact that a market exists to guide nonfederal energy development decisions, an alternative procedure has been provided for use under certain conditions. This alternative procedure permits the evaluation of single-purpose hydropower alternatives on the basis of market data when those plans would be 100 percent nonfederally financed and would have no significant adverse incidental effects.

Comment: One commenter suggested that the most likely nonfederal interest rate should be used in determining hydropower benefits. Another commenter urged that the Federal discount rate continue to be used.

Response: Distortions would be introduced into comparison of alternatives if an interest rate other than the Federal discount rate were used to evaluate the most likely nonfederal alternative.

Recreation (Subpart K)

Comment: Recreation benefit procedures are overly complex and, given the imprecision of recreation economics, cannot yield cost effective results. The threshold for use of the contingent valuation method (CVM) or the travel cost method (TCM) should be increased to one million visits annually.

Response: The procedures for the evaluation of recreational benefits of a project as proposed in these guidelines reflect the current state of the art and if used with skill and judgment by the analyst should provide the best estimates that can be obtained. Three alternative methods and their appropriate uses are presented in the guidelines with detailed explanation in the attached appendices. In the interest of increasing flexibility and reducing planning costs, the threshold for use of the CVM and TCM methods has been increased from 500,000 to 750,00 visits annually.

Comment: The existing unit-day value schedule is too restrictive, and there is a wide disparity between these values and those developed using the travel cost method, particularly for specialized hunting and fishing activities. Additional work is needed to ensure that values are reasonable, acceptable, and representative of expected user benefits.

Response: Reevaluation of the schedule of unit-day values is beyond the scope of this action. Unit-day values are cooperatively established by Federal water resource agencies, as provided for in Section 2.10.10(c)(2). The values have been updated by use of the Consumer Price Index to reflect current dollar (FY 1983) values.

External Economies (Subpart M)

Comment: The procedure concerning external economies should be deleted, because all known benefits should be internalized in the planning process.

Response: Agree. National economic planning should internalize all known direct beneficial and adverse effects. Consequently, this procedure has been rewritten as new *Section XII, Other Direct Benefits.*

Comment: This procedure contains potentially serious ambiguities and should be revised to ensure that only technological economies are included.

Response: It is correct that only direct effects of a plan arising from technological relationships are to be included in the analysis. The section has been rewritten to clarify this point.

Unemployed or Underemployed Labor Resources (Subpart N)

Comment: The procedure should extend the value for employment benefits to projects within reasonable commuting distance of areas of high and persistent unemployment.

Response: The procedure is limited to projects physically located in areas of high or persistent unemployment because the values (see Step 5 of evaluation procedure) are based on a study of projects physically located in areas of high and persistent unemployment. It would be inappropriate to apply these same values to projects outside these areas. Expenditures on projects outside of these areas would have a somewhat smaller but unspecifiable impact; however, the state of the art does not include procedures for measuring these unspecifiable benefits.

Procedure for Evaluating Structural Failure (OSE Account)

Comment: Some commenters urged retention of the OSE procedure for structural failure. Others supported the proposal to eliminate it from the P&G.

Response: The P&G do not include the former structural failure procedure. That procedure assumed arbitrary conditions for structural failure and resulting analyses could not be translated into expected losses. Without such capability, the procedure would not have provided useful information to assist in decisionmaking.

Final Action

PART 711—[REMOVED]

PART 713—[REMOVED]

PART 714—[REMOVED]

PART 716—[REMOVED]

Title 18 of the Code of Federal Regulations is amended by removing Parts 711, 713, 714 and 716.

(Secs. 103 and 402 of the Water Resources Planning Act (Pub. L. 89–80, 42 U.S.C. 1962, 1962b–2 and 1962d); E.O. 11747, November 7, 1973, 38 FR 30993).

Dated: February 22, 1983.

James G. Watt,

Chairman, Water Resources Council.

BILLING CODE 4310-10-M

WATER RESOURCES COUNCIL

Economic and Environmental Principles and Guidelines for Water and Related Land Resources Implementation Studies

AGENCY: Water Resources Council.

ACTION: Notice of adoption and availability.

SUMMARY: This notice announces the adoption and availability of administrative Economic and Environmental Principles and Guidelines for Water and Related Land Resources Implementation Studies (P&G) as approved by the President on February 3, 1983, and the Chairman of the Water Resources Council on February 22, 1983. The P&G replace 18 CFR Parts 711, 713, 714 and 716 and apply to implementation studies for water and related land resources projects of the Bureau of Reclamation, the Corps of Engineers, the Soil Conservation Service and the Tennessee Valley Authority.

DATE: The new P&G become effective July 8, 1983.

ADDRESS: Written comments for future improvements in the P&G should be addressed to: Chairman of the Water Resources Council, Department of the Interior, Washington, D.C. 20240. Copies of the P&G may be obtained from the Superintendent of Documents, Government Printing Office, Washington, D.C. 20402 (Stock Number 052–045–00085–1).

FOR FURTHER INFORMATION CONTACT: Jonathan P. Deason, Department of the Interior (202) 343–3150.

SUPPLEMENTARY INFORMATION:

I. Background

A notice of proposed repeal of the Principles, Standards and Procedures (PS&P) in 18 CFR 711, 713, 714, and 716 was published on September 11, 1981, at 46 FR 45368. Many commenters requested the opportunity to review the proposed P&G to assist them in commenting on repeal of the existing rules. In response, the comment period was re-opened on March 22, at which time proposed P&G were published at 47 FR 12297. Comments were requested on repeal of the PS&P and on adoption of the proposed P&G, including the procedures for evaluating national economic development (NED) and environmental quality (EQ).

II. Issuance of the P&G

The proposed P&G were reappraised by the Water Resources Council (WRC) in light of comments received during the initial and re-opened public review periods. A discussion of the comments received and WRC responses is presented in the document repealing 18 CFR Parts 711, 713, 714, and 716 which is published in today's **Federal Register**.

The P&G, as revised in response to public comments, have been established and adopted by the WRC. This action implements the requirement of the Water Resources Planning Act (Pub. L. 89–80) that the WRC establish principles, standards and procedures for planning water and land resources projects.

To assist in consideration of possible future improvements, continuing public review and comment are welcomed. Changes should be suggested to the Chairman of the WRC. All suggested changes will be considered at the time of the next revisions to the P&G. Copies of the P&G may be obtained from the Superintendent of Documents at the above address.

Dated: March 4, 1983.

Garrey E. Carruthers,

Alternate to the Chairman, Water Resources Council.

DEPARTMENT OF THE INTERIOR
MINERALS MANAGEMENT SERVICE

Outer Continental Shelf
Oil and Gas Lease Sale No. 70
St. George Basin

1. Authority. This notice is published pursuant to the Outer Continental Shelf Lands Act of 1953 (43 U.S.C. 1331-1343), as amended (92 Stat. 629), and the regulations issued thereunder (30 CFR 256 (formerly 43 CFR 3300; see the Federal Register at 47 FR 47006, October 22, 1982)). A revision of those regulations appeared in the Federal Register of June 16, 1982 at 47 FR 25967 and 26031. The revisions became effective on July 16, 1982, and will therefore apply to this sale.

2. Filing of Bids. Sealed bids will be received by the Regional Manager, Alaska Outer Continental Shelf (OCS) Region, 620 East 10th Avenue, P.O. Box 1159, Anchorage, Alaska 99510. Bids may be delivered, either by mail or in person, to the above address until 4:30 p.m., April 11, 1983, or by personal delivery to the Howard Rock Ballroom, Sheraton Anchorage Hotel, 401 East 6th Ave., Anchorage, Alaska, between the hours of 8:30 a.m., a.h.s.t., and 9:30 a.m., a.h.s.t., April 12, 1983. Bids received by the Regional Manager later than the times and dates specified above will be returned unopened to the bidders. Bids may not be modified or withdrawn unless written modification or withdrawal is received by the Regional Manager prior to 9:30 a.m., a.h.s.t., April 12, 1983. All bids must be submitted and will be considered in accordance with applicable regulations, including 30 CFR 256. The list of restricted joint bidders which applies to this sale was published in the Federal Register at 47 FR 44166, October 6, 1982.

3. Method of Bidding. A separate bid in a sealed envelope, labeled, "Sealed Bid for Oil and Gas Lease (insert number of tract), not to be opened until 10 a.m., a.h.s.t., April 12, 1983," must be submitted for each tract. A suggested bid form appears in 30 CFR 256, Appendix A. Bidders are advised that tract numbers are assigned solely for administrative purposes and are not the same as block numbers found on official protraction diagrams. All bids received shall be deemed submitted for a numbered tract. Bidders must submit with each bid one-fifth of the cash bonus in cash or by cashier's check, bank draft, or certified check, payable to the order of the Minerals Management Service. No bid for less than a full tract as described in paragraph 12 will be considered. Bidders submitting joint bids must state on the bid form the proportionate interest of each participating bidder, in percent to no more than five decimal places after the decimal point, e.g., 50.12345 percent. Other documents may be required of bidders under 30 CFR 256. Partnerships also need to submit a list of signatures authorized to bind the partnership. All documents must be executed in conformance with signatory authorizations on file. Bidders are warned against violation of 18 U.S.C. 1860, prohibiting unlawful combination or intimidation of bidders.

4. Bidding Systems. All leases awarded for this sale will provide for a yearly rental payment of $5 per hectare or fraction thereof and a minimum royalty of $5 per hectare or fraction thereof. The following systems will be utilized:

(a) Bonus Bidding with a Fixed Sliding Scale Royalty. Bids on tracts 70-10, 70-11, 70-12, 70-13, 70-14, 70-15, 70-16, 70-23, 70-24, 70-25, 70-26, 70-27, 70-28, 70-29, 70-36, 70-37, 70-38, 70-39, 70-40, 70-41, 70-42, 70-49, 70-50, 70-51, 70-52, 70-53, 70-54, 70-55, 70-73, 70-74, 70-75, 70-76, 70-77, 70-78, 70-79, 70-80, 70-81, 70-82, 70-83, 70-84, 70-85, 70-86, 70-87, 70-105, 70-106, 70-107, 70-108, 70-109, 70-110, 70-111, 70-112, 70-113, 70-114, 70-115, 70-116, 70-117, 70-118, 70-119, 70-137, 70-138, 70-139, 70-140, 70-141, 70-142, 70-143, 70-144, 70-145, 70-146, 70-147, 70-148, 70-149, 70-150, 70-151, 70-159, 70-160, 70-161, 70-162, 70-163, 70-164, 70-165, 70-166, 70-167, 70-168, 70-169, 70-170, 70-171, 70-172, 70-173, 70-181, 70-182, 70-183, 70-184, 70-185, 70-186, 70-187, 70-188, 70-189, 70-190, 70-191, 70-192, 70-193, 70-194, 70-195, 70-203, 70-204, 70-205, 70-206, 70-207, 70-208, 70-209, 70-210, 70-211, 70-212, 70-213, 70-214, 70-215, 70-216, 70-217, 70-225, 70-226, 70-227, 70-228, 70-229, 70-230, 70-231, 70-232, 70-233, 70-234, 70-235, 70-236, 70-237, 70-238, 70-239, 70-247, 70-248, 70-249, 70-250, 70-251, 70-252, 70-253, 70-254, 70-255, 70-256, 70-257, 70-258, 70-259, 70-260, and 70-261 must be submitted on a cash bonus basis with the percent royalty due in amount or value of production fixed according to the sliding scale formula described below. This formula fixes the percent royalty at a level determined by the value of lease production during each calendar quarter. For purposes of determining the royalty percent due on production during a quarter, the value of production during the quarter will be adjusted for inflation as described below. The determination of the value of the production on which royalty is due will be made pursuant to 30 CFR 250.64.

The fixed sliding scale formula operates in the following way: when the quarterly value of production, adjusted for inflation, is less than or equal to $16.697566 million, a royalty of 12.50000 percent in amount or value of production will be due on the unadjusted value or amount of production. When the adjusted quarterly value of production is equal to or greater than $16.697567 million, but less than or equal to $11822.537759 million, the royalty percent due on the unadjusted value or amount of production is given by

$Rj = b[Ln (Vj/S)]$ where

Rj = the percent royalty that is due and payable on the unadjusted amount or value of all production in quarter j

b = 8.0

Ln = natural logarithm

Vj = the value of production in quarter j, adjusted for inflation, in millions of dollars

S = 3.50

TABLE 1. HYPOTHETICAL QUARTERLY ROYALTY CALCULATIONS

(A) Actual Value of Quarterly Production (Millions of Dollars)	(B) GNP Fixed Weighted Price Index	(C) Inflation Factor[1]	(D) Adjusted Value of Quarterly Production[2] (Vj, Millions of $)	(E) Percent Royalty Rate (Rj)	(F) Royalty Payment[3] (Millions of Dollars)

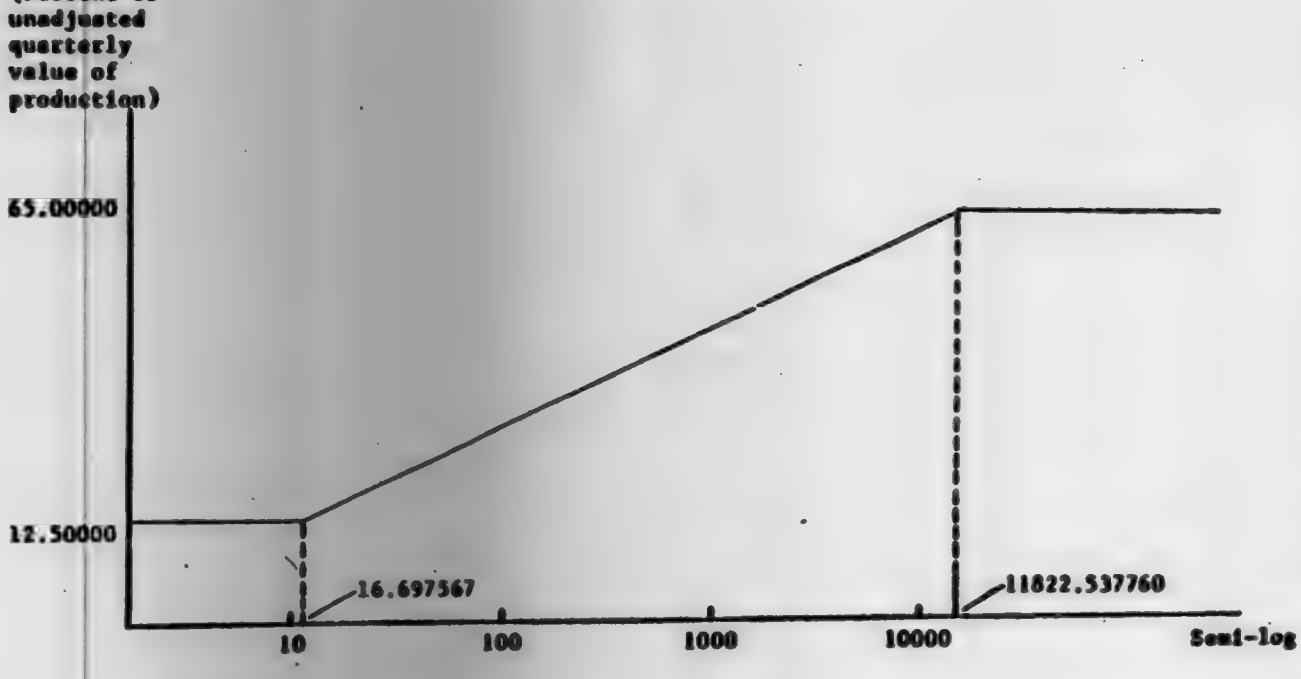
1 Column (B) divided by 150.0 (assumed value of GNP fixed weighted price index at time leases are issued).

2 Column (A) divided by Inflation Factor.

3 Column (A) times Column (E) divided by 100. All values are rounded for display purposes only.

Figure 1
Form of the Sliding Royalty Schedule



UMI 1983 MR 10 ISS 48 48 VOL

When the adjusted quarterly value of production is equal to or greater than $11822.537760 million, a royalty of 65.00000 percent in amount or value of production will be due on the unadjusted quarterly value of production. Thus, in no instance will the quarterly royalty due exceed 65.00000 percent in amount or value of quarterly production.

In determining the quarterly percent royalty due, Rj, the calculation will be carried to five decimal places (for example, 18.56224 percent). This calculation will incorporate the adjusted quarterly value of production, Vj, in millions of dollars, rounded to the sixth digit, i.e., the nearest dollar (for example, 35.624831 millions of dollars).

The form of the sliding scale royalty schedule is illustrated in Figure 1. Note that the effective quarterly royalty rate depends upon the inflation adjusted quarterly value of production. However, this rate is applied to the unadjusted quarterly value of production to determine the royalty payments due.

In adjusting the quarterly value of production for use in calculating the percent royalty due on production during the quarter, the actual value of production will be adjusted to account for the effects of inflation by dividing the actual value of production by the following inflation adjustment factor. The inflation adjustment factor used will be the ratio of the GNP fixed weighted price index for the calendar quarter preceding the quarter of production to the value of that index for the quarter preceding the issuance of the lease. The GNP fixed weighted price index is published monthly in the Survey of Current Business by the Bureau of Economic Analysis, U.S. Department of Commerce. The percent royalty will be due and payable on the actual amount or value of production as determined pursuant to 30 CFR 250.64. The timing of procedures for inflation adjustments and determinations of the royalty due will be specified at a later date. Table 1 provides hypothetical examples of quarterly royalty calculations using the sliding scale formula just described under two different values for the quarterly price index.

(b) Bonus Bidding with a 12-1/2 Percent Royalty. Bids on the remaining tracts to be offered at this sale must be submitted on a cash bonus basis with a fixed royalty of 12-1/2 percent.

5. Equal Opportunity. Each bidder must have submitted by 9:30 a.m., a.h.s.t., April 12, 1983, the certification required by 41 CFR 60-1.7(b) and Executive Order No. 11246 of September 24, 1965, as amended by Executive Order No. 11375 of October 13, 1967, on the Compliance Report Certification Form, Form 1140-4 (June 1982), and the Affirmative Action Representation Form, Form 1140-7 (June 1982). See "Information to Lessees" item 14(h).

6. Bid Opening. Bids will be opened on April 12, 1983, beginning at 10 a.m., a.h.s.t., at the second address stated in paragraph 2. The opening of the bids is for the sole purpose of publicly announcing bids received and no bids will be accepted or rejected at that time. If the Department is prohibited for any reason from opening any bid before midnight, April 12, 1983, that bid will be returned unopened to the bidder, as soon thereafter as possible.

7. Deposit of Payment. Any cash, cashier's checks, certified checks or bank drafts submitted with a bid may be deposited in a suspense account in the U.S. Treasury during the period the bids are being considered. Such a deposit does not constitute and shall not be construed as acceptance of any bid on behalf of the United States.

8. Withdrawal of Tracts. The United States reserves the right to withdraw any tract from this sale prior to issuance of a written acceptance of a bid for that tract.

9. Acceptance, Rejection, or Return of Bids. The United States reserves the right to reject any and all bids for any tract. In any case, no bid for any tract will be accepted and no lease for any tract will be awarded to any bidder unless:

a. The bidder has complied with all requirements of this notice and applicable regulations;

b. The bid is the highest valid cash bonus bid; and

c. The amount of the bid has been determined to be adequate by the Secretary of the Interior.

No bid will be considered for acceptance unless it offers a cash bonus in the amount of $371 or more per hectare or fraction thereof. Any bid submitted which does not conform to the requirements of this notice of sale, the OCS Lands Act, as amended, or applicable regulations may be returned to the person submitting that bid by the Regional Manager and not considered for acceptance.

10. Successful Bidders. Each person who has submitted a bid accepted by the Secretary of the Interior will be required to execute copies of the lease specified below, pay the balance of the cash bonus bid together with the first year's rental and satisfy the bonding requirements of 30 CFR 256 Subpart I within the time provided in 30 CFR 256.47. A modification of payments procedures for successful bidders appeared in the latest revision of 30 CFR 256 (see paragraph 1, above). These changes do not apply to the submission of the one-fifth bonus with bids, described in paragraph 3, above.

11. Official Protraction Diagrams. Tracts offered for lease may be located on the following official protraction diagrams which are available from the Regional Manager, Alaska Outer Continental Shelf Region, at the first address stated in paragraph 2, at a cost of $2 each:

a. Outer Continental Shelf Official Protraction Diagram NN 3-1, Davidson Bank (approved November 29, 1974).

b. Outer Continental Shelf Official Protraction Diagram NO 2-8, St. George Island (approved November 29, 1974).

c. Outer Continental Shelf Official Protraction Diagram NO 3-7 (approved November 29, 1974).

12. Tract Descriptions. Note: There may be gaps in the numbers of the tracts listed. Some of the blocks identified in the final environmental impact statement may not be included in this notice. The tracts offered for bid are as follows:

13. Lease Terms and Stipulations.

a. All leases issued as a result of this sale will be for an initial

c. Except as otherwise noted, the following stipulations will be included in each lease resulting from this sale. In the following stipulations the term RS refers to the Regional Supervisor, Offshore Field Operations,

13. Lease Terms and Stipulations.

a. All leases issued as a result of this sale will be for an initial term of 10 years. Leases issued as a result of this sale will be on Form MMS-2005 (August 1982), available from the Regional Manager, Alaska Outer Continental Shelf Region, at the first address stated in paragraph 2.

b. For leases resulting from this sale for tracts offered on a cash bonus basis with a fixed sliding scale royalty, listed in paragraph 4(a), Form MMS-2005 will be amended as follows:

Sec. 6. Royalty on Production. The lessee agrees to pay the lessor a royalty of that percent in amount or value of production from the leased area as determined by the sliding scale royalty formula as follows: when the quarterly value of production, adjusted for inflation, is less than or equal to $16.697566 million, a royalty of 12.50000 percent in amount or value of production will be due on the unadjusted value or amount of production. When the adjusted quarterly value of production is equal to or greater than $16.697567 million, but less than or equal to $11822.537759 million, the royalty percent due on the unadjusted value or amount of production is given by

Rj = b[Ln (Vj/$)] where

Rj = the percent royalty that is due and payable on the unadjusted amount or value of all production in quarter j

b = 8.0

Ln = natural logarithm

Vj = the value of production in quarter j, adjusted for inflation, in millions of dollars

$ = 3.50

When the adjusted quarterly value of production is equal to or greater than $11822.537760 million, a royalty of 65.00000 percent in amount or value of production will be due on the unadjusted quarterly value of production. Thus, in no instance will the quarterly royalty due exceed 65.00000 percent in amount or value of quarterly production.

In determining the quarterly percent royalty due, Rj, the calculation will be carried to five decimal places (for example, 18.56224 percent). This calculation will incorporate the adjusted quarterly value of production, Vj, in millions of dollars, rounded to the sixth digit, i.e., the nearest dollar (for example, 35.624831 millions of dollars). Gas of all kinds (except helium) is subject to royalty. The lessor shall determine whether production royalty shall be paid in amount or value.

c. Except as otherwise noted, the following stipulations will be included in each lease resulting from this sale. In the following stipulations the term RS refers to the Regional Supervisor, Offshore Field Operations, Minerals Management Service, formerly Regional Deputy Minerals Manager, Offshore Field Operations, Minerals Management Service.

Stipulation No. 1: If the RS has reason to believe that a site, structure, or object of historical or archaeological significance, hereinafter referred to as a "cultural resource," may exist in the lease area and gives the lessee written notice that the lessor is enforcing the provisions of this stipulation, the lessee shall, upon receipt of such notice, comply with the following requirements.

(1) Prior to any drilling activity or the construction or placement of any structure for exploration or development on the lease, including, but not limited to, well drilling and pipeline and platform placement, hereinafter in this stipulation referred to as "operation," the lessee shall conduct remote sensing surveys and/or prepare a report, as specified by the RS, to determine the potential existence of any cultural resource that may be affected by such operation. All data produced as well as other pertinent natural and cultural environmental data shall be examined by an archaeologist and geophysicist to determine if indicators are present suggesting the existence of a cultural resource that may be adversely affected by any lease operation. A report of such surveys and assessment prepared by an archaeologist and geophysicist shall be submitted by the lessee to the RS.

(2) If such cultural resource indicators are present, the lessee shall: (a) locate the site of the lease operation so as not to adversely affect the identified location; or (b) establish to the satisfaction of the RS, on the basis of further archaeological investigation conducted by an archaeologist and geophysicist using such survey equipment and techniques as deemed necessary by the RS, either that such operation will not adversely affect the location identified or that the potential cultural resource suggested by the occurrence of the indicators does not exist.

(3) A report of the latter investigation prepared by the archaeologist and geophysicist shall be submitted to the RS for review. Should the RS determine that the existence of a cultural resource which may be adversely affected by such operations is sufficiently established to warrant protection, the lessee shall take no action that may result in an adverse effect on such cultural resource until the RS has given directions as to its protection.

In addition, the lessee agrees that if any cultural resource should be discovered during the conduct of any operations on the lease area, he shall report immediately such findings to the RS and make every reasonable effort to protect the cultural resource until the RS gives directions as to its protection.

Stipulation No. 2: The lessee shall include in any exploration and development plans submitted under 30 CFR 250.34 a proposed environmental training program for all personnel involved in exploration or development activities (including personnel of the lessee's contractors and subcontractors) for review and approval by the Regional Supervisor. The program shall be designed to inform each person working on the project of specific types of environmental, social, and cultural concerns which relate to the individual's job. The program shall be formulated by qualified instructors experienced in each pertinent field of study, and shall employ effective methods to insure that personnel are informed of archaeological, geological, and biological resources, including bird colonies and sea mammal haul-out areas, and to insure that personnel understand the importance of avoidance and non-harassment of wildlife resources. The program shall be designed to increase the sensitivity and understanding of personnel to community values, customs, and lifestyles in areas in which such personnel will be operating. The program shall also include information concerning the domestic and foreign fishing industries in order to reduce potential conflicts.

The lessee shall also submit for review and approval a continuing technical environmental briefing program for supervisory and managerial personnel of the lessee and its agents, contractors, and subcontractors.

Stipulation No. 3: Subsea wellheads and temporary abandonments, or suspended operations that leave protrusions above the seafloor, shall be protected, if feasible and as appropriate, in such a manner as to allow commercial fisheries trawling gear to pass over the structure without snagging or otherwise damaging the structures or the fishing gear. Latitude and longitude coordinates of these structures, along with water depths, shall be submitted to the Regional Supervisor. The coordinates of such structures will be determined by the lessee utilizing state-of-the-art navigation systems with accuracy of at least ±50 feet (15.25 m) at 200 miles (322 km).

All pipelines, unless buried, including gathering lines, shall have a smooth-surface design. If an irregular pipe surface is unavoidable because of the need for valves, anodes, or other structures, it shall, as appropriate, be protected in such a manner as to allow trawling gear to pass over the object without snagging or otherwise damaging the structure or the fishing gear.

Stipulation No. 4: If the Regional Supervisor has reason to believe that biological populations or habitats which may require additional protection are on any leased tract(s), the Regional Supervisor may require the lessee to conduct environmental surveys to determine the extent and composition of biological populations or habitats which might require additional protective measures on that tract. The Regional Supervisor shall provide written notice to the lessee of his decision to require such surveys.

Based on any surveys which the Regional Supervisor may require of the lessee, or other information available to the Regional Supervisor on special biological resources, the Regional Supervisor may require the lessee to: (1) relocate the site of operations; (2) establish to the satisfaction of the Regional Supervisor on the basis of a site-specific survey, either that such operation will not have a significant adverse effect upon the resource identified or that a special biological resource does not exist; (3) operate during those periods of time that operations do not adversely affect the biological resources as established by the Regional Supervisor; and/or (4) modify operations to ensure that significant biological populations or habitats deserving protection are not adversely affected.

The lessee agrees that, if any area of biological significance should be discovered during the conduct of any operations on the leased area, he will immediately report such findings to the Regional Supervisor and make every reasonable effort to preserve and protect the biological resource from damage until the Regional Supervisor has given the lessee direction with respect to its protection.

The lessee shall submit all data obtained in the course of such surveys to the Regional Supervisor with the locational information for drilling or other activity. The lessee may not take any action that might affect the biologic populations or habitats surveyed until the Regional Supervisor provides written directions to the lessee with regard to permissible actions.

Stipulation No. 5. (To be included only in the leases resulting from this sale for the fixed sliding scale royalty tracts identified in paragraph 4(a) of this notice.)

(a) The royalty rate on production from this lease is subject to consideration for reduction under the same authority that applies to all other oil and gas leases on the Outer Continental Shelf (30 CFR 250.21). The Director, Minerals Management Service, may grant a reduction for only one year at a time and reduction of royalty rates will not be approved unless production has been under way for one year or more.

(b) Although the royalty rate specified in section 6(a) of this lease or as subsequently modified in accordance with applicable regulations and stipulations is applicable to all production under this lease, not more than 16-2/3 percent of the production from the lease area may be taken as royalty in amount, except as provided in sec. 15(d); the royalty on any portion of the production from the lease in excess of 16-2/3 percent may only be taken in value of the production from the lease area.

Stipulation No. 6. Pipelines will be required (a) if pipeline rights-of-way can be determined and obtained; (b) if laying such pipelines is technically and economically feasible and environmentally preferable; and (c) if, in the opinion of the lessor, pipelines can be laid without net social loss, taking into account any incremental cost of pipelines over alternative methods of transportation and any incremental benefits in the form of increased environmental protection or reduced multiple use conflicts. The lessor specifically reserves the right to require that any pipeline used for transporting production to be placed in certain designated management areas. In selecting the means of transportation, including any loading facilities, consideration will be given to any recommendation of the Regional Technical Working Group or other similar advisory group with participation of Federal, State, and local government and industry.

All pipelines, including both flow lines and gathering lines for oil and gas, shall be designed and constructed to provide for adequate protection from water currents, storms and ice gouging, subfreezing conditions, and other hazards as determined on a case-by case basis.

Following the development of sufficient pipeline capacity, no crude oil will be transported by surface vessel from offshore production sites, except in the case of emergency. Determinations as to emergency conditions and appropriate responses to these conditions will be made by the RS.

Maps locating major wildlife concentration areas are available for route planning from the Regional Supervisor, Offshore Field Operations, Alaska OCS Region, and appropriate resource agencies.

UMI VOL 48 48 ISS MR 10 1983

Following the development of sufficient pipeline capacity, no crude oil will be transported by surface vessel from offshore production sites, except in the case of emergency. Determinations as to emergency conditions and appropriate responses to these conditions will be made by the RS.

Where the three criteria set forth in the first sentence of this stipulation are not met and surface transportation must be employed, all vessels used for transporting hydrocarbons from the leased area must conform with all standards established for such vessels, pursuant to the Ports and Waterways Safety Act of 1972 (46 U.S.C. 391a), as amended.

Stipulation No. 7. (To be included in leases only for Tracts 70-10 through 70-16, 70-23 through 70-29, 70-36 through 70-42, 70-49 through 70-55, 70-76 through 70-87, 70-109 through 70-119, 70-142 through 70-151, 70-164 through 70-173, 70-187 through 70-195, 70-210 through 70-217, 70-233 through 70-239, 70-255 through 70-261, 70-296 through 70-299, 70-306 through 70-312, 70-319 through 70-339, 70-342 through 70-344, 70-347 through 70-348, and 70-351.)

In order to protect the wildlife and subsistence resources of the Pribilof Islands and the Aleutian Chain, offshore loading on this tract of produced oil, except during testing for well producibility or in the case of an emergency, is prohibited if such a prohibition on offshore loading is technically and economically feasible, safe, and environmentally preferable.

14. Information to Lessees: (a) Bidders are advised that during the conduct of all activities related to leases issued as a result of this lease sale, the lessee and its agents, contractors, and subcontractors will be subject to the provisions of the Marine Mammal Protection Act of 1972, as amended; the Endangered Species Act of 1973, as amended; and International Treaties.

The lessee or its contractors should be aware that disturbance of wildlife could be determined to constitute harassment, and thereby be in violation of existing laws. Violations under these acts and treaties may be reported to the National Marine Fisheries Service or U.S. Fish and Wildlife Service, as appropriate. Behavioral disturbance of most birds and mammals found in or near the Sale No. 70 area would be unlikely if vessels and aircraft maintained at least a 1-mile distance from observed wildlife or known wildlife concentration areas such as bird colonies and marine mammal haul-out and rookery areas. Therefore, in concurrence with the U.S. Fish and Wildlife Service, it is recommended that aircraft or vessels operated by lessees maintain at least a 1-mile distance from observed or known wildlife concentrations. Human safety will take precedence at all times.

Of particular concern are wildlife populations of the Pribilof Islands, Izembek Lagoon, and other coastal wilderness or refuge areas. For guidance regarding prohibited activities, attention of the lessees is directed particularly to existing National Wildlife Refuge System rules, 50 CFR Parts 27 and 215, and Part 36, rules for the Alaska National Wildlife Refuges (46 FR 31818, June 17, 1981), wherein 50 CFR 36.21(c) states: "The operation of aircraft at altitudes and in flight paths resulting in the herding, harassment, hazing, or driving of wildlife is prohibited."

Maps locating major wildlife concentration areas are available for route planning from the Regional Supervisor, Offshore Field Operations, Alaska OCS Region, and appropriate resource agencies.

(b) Lessees are advised that the state coastal management program contains policies which may be relevant to activities associated with this lease. In addition, local coastal management programs now being developed may have more specific policies related to energy facility siting, areas with particular geologic hazards, subsistence uses, habitats, transportation and areas which have historic or prehistoric resources. Early consultation and coordination with local Coastal Resource Service Area (CRSA) Boards, local planning agencies, and state agencies involved in coastal management review could prevent unsuitable facility siting. Local coastal districts engaged in program development include Bristol Bay CRSA, Aleutian Islands East CRSA, Bethel, and Bristol Bay Borough. Other agencies which would be appropriate to contact include, but are not limited to, the Alaska Office of Coastal Management, the Alaska Department of Natural Resources, and the Alaska Department of Community and Regional Affairs.

(c) Current information indicates that portions of the sale area may contain shallow gas deposits.

(d) The areas adjacent to the tracts offered for lease may fall in areas which may be included in fairways, precautionary zones, or traffic separation schemes which may be established, among other reasons, for the purpose of protecting maritime commerce. Bidders are advised that the United States may designate necessary fairways through leased tracts pursuant to the Port and Tanker Safety Act of 1978.

(e) Corps of Engineers permits are required for construction of any artificial islands, installations and other devices permanently or temporarily attached to the seabed located on the Outer Continental Shelf in accordance with Section 4(e) of the Outer Continental Shelf Lands Act of 1953, as amended.

(f) Bidders are advised that the Departments of the Interior and Transportation have entered into a Memorandum of Understanding, dated May 6, 1976, concerning the design, installation, operation and maintenance of offshore pipelines. Bidders should consult both Departments for regulations applicable to offshore pipelines.

(g) Bidders are also advised that in accordance with Sec. 16 of each lease offered at this sale, the lessor may require a lessee to operate under a unit, pooling or drilling agreement, and that the lessor will give particular consideration to requiring unitization in instances where one or more reservoirs underlie two or more leases with either a different royalty rate or a royalty rate based on a sliding scale.

(h) Revisions of Department of Labor regulations on Affirmative Action requirements for Government Contractors (including lessees) have been deferred, pending review of those regulations (see Federal Register of August 25, 1981, at 46 F.R. 42865 and 42968). Should those changes become effective at any time before the issuance of leases resulting from this sale, Section 18 of the lease form, Form MMS-2005 (August 1982), would be deleted from leases resulting from this sale. In addition, existing stocks of the Affirmative Action Forms described in Section 5 of this notice contain language that would be superseded by the revised regulations at 41 CFR 60-1.5(a)(1) and 60-1.7(a)(1).

VOL. 48 ISS. 48 MR - 10 1983 UMI

Pending the issuance of revised versions of Forms 1140-7 and 1140-8, submission of Form 1140-7 (June 1982) and Form 1140-8 (June 1982) will not invalidate an otherwise acceptable bid, and the revised regulations' requirements will be deemed to be part of the existing Affirmative Action Forms.

(i) Bidders are advised that the State of Alaska will be consulted by the MMS throughout the stages of OCS development. In addition to State involvement in the Intergovernmental Planning Program (IPP), and the Scientific Committee of the OCS Advisory Board, the Regional Supervisor will involve the State in the review of exploration and development plans.

(j) Lessees are notified that adequate oilspill contingency plans are required under Alaska OCS Operating Order No. 7, and under 30 CFR 250.34, prior to approval of exploration or development and production plans. OCS Operating Order No. 2 provides that exploration and development and production plans include provisions to meet emergency situations including a means of drilling a relief well should a blowout occur; loss or disablement of a drilling unit or a drilling rig; loss or damage to support craft; hazards unique to the site of drilling operations. In addition, environmental reports, exploration and development and production plans should address, among other things, environmental issues and subsistence values. In accordance with 30 CFR 250.34-1, MMS is required to review oilspill contingency plans. Approval of oilspill contingency plans will require demonstration of theoretical, experimental, and physical capability to detect, contain, cleanup, and dispose of spilled oil in the sale area in accordance with Best Available and Safest Technologies (BAST) requirements, as determined by the Regional Supervisor. Unimak Pass, Isanbak, Moffet and Nelson Lagoons, along with areas of the Pribilof Islands, are identified as areas of special biological sensitivity, and under Alaska OCS Operating Order No. 7 and 30 CFR 250.34-3, will require protection in oilspill contingency plans. Due to the severe weather conditions of the St. George Basin area and the sensitivity of these areas to spilled oil, special attention will be given to deployment plans and time requirements in the review of oilspill contingency plans. Such protection should not include dispersant usage unless such usage has been approved in advance.

(k) For protection of endangered whales, operators of fixed wing aircraft or helicopters should maintain a 1500 feet altitude (except during take-off and landing) during times when these whales are likely to be present.

(l) Lessees are advised that the RS has the authority to suspend oil and gas exploratory drilling activities on any lease whenever gray whales are present in the migratory corridor or sale area and are near enough to be subject to probable oilspill risk or probable risk from other disturbances. The Department of the Interior has determined that gray whales migrate through or are in the vicinity of St. George Basin generally from April to June and from October to December. If gray whales are present, the RS may order the cessation of exploratory drilling below a threshold depth predetermined by the RS until it is determined that the whales are outside the zone of likely influence or no longer subject to risk from oilspills or other disturbances.

(m) Lessees are advised that Environmental Protection Agency National Pollutant Discharge Elimination System (NPDES) permits are required for discharge of drilling fluids, produced waters and other drilling wastes generated during exploration and development/production phases.

(n) In addressing biological concerns, the RS will receive recommendations from a Bering Sea Biological Task Force (BTF). The BTF will be composed of designated representatives of MMS, U.S. Fish and Wildlife Service, the National Marine Fisheries Service, and the Environmental Protection Agency. Before making recommendations to the RS, the Bering Sea BTF should consult with representatives of the State of Alaska and local communities who can contribute to biological evaluations.

(o) Lessees should design the environmental training program required by Stipulation No. 2 to incorporate the views and concerns of local individuals and communities. Lessees are encouraged to provide opportunities to local individuals, organizations, and governments, including local coastal districts, to participate in the development of the environmental training programs.

(p) Lessees are encouraged to hire Alaska residents to perform work done by and for them within the State of Alaska. Lessees are advised that there is considerable local interest in employment associated with petroleum exploration, development and production activities. Lessees are encouraged, through affirmative action programs or otherwise, to provide opportunities to local individuals and organizations to acquire the skills necessary to participation in exploration, development, and production activities and are encouraged to provide, through affirmative action programs or otherwise, employment opportunities for qualified local individuals and organizations. Lessees are also advised that employment of local individuals and organizations may be one method of mitigating certain local social and economic impacts.

(q) Lessees are advised that exploration, development, and production activities may directly and indirectly have significant social and economic impacts on local individuals and communities. Lessees are encouraged to consult with local individuals, organizations, and governments, including local coastal districts, to identify direct and indirect social and economic impacts of exploration, development and production activities prior to undertaking those activities. Lessees are encouraged to consult with and enter into agreements with local individuals, organizations, and governments to compensate for direct and indirect social and economic impacts of exploration, development, and production activities. Lessees are advised

that this may include, among others, support to or provision of local community recreation facilities, mental health, drug, and alcohol treatment services and facilities, or community safety services and capital improvement projects.

that this may include, among others, support to or provision of local community recreation facilities, mental health, drug, and alcohol treatment services and facilities, or community safety services and capital improvement projects.

(r) Lessees are reminded that potential onshore or nearshore development, e.g., pipelines or port or terminal development, may be subject to land use controls, including the Bristol Bay Cooperative Management Plan, now under preparation.

15. OCS Orders. Operations on all leases resulting from this sale will be conducted in accordance with the provisions of all Alaska OCS Orders, effective November 22, 1982, and any other applicable OCS Order as it becomes effective. Final Alaska OCS Orders were published in the Federal Register at 47 FR 47180, on October 22, 1982.

Notice of Leasing Systems, Sale No. 70

Section 8(a)(8) (43 U.S.C. 1337 (a)(8)) of the Outer Continental Shelf Lands Act (OCSLA), as amended, requires that, at least 30 days before any lease sale, a notice be submitted to the Congress and published in the Federal Register:

(A) identifying the bidding systems to be used and the reasons for such use, and

(B) designating the tracts to be offered under each bidding system and the reasons for such designation.

This notice is published pursuant to these requirements.

A. Bidding systems to be used. In OCS Sale No. 70, tracts will be offered under the following two bidding systems as authorized by section 8(a)(1) (43 U.S.C. 1337 (a)(1)): (1) bonus bidding with a fixed sliding scale royalty on 148 tracts, and (2) bonus bidding with a 12 1/2 percent royalty on 331 tracts.

(1) Bonus Bidding with a Fixed Sliding Scale Royalty. This system is authorized by section (8)(a)(1)(C) of the OCSLA, as amended. The sliding scale is designed to establish higher royalty rates for larger reservoirs with higher production rates. As such, the expected bonus is reduced compared to a fixed one-sixth royalty system. This may improve competition for leases, and also tends to reduce the likelihood of production losses that could result if higher royalty rates are set by other means, such as royalty bidding, prior to reservoir delineation and production. The fixed sliding scale formula provided for Sale No. 70 is based on the current assumed range of costs and wellhead prices for this area.

The fixed sliding scale formula operates in the following way: when the quarterly value of production, adjusted for inflation, is less than or equal to $16.697566 million, a royalty of 12.50000 percent in amount or value of production will be due on the unadjusted value or amount of production. When the adjusted quarterly value of production is equal to or greater than $16.697567 million, but less than or equal to $11822.537759 million, the royalty percent due on the unadjusted value or amount of production is given by

$$Rj = b\,[\ln (Vj/S)]$$ where

Rj = the percent royalty that is due and payable on the unadjusted amount or value of all production in quarter j

b = 8.0

ln = natural logarithm

Vj = the value of production in quarter j, adjusted for inflation, in millions of dollars

S = 3.50

When the adjusted quarterly value of production is equal to or greater than $11822.537760 million, a royalty of 65.00000 percent in amount or value of production will be due on the unadjusted quarterly value of production. Thus, in no instance will the quarterly royalty due exceed 65.00000 percent in amount or value of quarterly production.

In adjusting the quarterly value of production for use in calculating the percent royalty due on production during the quarter, the actual value of production will be adjusted to account for the effects of inflation by dividing the actual value of production by the following inflation adjustment factor. The inflation adjustment factor used will be the ratio of the GNP fixed weighted price index for the calendar quarter preceding the quarter of production to the value of that index for the quarter preceding the issuance of the lease. The GNP fixed weighted price index is published monthly in the Survey of Current Business by the Bureau of Economic Analysis, U.S. Department of Commerce. The percent royalty will be due and payable on the actual amount or value of production as determined pursuant to 30 CFR 250.64.

(2) Bonus Bidding with a 12 1/2 Percent Royalty. This system is authorized by section (8)(a)(1)(A) of the OCSLA, as amended. This system has been chosen for certain deeper water tracts proposed for Sale No. 70 because these tracts are expected to require substantially higher exploration, development, and production costs, as well as longer times before initial production, in comparison to more shallow water tracts. Department of the Interior analyses indicate that the minimum economically developable discovery on a tract in such high cost areas under a 12 1/2 percent royalty system would be less than for the same tracts under a 16 2/3 percent royalty system. As a result, more tracts may be explored and developed. In addition, the lower royalty rate system is expected to yield more rapid production rates and higher economic profits. It is not anticipated, however, that the larger cash bonus bid associated with a lower royalty rate will significantly reduce competition, since the higher costs for exploration and development are the primary restraints to competition.

B. Designation of Tracts. The selection of tracts to be offered under the two systems was based on the following factors:

(1) Every effort was made based on available information so that different bidding systems did not split a single geological structure.

(2) Tracts were selected in those resource and cost areas that were appropriate to the identified sliding scale parameters for this sale.

The specific tracts to be offered under each system are as follows:

(a) Bonus Bidding with a Fixed Sliding Scale Royalty--Tracts 70-10 thru 70-16, 70-23 thru 70-29, 70-36 thru 70-42, 70-49 thru 70-55, 70-73 thru 70-87, 70-105 thru 70-119, 70-137 thru 70-151, 70-159

UMI

The specific tracts to be offered under each system are as follows:

(a) Bonus Bidding with a Fixed Sliding Scale Royalty--Tracts 70-10 thru 70-16, 70-23 thru 70-29, 70-36 thru 70-42, 70-49 thru 70-55, 70-73 thru 70-87, 70-105 thru 70-119, 70-137 thru 70-151, 70-159 thru 70-173, 70-181 thru 70-195, 70-203 thru 70-217, 70-225 thru 70-239, and 70-247 thru 70-261.

(b) Bonus Bidding with a 12 1/2 Percent Royalty -- All remaining tracts.

Part V

Department of Education

Indian Fellowship Program

DEPARTMENT OF EDUCATION

34 CFR Part 263

Indian Fellowship Program

AGENCY: Department of Education.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Secretary issues proposed regulations to provide appropriate criteria for awarding Indian Fellowships, and to reduce burdens upon applicants by clarifying the regulations governing the Indian Fellowship Program.

DATE: comments must be received on or before April 25, 1983.

ADDRESSES: Comments should be addressed to Director, Indian Education Programs, U.S. Department of Education, 400 Maryland Avenue, SW. (FOB-6, Room 2177), Washington, D.C. 20202.

FOR FURTHER INFORMATION CONTACT: Mrs. Alice T. Ford, Coordinator, Indian Fellowship Program, U.S. Department of Education, 400 Maryland Avenue, SW. (FOB-6, Room 2147) Washington, D.C. 20202. Telephone: (202) 245-8840.

SUPPLEMENTARY INFORMATION: (a) The purpose of the Indian Fellowship Program is to provide Federal financial assistance to Indian students by awarding fellowships in order to enable them to pursue a course of study leading toward a postbaccalaureate degree in medicine, law, education, and related fields; or an undergraduate or graduate degree in engineering, business administration, natural resources, and related fields. This program is authorized by Pub. L. 92-318, the Indian Education Act, Section 423, as amended by the Education Amendments of 1978, Pub. L. 95-561, Section 1152, 20 U.S.C. 3385b.

The major issues are:

- Should the Indian Education Fellowship Program be administered without revised regulations which clarify the meaning of the fellowship statute?

Without revised regulations the Indian Education Fellowship Program will experience a substantial burden of monitoring applicants. Revised regulations will make it possible to administer the Indian Education Fellowship Program in a more cost effective manner.

- Should the criteria for the Indian Education Fellowship Program be revised to eliminate "Financial need" as a criterion?

Currently, the Fellowship regulations award points to applicants on a criterion entitled, "Financial need," but the regulations do not require specific information concerning an applicant's needs and resources. The proposed regulations eliminate this criterion, but include a section entitled "Application contents: evidence of financial aid need" to more clearly specify the information that is required to determine the applicant's financial aid need. This change will allow the Indian Education Programs office to make a better assessment of the amount of funds that are awarded to successful applicants for fellowships. This should result in more efficient use of program funds and allow the award of additional fellowships.

(b) The present regulations for the Indian Fellowship Program do not sufficiently clarify certain aspects of the statute. The main provisions of the proposed regulations substantially reduce administrative burdens on program administrators and on the applicants. The direct effect of the proposed regulations will be to provide clarity on the statutory requirements and to minimize the potential for administrative abuses.

(c) These regulations are also needed to—

(1) Better assure that Indian students are able to attend institutions of higher education to pursue a course of study leading to a graduate or undergraduate degree in certain critical professions;

(2) Maximize fellowship resources thereby allowing more Indian students to be served by the program;

(3) Reduce administrative burdens; and

(4) Reduce the rate of abuse of program funds.

Executive Order 12291

These proposed regulations have been reviewed in accordance with Executive Order 12291.

They are classified as non-major because they do not meet the criteria for major regulations established in the order.

Regulatory Flexibility Act Certification

The Secretary certifies that these proposed regulations will not have significant economic impact on a substantial number of small entities. The proposed regulations apply to fellowship applicants and individuals who are not classified as small entities.

Invitation To Comment

Interested persons are invited to submit comments and recommendations regarding these proposed regulations. Written comments and recommendations may be sent to the address given at the beginning of this document. All comments received on or before (the 45th day after publication of this document) will be considered before the Secretary issues the final regulations.

All comments submitted in response to these proposed regulations will be available for public inspection, during and after the comment period, in Federal Office Building 6, Room 2177, 400 Maryland Avenue, S.W., Washington, D.C., between the hours of 8:30 a.m. and 4:00 p.m., Monday through Friday of each week except Federal holidays.

To assist the Department in complying with the specific requirements of Executive Order 12291 and the Paperwork Reduction Act of 1980 and their overall requirement of reducing regulatory burden, public comment is especially invited on whether there may be further opportunities to reduce any regulatory burdens found in these proposed regulations.

Assessment of Educational Impact

The Secretary also particularly requests comments on whether the regulations in this document would require transmission of information that is being gathered by or is available from any other agency or authority of the United States.

List of Subjects in 34 CFR Part 263

Colleges and universities, Education, Engineers, Health professions, Indians—education, Law, Natural resources, Scholarships and fellowships.

Citation of Legal Authority

A citation of statutory or other legal authority is placed in parentheses on the line following each substantive provision of these proposed regulations.

(Catalog of Federal Domestic Assistance No. 84.087; Indian Fellowship Program)

Dated: March 4, 1983.

T. H. Bell,

Secretary of Education.

The Secretary proposes to amend Part 263 of Title 34 of the Code of Federal Regulations to read as follows:

PART 263—INDIAN FELLOWSHIP PROGRAM

Subpart A—General

Sec.

263.1 What is the purpose of the Indian Fellowship Program?
263.2 Who is an eligible applicant for financial assistance?
263.3 What definitions apply to the Indian Fellowship Program?
263.4 What are the allowable fields of study?
263.5 What does a fellowship award include?
263.6 Application contents: evidence that the applicant is Indian.

Sec.

263.7 Application contents: evidence of admission or attendance.
263.8 Application contents: transcripts.
263.9 Application contents: evidence of financial aid need.
263.10 Application contents: other information.

Subpart B—How Are Fellows Selected?

263.11 What priorities may the Secretary establish?
263.12 What priority is given to certain applicants?
263.13 How does the Secretary evaluate applications?

Subpart C—What Conditions Must Be Met by Fellows?

263.21 Required certification of information.
263.22 Time period for a fellowship.
263.23 Responsibilities of a Fellow.
263.24 Leave of absence requests.
263.25 Discontinuation of fellowship payments.
263.26 Requirements for an alternate Fellow.

Subpart D—Who Is Responsible for Administration of Grant Payments?

263.31 Disbursement of funds.

Authority: Indian Education Act, section 423 (20 U.S.C. 3385b) as amended, unless otherwise noted.

Subpart A—General

§ 263.1 What is the purpose of the Indian Fellowship Program?

The Indian Fellowship Program provides Federal financial assistance to Indian students by awarding fellowships in order to enable them to pursue a course of study leading toward—

(a) A postbaccalaureate degree in medicine, law, education, and related fields; or

(b) An undergraduate or graduate degree in engineering, business administration, natural resources, and related fields.

(Indian Education Act, Section 423; 20 U.S.C. 3385b)

§ 263.2 Who is an eligible applicant for financial assistance?

(a) An applicant must be an Indian as defined in § 263.3.

(b) An applicant must be a United States citizen.

(c) An applicant is ineligible for a fellowship award if he or she already has obtained a terminal graduate or postbaccalaureate degree in one of the fields listed in § 263.4.

(d) An applicant must be a full-time undergraduate or graduate student at an accredited institution of higher education in one of the fields or related fields listed in § 263.4 and must be recognized by his or her institution of higher education as a degree candidate, except as provided in § 263.7(b).

(e) An applicant must have demonstrated financial aid need, as defined in § 263.3.

(Indian Education Act, Section 423; 20 U.S.C. 3385b)

§ 263.3 What definitions apply to the Indian Fellowship Program?

The following definitions apply to the Indian Fellowship Program:

"Department" means the U.S. Department of Education.

"Dependent care" means the care of minor children who reside with the Fellow.

"Expenses" means tuition and required fees, required university health insurance, room and board at or near the institution, travel in cases of extreme hardship, instructional supplies, and dependent care associated with attendance at an institution of higher education.

"Fellow" means the recipient of a fellowship under the Indian Fellowship Program.

"Fellowship" means an award under the Indian Fellowship Program.

"Financial aid need" means the difference between a student's expenses for the academic year and his or her resources.

"Full course load" means the number of credit hours which the institution requires of a full-time student.

"Full-time student" means a student who is a degree candidate, carries a full course load, and who is not employed for more than 20 hours a week.

"Good standing" means a cumulative grade point average of 2.0 on a 4.0 grade point scale in which failing grades are computed as a part of the average.

"Indian" means any individual who is—

(a) A member of a tribe, band, or other organized group of Indians, including those tribes, bands, or groups terminated since 1940 and those recognized by the State in which they reside;

(b) A descendant, in the first or second degree, of any individual described in paragraph (a) of this definition;

(c) Considered by the Secretary of the Interior to be an Indian for any purpose; or

(d) An Eskimo or Aleut or other Alaska Native.

(Indian Education Act, Section 453(a); U.S.C. 1221h(a))

"Indian tribe" means any federally or State recognized Indian tribe, band, nation, rancheria, pueblo, Alaska Native village, or regional or village corporation as defined in or established under the Alaska Native Claims Settlement Act (85 Stat. 688), that exercises the power of self-government.

"Institution of higher education" means that term as defined in 34 CFR 250.4.

"Resources" means income, savings, spouse's income, family contributions and other sources of financial aid.

"Secretary" means the Secretary of the Department of Education or an official or employee of the Department acting for the Secretary under a delegation of authority.

"Stipend" means that portion of a fellowship award which is used for personal living expenses.

"Undergraduate degree" means a baccalaureate (bachelor's) degree awarded by an institution of higher education.

(Indian Education Act, Section 423; 20 U.S.C. 3385b)

§ 263.4 What are the allowable fields of study?

(a) The allowable fields and related fields of study under this program are—

(1) Medicine. Fields related to medicine such as—
(i) Veterinary medicine;
(ii) Nursing;
(iii) Dentistry;
(iv) Optometry or Ophthalmology;
(v) Biochemistry;
(vi) Pharmacy;
(vii) Nutrition; and
(viii) Clinical psychology.

(2) Law.

(3) Education. Fields related to educ.. on such as—
(i) Computer science; and
(ii) Technology.

(4) Business Administration. Fields related to business administration such as—
(i) Accounting;
(ii) Economics;
(iii) Computer science and technology;
(iv) Public administration; and
(v) Mathematics.

(5) Engineering. Fields related to engineering such as—
(i) Architecture;
(ii) Urban or Rural Planning; and
(iii) Communication technology.

(6) Natural Resources. Fields related to natural resources such as—
(i) Agricultural science;
(ii) Forestry;
(iii) Horticulture;
(iv) Hydrology;
(v) Fisheries;
(vi) Environmental or earth sciences;
(vii) Geology or Geophysics;
(viii) Oceanography;
(ix) Marine biology;
(x) Mining;

(xi) Chemical and petroleum refining; and

(xii) Metallurgy.

(b) The Secretary considers, on a case-by-case basis, the eligibility of applications for fellowships in related fields of study in addition to those listed in paragraph (a) of this section.

(Indian Education Act, Section 423; 20 U.S.C. 3385b)

§ 263.5 What does a fellowship award include?

(a) The Secretary awards a fellowship in an amount up to but not more than, the difference between the student's resources, including other sources of financial aid, and the student's expenses, as defined in § 263.3 The assistance provided by the program either—

(1) Fully finances a student's educational expenses; or

(2) Supplements other resources of the student in meeting these expenses.

(b) The Secretary announces for each field of study the expected maximum amounts for subsistence and other fellowship costs in the annual application notice published in the Federal Register.

(Indian Education Act, Section 423; 20 U.S.C. 3385b)

§ 263.6 Application contents: evidence that the applicant is Indian.

An application must contain evidence that the applicant is Indian as defined in § 263.3 of this part.

(Indian Education Act, Section 453(a); 20 U.S.C. 1221h(a))

§ 263.7 Application contents: evidence of admission or attendance.

(a) An application must contain evidence that the applicant is currently in attendance or has been accepted for admission as a full-time student at an accredited institution of higher education in one of the eligible fields of study listed in § 263.4.

(b) An applicant who has not yet been accepted for admission may submit an application that the Secretary may consider, provided that the applicant is accepted by an accredited institution of higher education by a date to be specified by the Secretary.

(Indian Education Act, Section 423; 20 U.S.C. 3385b)

§ 263.8 Application contents: transcripts.

(a) An applicant for an undergraduate fellowship shall submit high school and, if appropriate, undergraduate transcripts.

(b) An applicant for a graduate fellowship shall submit undergraduate and, if appropriate, graduate transcripts.

(Indian Education Act, Section 423; 20 U.S.C. 3385b)

§ 263.9 Application contents: evidence of financial aid need.

(a) An applicant shall demonstrate a need for financial assistance beyond commitments of personal resources, other educational grants, scholarships, Pell Grants, and work study programs. Financial assistance is provided to enable a Fellow to meet allowable expenses for attending an institution of higher education full-time.

(b) To demonstrate need for financial assistance, the applicant must submit the following:

(1) Information showing the amount of tuition and fees charged by the institution of higher education to be attended.

(2) Letters of commitment from granting sources of other financial aid.

(3) Evidence of other pending applications for financial aid.

(4) A copy of the Graduate and Professional Schools Financial Aid Statement (GAPSFAS), the American College Testing Program's Student Need Analysis Statement (Family Financial statement), or a similar complete statement of financial resources that has been submitted to the institution of higher education.

(Indian Education Act, Section 423; 20 U.S.C. 3385b)

§ 263.10 Application contents: other information.

An application must contain—

(a) Three letters of assessment;

(b) An educational commitment essay;

(c) Evidence of scholastic and service awards, leadership positions held, and other special recognition by school, religious, tribal, and civic organizations; and

(d) Standardized test scores appropriate to the applicant's proposed field and level of study.

(Indian Education Act, Section 423; 20 U.S.C. 3385b)

Subpart B—How Are Fellows Selected?

§ 263.11 What priorities may the Secretary establish?

(a) Each year, the Secretary may establish priorities among the allowable fields of study described in § 263.4.

(b) The Secretary announces the priorities selected and the approximate amount of funds reserved for any combination of the various fields or related fields of study in the application notice published in the Federal Register.

(Indian Education Act, Section 423; 20 U.S.C. 3385b)

§ 263.12 What priority is given to certain applicants?

The Secretary shall award 15 additional points beyond those awarded under § 263.13 to applicants who apply for graduate fellowships in the fields of engineering, business administration, natural resources, and their related fields.

(Indian Education Act, Section 423; 20 U.S.C. 3385b)

§ 263.13 How does the Secretary evaluate applications?

(a) The Secretary evaluates an application on the basis of the criteria listed in paragraphs (c) and (d) of this section, in addition to the priority listed in paragraphs (c) and (d) of this section, in addition to the priority points awarded under § 263.12. The maximum possible point range for each criterion is stated in parentheses. The number of points the Secretary awards for each criterion depends on how well the application addresses all of the factors of that criterion. The total number of points available under the criteria in this section is 100.

(b) The Secretary evaluates and ranks an application with other applications for the same field and related fields.

(c) *Academic record and leadership potential. (70 points)*

(1) The Secretary considers the quality of the applicant's academic record and the applicant's potential for success in his or her field of study by reviewing the items in paragraphs (c) (2) and (3) of this section. The Secretary awards up to 35 points for paragraph (c)(2) and up to 35 points for paragraph (c)(3).

(2) The Secretary reviews the applicant's grades and standardized test scores, such as the Scholastic Aptitude Test (SAT), American College Testing Assessment Program (ACT), Graduate Record Examination (GRE), Law School Admission Test (LSAT), Medical College Admissions Test (MCAT), and achievements tests.

(3) The Secretary reviews documentation of any leadership positions held by the applicant while in school and three letters of assessment that address the applicant's potential for success and leadership in his or her field of study. The letters must be from—

(i) A teacher or instructor of the applicant;

(ii) A school principal, counselor, or coordinator of a program funded

under Part A of the Indian Education Act; and

(iii) A parent committee member of an Indian Education Act, Part A, project, tribal council member, an advisor or civic leader who has observed the applicant in educational, social, or civic activities.

(d) *Commitment.* (30 points)

(1) The Secretary considers the applicant's commitment by reviewing an educational commitment essay written by the applicant. The Secretary awards up to 30 points for this criterion.

(2) In reviewing the essay, the Secretary looks for—

(i) The applicant's ability to write clearly;

(ii) How well and the extent to which the applicant expresses a commitment of pursuing his or her chosen field of study; and

(iii) The extent to which the essay explains how participation in the fellowship program will enable the applicant to achieve his or her potential and assist him or her in providing leadership to the Indian Community.

(Indian Education Act, Section 423; 20 U.S.C. 3385b)

Subpart C—What Conditions Must Be Met by Fellows?

§ 263.21 Required certification of information.

To verify the accuracy of the information provided in the application, the applicant, if requested, shall provide all information and documents, including a copy of his or her Federal Income Tax return. The applicant's failure to provide the requested information and documents invalidates the application.

(Indian Education Act, Section 423; 20 U.S.C. 3385b)

§ 263.22 Time period for a fellowship.

(a) The Secretary awards a fellowship for a period of time—

(1) Not to exceed four academic years for an undergraduate or doctorate degree; and

(2) Not to exceed two academic years for a master's degree.

(b) The Secretary reviews the status of each Fellow at the end of each year and continues support only if the Fellow—

(1) Has complied with the Indian Education Act and applicable regulations;

(2) Has remained a full-time student in good standing in the field in which the fellowship was awarded; and

(3) Has submitted a noncompeting continuation application to request additional support.

(4) Has demonstrated continued financial aid need.

(c) A fellowship terminates when the Fellow receives the degree being sought. A fellowship holder who is awarded an undergraduate degree may seek support under this program to pursue a graduate level or postbaccalaureate degree by submitting a new application.

(Indian Education Act, Section 423; 20 U.S.C. 3385b)

§ 263.23 Responsibilities of a Fellow.

A Fellow shall—

(a) Start school during the first year of the award at the institution named on the grant award document and complete at least one full academic term;

(b) Submit to the Secretary two copies of his or her official grade report at the close of each academic term;

(c) Request a leave of absence from the Secretary for any interruption in his or her program of academic study;

(d) Submit to the Secretary within 60 days from the start of each academic year, a current financial report which has been reviewed and signed by the financial aid officer at the institution of higher education. The financial report shall state all sources and amounts of financial assistance received by the Fellow for the academic year for which the fellowship applies; and

(e) Report to the Secretary any changes in academic or financial status.

(Indian Education Act, Section 423; 20 U.S.C. 3385b)

§ 263.24 Leave of absence requests.

(a) A Fellow may request a leave of absence from the Secretary for a period not longer than 12 months.

(b) The Secretary permits a leave of absence only if the institution certifies that the Fellow is eligible to resume his or her course of study at the end of the leave of absence.

(Indian Education Act, Section 423; 20 U.S.C. 3385b)

§ 263.25 Discontinuation of fellowship payments.

(a) The Secretary may discontinue the fellowship, if the Fellow—

(1) Fails to comply with the provisions under this part, including failure to obtain an approved leave of absence under § 263.24, or with the terms and conditions of the fellowship award;

(2) Fails to disclose any information which substantially affects his or her financial status; or

(3) Fails to report any change in his or her academic status.

(b) The Secretary will discontinue a fellowship only after providing reasonable notice and an opportunity for the Fellow to rebut, in writing or in an informal meeting with the responsible official in the Department of Education, the basis for the decision.

(Indian Education Act, Section 423; 20 U.S.C. 3385b)

§ 263.26 Requirements for an alternate Fellow.

If a fellowship is vacated or discontinued, the Secretary may award the unexpended funds from that fellowship to an alternate applicant at that institution, for a period of study which does not exceed the term of the original fellowship.

(Indian Education Act, Section 423; 20 U.S.C. 3385b)

Subpart D—Who Is Responsible for the Administration of Grant Payments?

§ 263.31 Disbursement of funds.

(a) Funds are disbursed directly to the institution of higher education where a Fellow is enrolled. Stipends shall be distributed to Fellows in installments by the institution. No fewer than two installments per academic year shall be made. If the fellowship is vacated or discontinued, the Secretary selects an alternate Fellow at that institution or the institution must return the unexpended funds.

(b) A Fellow who officially or unofficially withdraws or is expelled from an institution before completion of a term shall refund a prorated portion of the stipends, that has been received, as determined by the Secretary.

(Indian Education Act, Section 423; 20 U.S.C. 3385b)

Part VI

Department of Agriculture

Animal and Plant Health Inspection

Citrus Canker; Mexico; Proposed Amendment to Interim Rule and Notice of Public Hearing

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

7 CFR Part 319

[Docket No. 83-308]

Citrus Canker; Mexico

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Proposed amendment to interim rule and notice of public hearing.

SUMMARY: This document proposes to amend the "Citrus Canker—Mexico" interim regulations to allow any importer to import restricted articles for movement to and use in certain northern parts of Louisiana and Texas in accordance with certain conditions, and to allow restricted articles to be culled and repacked under certain conditions in restricted areas in Texas. This proposal is in response to requests from importers and State officials and appears to be warranted in order to relieve unnecessary restrictions with respect to restricted articles.

This document also gives notice of a public hearing concerning this proposed action.

DATES: Written comments concerning the proposal must be received on or before March 30, 1983. A public hearing concerning the proposal will be held at 10 a.m. on March 24, 1983.

ADDRESSES: Written comments concerning this proposal should be submitted to Thomas O. Gessel, Director, Regulatory Coordination Staff, APHIS, USDA, Room 728, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782.

A public hearing concerning the proposal will be held at the Crockett Room, The Hilton Inn, 2721 South Tenth Street, McAllen, Texas 78501.

FOR FURTHER INFORMATION CONTACT: Frank Cooper, Staff Officer, Regulatory Services Staff, Plant Protection and Quarantine, APHIS, USDA, Room 637 Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782; 301-436-8248.

Stephen Poe, Plant Pathologist, Emergency Programs, Plant Protection and Quarantine, APHIS, USDA, Room 609 Federal Building, Hyattsville, MD 20782; 301-436-8365.

SUPPLEMENTARY INFORMATION:

Public Hearing

A representative of the Animal and Plant Health Inspection Service will preside at the hearing. Any interested person may appear and be heard in person, by attorney, or by other representative.

The hearing will begin at 10 a.m. and is scheduled to end at 5 p.m. local time. However, the hearing may be terminated at any time after it begins if all of those persons desiring an opportunity to speak have been heard. Persons who wish to speak are requested to register with the presiding officer prior to the hearing. The prehearing registration will be conducted at the location of the hearing from 9 a.m. to 10 a.m. Those registered persons will be heard in the order of their registration. Any other person who wishes to speak at the hearing will be afforded such opportunity after the registered persons have been heard. It is requested that duplicate copies of any written statements that are presented be provided to the presiding officer at the hearing.

If the number of preregistered persons and other participants in attendance at the hearing warrants it, the presiding officer may limit the time for each presentation in order to allow everyone wishing to speak the opportunity to be heard.

Comments

Written comments are solicited for 20 days after publication of this document in the **Federal Register**. It appears that there is no longer a need for imposing certain restrictions on the importation of restricted articles and that prompt action should be taken to relieve the unnecessary restrictions. Therefore, a comment period of 20 days appears to be warranted and adequate under the circumstances.

The current "Citrus Canker-Mexico" regulations are established as interim regulations. The comment period for the current interim regulations expired on January 17, 1983. Any comments received in response to this proposal will also be considered in connection with the establishment of final regulations.

Background

This document proposes to amend the "Citrus Canker-Mexico" interim regulations (contained in 7 CFR 319.27 *et seq.* and referred to below as the regulations). The regulations were initially established on November 17, 1982, by a document published in the **Federal Register** on the same day (47 FR 51723-51729). The regulations were changed effective November 17, 1982, and this was announced in the **Federal Register** on December 2, 1982 (47 FR 54273-54275). The regulations were further changed effective January 20, 1983, by a document published in the **Federal Register** on January 5, 1983 (48 FR 387-393).

The regulations were established to protect against the introduction of citrus canker disease, which is caused by the infectious bacterium *Xanthomonas campestris* pv. *citri* (Hasse 1915) Dye 1976. This was necessary because of the finding of citrus canker disease in the State of Colima and in the municipio of Coahuayana in the State of Michoacan in Mexico (these areas are referred to below as infected areas).

The regulations provide that any fruit or peel of Mexican lime (*Citrus aurantifolia*) from any area of Mexico, and any other fruit or peel of citrus or citrus relatives (fruit or peel of any genera, species, or varieties of the subfamilies Aurantioideae, Rutoideae, and Toddalioideae of the botanical family Rutaceae) from infected areas in Mexico offered for importation into the United States will be refused importation unless imported by the U.S. Department of Agriculture for experimental or scientific purposes under certain conditions.

The regulations also designate as restricted articles fruit or peel of ethrog (*Citrus medica*), grapefruit (*Citrus paradisi*), lemon (*Citrus limon*), orange (*Citrus sinensis*), Persian lime (*Citrus latifolia*), and tangerine (*Citrus reticulata*) from uninfected areas in Mexico. Under the regulations any restricted article is allowed to be imported into the United States by the U.S. Department of Agriculture for experimental or scientific purposes under certain conditions and is allowed to be imported by any importer if imported in accordance with certain conditions.

A restricted article is allowed to be imported by any importer only if imported in accordance with provisions concerning permits, inspection and phytosanitary certificates of inspection, treatment and other requirements, marking and identity, arrival notification, costs and charges, ports of entry, destination requirements, and restricted destination permits. In accordance with these requirements, a restricted article may be imported only for movement to and use in locations other than Arizona, California, Florida, Hawaii, Louisiana, Puerto Rico, Texas, or the Virgin Islands of the United States. The **Federal Register** document of January 5, 1983, set forth the rationale for not allowing restricted articles to be imported for movement to or use in these areas. It was explained that a significant number of host plants are grown either commercially or noncommercially in these areas (48 FR

389–390). It was further explained that as an additional precaution against the establishment of citrus canker disease caused by bacteria trapped in pores or wounds of restricted articles, it was necessary to establish procedures designed to prevent restricted articles from being destined to areas in the United States where host plants are grown either commercially or noncommercially in significant amounts (48 FR 388–390).

Movement to and Use in Louisiana and Texas

Importers of restricted articles have requested that the regulations be amended to allow restricted articles to be imported for movement to and use in northern parts of Louisiana and Texas where citrus or citrus relatives are not grown either commercially or noncommercially in significant amounts. It appears that there is a basis for amending the regulations to allow restricted articles to be moved to and used in areas in northern parts of Louisiana and Texas. In this connection, it is proposed to allow restricted articles to be moved to and used in any part of Louisiana not included in that part of Louisiana more than 15 miles south of Interstate Highway 20 and it is proposed to allow restricted articles to be moved to and used in any part of Texas not included in that part of Texas more than 15 miles south of the direct route from the Louisiana border to the New Mexico border beginning on Interstate Highway 20 and continuing on Interstate Highway 10.

The regulations also currently require that a restricted article bear on the outer container the statement "Not to be distributed within Arizona, California, Florida, Hawaii, Louisiana, Puerto Rico, Texas, or the Virgin Islands of the United States." Therefore, in accordance with the proposal to allow restricted articles to be moved to and used in parts of Louisiana and Texas, it is also proposed to change the required statement to read "Not to be distributed within Arizona, California, Florida, Hawaii, any part of Louisiana more than 15 miles south of Interstate Highway 20, Puerto Rico, any part of Texas more than 15 miles south of the direct route from the Louisiana border to the New Mexico border beginning on Interstate Highway 20 and continuing on Interstate Highway 10, or the Virgin Islands of the United States."

In addition, the regulations currently provide that a restricted article may be moved from the port of entry to locations other than Arizona, California, Florida, Hawaii, Louisiana, Puerto Rico, Texas, or the Virgin Islands of the United States only pursuant to a restricted destination permit issue by an inspector. Therefore, in accordance with the proposed provisions explained above, it is further proposed to provide that a restricted destination permit also may be issued for movement to locations in the northern parts of Louisiana and Texas described above.

It appears that restricted articles could be allowed to be imported for movement to and use in such northern parts of Louisiana and Texas under the conditions explained above without presenting a significant risk of causing the introduction of citrus canker disease into the United States.

The proposed marking requirements and restricted destination permit requirements appear to be adequate to prevent the commercial movement of these articles into restricted areas, including any restricted areas in Louisiana or Texas. In this connection, it should be particularly noted that the regulations already provide that a restricted destination permit will be issued for the movement of a restricted article only upon the presentation of evidence, such as U.S. Customs bond, an invoice, or other shipping document indicating destination, sufficient, to establish that the article would be shipped to a location in the United States where it would be eligible for distribution and use.

Also, the proposed boundary lines in Louisiana and Texas appear to be sufficiently distant from areas where citrus or citrus relatives are grown in significant amounts to provide adequate protection against shoppers purchasing restricted articles in areas where restricted articles are allowed and taking the articles back home to areas where citrus or citrus relatives are grown. The boundary lines are at least one hundred and fifty miles from areas in Louisiana and Texas where citrus or citrus relatives are grown in significant amounts.

As an added precaution, it is also proposed to allow restricted articles to be moved from the port of entry to a wholesale distributor in the specified parts of northern Louisiana and Texas only if the wholesale distributor is operating under a valid compliance agreement whereby the wholesale distributor agrees not to reship the restricted articles to areas where they would not be eligible for distribution and use and agrees not to reship restricted articles to any other wholesale distributor in a restricted area not operating under such a compliance agreement. This is in accord with requests of State officials of Louisiana and Texas who asserted that these precautions were needed if the proposal to allow restricted articles to be distributed and used in northern parts of Louisiana and Texas were adopted.

Since areas in these northern parts of Louisiana and Texas have at times served as distribution points for areas where the articles would not be allowed to be distributed and used, the proposed compliance agreement requirements appear to be necessary to assure that wholesale distributors understand and comply with the applicable requirements. Further, it is proposed to establish due process requirements as set forth in the proposed text for the withdrawal of such compliance agreements for noncompliance with the regulations or any conditions imposed pursuant thereto.

Culling and Repacking

As noted above, the regulations are designed to provide that a restricted article may be imported only for distribution and use in locations other than areas where citrus or citrus relatives are grown in significant amounts. Currently, the regulations only allow restricted articles to move from the port of entry to destination and do not allow restricted articles to be culled and repacked in the restricted areas where they would not be eligible for distribution and use. Importers of restricted articles have requested that the regulations be amended to allow restricted articles to be culled and repacked in an restricted areas in Texas. Certain importers own facilities for these activities in the restricted areas in Texas. In this connection, it appears that importers want to be allowed to cull and repack restricted articles in their own facilities in Texas since it is more expensive for these importers to have the restricted articles culled and repacked in other facilities in Mexico or in areas in the United States where restricted articles are allowed to be distributed and used.

In order to allow restricted articles to be culled and repacked in restricted areas in Texas, it is necessary to have adequate safeguards to protect against the introduction of citrus canker disease into the United States. It is necessary to have adequate assurance that the restricted articles would remain identifiable as restricted articles while in the restricted areas and that the restricted articles would be shipped to destination where they are eligible to be distributed and used. It is further necessary to require that any restricted articles unpacked and not repacked be disposed of in a manner adequate to

prevent the introduction of citrus canker disease into the United States. It is also necessary that the outer containers of the repacked restricted articles bear sufficient information (1) to indicate that the restricted articles are to be shipped only to destinations where they are eligible to be distributed and used and (2) to provide a means of tracing the articles back to the repacker if additional information were needed concerning the articles for enforcement purposes.

It appears that there would be adequate safeguards if the culling and repacking in the citrus producing areas in Texas were allowed to be conducted only pursuant to a compliance agreement between Plant Protection and Quarantine (the unit of the Animal and Plant Health Inspection Service responsible for administering the regulations) and the person conducting the culling and repacking whereby it is agreed that these activities would be conducted under the following conditions:

(1) The culling and repacking, and any related activities would be subject to monitoring by inspectors;

(2) The culling and repacking would be conducted only under conditions found by an inspector as adequate to assure that the restricted articles would not be commingled with nonrestricted articles and would remain identifiable as restricted articles during such activities (i.e., restricted articles must be separated from nonrestricted articles by being in separate rooms or by being separated by partition, the equipment used for culling restricted articles may not be used for processing nonrestricted articles until all restricted articles which have been culled by that equipment have been repacked for distribution or put in containers for disposal);

(3) The outer containers of the repacked restricted articles would plainly and correctly bear the general nature and quantity of the contents, the country or locality of origin, the name and address of repacker, the name and address of consignee, and the statement "Not to be distributed within Arizona, California, Florida, Hawaii, any part of Louisiana more than 15 miles south of Interstate Highway 20, Puerto Rico, any part of Texas more than 15 miles south of the direct route from the Louisiana border to the New Mexico border beginning on Interstate Highway 20 and continuing on Interstate Highway 10, or the Virgin Islands of the United States States"; and

(4) Any restricted articles taken out of their containers and not repacked for distribution and use in areas where they are eligible for distribution and use must be disposed of daily by returning them to Mexico, or be disposed of daily by incineration or burial in a landfill (the incinerator or landfill must have equipment and use procedures that are determined by the Deputy Administrator to be adequate to prevent the dissemination of citrus canker disease and be certified by the responsible State or local official as currently complying with the applicable laws for environmental protection); and any restricted articles held or moved for disposal must be held or moved in covered containers adequate to prevent spillage of the articles and marked so as to identify these as culled restricted articles.

Accordingly, it is proposed to allow persons to cull and repack restricted articles in the restricted areas of Texas under the specified conditions.

Also, it is proposed to establish due process requirements as set forth in the proposed text for the withdrawal of such compliance agreements for noncompliance with the regulations or any specified conditions imposed pursuant thereto.

As noted above, it is proposed to allow culling and repacking to occur under the conditions in Texas but not in the other specified citrus producing jurisdictions. If there are requests to allow culling and repacking in other jurisdictions where restricted articles are not allowed to be distributed and used, amendment of the regulations to allow such activities will be considered.

As noted above, it is proposed to require the culling and repacking to be subject to monitoring by inspectors and to be conducted only under conditions found by an inspector to meet certain criteria. In this connection, it should be noted that an inspector is defined in the interim rule as:

Inspector. Any employee of Plant Protection and Quarantine, Animal and Plant Health Inspection Service, U.S. Department of Agriculture, or other person authorized by the Deputy Administrator in accordance with law to enforce the provisions of the regulations in this subpart.

Miscellaneous

In order ot make the regulations more easily understood it is proposed to define the areas where restricted articles are not allowed to be distributed and used as "restricted areas" and to make certain other nonsubstantive changes in the regulations.

Executive Order 12291 and Regulatory Flexibility Act

This proposed amendment to the interim rule is issued in conformance with Executive Order 12291 and Secretary's Memorandum No. 1512–1, and has been determined to be not a "major rule." Based on information compiled by the Department, it has been determined that this proposal would not have a significant effect on the economy; would not cause a major increase in costs or prices for consumers, individual industries, Federal, State or local government agencies, or geographic regions; and would not cause significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets. Also, it is necessary to complete this rulemaking proceeding as quickly as possible in order to take any warranted action to relieve unnecessary restrictions. The emergency nature of this action makes it impracticable for the agency to follow the procedure of Executive Order 12291 with respect to this action.

It appears that the restricted articles that would be allowed to be distributed and used in northern parts of Louisiana and Texas would not constitute a significant portion of these types of articles distributed and used within the United States.

Further, it appears that the culling and repacking of restricted articles in accordance with the proposal in areas in Texas would not constitute a significant portion of the culling and repacking of fruits in the United States and would not constitute a significant portion of these activities involving small entities

James O. Lee, Jr., Acting Administrator of the Animal and Plant Health Inspection Service, has determined that, under the circumstances explained above, it is anticipated that the proposal, if adopted, would not have a significant economic impact on a substantial number of small entities.

List of Subjects in 7 CFR Part 319

Agricultural commodities, Imports, Plant diseases, Plants (agriculture), Transportation, Citrus Canker, Fruit.

PART 319—CITRUS CANKER—MEXICO

Under the circumstances referred to above, "Subpart—Citrus Canker—Mexico" in 7 CFR Part 319 is proposed to be amended as follows:

1. Section 319.27–1 would be amended by adding a definition of "Restricted area" in alphabetical order to read as follows:

§ 319.27-1 Definitions.

* * * * *

Restricted area. Any area listed as a restricted area in § 319.27-9.

§ 319.27-5 [Amended]

2. Paragraph (a)(8) of § 319.27-5 would be revised to read as follows:

* * * * *

(a) * * *

(8) The statement "Not to be distributed within Arizona, California, Florida, Hawaii, any part of Louisiana more than 15 miles south of Interstate Highway 20, Puerto Rico, any part of Texas more than 15 miles south of the direct route from the Louisiana border to the New Mexico border beginning on Interstate Highway 20 and continuing on Interstate Highway 10, or the Virgin Islands of the United States."

* * * * *

3. Provisions in § 319.27-9 and 319.27-10 would be revised and new §§ 319.27-11 and 319.27-12 would be added to read as follows:

§ 319.27-9 Restricted areas.

The following areas are designated as restricted areas: Arizona, California, Florida, Hawaii, any part of Louisiana more than 15 miles south of Interstate Highway 20, Puerto Rico, any part of Texas more than 15 miles south of the direct route from the Louisiana border to the New Mexico border beginning on Interstate Highway 20 and continuing on Interstate Highway 10, or the Virgin Islands of the United States.

§ 319.27-10 Destination requirements.

Any restricted article may be imported only for movement to and use in an area not included as a restricted area except that restricted articles may be culled and repacked in restricted areas in Texas as provided in § 319.27-12.

§ 319.27-11 Restricted destination permits.

A restricted article may be moved from the port of entry to a location not in a restricted area only pursuant to a restricted destination permit issued by an inspector. A restricted destination permit will be issued for the movement of a restricted article only upon the presentation of evidence, such a U.S. Customs bond, an invoice, or other shipping document indicating destination, sufficient to establish that the article would not be shipped in violation of this subpart and would be shipped to a location in the United States not in a restricted area.

§ 319.27-12 Culling and packing in Texas; movement to areas in northern parts of Louisiana and Texas; compliance agreements.

(a) Restricted articles may be culled and repacked in restricted areas in Texas in accordance with a valid compliance agreement between Plant Protection and Quarantine and the person conducting such activities whereby it is agreed that any culling or repacking would be conducted under the following conditions:

(1) The culling and repacking, and any related activities would be subject to monitoring by inspectors;

(2) The culling and repacking would be conducted only under conditions found by an inspector as adequate to assure that the restricted articles would not be commingled with nonrestricted articles and would remain identifiable as restricted articles during such activities (i.e., restricted articles must be separated from nonrestricted articles by being in separate rooms or by being separated by a partition, the equipment used for culling restricted articles may not be used for processing nonrestricted articles until all restricted articles which have been culled by that equipment have been repacked for distribution or put in containers for disposal);

(3) The outer containers of the repacked restricted articles would plainly and correctly bear the general nature and quantity of the contents, the country or locality of origin, the name and address of repacker, the name and address of consignee, and the statement "Not to be distributed within Arizona, California, Florida, Hawaii, any part of Louisiana more than 15 miles south of Interstate Highway 20, Puerto Rico, any part of Texas more than 15 miles south of the direct route from the Louisiana border to the New Mexico border beginning on Interstate Highway 20 and continuing on Interstate Highway 10, or the Virgin Islands of the United States"; and

(4) Any restricted article taken out of its container and not repacked for distribution and use in areas where it is eligible for distribution and use must be disposed of by daily returning it to Mexico, or be disposed of daily by incineration or burial in a landfill (the incinerator or landfill must have equipment and use procedures that are determined by the Deputy Administrator to be adequate to prevent the dissemination of citrus canker disease and be certified by the responsible State or local official as currently complying with the applicable laws for environmental protection); and any restricted articles held or moved for disposal must be held or moved in covered containers adequate to prevent spillage of the articles and marked so as to identify as culled restricted articles.

(b) A restricted article may not be moved from the port of entry to any wholesale distributor or restricted articles in an area in Louisiana or Texas not designated as a restricted area, unless the wholesale distributor is operating under a valid compliance agreement between Plant Protection and Quarantine and the wholesale distributor whereby the wholesale distributor agrees not to reship restricted articles to any restricted area and agrees not to reship restricted articles to any other wholesale distributor in a restricted area not operating under such a compliance agreement.

(c) Any compliance agreement may be cancelled orally or in writing by the inspector who is supervising its enforcement whenever the inspector finds that such person has failed to comply with the provisions of this subpart or any conditions imposed pursuant thereto. If the cancellation is oral, the decision and the reasons therefor shall be confirmed in writing as promptly as circumstances permit. Any person whose compliance agreement has been cancelled may appeal the decision, in writing, to the Deputy Administrator within ten (10) days after receiving written notification of the cancellation. The appeal shall state all of the facts and reasons upon which the person relies to show that the compliance agreement was wrongfully cancelled. The Deputy Administrator shall grant or deny the appeal, in writing, stating the reasons for such decision, as promptly as circumstances allow. If there is a conflict as to any material fact, a hearing shall be held to resolve such conflict.

(Secs. 105, 106, and 107; 71 Stat. 32-34; 7 U.S.C. 150dd, 150ee, 150ff; secs. 5, 7, and 9; 37 Stat. 316-18; 7 U.S.C. 159, 160, 162; 7 CFR 2.17, 2.51, and 371.2(c))

Done at Wahington, D.C., this 8th day of March, 1983.

H. L. Ford,

Deputy Administrator, Plant Protection and Quarantine, Animal and Plant Health Inspection Service.

AGENCY PUBLICATION ON ASSIGNED DAYS OF THE WEEK

The following agencies have agreed to publish all documents on two assigned days of the week (Monday/Thursday or Tuesday/Friday). This is a voluntary program. (See OFR NOTICE 41 FR 32914, August 6, 1976.) Documents normally scheduled for publication on a day that will be a Federal holiday will be published the next work day following the holiday.

Monday	Tuesday	Wednesday	Thursday	Friday
DOT/SECRETARY	USDA/ASCS		DOT/SECRETARY	USDA/ASCS
DOT/COAST GUARD	USDA/FNS		DOT/COAST GUARD	USDA/FNS

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers, free of postage, for $300.00 per year, or $150.00 for six months, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the **Federal Register.**

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

Rules and Regulations

Federal Register
Vol. 48, No. 49
Friday, March 11, 1983

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 29

Tobacco Inspection; Growers' Referendum Results

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This document contains the determination with respect to the referendum on the designation of the consolidated flue-cured tobacco markets of Mebane and Burlington, North Carolina. A referendum was conducted during the period of January 10–14, 1983, among tobacco growers who sell their tobacco at auction in Mebane and Burlington, North Carolina, to determine producer approval of the designation of these two markets as one consolidated market. Eligible producers voted unanimously in favor of the designation. Therefore, for the 1983 and succeeding flue-cured marketing seasons, the Mebane and Burlington, North Carolina, tobacco markets shall be designated as and be called Mebane-Burlington. The regulations are herein amended to reflect this new designated market.

EFFECTIVE DATE: March 11, 1983.

FOR FURTHER INFORMATION CONTACT: Mary C. Duncan, (202) 447–5836.

SUPPLEMENTARY INFORMATION: A notice was published in the January 4, 1983, issue of the **Federal Register** (48 FR 316) advising that a referendum would be conducted among flue-cured producers who market their tobacco on the Mebane and Burlington, North Carolina, markets to ascertain if such producers favored the designation of the consolidated markets. Mebane and Burlington had been officially and separately designated on June 26, 1942 (7 FR 4611) under the Tobacco Inspection Act of 1935 (7 U.S.C. 511 *et seq.*).

The referendum was conducted among producers who were engaged in the production of flue-cured tobacco marketed in Mebane and Burlington, North Carolina, for calendar year 1982. Ballots for the January 10–14 referendum were mailed to approximately 650 producers. The Department received a total of 302 responses: 272 eligible producers voted in favor of the consolidation of the Mebane and Burlington markets, and 30 ballots were determined to be ineligible because 20 were postmarked prior to January 10, 1983, contrary to written instructions contained on the ballot, and 10 ballots were not completed and/or signed.

Upon the basis of the results of the referendum, it is determined that the consolidated market of Mebane-Burlington, North Carolina, is hereby designated as a flue-cured tobacco auction market and that this designated market shall receive mandatory, federal grading of tobacco sold at auction for the 1983 and succeeding seasons.

The referendum was held in accordance with the provisions of 7 U.S.C. 1312(c) and the regulations set forth in 7 CFR Parts 29 and 717.

This final rule has been reviewed under USDA procedures established to implement Executive Order 12291 and the Secretary's Memorandum 1512–1 and has been determined to be a "nonmajor" rule because it does not meet any of the criteria established for major rules under the executive order.

Additionally, in conformance with the provisions of Pub. L. 96–354, Regulatory Flexibility Act, full consideration has been given to the potential economic impact upon small business. Tobacco warehousemen and producers fall within the confines of "small business" as defined in the Regulatory Flexibility Act. A number of firms which are affected by these adopted regulations do not meet the definition of small business either because of their individual size or because of their dominant position in one or more marketing areas. William T. Manley, Deputy Administrator, Agricultural Marketing Service, has certified that this action will have no adverse economic impact upon all entities, small or large, and will in no way affect the normal competition in the market place.

List of Subjects in 7 CFR Part 29

Administrative practices and procedure, Tobacco.

PART 29—TOBACCO INSPECTION

Accordingly, the Department amends the regulations under the Tobacco Inspection Act contained in 7 CFR part 29, Subpart D, as follows:

§ 29.8001 [Amended]

The table contained in § 29.8001, entitled "Designated Tobacco Markets" is amended as follows:

(1) Item (t) is amended by deleting the words "Burlington, N.C." and "Mebane, N.C." from the column entitled Auction Markets.

(2) A new item (ww) is added under (vv) at end of the table, the new (ww) to read as follows:

Territory	Types of tobaccos	Auction markets	Order of designation	Citation
(ww) North Carolina.	Flue-Cured.	Mebane-Burlington.	Mar. 11, 1983	48 FR—.

Dated: March 7, 1983.

C. W. McMillan,

Assistant Secretary, Marketing and Inspection Services.

BILLING CODE 3410-02-M

Food and Nutrition Service

7 CFR Part 210

National School Lunch Program

AGENCY: Food and Nutrition Service.

ACTION: Restatement of interim rule.

SUMMARY: This document corrects a technical error both in the January 1, 1981 and the January 1, 1982 revision of Part 210 of Title 7 of the Code of Federal Regulations. On September 20, 1980, the Department published an interim rule (45 FR 64068) which amended § 210.13(b) of the National School Lunch Program. This interim rule was to be effective January 1, 1981. On December 16, 1980, the Department published an emergency final rule, Amendment 44 to Part 210 (45 FR 82621) which also amended § 210.13(b). Amendment 44 was made effective upon publication in order to implement the provision in Pub. L. 96–

108 which required that fiscal year 1980 Claims for Reimbursement be submitted by January 1, 1981. The Department intended that the Amendment 44 language be replaced by the interim rule language on January 1, 1981. This would have extended the claim submission requirements to subsequent years. As a result of a technical error, the revised Code of Federal Regulations reflects the obsolete language of Amendment 44 rather then the interim provision set forth by the Department for the period beginning January 1, 1981. The Department is re-publishing the interim rule provision in order to correct the Code of Federal Regulations.

EFFECTIVE DATE: January 1, 1981.

FOR FURTHER INFORMATION CONTACT: Stanley C. Garnett, Chief, Policy and Program Development Branch, School Programs Division, Food and Nutrition Service, U.S. Department of Agriculture, Alexandria, Virginia 22302, (703) 756–3620.

PART 210—[AMENDED]

Accordingly, 7 CFR 210.13(b) is corrected to read as follows:

§ 210.13 Reimbursement procedures.

* * * * *

(b) Claims for Reimbursement shall include data in sufficient detail to justify the reimbursement claimed and to enable the State to provide the information for the reports required under § 210.14(g)(2). Claims for Reimbursement shall be received by the State agency, or FNSRO where applicable, by the 10th day of the month following the month covered. Not more than 10 days of the beginning or ending month of Program operations in a fiscal year may be combined on a Claim for Reimbursement with the operations of the month immediately following the beginning month, or preceding the ending month. Claims for Reimbursement may not combine operations occurring during the ending month of a fiscal year with the beginning month of the next fiscal year. Claims for Reimbursement for meals served during any fiscal year shall be filed with the State agency, or FNSRO where applicable, prior to January 1, of the following fiscal year in order to be eligible for reimbursement. The State agency, or FNSRO where applicable, shall, as determined necessary through its administrative review processes or otherwise, promptly take corrective action with respect to any such claim. Such corrective action shall be completed in sufficient time to be reflected in the applicable final Program Operations and Financial Status Reports for the fiscal year as required under OMB Circular A–102 if reimbursement for such claims is to be made from funds made available for that fiscal year through the Letter of Credit process described under § 210.5(a) of this Part. Any requested increase in reimbursement level for any fiscal year resulting from corrective action taken after submission of the final fiscal year Program Operations and Financial Status Reports, shall be submitted to FNS for approval. The request shall be accompanied by a written explanation of the basis for the adjustment and the actions taken to minimize the need for such adjustments in the future. If FNS approves of such increase, it shall make payments subject to the availability of funds. Any reduction in reimbursement level for any fiscal year resulting from corrective action taken after submission of the final fiscal year Program Operations and Financial Status Report shall be handled in accordance with the provisions of § 210.16 of this Part except that amounts recovered may not be used to make program payments.

BILLING CODE 3410-30-M

Agricultural Marketing Service

7 CFR Part 910

[Lemon Reg. 402; Lemon Reg. 401, Amdt. 1]

Lemons Grown in California and Arizona; Limitation of Handling

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This action establishes the quantity of California-Arizona lemons that may be shipped to the fresh market during the period March 13–19, 1983, and increases the quantity of lemons that may be shipped during the period March 6–12, 1983. Such action is needed to provide for orderly marketing of fresh lemons for the periods specified due to the marketing situation confronting the lemon industry.

DATES: The regulation becomes effective March 13, 1983, and the amendment is effective for the period March 6–12, 1983.

FOR FURTHER INFORMATION CONTACT: William J. Doyle, Chief, Fruit Branch, F&V, AMS, USDA, Washington, D.C. 20250, telephone 202–447–5975.

SUPPLEMENTARY INFORMATION: This final rule has been reviewed under Secretary's Memorandum 1512–1 and Executive Order 12291 and has been designated a "non-major" rule. William T. Manley, Deputy Administrator, Agricultural Marketing Service, has certified that this action will not have a significant economic impact on a substantial number of small entities. This action is designed to promote orderly marketing of the California-Arizona lemon crop for the benefit of producers, and will not substantially affect costs for the directly regulated handlers.

This final rule is issued under Marketing Order No. 910, as amended (7 CFR Part 910; 47 FR 50196), regulating the handling of lemons grown in California and Arizona. The order is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674). The action is based upon the recommendations and information submitted by the Lemon Administrative Committee and upon other available information. It is hereby found that this action will tend to effectuate the declared policy of the Act.

This action is consistent with the marketing policy for 1982–83. The marketing policy was recommended by the committee following discussion at a public meeting on July 6, 1982. The committee met again publicly on March 8, 1983, at Los Angeles, California, to consider the current and prospective conditions of supply and demand and recommended a quantity of lemons deemed advisable to be handled during the specified weeks. The committee reports the demand for lemons has improved.

It is further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rulemaking, and postpone the effective date until 30 days after publication in the **Federal Register** (5 U.S.C. 553), because of insufficient time between the date when information became available upon which this regulation and amendment are based

and the effective date necessary to effectuate the declared policy of the Act. Interested persons were given an opportunity to submit information and views on the regulation at an open meeting, and the amendment relieves restrictions on the handling of lemons. It is necessary to effectuate the declared purposes of the Act to make these regulatory provisions effective as specified, and handlers have been apprised of such provisions and the effective time.

List of Subjects in 7 CFR Part 910

Marketing agreements and orders, California, Arizona, Lemons.

PART 910—[AMENDED]

1. Section 910.702 is added as follows:

§ 910.702 Lemon regulation 402.

The quantity of lemons grown in California and Arizona which may be handled during the period March 13, 1983, through March 19, 1983, is established at 250,000 cartons.

2. Section 910.701 Lemon Regulation 401 (48 FR 9235) is revised to read as follows:

§ 910.701 Lemon regulation 401.

The quantity of lemons grown in California and Arizona which may be handled during the period March 6, 1983, through March 12, 1983, is established at 265,000 cartons.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Dated: March 10, 1983.

D. S. Kuryloski,

Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

BILLING CODE 3410–02–M

Farmers Home Administration

7 CFR Parts 1809, 1945, and 1951

Emergency Loans

AGENCY: Farmers Home Administration, USDA.

ACTION: Final rule.

SUMMARY: The Farmers Home Administration (FmHA) amends its insured Emergency (EM) loan regulations to clarify Subpart D so that production loss calculations will be made on a fair and equitable basis for all farmers. This final rule terminates Subpart B and changes the title of Subpart D.

This action is needed to implement administrative changes to correct program deficiencies. The intended effect is to provide for more efficient administration of the program so that EM loans will be made on a fair and equitable basis to farmers suffering substantial agricultural losses, and who need the Federal assistance to continue their farming operations.

EFFECTIVE DATE: March 11, 1983.

FOR FURTHER INFORMATION CONTACT: Keith L. Smalley, Emergency Loan Officer, Emergency Division, Farmers Home Administration, USDA, Room 5346–S, Washington, D.C. 20250, telephone (202) 382–1651.

SUPPLEMENTARY INFORMATION: This action has been reviewed under USDA procedures established in Secretary's Memorandum 1512–1 which implements Executive Order 12291 and has been determined to be "non major". This action will cause no major increase in costs or prices for individuals, organizations, or other Government agencies affected; and there will be no significant adverse effects on competition, employment, investment, productivity, innovation, or the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

This action does not directly affect any FmHA programs or projects that are subject to A–95 clearinghouse review.

The Catalog of Federal Domestic Assistance number is 10.404 Emergency Loan (EM).

This document has been reviewed in accordance with 7 CFR Part 1901, Subpart G, "Environmental Impact Statements." It is the determination of FmHA that this action does not constitute a major Federal action significantly affecting the quality of the human environment and in accordance with the National Environmental Policy Act of 1969, Public Law (Pub. L.) 91–190, an Environmental Impact Statement is not required.

Need for Governmental Action

The Congress has been critical of FmHA's overall management of the Disaster Emergency Program. The Administration agrees with these criticisms.

Emergency (EM) loans are being made to farmers who have suffered losses to one crop while having offsetting good production in another crop(s). Although some corrective measures have been taken to assure that EM loans are needed and made only to those actually suffering production losses, it has become evident that a need exists for further revision and clarification of the regulations governing the EM loan program. Revisions must be made in Subpart D of Part 1945 so that farmers served under these regulations receive equal and fair treatment in obtaining EM loans.

The termination of Subpart B of Part 1945 eliminates the confusion that can be caused by having two loan regulations. The elimination of Subpart B will not have any effect on borrowers who were eligible for actual loss loans under Subpart B, as the time for applying for such loans has expired. Applicants for major adjustment and annual production loans are treated the same under Subpart D as they were under Subpart B. These loan applications will be processed under Subpart D of Part 1945. By terminating Subpart B of Part 1945, it will be necessary to revise the title of Subpart D, Part 1945.

A proposed rule was published in the **Federal Register** (47 FR 41978) on September 23, 1982. This action proposed revisions of Part 1945, Subpart B and Part 1945, Subpart D and the termination of processing EM loans under Part 1945, Subpart B as of September 30, 1982. A 60 day period was granted for public comment which ended November 22, 1982. Two comments were received. These comments were concerned about items that are statutory in nature and eligibility for EM loans. One of the comments was concerned about the deletion of acreage-poundage controls as a consideration in calculating production losses. This change in the regulations provides that crops under acreage-poundage controls will be treated the same as other crops in loss calculations thereby providing a more equitable basis for all loss calcuiations.

Since the September 23, 1982 date of publication of the proposed rule did not permit publishing the revisions to Part 1945, Subpart B as a final rule prior to September 30, 1982; the proposed revisions to Part 1945, Subpart B are withdrawn by this action and the regulation will be terminated on the close of business on the date this final rule is published in the **Federal Register**.

The following is a summary of the revisions being made by this action:

1. Subpart B, §§ 1945.51 through 1945.100 are removed and reserved.

2. The reference is deleted to disaster designations having a beginning incidence period date on or after May 26, 1981, in the title of Part 1945, Subpart D.

3. Section 1945.154 (a)(23) is revised to delete the reference to tobacco under acreage-poundage control as a consideration in establishing normal year's production and in calculating production losses. The source of records

and their priority of use is redesignated as §1945.163 (a)(1).

4. Section 1945.154 (a)(33)(i) is revised to clarify the definition of basic security.

5. Section 1945.154 (a)(33)(ii) is revised to clarify the definition of normal income security.

6. Section 1945.154 (a)(33)(iii) is revised to clarify the definition of additional security.

7. Section 1945.162 (a)(2) is revised to define a joint farming operation.

8. Section 1945.162 (d) is revised to reference this paragraph with § 1945.163 (a)(2)(xvii) in regard to calculating production losses when an applicant's farming operation is conducted in both a designated and nondesignated county(ies).

9. Section 1945.163 (a)(1) is completely revised to redesignate the source of prices and priority of records to be used in calculating production losses.

10. Section 1945.163 (a)(2)(i), (a)(2)(ii), (a)(2)(iv) and (a)(2)(vi) are revised for clarity and (a)(2)(xvii) is added to this paragraph to clarify how production losses are calculated for an EM applicant whose farming operation is conducted in both a designated and a nondesignated county(ies).

11. Section 1945.166 (a)(1) is revised to reference this paragraph with § 1945.163 (a)(2)(xvii).

12. Section 1945.166 (d) is revised for clarification.

13. Section 1945.167 (a) is revised for clarification.

14. Section 1945.167 (e) is revised to clarify that subsequent annual production EM loans can only be made to borrowers who were indebted for EM loan(s) on December 15, 1979.

15. Section 1945.167 (i) is added to this paragraph to provide that FmHA employees will not guarantee repayment of advances from other credit sources.

16. Section 1945.169 (f)(1) is revised to state that up to 75 percent of planned gross farm income can be advanced for annual production purposes, and to delete the reference to the greater of $100,000 or 75 percent of the estimated gross farm income when the applicant can provide only a first lien on a crop(s) and/or livestock and livestock products.

17. References to Subpart B of Part 1945 of this Chapter are deleted in Subpart A of Part 1809, Subpart A of Part 1945 and Subpart A of Part 1951 of this Chapter.

List of Subjects in 7 CFR Part 1945

Agriculture, Disaster assistance, Intergovernmental relations, Livestock, Loan programs—Agriculture.

Therefore, Chapter XVIII Title 7, Code of Federal Regulations, is amended as follows:

PART 1809—APPRAISALS

Subpart A—Appraisal of Farms and Leasehold Interests

§ 1809.1 [Amended]

1. In Section 1809.1, paragraph (b) is amended by removing the words "and Subpart B" in line 7.

PART 1945—EMERGENCY

Subpart A—Disaster Assistance—General

§ 1945.21 and 1945.26 [Amended]

2. In §§ 1945.21(b)(2) and (c)(1), and 1945.26(d) amendments to the paragraphs are made by removing the words "Subparts B and D" and inserting in their place, "Subpart D."

Subpart B—Emergency Loan Policies, Procedures and Authorizations for Those Applications Associated With Disaster Designations Having a Beginning Incidence Period Dated Prior to May 26, 1981

§§ 1945.51-1945.100 [Removed and Reserved]

3. Sections 1945.51 through 1945.100 are removed and reserved.

Subpart D—Emergency Loan Policies, Procedures and Authorizations for Applications Associated with FmHA Disaster Designations Having a Beginning Incidence Period Date on or After May 26, 1982

4. The title of Subpart D is revised to read as follows:

Subpart D—Emergency Loan Policies, Procedures and Authorizations

§ 1945.154 [Amended]

5. In § 1945.154, paragraphs (a)(23), (a)(33)(i), (a)(33)(ii), and (a)(33)(iii) are revised to read as follows:

§ 1945.154 Definitions and abbreviations.

(a) * * *

(23) *Normal year's production.* The normal year's production is the average per acre yield or production per animal unit of the 4 better years out of the 5 years immediately preceding the disaster year.

* * * * *

(33) *Security.* * * *

(i) *Basic security.* Real estate, fixtures, personal property, *e.g.*, foundation herds, flocks, aquatic animals and plant organisms, and machinery and equipment serving as security. When no collateral other than crops, livestock and/or livestock products and/or repayment ability, as defined in § 1945.169(d) of this Subpart, is available as security for the loan(s), the collateral is also considered to be basic security and sales proceeds *will not* be released for any purpose unless the Farm and Home Plan for that crop year includes plans for release of the proceeds for necessary farm operating or family living expenses.

(ii) *Normal income security.* All collateral (crops, livestock, and/or livestock products) planned to be marketed in the regular course of business, except as set forth in subparagraph (a)(33)(i) of this section, unless liquidation is approved. When liquidation is approved, all security, including normal income security, becomes basic security and sales proceeds *cannot* be released except as reflected in the Farm and Home Plan for that crop year.

(iii) *Additional Security.* All collateral not covered by subparagraphs (a)(33)(i) or (ii) of this section including: general intangibles, accounts and contract rights, which is encumbered, in addition to basic security and normal income security. Real estate and chattels can be additional security if required by loan approval conditions.

* * * * *

§ 1945.162 [Amended]

6. In § 1945.162, paragraphs (c)(2) and (d) are revised to read as follows:

§ 1945.162 Eligibility requirements.

* * * * *

(c) * * *

(2) An individual involved in a joint farming operation is not considered to be an established farmer for EM loan purposes. A joint farming operation is an operation where two or more farmers work together sharing equally or unequally land, labor, equipment, expenses and income. The joint ownership of land and/or equipment or the exchange of labor and equipment in separate farming operations does not constitute a joint operation. Thus, the latter type of arrangement is not considered a joint operation, but two separate individual operations.

* * * * *

(d) *Operate in a disaster area.* An applicant for an actual loss loan must have sustained qualifying losses in an area in which the availability of EM loans for actual losses has been determined in accordance with Subpart A of Part 1945 of this Chapter and must have filed an application before the expiration of the termination date. When an applicant's farming operation is located both in a designated county(ies) and a non-designated

county(ies) refer to § 1945.163 (a)(2)(xvii) of this Subpart.

* * * * *

§ 1945.163 [Amended]

7. In section 1945.163, paragraphs (a)(1), (a)(2)(i), (a)(2)(ii), (a)(2)(iv) and (a)(2)(vi) are revised and paragraph (a)(2)(xvii) is added to read as follows:

§ 1945.163 Determining qualifying losses, eligibility for actual loss loan(s) and the maximum amount of actual loss loan(s), annual production and major adjustment loan(s).

* * * * *

(a) *Production Losses.*

(1) The normal years production will be established by eliminating the poorest year of the 5-year production history immediately preceding the disaster year and averaging the remaining 4 years' production. The applicant *must* select the year to be eliminated. The year selected to be eliminated *must* be the same year for all farm enterprises (ie., *all* crops, livestock, and livestock products), which constituted a part of the applicant's farming operation during that year. A State Supplement will be issued which will be used in connection with subparagraph (a)(1)(iii) of this section. The State Supplement will contain average production figures provided by the USDA State Crop and Livestock Reporting Service, when available. If those records are not available, the State Supplement will contain statistical data on production from similar State or Federal bodies. When this information is available by County, County averages will be used. If available only by State, the State averages will be used throughout the State. In those States where neither a county nor State average is available for an agricultural commodity(ies), the State Director, with the advice of representatives of other Federal and State agricultural agencies, will establish County or State averages and advise County offices of these averages in the State Supplement. State directors and Farmer Programs Chiefs in adjoining States will consult with each other before releasing these figures. An applicant must use data from the production record source(s) in the order of priority as listed in subparagraphs (a)(1) (i), (ii) and (iii) of this section. The applicant will identify, on Form FmHA 1945-22, the production record source(s) to be used in determining the normal year's production for each commodity that was produced on all farms operated by the applicant in the disaster year. The order of priority of production records that will be used is:

(i) The applicant's actual reliable farm records.

(ii) The Agricultural Stabilization and Conservation Service (ASCS) established yields. When this production record source is used, an applicant must obtain the information from ASCS and submit it with the application to FmHA. This production record source will be used only for those commodities for which the applicant's reliable farm records were not maintained.

(iii) County or State averages. When this production record source is used, an applicant needs to provide production data for only the disaster year. The averages will be found in the State Supplement mentioned in paragraph (a)(1) of this section. This production record source will be used only for those commodities for which neither the applicant's reliable farm records nor ASCS established yields are available.

(iv) When one source of records is not available for the full 5 years preceding the disaster year a combination of record sources in paragraphs (a) (i), (ii) and (iii) of this Section will be used.

(v) When an applicant's production loss is on land being developed and maximum production capacity has not been attained, the State Director will establish normal yields on a case by case basis.

(2) * * *

(i) In calculating production losses, the same established unit prices will be used for the disaster year and the normal year in computing the dollar value of each enterprise. Unit prices will be established in accordance with subparagraph (a)(2)(iii) of this section. In the production loss calculation, those crop production yields and production per animal unit records authorized in subparagraphs, (a)(1) (i), (ii) and (iii) of this section will be used.

(ii) Information certified on Form FmHA 1945–22 for the disaster year for all single enterprises (as defined in § 1945.154(a)(15)(i)), which suffered a loss due to the disaster, will be transposed from Form FmHA 1945–22 to the appropriate places on Form FmHA 1945–26. The FmHA official completing Form FmHA 1945–26 is responsible for verifying loss information provided by the applicant. Information obtained from ASCS on Form FmHA 1945–29 will be cross checked with information provided by the applicant on Form FmHA 1945–22. Any discrepancies will be resolved, loss calculations adjusted if necessary, and the correct information recorded in the County Office case file. When the applicant's disaster loss is due to a reduction in *quality,* rather than due to a reduction in *quantity,* the applicant will be given credit for this by adjusting actual production yield downward. This will be accomplished by converting the dollar value of the quality loss to a yield reduction equal in value to the quality loss. When such an adjustment in necessary, the basis used in making the adjustment will be the applicant's *accurate* records of production and sales receipts showing the price received and the grade of the commodity in question. This information will be well documented by the County Supervisor.

* * * * *

(iv) The amount of actual production loss will be calulated for the single enterprise which is a basic part of the farming operation (see § 1945.154(a)(15) of this Subpart) by subtracting all compensatory disaster payments which are related to the disaster and which have been received or will be received; *i.e.,* crop insurance indemnity payments, ASCS disaster program payments, or any other disaster compensation *for that enterprise,* from the gross dollar amount of production losses for that enterprise as determined in subparagraph (a)(2)(iii) of the section.

* * * * *

(vi) Once eligibility is established based on production losses, the total production loss sustained by the applicant, directly attributable to the disaster, is computed by adding the gross dollar amount of production losses of *all* single enterprises, whether or not they constitute a basic part of the farming operation, and subtracting from this total all compensatory disaster payments received or to be received for those enterprises.

* * * * *

(xvii) When an applicant's farming operation(s) is conducted in a designated county(ies) and a nondesignated county(ies), eligibility will be established based on losses to a single enterprise which constitutes a basic part of the farming operation, without regard to whether the single enterprise is located in the designated county. The disaster year's *actual* yields, both in the designated and nondesignated counties, will be used to determine losses. Compensatory payments will be subtracted as explained in subparagraph (a)(2)(iv) of this section when determining eligibility. The amount of the production loss loan will be limited to the production loss sustained in the designated county, *minus* compensatory payments received or to be received for that portion of the

farming operation located in the designated county.

* * * * *

§ 1945.168 [Amended]

8. In § 1945.168 (a)(1) and (d) are revised to read:

§ 1945.168 Loan Purposes.

* * * * *

(a) *Loans for actual losses.*

(1) The amount of the maximum actual loss loan(s) in addition to the limitations contained in § 1945.163 (a)(2)(xvii) and (d) of this Subpart, is further limited to the actual dollar loss, or the actual amount of essential family, farm, and nonfarm enterprise credit that the applicant needs to carry on normal operations, *whichever is the lesser.* Actual loss loan funds will not be used to finance a nonfarm enterprise, unless such enterprise is needed to support a reasonable standard of living for the family. The use of the loss loan funds will be identified in the Farm and Home Plan so that a determination can be made as to whether such loan(s) were used for authorized purposes and covered all or a portion of the actual dollar loss.

* * * * *

(d) *Annual production and major adjustment loan indebtedness.* During fiscal year 1983, and all fiscal years thereafter, *no* annual production or major adjustment loan assistance may be made or guaranteed in any amount. Borrowers with EM loans outstanding on December 15, 1979, may receive subsequent EM annual production loans in accordance with the provisions of paragraph (b) of this section in amounts necessary to continue their normal farming operation(s) without regard to any indebtedness ceiling. (See § 1945.167(e), of this Subpart, concerning subsequent EM loans.)

* * * * *

§ 1945.167 [Amended]

9. In § 1945.167, the introductory text of paragraph (a) and paragraph (e) are revised and paragraph (i) is added to read as follows:

§ 1945.167 Loan limitations and special provisions.

(a) *Use of EM loan funds not authorized for expansion purpose(s).* EM actual loss loan funds *will not* be used to expand an applicant's farming, ranching, or aquaculture operation beyond that which constituted the normal predisaster operation(s). This limitation is not intended to prohibit minor changes in crop or livestock enterprises provided:

* * * * *

(e) *Subsequent EM loans.* Only those borrowers who were indebted for EM loans on December 15, 1979, and who received an initial annual production loan based on an application filed within 12 months from a disaster authorization dated prior to December 15, 1979, may receive subsequent EM annual production loans.

* * * * *

(i) *Prohibition on guaranteeing repayment of advances from other credit sources.* FmHA employees will not guarantee repayment of advances from other credit sources, either personally or on behalf of applicants, borrowers, or FmHA.

§ 1945.169 [Amended]

10. In § 1945.169, paragraph (f)(1) is revised to read:

§ 1945.169 Security requirements.

* * * * *

(f) *Operating purposes.*

(1) Loan funds used for annual production purposes will be secured by a first lien on the crop(s) and/or livestock and livestock products being financed with EM loan funds, plus enough additional security, as defined in 1945.154(a)(33)(iii) to assure that the Government's financial interest will be protected. When the applicant can provide *no* security other than a first lien on the crop(s) and/or livestock and livestock products, the amount of the loan will be limited to 75 percent of the planned gross farm income as shown on Form FmHA 431–2, or as shown on another acceptable plan of operation based on normal production and prices authorized by the State Director for developing annual farm plans within the State. When an EM borrower, who is indebted for an annual operating loan which is secured by only a first lien on the crop(s) and/or livestock and livestock products, needs a subsequent EM annual production loan to complete that year's farming operation, and the loan is needed to protect the Government's investment already in the crop and/or livestock and livestock products, the 75 percent gross income requirement may be waived by the State Director.

* * * * *

PART 1951—SERVICING AND COLLECTIONS

Subpart A—Account Servicing Policies

§ 1951.10 [Amended]

11. In § 1951.10, paragraph (a)(5) is amended by removing the words "§ 1945.50(b)(4) of Subpart B of Part 1945 and,"

(7 U.S.C. 1989; 7 CFR 2.23; 7 CFR 2.70)

Dated: January 20, 1983.

Charles W. Shuman,

Administrator, Farmers Home Administration.

BILLING CODE 3410-07-M

DEPARTMENT OF JUSTICE

Immigration and Naturalization Service

8 CFR Part 214

Nonimmigrant Classes

AGENCY: Immigration and Naturalization Service, Justice.

ACTION: Final rule.

SUMMARY: This final rule will accomplish two purposes. First, it will terminate the nonimmigrant status of Libyan nationals and third country nationals acting on behalf of Libyan entities who are presently engaged in aviation or nuclear-related education or training in the United States. Secondly, it will bar certain benefits to such individuals where the intent is to obtain such education or training. The Secretary of State has determined that this type of education or training is detrimental to the security of the United States, and that it falls within section 212(a)(27) of the Immigration and Nationality Act, 8 U.S.C. 1182(a)(27).

EFFECTIVE DATE: March 11, 1983.

FOR FURTHER INFORMATION CONTACT:

For general information: Stanley J. Kieszkiel, Acting Instructions Officer, Immigration and Naturalization Service, 425 Eye Street, NW., Washington, DC 20536 Telephone: (202) 633–3048.

For specific information: Michael Heilman, Assistant General Counsel, Immigration and Naturalization Service, 425 Eye Street, NW., Washington, DC 20536 Telephone: (202) 633–2620.

SUPPLEMENTARY INFORMATION: This amendment to 8 CFR Part 214 will bar the continued education or training of Libyan nationals and third country nationals acting on behalf of Libyan entities, in the fields of aviation maintenance, flight operations and nuclear-related studies or training. This amendment will also prohibit changes in nonimmigrant status, school transfer, extensions of stay, reinstatement of student status, employment authorization and practical training, where the purpose is to obtain the prohibited training or education.

These prohibitions are based upon a determination by the Secretary of State that aviation and nuclear-related training by foreign nationals in the United States, whose skills could be used by the Government of Libya, are detrimental to the security of the United States within the meaning of section 212(a)(27) of the Immigration and Nationality Act, 8 U.S.C. 1182(a)(27). Based on this determination, the Department of State has suspended the issuance of nonimmigrant visas to persons who intend to travel to the United States to receive training. The Department of State will also revoke previously issued nonimmigrant visas when it is determined that the purpose of the individual's travel to the United States is to engage in the prohibited activity. The regulations published here will insure that persons in the barred categories who have already entered the United States, or who may subsequently enter, will not be able to participate in aviation or nuclear-related training or education programs.

This final rule is exempt from the requirements of Executive Order 12291 because the rule is issued with respect to a foreign affairs function of the United States.

Compliance with 5 U.S.C. 553 as to notice and delayed effective date is not required because the rule involves a foreign affairs function and it is in the public interest to avoid delay.

List of Subjects in 8 CFR Part 214

Administrative practice and procedure, Aliens, Employment, Schools, Students.

Accordingly, Chapter I of Title 8 of the Code of Federal Regulations is amended as follows:

PART 214—NONIMMIGRANT CLASSES

Part 214 is amended by adding the following new § 214.5:

§ 214.5 Libyan and third country nationals acting on behalf of Libyan entities.

(a) Notwithstanding any other provision of this Title, the nonimmigrant status of any Libyan national, or of any other foreign national acting on behalf of a Libyan entity, who is engaging in aviation maintenance, flight operations, or nuclear-related studies or training is terminated.

(b) Notwithstanding any other provision of this chapter, the following benefits will not be available to any Libyan national or any other foreign national acting on behalf of a Libyan entity where the purpose is to engage in, or seek to obtain aviation maintenance, flight operations or nuclear-related studies or training:

(1) Application for school transfer.

(2) Application for extension of stay.

(3) Employment authorization or practical training.

(4) Request for reinstatement of student status.

(5) Application for change of nonimmigrant status.

(Secs. 103, 212, 214, 248; 8 U.S.C. 1103, 1182, 1184, 1258)

Dated: September 28, 1982.

Alan C. Nelson,

Commissioner of Immigration and Naturalization.

BILLING CODE 4410-10-M

CIVIL AERONAUTICS BOARD

14 CFR PART 204

[Economic Regulation ER-1307A; Docket 38904]

Data To Support Fitness Determination

AGENCY: Civil Aeronautics Board.

ACTION: Notice of Approval of Reporting Requirements by the Office of Management and Budget.

SUMMARY: The Civil Aeronautics Board set a two-year review period for fitness determinations for nonoperating air carriers, in ER-1307 (47 FR 52977, November 24, 1982). The Office of Management and Budget approved the revised reporting requirements contained in this final rule (14 CFR 204.8) through December 31, 1984, under OMB No. 3024-0041.

DATES:

Effective: February 22, 1983.

Adopted: March 7, 1983.

FOR FURTHER INFORMATION CONTACT: Linda K. Koman, Data Requirements Section, Information Management Division, Office of Comptroller, Civil Aeronautics Board, 1825 Connecticut Avenue, NW., Washington, D.C. 20428, (202) 673-6042.

SECURITIES AND EXCHANGE COMMISSION

17 CFR Parts 230, 239 and 274

[Release Nos. 33-6454, IC-13049; File No. S7-963]

Advertising by Investment Companies

AGENCY: Securities and Exchange Commission.

ACTION: Adoption of temporary amendments to rule 482 and Form N-1 and solicitation of comments.

SUMMARY: The Commission is adopting on a temporary basis and soliciting comments on amendments to rule 482 under the Securities Act of 1933, applicable to investment companies registered under the Investment Company Act of 1940, and an amendment to Form N-1, the registration form used by open-end management investment companies. These amendments will permit registered investment companies to mail advertisements directly to prospective investors and would permit money market funds to advertise their effective yield.

DATE: The temporary amendments are effective March 11, 1983.

Comments should be received on or before April 29, 1983.

ADDRESS: Comments should be submitted in quintuplicate to George A. Fitzsimmons, Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, D.C. 20549. Comment letters should refer to File No. S7-963. All comments received will be available for public inspection and copying in the Commission's Public Reference Room, 450 Fifth Street, NW., Washington D.C. 20549.

FOR FURTHER INFORMATION CONTACT: Jane A. Kanter, Esq. (202) 272-2115, Special Counsel, or Gregory K. Todd, Esq. (202) 272-7317), Office of Disclosure Legal Services, Division of Investment Management, Securities and Exchange Commission, Washington, D.C. 20549.

SUPPLEMENTARY INFORMATION: The Commission is today adopting on a temporary basis and publishing for comment amendments to rule 482 [17 CFR 230.482] under the Securities Act of 1933 (the "1933 Act") [15 U.S.C. 77a *et seq.*] and an amendment to Form N-1 [17 CFR 239.15, 274.11], the registration form used by open-end management investment companies. These amendments will: (i) Permit investment companies registered under the Investment Company Act of 1940 (the "1940 Act") [15 U.S.C. 80a-1 *et seq.*] to

send advertisements permitted under that rule by direct mail to potential investors, (ii) modify the present method of determining current yield by changing the method by which the base period return is calculated, and (iii) permit investment companies that are money market funds to advertise yield figures comparable to compound interest rates. The Commission solicits comments on these temporary amendments.

Background

In 1979, the Commission adopted rule 482 under the 1933 Act [1] to allow registered investment companies greater freedom to advertise through "bona fide" public media than is permitted in "tombstone" advertisements by rule 134 under the 1933 Act [17 CFR 230.134]. The Commission adopted rule 482 pursuant to section 19(b) of the 1933 Act [15 U.S.C. 77j(b)], which authorizes the Commission to permit, for certain purposes [2], the use of prospectuses that either omit in part or summarize the information contained in the full prospectus. Accordingly, a rule 482 advertisement is a prospectus for purposes of potential civil liability under section 12(2) of the 1933 Act [3] [15 U.S.C. 771(2)]. Rule 482 contains the following specific conditions: (i) The issuer must be registered under the 1940 Act or must be a business development company making a public offering of its securities pursuant to the 1933 Act; (ii) the advertisement must appear in a bona fide newspaper or magazine, or be used on radio or television; (iii) the advertisement must contain only information the substance of which is included in the issuer's statutory prospectus; and (iv) the advertisement must conspicuously state from whom a statutory prospectus may be obtained, and that the investor should read the statutory prospectus before investing in securities of the issuer. [4]

In 1980, rule 482 was amended to add the requirement that any quotation of a money market fund's yield in such an advertisement must be based on the "method of computation prescribed in Item 17 (and the instructions thereto) of Form N–1 * * * and [must identify the date of the last day in] the period used in computing that quotation." [5] These requirements were added in order to provide a standardized method of calculating yield by money market funds. The Commission believed that a standardized method was necessary so as to enable investors to compare accurately the yields of different funds. [6]

Discussion

After reviewing the requirements of rule 482 in light of experience with the rule and other developments discussed below, the Commission has determined to expand the availability of the rule in two regards: (i) To permit rule 482 prospectuses to be used in direct mail solicitations (the rule currently permits only mass media advertisements); and (ii) to permit money market funds to advertise effective yield on a basis that is comparable to the compound interest advertised by other financial institutions. The Commission is also making a technical change in the existing yield calculation formula to eliminate a bias in favor of funds that pay dividends monthly rather than daily.

Expansion to Permit Direct Mail Advertising

As stated above, rule 482 permits the use of omitting prospectuses in mass media advertising but not in direct mail solicitations. [7] With regard to this limitation, the release adopting the rule states that the Commission was concerned in 1979 that direct mail advertisements might be more likely than mass media advertisements to be viewed by investors as the primary selling document. In this regard, the Commission believed that, while economic considerations would keep mass media advertisements relatively short, direct mail advertisements might be so lengthy as to give the appearance of a full prospectus. Upon further consideration, however, the Commission is no longer convinced that the prohibition against rule 482 prospectuses being used for direct mail advertising is justified. First, rule 482 presently provides that the omitting prospectus must state conspicuously from whom a full statutory prospectus may be obtained and that the investor should read the full prospectus carefully before investing. The Commission believes that this legend substantially reduces the likelihood that an investor would confuse the direct mail advertisement with a full prospectus. Moreover, it would seem that direct mail solicitations, like mass media advertisements, would be subject to economic considerations which would tend to keep them relatively short. In particular, it appears that the postal costs of direct mail advertising should provide investment companies with an incentive for transmitting short documents that investors should not confuse with a statutory prospectus. The Commission requests specific information on the costs of direct mail.

In addition to the foregoing, the Commission has had three years of experience with the rule and is of the opinion that there is little reason to believe that, if rule 482 prospectuses were used for direct mail, investors would receive inaccurate, incomplete, or misleading information. Given that the securities laws do not require delivery of a prospectus prior to sale, investors who receive direct mail solicitations (pursuant to rule 482) that contain only information extracted from or

---

[1] The rule was adopted as rule 434d, Securities Act Release No. 6110, August 31, 1979 [44 FR 52818 (September 10, 1979)], but was renumbered as rule 482 without modification in 1982 with the revision of Regulation C under the 1933 Act. Securities Act Release No. 6383, March 3, 1982 [47 FR 11380 (March 16, 1982)].

[2] A "summary" or "omitting" prospectus authorized pursuant to section 10(b) of the 1933 Act may not replace the full statutory prospectus that must be delivered no later than the time at which the sale that is subject to section 5 of the 1933 Act [15 U.S.C. 77e] is confirmed. However, an authorized summary or omitting prospectus may be used prior to delivery of the full statutory prospectus.

[3] Rule 482 prospectuses, however, are not part of the registration statement for purposes of liability under section 11 of the 1933 Act [15 U.S.C. 77k]. Rule 134 "tombstone" advertisements are neither prospectuses nor part of the registration statement, and therefore neither section 11 nor section 12(2) liability attaches to such advertisements. Rule 134 was adopted pursuant to section 2(10) of the 1933 Act [15 U.S.C. 77b(10)], which authorizes the Commission to define communications that contain only certain limited types of information as not being prospectuses.

[4] Rule 482 also requires that the statement provided in 17 CFR 230.481(b)(2) ("A registration statement relating to these securities has been filed * * *") must be included if the advertisement is used prior to the effective date of the registration, but the statement provided by 17 CFR 230.481(b)(1) ("THESE SECURITIES HAVE NOT BEEN APPROVED * * *") need not be included in the advertisement. The advertisement need not be filed with the issuer's registration statement, but must be filed pursuant to rule 424 (17 CFR 230.424).

[5] Securities Act Release No. 6243, September 30, 1980 [45 FR 67079 (October 9, 1980)], defines a "money market fund" as any investment company that holds itself out as a "money market" fund or has an investment policy calling for investments in debt securities maturing in 13 months or less. Pursuant to that release, Form N–1 was amended to include new Item 17, which requires that prospectuses for money market funds include a description of a standardized method of computing yield, as set forth in that item, and a yield quotation based on that method. The yield quotation must be calculated by dividing the fund's average daily net investment income per share earned during the seven days ended on the date of the fund's most recent financial statements by its average daily price per share (usually $1.00) and multiplying the result by 365, with the resulting figure represented as a percent carried to at least the nearest hundredth of one percent.

[6] The method of calculating yield adopted by the Commission was originally recommended by the investment company industry. *See* Investment Company Institute (pub. avail. November 10, 1979).

[7] "Sales literature" may currently be sent by direct mail under section 2(10)(a) of the 1933 Act [15 U.S.C. 77(b)(10)(a)]. However, such sales literature must be accompanied or preceded by a full statutory prospectus.

summarizing the statutory prospectus may, in fact, in some cases receive better information prior to making an investment decision than they would otherwise. For these reasons the Commission believes that expanding rule 482 to permit the use of direct mail is consistent with the rule's purpose of providing more information to investors about alternative investment opportunities.[8]

Advertising Effective Yield

As discussed above, in 1980 the Commission adopted a standardized yield computation for use in prospectuses and advertisements of money market funds. Based on its experience with the standardized yield, the Commission is now proposing to modify that standardized yield computation. The proposal would change the method of determining the base period return and would permit the use of a compounded effective yield in addition to the simple annualized yield.

As a technical amendment to Item 17 of Form N–1, the Commission is changing the determination of the base period return to eliminate a bias in the current computation toward funds that pay dividends monthly rather than daily. Some money market funds declare and pay dividends daily; others declare them daily and pay them monthly. If funds of the same size were to earn the same return on their portfolios, a fund that pays dividends daily would declare a smaller amount of dividends per share over a period of time (because of a daily increasing number of shares outstanding) than one that pays monthly. As a result, the fund paying monthly dividends would show a higher yield.

As demonstrated in the example provided as the Appendix to this release, the proposed yield calculations are based on the consideration of a hypothetical account having a balance of exactly one share at the beginning of a seven day period. The base period return would be the change in the value of the hypothetical account during the seven day period, including dividends declared on the original share, dividends declared on any shares purchased with dividends on that share, and any monthly account charges or sales charges that would affect an account of average size, but excluding any capital changes. The adoption of this method of determining the base period return would eliminate the discrepancy that can result from differences in frequency of dividend payment.

As is the case with the existing standardized yield, capital changes (realized gains and unrealized appreciation and depreciation) are to be excluded from the computation of the base period return. Although some funds reflect capital changes in their dividends, the Commission believes that limiting the yield computation to net investment income better indicates the earning potential of a fund's portfolio and thus both promotes comparability of yields and reduces the potential for misleading investors by the use of advertised yields.

Use of a Compounded Effective Yield

The current standardized yield figure, which is the only one that money market funds may include in rule 482 advertisements, is an annualization, without compounding, of the rate of return the fund received on its portfolio during the base period. Nevertheless, while money market funds do not undertake to pay a stated rate of interest or to compound it at specified intervals, a money market fund investment may earn in effect a compounded rate of return. When a fund's portfolio instruments mature, it reinvests the proceeds (unless they are needed for some other purpose, such as redemptions). Since those proceeds include both original principal and interest earned, the fund has increasing amounts to invest each time a particular investment matures. Such a progressive growth of assets to invest in effect compounds the return received by the fund. Because the portfolios of money market funds consist, to a large extent, of instruments that will mature in substantially less than a year, these funds would realize over the course of a year, assuming consistent interest rates,[9] a return greater than that expressed by the simple annualization of the return earned in a seven day period.

Accordingly, the Commission believes that money market funds should be permitted to advertise, in addition to the uncompounded annualization of the return for the seven day base period, figures reflecting a compound effective yield in rule 482 advertisements. Such a change in rule 482 seems particularly appropriate in view of the fact that, in recent months, depository institutions have been permitted to offer accounts competitive with the money market funds, and interest rates on these accounts are permitted to be advertised on a compound basis. It is logical to assume that many investors wish to compare the rates advertised by the depository accounts with the yields advertised by money market funds, and such comparisons would be facilitated by permitting yield figures to be advertised on a basis equivalent to the compound interest rates advertised by depository institutions.

The amendment to Item 17 of form N–1 permits the use of an effective yield quotation based on daily compounding. Because the compound effect realized by a fund would be dependent on its receipt of investment proceeds upon maturity of its portfolio instruments, the Commission requests comment on whether a compounding period related to a fund's weighted average portfolio maturity would be more appropriate than daily compounding.

Temporary Adoption and Implementation

The Administrative Procedure Act ("APA") generally requires that any agency or commission publish a notice of proposed rule-making that provides adequate opportunity for comment by interested persons. Section 553(b)(B) of the APA provides an exception from this requirement in situations where the agency for good cause finds that prior notice and comment are "impractical, unnecessary, or contrary to the public interest." These standards are incorporated in Rule 4(b) of the Commission's Rules of Practice [17 CFR 201.4(b)], which requires publication of prior notice of proposed rule amendments "[e]xcept where the Commission finds that notice and public procedure are impracticable, unnecessary, or contrary to the public interest."

In addition, the APA provides in section 553(d) that an adopted rule must be *published* at least 30 days prior to the rule's effective date. However, section 553(d)(1) contains an exception to this required publication of an adopted rule and 30 day delay in effectiveness when the rule is a substantive one that grants an exception or relieves a restriction.

The purpose of the temporary amendments to rule 482 and Form N–1 is to permit investors to be better informed about competing investment alternatives including not only other money market funds, but also the new depository accounts that are directly competitive with and intended to be equivalent to

[8] In adopting Rule 482, the Commission stated that: Institutions such as savings and loan companies and insurance companies, which compete with investment companies for investor interest, are not subject to the same advertising limitations as investment companies, and thus existing limitations on investment company advertising may have had the effect of restricting the availability of information about all revelant investment possibilities.

Securities Act Release No. 6116 (August 31, 1979), 44 FR at 52816.

[9] The same assumption underlies the advertising of compounded yields by depository institutions.

money market funds. The Commission believes that it is particularly important at the present time that investors choosing among various investment opportunities have a broad range of information available to them to assist them in their investment decisions. The Commission is of the opinion that investors may be confused if they are not able to compare accurately these competing investment products. Accordingly, the Commission finds that notice and opportunity for comment are contrary to the public interest before the adoption of these amendments on a temporary basis. Further, the Commission finds that a 30 day delay in effectiveness after publication is not required pursuant to section 553(d)(1) of the APA, because the amendments to Rule 482 and Form N–1 relieve restrictions. Therefore, these temporary amendments to rule 482 and Form N–1 will become effective immediately upon publication in the **Federal Register**.

Funds desiring to use yield quotations in rule 482 advertisements, in accordance with that rule, must have in their prospectuses a description of the new method of determining current yield proposed in this release, and a quotation of current yield based on that method, which identifies the length of the base period and date of the last day in the base period used in computing that quotation. Funds wishing to use rule 482 to advertise their effective yield on a compound basis must also include in their prospectuses a corresponding quotation of effective yield determined in accordance with the method described herein.

The Commission is aware that the prospectuses of almost all money market funds already include a description of a standardized method of computing yield, as set forth in current Item 17 of Form N–1, and a yield quotation based on that method. The Commission believes that in view of the foregoing, funds wishing to include yield figures in rule 482 advertisements before their prospectuses are ready for regular updating, may revise their prospectuses to include a "sticker" containing the necessary information pursuant to rule 424(c) of the 1933 Act [17 CFR 230.424(c)].

Text of Temporary Amendments to Parts 230, 239 and 274

In accordance with the foregoing, Title 17 of the Code of Federal Regulations, parts 230, 239 and 274 is temporarily amended as follows:

PART 230—GENERAL RULES AND REGULATIONS, SECURITIES ACT OF 1933

1. In § 230.482, paragraph (a)(2) is removed, paragraph (a)(3) is redesignated as (a)(2), paragraph (a)(4) is redesignated as (a)(3); paragraph (a)(5) is redesignated as (a)(4), and paragraph (d) is revised as follows:

§ 230.482 Advertising by an investment company as satisfying requirements of section 10.

* * * * *

(d) In the case of an investment company which holds itself out to be a "money market" fund or has an investment policy calling for investment of at least 80% of its assets in debt securities maturing in 13 months or less, any quotation of such company's yield contained in such advertisements shall be: (1) A quotation of current yield based in the method of computation prescribed in Item 17 of Form N–1, set forth in §§ 239.15 and 274.11 of this chapter, and identifying the length of and the date of the last day in the base period used in computing that quotation, or (2) a quotation of current yield described in clause (1) above and a corresponding quotation of effective yield determined in accordance with the instructions to Item 17 of Form N–1.

PART 239—FORMS PRESCRIBED UNDER THE SECURITIES ACT OF 1933

PART 274—FORMS PRESCRIBED UNDER THE INVESTMENT COMPANY ACT OF 1940

2. By amending Item 17 of Part I of Form N–1 [§§ 239.15 and 274.11] to read as follows:

§ 239.15 Form N–1 for open-end management investment companies registered on Form N–8A.

§ 274.11 Form N–1 registration statement of open-end management investment companies.

* * * * *

Part I. Information Required in Prospectus of Registration Statement

* * * * *

Item 17 *Yield Quotations of Money Market Funds (Prospectus only)*

(a) * * *

(i) a yield quotation based on the seven days ended on the date of the most recent financial statements of the Registrant included in the prospectus, computed by determining the net change exclusive of capital changes in the value of a hypothetical pre-existing account having a balance of one share at the beginning of the period, dividing the net change in account value by the value of the account at the beginning of the base period to obtain the base period return, and multiplying the base period return by (365/7) with the resulting yield figure carried to at least the nearest hundredth of one percent; and

(ii) * * *

(b) For purposes of the calculation required in subsection (a), above, the determination of net change in account value must reflect:

(i) the value of additional shares purchased with dividends from the original share, and dividends declared on both the original share and any such additional shares; and

(ii) all fees that are charged to all shareholder accounts, in proportion to the length of the base period and the fund's average account size.

(c) The capital changes to be excluded from the calculation required in subsection (a) are realized gains and losses from the sale of securities and unrealized appreciation and depreciation.

Instructions:

1. In connection with the presentation of the yield figure, the prospectus must disclose any material net change in the yield figure that would result from the inclusion of capital changes that are excluded in the computation pursuant to Item 17(a).

2. In addition to the yield quotation required by Item 17, the registrant may also include a quotation of effective yield, carried to at least the nearest hundredth of one percent, computed by compounding the unannualized base period return by dividing the base period return by 7, adding 1 to the quotient, raising the sum to the 365th power, and subtracting one from the result, according to the following formula,

$$\text{Effective yield} = \text{base period return}/7 + 1)^{365} - 1.$$

Summary of Initial Regulatory Flexibility Analysis

The Commission has prepared an Initial Regulatory Flexibility Aanalysis in accordance with 5 U.S.C. 603 regarding the amendments to rule 482 and Form N–1 proposed herein. The analysis notes that the temporary amendments would permit registered investment companies to mail

advertisements directly to prospective investors and would permit money market funds to advertise their effective yield. The objective of these amendments is to provide prospective investors with sufficient information to make an informed choice concerning the various investment alternatives available.

A copy of the Initial Regulatory Flexibility Analysis may be obtained by contacting Gregory K. Todd, Esq., Office of Disclosure Legal Services, Securities and Exchange Commission, Room 5128, 450 Fifth Street, NW., Washington, D.C. 20549.

Statutory Authority

These amendments are being adopted pursuant to sections 10 and 19(2) of the 1933 Act [15 U.S.C. 77] and 77s(a)] and section 38(a) of the 1940 Act [15 U.S.C. 80a-37(a)].

By the Commission.

Dated: February 28, 1983.

George A. Fitzsimmons,

Secretary.

APPENDIX

Example:

Assumptions:

Value of a hypothetical pre-existing account with exactly one share at the beginning of the period	$1.000000000
Value of the same account* (excluding capital changes) at the end of the seven day period	$1.001919388
*This value would include the value of any additional shares purchased with dividends from the original share, and all dividends declared on both the original share and any such additional shares	
Monthly account charge for each account	$5.00
Average account size	10,000

Calculation:

Ending account value	$1.001919388
Less beginning account value	1.000000000
Net change in account value	0.001919388
Monthly account charge	$5.00
	×12
Annual account charge	60.00
Seven days proportional charge per share based on average account size: (7/365)×60÷10,000 shares	0.000115068
Adjusted change in account value	$0.001804320
Base period return: (adjusted change/beginning account value) $0.001804320/$1.000000000=	0.001804320

Current yield=0.001804320×(365/7)=9.41%

Effective yield=(1+0.001804320/7)^{365}−1=9.86%

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration is amending the animal drug regulations to reflect approval of a new animal drug application (NADA) filed by Schering Corp. providing for safe and effective use of gentamicin sulfate oral solution in swine drinking water for control and treatment of colibacillosis and dysentery.

EFFECTIVE DATE: March 11, 1983.

FOR FURTHER INFORMATION CONTACT: Charles E. Haines, Bureau of Veterinary Medicine (HFV-133), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-3410.

SUPPLEMENTARY INFORMATION: Schering Corp., Galloping Hill Rd., Kenilworth, NJ 07033, filed NADA 91-191 providing for use of gentamicin sulfate oral solution (50 milligrams of gentamicin per milliliter) in drinking water: (1) In wanling swine for control and treatment of colibacillosis caused by strains of *E. coli* sensitive to gentamicin; (2) in swine for control and treatment of swine dysentery associated with *Treponema hyodysenteriae*. Schering has demonstrated safety and effectiveness of the drug for the labeled conditions of use through submission of data derived from adequate and well controlled studies. The NADA is approved, and the regulations are amended accordingly.

On January 7, 1983 (48 FR 791), the agency approved the use of injectable gentamicin sulfate to treat porcine colibacillosis. Therefore, for the purposes of human safety, this NADA is considered to be a Category II supplement because it provides for an alternative route of administration (oral versus injectable) in the same species (swine). The sponsor demonstrated that 3 days after the last treatment with the recommended dosage of gentamicin sulfate oral solution, the total residues of gentamicin in the edible tissues are below the established tolerance. Accordingly, approval of this application poses no increased risk to humans from exposure to residues of gentamicin, and review of the underlying safety data was not required.

The Bureau of Veterinary Medicine has carefully considered the potential environmental effects of this action and has concluded that the action will not have a significant impact on the human environment and that an environmental impact statement therefore will not be prepared. The Bureau's finding of no significant impact and the evidence supporting this finding, contained in an environmental impact analysis report (pursuant to 21 CFR 25.1(j)), may be seen in the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, between 9 a.m. and 4 p.m., Monday through Friday.

In accordance with the freedom of information provisions of Part 20 (21 CFR Part 20) and § 514.11(e)(2)(ii) (21 CFR 514.11(e)(2)(ii)), a summary of safety and effectiveness data and information submitted to support approval of this application may be seen in the Dockets Management Branch (address above).

List of Subjects in 21 CFR Part 520

Animal drugs, oral.

Therefore, under the Federal Food,

Drug, and Cosmetic Act (sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i))) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.10) and redelegated to the Bureau of Veterinary Medicine (21 CFR 5.83), Part 520 is amended by adding new § 520.1044, to read as follows:

PART 520—ORAL DOSAGE FROM NEW ANIMAL DRUGS NOT SUBJECT TO CERTIFICATION

§ 520.1044 Gentamicin sulfate oral solution.

(a) *Specifications.* Each milliliter of aqueous solution contains gentamicin sulfate equivalent to 50 milligrams of gentamicin.

(b) *Sponsor.* See No. 000085 in § 510.600(c) of this chapter.

(c) *Related tolerances.* See § 556.300 of this chapter.

(d) *Conditions of use*—(1) *Amount.* Colibacillosis: 1 milliliter per 2 gallons of drinking water for 3 consecutive days, to provide 0.5 milligram/pound/day; swine dysentery: 1 milliliter per 1 gallon of drinking water for 3 consecutive days, to provide 1.0 milligram/pound/day.

(2) *Indications for use.* In weanling swine control and treatment of colibacillosis caused by strains of *E. coli* sensitive to gentamicin, and in swine for control and treatment of swine dysentery associated with *Treponema hyodysenteriae.*

(3) *Limitations.* For use in swine drinking water only. Do not store or offer medicated drinking water in rusty containers since the drug is quickly destroyed in such containers. Medicated drinking water should be prepared daily and be the sole source of drinking water for 3 consecutive days. Treatment may be repeated if dysentery recurs. Do not slaughter treated swine or food for at least 3 days following treatment.

Effective date. March 11, 1983.

(Sec. 512(i), 82 stat. 347 (21 U.S.C. 360b(i)).)

Dated: March 3, 1983.

Lester M. Crawford,

Director, Bureau of Veterinary Medicine.

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Part 1

[T.D. 7873]

Income Tax; Taxable Years Beginning After December 31, 1953; Information Returns of Brokers.

AGENCY: Internal Revenue Service, Treasury.

ACTION: Final regulations.

SUMMARY: This document contains final regulations relating to information returns of brokers. Changes to the applicable tax law were made by the Tax Equity and Fiscal Responsibility Act of 1982. The regulations require brokers to make returns of information on dispositions (including short sales) of securities commodities, regulated futures contracts, and forward contracts effected for customers. They also require barter exchanges to make returns of information with respect to exchanges of property or services through the barter exchange. The regulations affect brokers effecting dispositions (including short sales) of securities, commodities, regulated futures contracts, and forward contracts, and barter exchanges, providing them with the guidance needed to comply with the law.

DATES: Effective on March 3, 1983.

The regulations apply with respect to transactions occurring on or after July 1, 1983.

FOR FURTHER INFORMATION CONTACT: Gregory A. Roth of the Legislation and Regulations Division, Office of Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue, N.W., Washington, D.C. 20224, Attention: CC:LR:T, 202-566-3238 (not a toll-free call).

SUPPLEMENTARY INFORMATION:

Background

On November 15, 1982, the **Federal Register** published proposed amendments to the Income Tax Regulations (26 CFR Part 1) under section 6045 of the Internal Revenue Code of 1954 (47 FR 51415). The amendments were proposed to provide rules relating to returns of brokers under section 6045 of the Internal Revenue Code of 1954. Section 311 of the Tax Equity and Fiscal Responsibility Act of 1982 (96 Stat. 600) amended section 6045.

A public hearing was held on January 27, 1983. After consideration of all comments regarding the proposed amendments, those amendments are adopted as revised by this Treasury decision.

Explanation of Provisions

The final regulations generally require brokers to make returns of information with respect to sales by customers. In addition, barter exchanges are required to file returns of information on exchanges of property or services through the barter exchange if there are at least 100 such exchanges during the calendar year. The rules in the final regulations are substantially the same as the rules in the notice of proposed rulemaking, which are summarized in the preamble of the notice of proposed rulemaking. Several rules have been changed, however, in response to public comments received. These changes are summarized below.

Comments and Changes Due to Comments

A number of comments suggested that the regulations should permit reporting on an aggregate rather than a transactional basis. For reasons set forth below, the Internal Revenue Service believes that transactional reporting is necessary. The Service recognizes, however, that brokers would benefit from additional time to implement a transactional reporting system. Accordingly, the final regulations permit brokers and barter exchanges to elect aggregate reporting for calendar year 1983 and should provide brokers and barter exchanges with sufficient time to implement a transactional reporting system in a cost-efficient manner.

Transactional reporting is necessary, as a general rule, so that the amount received in a sale of property can be matched with the basis of the property to determine gross income. The Service received numerous comments suggesting that aggregate reporting would reduce the burden on reporters and should be adequate for the Service's needs. These comments were given careful

consideration. In the case of broker reports that provide only gross proceeds information, however, the Service's planned uses of the reports (selecting returns for correction processing under the information returns processing program, selecting returns for audit, implementing audits, and monitoring taxpayer compliance) generally require transactional data. Transactional data facilitates thorough, accurate, and cost-efficient audits.

In the case of transactions in regulated futures contracts, however, the Service has concluded that aggregate reporting may provide adequate information since such reporting generally provides sufficiently accurate gross income information. Accordingly, the final regulations provide special aggregate reporting requirements for regulated futures contracts. A broker is required to separately report such contracts annually and on an account-by-account basis. As to regulated futures contracts in each customer account, the broker must report the realized profit or loss during the year, the unrealized profit or loss at the end of the preceding year, the unrealized profit or loss at the end of the year, and the unadjusted taxable gain or loss for the year. The reporting rules were formulated solely taking into consideration the optimal form of reporting of commodities transactions in general and without regard to considerations of the tax treatment of options on futures.

The Service intends to monitor taxpayer compliance with respect to regulated futures contracts to determine whether aggregate reporting hampers enforcement efforts to reduce avoidance of tax. If abuses are detected, the Service will reconsider these special reporting rules for regulated futures contracts.

Several comments objected to the requirement in the proposed regulations that brokers and barter exchanges file returns of information on magnetic media. In general, the comments requested additional time to implement magnetic media reporting and suggested that requiring the use of magnetic media would impose an undue burden on brokers and barter exchanges that lack the necessary data processing capacity. The comments also suggested that the exemption for brokers with fewer than 250 customers and barter exchanges with fewer than 250 members or clients is of limited applicability.

The final regulations require magnetic media reporting, but not until calendar year 1984. The final regulations provide, as did the proposed regulations, that the Commissioner may waive the magnetic media requirement on a showing of undue hardship. Existing brokers and barter exchanges must file an application for waiver on or before September 15, 1983; new brokers and barter exchanges will have at least two full months after becoming a broker or barter exchange to file an application for waiver. It is anticipated that the waiver authority will be exercised liberally so as not to unduly burden brokers and barter exchanges that lack both the necessary data processing facilities and cost-efficient access to computer service bureaus. This waiver policy will effect the relief that the exemption in the proposed regulations was intended to provide. Accordingly, these regulations do not include that exemption.

The proposed regulations provided that, for purposes of section 6045, a sale occurs on the date the customer becomes entitled to the gross proceeds thereof (settlement date). Comments received indicate that many brokers do not treat the settlement date as the sale date, but instead consider that a sale occurs on the date it is entered on the books of the broker (trade date). The final regulations allow a broker to report using either the settlement date or the trade date.

The proposed regulations required brokers to report the cost of property used to cover a short sale in the year of cover. A number of comments objected to this requirement because such cost information frequently is not available to the broker. In addition, this requirement was inconsistent with provisions of the regulations that required gross proceeds information with respect to other types of sales. The final regulations require brokers to report the amount received on the entry into the short sale in the year of entry. The Service recognizes that in situations where a short sale is not covered in the year of entry, the report by the broker under section 6045 will be made with respect to a year preceding the year in which the customer reports the sale for tax purposes.

The proposed regulations required brokers to report in terms of United States dollars the proceeds of a sale paid in a foreign currency directly or indirectly convertible into United States dollars, with conversion of the foreign currency into United States dollars at the exchange rate on the day of sale. Some brokers commented that it is difficult for them to determine what currencies are indirectly convertible. Additionally, some comments observed that there is no single exchange rate on a given day. Some comments expressed concern that the proposed regulations, in effect, required brokers to keep dual records for all affected accounts: one in the foreign currency and another in United States dollars.

The Service needs reports in United States dollars to audit returns effectively. However, the Service recognizes the need to provide some flexibility. Consequently, the regulations provide simplified rules for foreign currency conversion. Conversion is required as to any directly convertible foreign currencies and as to any indirectly convertible currencies specified in a notice published in the **Federal Register**. Conversion may be at the exchange rate on the day of sale or on the last day of the reporting period. A broker may use generally recognized financial publications as a source for exchange rates.

The Service received a number of comments on the exemption provided in the proposed regulations for obligor payments on short-term obligations and certain types of accounts at financial institutions. Many of the comments requested clarification of the scope of the exemption. Other comments noted that certain similar transactions that have no tax effect or are already subject to reporting under provisions of the Internal Revenue Code other than section 6045 were not exempt under the proposed regulations.

To clarify the proposed exemption and to extend the exemption to debt transactions otherwise adequately reported or not likely to have tax effect, the final regulations exempt obligor payments on nontransferable obligations (including savings bonds, savings accounts, checking accounts, and NOW accounts), obligations as to which the entire gross proceeds are reported by the broker under provisions of the Internal Revenue Code other than section 6045, retirement of short-term obligations that have original issue discount, and retirement of book entry or registered form obligations as to which no interim transfers have occurred.

Comments received from depository trusts, dividend reinvestment plans, and similarly situated brokers noted that they frequently purchase or redeem fractional shares for various reasons. It is possible that the cost of reporting such transactions would be disproportionate compared to the potential tax on such transactions. In response to these concerns, the regulations provide an exemption for redemptions and repurchases of fractional shares for less than $20.

Some comments requested that barter exchanges be allowed to report

exchanges in terms of trade credits rather than the cash equivalent of such credits. The Service is unable to use information reported in terms other than cash. Moreover, barter exchanges are better situated to convert credits into their cash equivalent than is the Service. Accordingly, this suggestion was not adopted.

Special Analyses

The Commissioner of Internal Revenue has determined that this rule is not a major rule as defined in Executive Order 12291. Accordingly, a Regulatory Impact Analysis is not required.

The Secretary of the Treasury certifies that the regulations in this document do not have a significant impact on a substantial number of small entities. Accordingly, a regulatory flexibility analysis is not required. The Secretary's certification is based on a determination that the economic impact of the reporting requirements is primarily attributable to requirements imposed directly by the statute. The Service has significant discretion under the statute to require reporting of information other than information regarding gross proceeds. In general, however, the regulations require only gross proceeds information, the reporting of which is expressly contemplated by the statute. As to the manner of reporting, the regulations obtain the information contemplated by the statute in a usable form with the minimum possible impact on small entities and the economy in general. The regulations require reports with respect to each transaction and require the use of magnetic media because alternative methods of reporting provide information in an unusable form and would not result in the improved compliance contempleted by Congress. In an effort to minimize the burdens on brokers, the regulations permit brokers to elect a monthly, quarterly, or annual reporting period. Brokers also may send statements to their customers on the same basis. Although the Service believes year-end statements to customers would contribute to significant improvements in taxpayer compliance, it recognizes the possiblity that such a requirement would increase the burden imposed by the regulations. Finally, the impact of the regulations on small entities is minimized by certain exemptions.

Drafting Information

The principal author of these regulations is Gregory A. Roth of the Legislation and Regulations Division of the Office of Chief Counsel, Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service and Treasury Department participated in developing the regulations on matters of both substance and style.

Income taxes, Administration and procedure, Filing requirements.

PART 1—[AMENDED]

Admendments to the Regulations

The amendments to 26 CFR Part 1 are as follows:

Paragraph. New § 1.6045-1 is added immediately after § 1.6044-5. The new section is set forth below.

§ 1.6045-1 Returns of information of brokers and barter exchanges.

(a) *Meaning of terms.* The following definitions apply for purposes of this section:

(1) The term "broker" means a person that, in the ordinary course of a trade or business during the calendar year, stands ready to effect sales to be made by others. (2) The term "customer" means, with respect to a sale effected by a broker, the person (other than such broker) that makes the sale, if the broker acts as—

(i) An agent for such person in the sale;

(ii) A principal in the sale; or

(iii) The participant in the sale responsible for paying to such person or crediting to such person's account the gross proceeds on the sale.

[3] The term "security" means—

(i) A share of stock in a corporation (foreign or domestic);

(ii) An interest in a trust;

(iii) An interest in a partnership;

(iv) A debt obligation;

(v) An interest in or right to purchase any of the foregoing in connection with the issuance thereof from the issuer or an agent of the issuer or from an underwriter that purchases any of the foregoing from the issuer, or

(vi) An interest in a security described in paragraph (a)(3) (i) or (iv) (but not including options or executory contracts that require delivery of such type of security).

(4) The term "barter exchange" means any person with members or clients that contract either with each other or with such person to trade or barter property or services either directly or through such person. The term does not include arrangements that provide solely for the informal exchange of similar services on a noncommercial basis.

(5) The term "commodity" means—

(i) Any type of personal property or an interest therein (other than securities as defined in paragraph (a)(3)) the trading of regulated futures contracts in which has been approved by the Commodity Futures Trading Commission;

(ii) Lead, palm oil, rapeseed, tea, tin, or an interest in any of the foregoing; or

(iii) Any other personal property or an interest therein that is of a type the Secretary determines is to be treated as a "commodity" under this section, from and after the date specified in a notice of such determination published in the **Federal Register.**

(6) The term "regulated futures contract" means a regulated futures contract within the meaning of section 1256(b).

(7) The term "forward contract" means—

(i) An executory contract that requires delivery of a commodity in exchange for cash and which contract is not a regulated futures contract; or

(ii) An executory contract that requires delivery of personal property or an interest therein in exchange for cash, or a cash settlement contract, if such executory contract or cash settlement contract is of a type the Secretary determines is to be treated as a "forward contract" under this section, from and after the date specified in a notice of such determination published in the **Federal Register.**

(8) The term "closing transaction" means any termination of an obligation under a forward contract or a regulated futures contract.

(9) The term "sale" means any disposition of securities, commodities, regulated futures contracts, or forward contracts for cash, and includes redemptions of stock, retirements of indebtedness, and enterings into short sales. In the case of a regulated futures contract or a forward contract, the term "sale" means any closing transaction. When a closing transaction in a regulated futures contract involves making or taking delivery, the profit or loss on the contract is a sale, and, if delivery is made, such delivery is a separate sale. When a closing transaction in a forward contract involves making or taking delivery, the delivery is a sale without separation of the profit or loss on the contract from the profit or loss on the delivery, except that taking delivery for United States dollars is not a sale. The term "sale" does not include grants or purchases of options, exercises of call options, or enterings into contracts that require delivery of personal property or an interest therein.

(10) The term "effect" means, with respect to a sale, to act as—

(i) An agent for a party in the sale wherein the nature of the agency is such

that the agent ordinarily would know the gross proceeds from the sale; or

(ii) A principal in such sale.

Acting as an agent or principal with respect to grants or purchases of options, exercises of call options, or enterings into contracts that require delivery of personal property or an interest therein is not of itself effecting a sale. A broker that has on its books a forward contract under which delivery is made effects such delivery.

(11) The term "foreign currency" means currency of a foreign country.

(12) The term "convertible foreign currency" means a foreign currency that is either:

(i) Readily convertible into United States dollars; or

(ii) Of a type the Secretary determines is to be treated as a "convertible foreign currency," from and after the date specified in a notice of such determination published in the **Federal Register**.

(13) The term "cash" means United States dollars or any convertible foreign currency.

(b) *Examples.* The following examples illustrate the definitions in paragraph (a):

Example (1). The following persons generally are brokers within the meaning of paragraph (a)(1):

(i) A mutual fund, an underwriter of the mutual fund, or an agent for the mutual fund, any of which stands ready to redeem or repurchase shares in such mutual fund.

(ii) An obligor that regularly issues and retires its own notes.

(iii) A professional custodian (such as a bank) that regularly arranges sales for custodial accounts pursuant to instructions from the owner of the property.

(iv) A depositary trust or other person who regularly acts as an escrow agent in corporate acquisitions, if the nature of the activities of the agent is such that the agent ordinarily would know the gross proceeds from sales.

(v) A stock transfer agent for a corporation, which agent records transfers of stock in such corporation, if the nature of the activities of the agent is such that the agent ordinarily would know the gross proceeds from sales.

(vi) A dividend reinvestment agent for a corporation that stands ready to purchase or redeem shares.

Example (2). The following persons are not brokers within the meaning of paragraph (1)(a) in the absence of additional facts that indicate the person is a broker:

(i) A stock transfer agent for a corporation, which agent daily records transfers of stock in such corporation, if the nature of the activities of the agent is such that the agent ordinarily would not know the gross proceeds from sales.

(ii) A person (such as a stock exchange) that merely provides facilities in which others effect sales.

(iii) An escrow agent or nominee if such agency is not in the ordinary course of a trade or business.

(iv) An escrow agent, otherwise a broker, which agent effects no sales other than such transactions as are incidental to the purpose of the escrow (such as sales to collect on collateral).

(v) A floor broker on a commodities exchange, which broker maintains no records with respect to the terms of sales.

(vi) A corporation that issues and retires long-term debt on an irregular basis.

(vii) A clearing organization.

Example (3). A, B, and C belong to a carpool in which they commute to and from work. Every third day, each member of the carpool provides transportation for the other two members. Because the carpool arrangement provides solely for the informal exchange of similar services on a noncommercial basis, the carpool is not a barter exchange within the meaning of paragraph (a)(4).

Example (4). X is an organization whose members include retail merchants, wholesale merchants, and persons in the trade or business of performing services. X's members exchange property and services among themselves using credits on the books of X as a medium of exchange. Each exchange through X is reflected on the books of X by crediting the account of the member providing property or services and debiting the account of the member receiving such property or services. X also provides information to its members concerning property and services available for exchange through X. X charges its members a commission on each transaction in which credits on its books are used as a medium of exchange. X is a barter exchange within the meaning of paragraph (a)(4) of this section.

Example (5). A warehouse receipt is an interest in personal property for purposes of paragraph (a). Consequently, a warehouse receipt for a quantity of lead is a commodity under paragraph (a)(5)(ii). Similarly an executory contract that requires delivery of a warehouse receipt for a quantity of lead is a forward contract under paragraph (a)(7)(ii).

Example (6). The only customers of a depository trust acting as an escrow agent in corporate acquisitions, which trust is a broker, are shareholders to whom the trust makes payments or shareholders for whom the trust is acting as an agent.

Example (7). The only customers of a stock transfer agent, which agent is a broker are shareholders to whom the agent makes payments or shareholders for whom the agent is acting as an agent.

Example (8). D, an individual not otherwise exempt from reporting, is the holder of an obligation issued by P, a corporation. R, a broker, acting as an agent for P, retires such obligation held by D. Such obligor payments from R represent obligor payments by P. (See paragraph (c)(3)(v)). D, the person to whom the gross proceeds are paid or credited by R, is the customer of R.

(c) *Reporting by brokers*—(1) *Requirement of reporting.* Any broker shall, except as otherwise provided, report in the manner prescribed in this section.

(2) *Sales required to be reported.* Except as provided in paragraphs (c)(3), (c)(5), (g), and (p)(1), a broker shall make a return of information with respect to each sale by a customer of the broker effected by the broker in the ordinary course of a trade or business in which the broker stands ready to effect sales to be made by others.

(3) *Exceptions*—(i) *Sales for exempt recipients.* No return of information is required with respect to a sale by a customer that is an exempt recipient described in section 3452(c)(2) (A) through (E) or (G) through (I) (relating to exemptions from withholding) as determined under § 35.3452(c)–1.

(ii) *Multiple brokers.* In the case of a sale in which a broker is instructed to initiate the sale by a person that is an exempt recipient described in section 3452(c)(2) (F) or (K)(i) (relating to exemptions from withholding) as determined under § 35.3452(c)–1, no return of information is required with respect to the sale by the broker so instructed. In the case of a redemption of stock or retirement of securities, only the broker responsible for paying the holder redeemed or retired, or crediting the gross proceeds on the sale to such holder's account, is required to report the sale.

(iii) *Custodians and trustees.* No return of information is required with respect to a sale effected by a custodian or trustee in its capacity as such, provided the sale is otherwise reported by the custodian or trustee on a properly filed Form 1041 and all Schedule K–1 reporting requirements are satisfied.

(iv) *Sales at issue price.* No return of information is required with respect to a sale of an interest in a regulated investment company (within the meaning of section 851) that computes its current price per share for purposes of distributions, redemptions, and purchases so as to stabilize the price per share at a constant amount that approximates its issue price or the price at which it was originally sold to the public.

(v) *Obligor payment on certain obligations.* No return of information is required with respect to payments representing obligor payments on—

(*a*) Nontransferable obligations (including savings bonds, savings accounts, checking accounts, and Now accounts);

(*b*) Obligations to which the entire gross proceeds are reported by the broker of Form 1099 under provisions of the Internal Revenue Code other than section 6045 (including stripped coupons issued prior to July 1, 1982); or

(*c*) Retirement of short-term obligations, as defined in § 35.3455(b)-1 (b)(1), that have original issue discount,

as defined in section 1232(b)(1).

(vi) *Callable obligations.* No return of information is required with respect to demand obligations that also are callable by the obligor and that have no premium or discount.

(vii) *Foreign currency.* No return of information is required with respect to a sale of foreign currency other than a sale pursuant to a forward contract or regulated futures contract that requires delivery of foreign currency.

(viii) *Fractional share.* No return of information is required with respect to a sale of a fractional share of stock if the gross proceeds on the sale of the fractional share are less than $20.

(ix) *Certain retirements.* No return information is required from an issuer or its agent with respect to the retirement of book entry or registered form obligations as to which the relevant books and records indicate that no interim transfers have occurred.

(4) *Examples.* The following examples illustrate the application of the reporting requirements:

Example (1). A, an individual, places an order with B, a person generally known in the investment community to be a federally registered broker/dealer, to sell A's stock in a publicly traded corporation. B, in turn, places an order to sell the stock with C, a second broker, who executes the sale. B discloses to C the identity of the customer placing the order. C is not required to make a return of information with respect to the sale because C was instructed by B, an exempt recipient described in section 3452 (c)(2)(F) and § 35.3452 (c)-1 (j), to initiate the sale.

Example (2). The facts are the same as in Example (1) except that B has an omnibus accont with C so that B does not disclose to C whether the transaction is for a customer of B or for B's own account. C is not required to make a return of information with respect to the sale because C was instructed by B, an exempt recipient described in section 3452(c)(2)(F) and § 35.3452(c)-1 (j), to initiate the sale.

Example (3). D, an individual not otherwise exempt from reporting, owns bonds that are held by E, a broker/dealer, in an account for D with E designated as nominee for D. Upon retirement of the bonds, the gross proceeds are automatically credited to the account of D. E is required to make a return of information with respect to the redemption because E is the broker responsible for making payment of the gross proceeds to D.

(5) *Form of reporting for regulated futures contracts*—(i) *In general.* A broker effecting closing transactions in regulated futures contracts shall report information with respect to regulated futures contracts solely in the manner prescribed in this paragraph (c)(5). In the case of a sale that involves making delivery pursuant to a regulated futures contract, only the profit on loss on the contract is reported as a transactions with respect to regulated futures contracts under this paragraph (c)(5); such sales are, however, subject to reporting under paragraph (d)(2). The information required under this paragraph (c)(5) must be reported on a calendar year basis, unless the broker is advised in writing by an account's owner that the owner's taxable year is other than a calendar year and the broker elects to report with respect to regulated futures contracts in such account on the basis of the owner's taxable year. The following information must be reported as required by Form 1099 with respect to regulated futures contracts held in a customer's account:

(*a*) The name, address, and taxpayer identification number of the customer.

(*b*) The net realized profit or loss from all regulated futures contracts closed during the calendar year.

(*c*) The net unrealized profit or loss in all open regulated futures contracts at the end of the preceding calendar year.

(*d*) The net unrealized profit or loss in all open regulated futures contracts at the end of the calendar year.

(*e*) The aggregate profit or loss from regulated futures contracts ((*b*)+(*d*)—(*c*)).

(*f*) Any other information required by Form 1099. See 17 CFR 1.33. For this purpose, the end of a year is the close of business of the last business day of such year. In reporting under this paragraph (c)(5), the broker shall make such adjustments for commissions that have actually been paid and for option premiums as are consistent with the books of the broker. No additional returns of information with respect to regulated futures contracts so reported are required.

(ii) *Examples.* The following examples illustrate the application of the rules in this paragraph (c)(5):

Example (1). On October 30, 1984, A, an individual who is a calendar year taxpayer not otherwise exempt from reporting, buys one March 1985 put on Treasury Bond futures (i.e. A purchases an option to enter into a short regulated futures contract of $100,000 face value U.S. Treasury bonds). A pays $500 for the option. On December 19, 1984, A, through B, exercises the option and enters into the futures contract. On February 15, 1985, A, through B, enters into a closing transaction with respect to the futures contract. These are A's only transactions in the account. Since B's books list A's regulated futures contract on December 31, 1984, B must report for A, for 1984, the unrealized profit or loss in the contract as of December 31, 1984. For 1985, B will report the same amount for A as the unrealized profit or loss at the beginning of 1985. The return of information for 1985 will also include the gain or loss from the contract in the net realized profit or loss from all regulated futures contracts sales during 1985.

Example (2). The facts are the same as in Example (1) except that A does not enter into the closing transaction, but instead, on March 20, 1985, B informs A that A will make delivery under the contract. On March 22, 1985, A does so; consequently, A becomes entitled to the gross proceeds. B enters the closing transaction on its books on March 20, 1985. In addition to the returns of information required by paragraph (c)(5), as described in Example (1), B must report the March 22, 1985 delivery as a separate transaction. B may use as the sale date for the delivery either March 20, 1985, the date the transaction is entered on the books of B, or March 22, 1985, the date A becomes entitled to the gross proceeds. B may not deduct the $500 premium from the gross proceeds with respect to the March 22, 1985 delivery.

Example (3). The facts are the same as in Example (2) except that A buys a call on Treasury bond futures and takes delivery. B will supply the returns of information required by paragraph (c)(5), as described in Example (1). B is not required to make a return of information with respect to A's taking delivery.

Example (4). C, an individual who is a calendar year taxpayer not otherwise exempt from reporting, has an account with D, a broker. C trades both regulated futures contracts and forward contracts through C's account with D. D must report C's regulated futures contracts on an annual basis as required by paragraph (c)(5). With respect to C's forward contracts, D may elect to use the calendar month, quarter, or year as D's reporting period as provided in paragraph (c)(6).

(6) *Reporting periods and filing groups*—(i) *Reporting period—(a) In general.* A broker may elect to use the calendar month, quarter, or year as the broker's reporting period. A broker may separately elect a reporting period for each filing group.

(b) Election. For each calendar year, a broker shall elect a reporting period by filing Forms 1096 and 1099 in the manner elected. A different reporting period may be subsequently elected by filing in the manner subsequently elected, provided no duplication of reported transactions results.

(ii) *Filing group—(a) In general.* A broker may elect to group customers or customer accounts by office, branch, department or other method of operational classification and separately file Forms 1096 and 1099 for each filing group.

(b) Election. For each calendar year, a broker shall elect filing groups by filing Forms 1096 and 1099 in the manner elected. Different filing groups may be subsequently elected by filing in the manner subsequently elected, provided no duplication of reported transactions results.

(iii) *Example.* The following example illustrates the rules of this paragraph (c)(6):

Example. The A department of C, a broker, files a separate report for each month of 1984, whereas the B department of C files one report for all of 1984. C makes no other

reports or returns of information under section 6045 for 1984. C had thereby elected two filing groups for 1984, the A department and the B department. The A department has the calendar month as its 1984 reporting period, whereas the B department has the calendar year as its 1984 reporting period. The same result would occur if A and B were offices or branches of C.

(d) *Information required.*—(1) *In general.* A broker that is required to make a return of information under paragraph (c) during a reporting period shall report on a separate Form 1099 for each filing group, showing such information as may be required by Form 1099, in the form, manner, and number of copies required by Form 1099.

(2) *Transactional reporting.* As to each sale with respect to which a broker is required to make a return of information under this section, the broker, except as provided in paragraphs (c)(5) and (p)(1), shall show on Form 1099 the name, address, and taxpayer identification number of the customer, the property sold, Committee on Uniform Security Identification Procedures (CUSIP) number of the security sold (if known), the gross proceeds, sale date, and such other information as may be required by Form 1099, in the form, manner, and number of copies required by Form 1099.

(3) *Bond sales between interest payment dates.* As to each sale of a debt obligation prior to maturity with respect to which a broker is required to make a return of information under this section, a broker shall show separately on Form 1099 the amount of accrued and unpaid interest as of the sale date that must be reported by the customer as interest income under § 1.61–7(d) (but not the amount of any original issue or market discount). Such interest information shall be shown in the manner and at the time required by Form 1099 and section 6049.

(4) *Sale date*—(i) *In general.* Except as otherwise provided in this paragraph (d)(4), a broker may report a sale as occurring on the date the sale is entered on the books of the broker of the date the customer becomes entitled to the gross proceeds thereof. The method of reporting the date the sale occurs shall be consistently applied by the broker as to all reports with respect to a filing group during a calendar year.

(ii) *Exception.* For purposes of this section, a broker shall report a short sale as occurring on the date the short sale is entered on the books of the broker.

(iii) *Example.* The following example illustrates the application of the rules in this paragraph (d)(4):

Example. C, an individual not otherwise exempt from reporting, through J, a broker, enters into a short sale with respect to 100 shares of the stock of corporation B for $50 per share on July 12, 1985. J is required to report the sale as occurring on July 12, 1985 with gross proceeds of $5,000 dollars.

(5) *Gross proceeds.* The gross proceeds on a sale are the total amount paid to the customer or credited to the customer's account as a result of such sale reduced by the amount of any interest reported under paragraph (d)(3) and increased by any amount not so paid or credited by reason of repayment of margin loans. In the case of a closing transaction which results in a loss, gross proceeds are the amount debited from the customer's account. The broker may, but is not required to, take commissions and option premiums into account in determining gross proceeds, provided the treatment chosen is consistent with the books of the broker.

(6) *Conversion of proceeds paid in foreign currency*—(i) *Convertible currency.* In the event the proceeds of a sale are paid in convertible foreign currency, the amount subject to reporting under this section shall be computed by converting such foreign currency into United States dollars at the exchange rate determined in the following manner. The broker may choose, with respect to a filing group, to use either the exchange rate on the date the sale occurs or the exchange rate at the close of business on the last business day of the reporting period in which the sale occurs. In either case, the broker may use as such exchange rate the rate at which the broker was able to purchase the foreign currency at the relevant time or, if there is no such rate, the exchange rate quote for such foreign currency at such time in any generally recognized financial publication, provided the broker consistently uses the same publication.

(ii) *Nonconvertible currency.* [Reserved.]

(e) *Reporting of barter exchanges*—(1) *Requirement of reporting.* A barter exchange shall, except as otherwise provided, report in the manner prescribed in this section.

(2) *Exchanges required to be reported*—(i) *In general.* Except as provided in paragraphs (e)(2)(ii), (g), and (p)(2), a barter exchange shall make a return of information with respect to exchanges of personal property or services through the barter exchange during the calendar year among its members or clients or between such persons and the barter exchange. For this purpose, property or services are exchanged through a barter exchange if payment for property or services is made by means of a credit on the books of the barter exchange or scrip issued by the barter exchange or if the barter exchange arranges a direct exchange of property or services among its members or clients or exchanges property or services with a member or client.

(ii) *Exemption.* A barter exchange through which there are fewer than 100 exchanges during the calendar year is not required to report for, or make a return of information with respect to exchanges during, such calendar year. The Commissioner may require multiple barter exchanges to be combined for purposes of the proceeding sentence upon a determination that a material purpose for the formation or continuation of one or more of the barter exchanges to be combined was to receive one or more exemptions pursuant to this subparagraph.

(f) *Information required*—(1) *In general.* A person that is a barter exchange during a calendar year shall report on Form 1099 showing the information required thereon for such year.

(2) *Transactional reporting.* As to each exchange with respect to which a barter exchange is required to make a return of information under this section the barter exchange, except as provided in paragraph (p)(2), shall show on Form 1099 the name, address, and taxpayer identification number of each member or client providing property or services in the exchange, the property or services provided, the amount received by the member or client for such property or services, the date on which the exchange occurred, and such other information as may be required by Form 1099, in the form, manner, and number of copies required by Form 1099.

(3) *Exchange date.* For purposes of this section an exchange is considered to occur with respect to a member or client of a barter exchange on the date cash, property, a credit, or scrip is actually or constructively received by the member or client as a result of the exchange. (See § 1.451–2 for rules pertaining to constructive receipt.)

(4) *Amount received.* The amount received by a member or client in an exchange includes cash received, the fair market value of any property or services received, and the fair market value of any credits to the account of the member or client on the books of the barter exchange or scrip issued to the member or client by the barter exchange, but does not include any amount received by the member or client in a subsequent exchange of credits or scrip. For purposes of this section, the fair market value of a credit

or scrip is the value assigned to such credit or scrip by the issuing barter exchange for the purpose of exchanges unless the Commissioner requires the use of a different value that the Commissioner determines more accurately reflects fair market value.

(5) *Meaning of terms.* For purposes of this paragraph (f)—(i) A credit is an amount on the books of the barter exchange that is transferable from one member or client of the barter exchange to another such member or client, or to the barter exchange in payment for property or services;

(ii) Scrip is a token issued by the barter exchange that is transferable from one member or client, of the barter exchange to another such member or client, or to the barter exchange, in payment for property or services; and

(iii) Property does not include a credit or scrip.

(6) *Reporting period.* A barter exchange shall use the calendar year as the reporting period.

(g) *Exempt foreign persons*—(1) *In general.* No return of information is required with respect to the participation in any transaction during a calendar year of a person who furnishes during such calendar year (or who has furnished during any of the two preceding calendar years) to the broker or barter exchange (irrespective of whether the branch of the broker or barter exchange is within or without the United States) a statement, signed under penalty of perjury, that such person is an exempt foreign person, unless an employee or other agent of the broker or barter exchange who is responsible for receiving or reviewing such statement has actual knowledge that such statement is incorrect. However, the broker or barter exchange may, at its option, require the statement to be provided with respect to each separate transaction. The broker or barter exchange shall retain such statement for at least four years following the end of the last calendar year for which a return of information is not required by reason of such statement. See § 1.6001–1 (relating to records in general) for the requirements relating to the retention of statements provided under this paragraph (g). If, after providing such statement, the person ceases to be an exempt foreign person, such person shall so notify the broker or barter exchange in writing within 30 days of this change in status. For purposes of this paragraph (g), an exempt foreign person is a person who, during a calendar year in which such person participates in transactions with respect to which a return of information would otherwise be required under this section—

(i) Is neither a citizen of the United States, a resident of the United States, nor a person treated as a resident of the United States by reason of an election under section 6013 (g) or (h);

(ii) Is not subject to the provisions of section 877;

(iii) In the case of an individual, has not been, and at the time the statement is furnished reasonably expects not to be, present in the United States for a period aggregating 183 or more days (or is a beneficiary of a tax treaty to which the United States is a party and pursuant to which gains from such person's transactions are exempt from Federal income taxation); and

(iv) At the time the statement is furnished, is not, or reasonably expects not to be, engaged in a trade or business in the United States during such year (or is a beneficiary of a tax treaty to which the United States is a party and pursuant to which gains from such person's transactions are exempt from Federal income taxation).

(2) *Example.* The following example illustrates the application of the exception to the reporting requirements for exempt foreign persons:

Example. In March 1983, F, an individual, opens an account with G, a foreign branch of a brokerage firm incorporated in the United States. G requires new customers to complete a form signed under penalty of perjury that includes 4 questions corresponding to the 4 criteria for an exempt foreign person listed in paragraph (g)(1)(i) through (iv). F's responses to the 4 questions indicate that the 4 criteria are satisfied, and the sole employee of G responsible for receiving and reviewing such statement has no actual knowledge to the contrary. G does not require F to provide a statement that F is an exempt foreign person for each separate transaction it effects on F's behalf and does not require F to provide such a statement on a periodic basis. During 1984, 1985 and 1986, F does not furnish to G a statement that F is an exempt foreign person. If G is not notified by F that F has ceased to be an exempt foreign person, G is not required to make a return of information with respect to sales effected for F during 1983, 1984 and 1985. However, if no other exception applies, G is required to make a return of information with respect to sales effected for F during 1986.The same result would occur if G were a United States branch of either a United States or a foreign brokerage firm.

(h) *Identity of customer*—(1) *In general.* For purposes of this section, a broker or barter exchange shall treat the person who appears on the books and records of the broker or barter exchange with respect to property or services as the principals with respect thereto.

(2) *Examples.*The following examples illustrate the rule of this paragraph (h):

Example (1). The records of A, a broker, show an account in the name of "B". B is a nominee for C. All reporting with respect to such account shall treat B as the customer.

Example (2). J, an individual, places an order with H, a broker, to sell J's stock that is held by P, a broker/dealer, in an account for J with P designated as nominee for J, and to credit the gross proceeds from the sale to J's account with P. The account is in the name of P, so that H's customer is P.

(i) [Reserved.]

(j) *Time and place for filing.* Forms 1096 and 1099 required under this section shall be filed after the last calendar day of the reporting period elected by the broker or barter exchange and on or before the end of the second calendar month following the close of the calendar year of such reporting period with the appropriate Internal Revenue Service Center, the address of which is listed in the instructions for Form 1096.

(k) *Requirement and time for furnishing statement*—(1) *Requirement for furnishing statements.* A broker or barter exchange making a return of information under this section with respect to a transaction shall furnish to the person whose identifying number is (or is required to be) shown on such return a written statement showing the information required by paragraph (c)(5), (d), (f), or (p) of this section and containing a legend stating that such information is being reported to the Internal Revenue Service if the return of information is not made on magnetic media, this requirement may be satisfied by furnishing to such person a copy of all Forms 1099 with respect to such person filed with the Internal Revenue Service Center. A statement shall be considered to be furnished to a person to whom a statement is required to be made under this paragraph (k) if it is mailed to such person at the last address of such person known to the broker or barter exchange.

(2) *Time for furnishing statements.* A broker or barter exchange may furnish the statements required by this paragraph (k) yearly, quarterly, monthly or on any other basis, without regard to the reporting period elected by the broker or barter exchange, provided that all statements required to be furnished under this paragraph (k) for a calendar year shall be furnished on or before January 31 of the following calendar year.

(l) *Use of magnetic media*—(1) *In general.* Except as otherwise provided by paragraph (l) (2) and (3), a broker or a barter exchange required to file returns of information under this section, shall, in lieu of filing Form 1099 for such year, file such returns of information on magnetic media

authorized by the Commissioner and shall follow the appropriate revenue procedures for such magnetic media filing in lieu of following Form 1099 instructions.

(2) *Exception for undue hardship.* (i) The Commissioner may authorize a broker or barter exchange to file returns of information on Form 1099 instead of on magnetic media if undue hardship is shown on an application filed with the appropriate Internal Revenue Service Center.

(ii) In the case of a person who is a broker or barter exchange on July 1, 1983, an application to file returns of information on Form 1099 must be filed on or before September 15, 1983. In the case of a person who becomes a broker or barter exchange after July 1, 1983, such application must be filed by the end of the second month following the month in which such person becomes a broker or barter exchange.

(3) *Transitional rule.* A broker or barter exchange may submit returns of information on Form 1099 for reporting periods that—

(i) End before January 1, 1984; or

(ii) Begin before 30 days after the date on which a timely filed request to file returns of information on Form 1099 is denied.

(m) *Reporting on options transactions.* [Reserved]

(n) *Reporting on bond discounts.* [Reserved]

(o) *Additional reporting by stock transfer agents.* [Reserved]

(p) *Transitional rules*—(1) *Information required from brokers.* In the case of reporting periods ending before January 1, 1984, a broker may show the information required by this paragraph (p)(1) on Form 1099 in lieu of the information required under paragraph (d)(2). As to each customer account for which a return of information is required under this section with respect to sales, the broker must report the name, address, and taxpayer identification number of the customer, the aggregate gross proceeds of all sales of the account during the reporting period for which a return of information is required under this section, and such other information as may be required by Form 1099, in the form, manner, and number of copies required by Form 1099.

(2) *Information required from barter exchanges.* In the case of reporting periods ending before January 1, 1984, a barter exchange may show the information required by this paragraph (p)(2) on Form 1099 in lieu of the information required under paragraph (f)(2). As to each member or client providing property or services in an exchange for which a return of information is required under this section, the barter exchange must report the name, address, and taxpayer identification number of the member or client, the aggregate amount received by the member or client during the reporting period for property or services provided by such member or client in exchanges for which a return of information is required, and such other information as may be required by Form 1099, in the form, manner, and number of copies required by Form 1099.

(q) *Effective date.* This section applies to calendar year 1983 and all succeeding calendar years, and, as to 1983, only to transactions occurring on or after July 1, 1983.

(Secs. 6011(e), 6045 and 7805 of the Internal Revenue Code of 1954, (98 Stat. 810, 68A Stat. 747, 917; 26 U.S.C. 6011(e), 6045, 7805)

James I. Owens,

Acting Commissioner of Internal Revenue.

Approved: March 3, 1983.

John E. Chapoton,

Assistant Secretary of the Treasury.

BILLING CODE 4830-01-M

Bureau of Alcohol, Tobacco and Firearms

27 CFR Parts 4, 5, and 7

[Notice No. 459]

Ingredient Labeling of Wine, Distilled Spirits, and Malt Beverages

AGENCY: Bureau of Alcohol, Tobacco and Firearms (ATF), Treasury.

ACTION: Reinstatement of Treasury Decision ATF-66.

SUMMARY: This notice announces the Treasury Department's reinstatement of the ingredient labeling regulations as originally promulgated in T.D. ATF-66 (456 FR 40538; June 13, 1980). The Treasury Department and ATF are making this announcement pursuant to the order of the United States District Court for the District of Columbia, in *Center for Science in the Public Interest* v. *Department of the Treasury*, Civil Action No. 82-610.

By order dated February 8, 1983, the court vacated and set aside T.D. ATF-94, 46 FR 55093 (November 6, 1981) which rescinded T.D. ATF-66. This document requires ingredient labeling of alcoholic beverages after February 8, 1984.

EFFECTIVE DATE: March 11, 1983.

FOR FURTHER INFORMATION CONTACT: Imelda M. Koett Kirk, Bureau of Alcohol, Tobacco and Firearms, P.O. Box 385, Washington, DC 20044-0385, 202-566-7806.

SUPPLEMENTARY INFORMATION: The Treasury Department and the Bureau of Alcohol, Tobacco and Firearms are announcing that T.D. ATF-66, 45 FR 40538 (June 13, 1980), requiring ingredient labeling of alcoholic beverages will be mandatory on February 8, 1984. The Treasury Department and ATF are making this announcement pursuant to the order of the United States District Court for the District of Columbia, in *Center for Science in the Public Interest v. Department of the Treasury*, Civil Action No. 82-610..

By order dated February 8, 1983, the court vacated and set aside T.D. ATF-94, 46 FR 55093 (November 6, 1981) which rescinded T.D. ATF-66. The court further ordered the Department to announce within 30 days a new date, not to exceed one year from the date of its order, upon which T.D. ATF-66 will be mandatory. The Government subsequently moved the court to amend its order to allow the Government 60 days in which to announce a new effective date so that the Government could decide whether to appeal before announcing a new mandatory compliance date. This motion was denied.

Publication of this notice is without prejudice to, and not a waiver of, the Government's right to appeal the district court's decision, seek a stay of the court mandated effective date of T.D. ATF-66 or take other appropriate administrative action. Such appeal, stay, or other action which the Government is still considering could result in a change in the mandatory date.

Signed: March 8, 1983.

Stephen E. Higgins,

Acting Director.

Approved: March 9, 1983.

David Q. Bates,

Acting Assistant Secretary (Enforcement and Operations).

BILLING CODE 4810-31-M

DEPARTMENT OF DEFENSE

Office of the Secretary

32 CFR Part 199

[DOD Regulation 6010.8-R, Amdt. No. 19]

Civilian Health and Medical Program of the Uniformed Services (CHAMPUS); Appeals and Hearings

AGENCY: Office of the Secretary, DOD.

ACTION: Amendment of final rule.

SUMMARY: This amendment revises policies and procedures for appealing benefit decisions made by Office of Civilian Health and Medical Program of the Uniformed Services (OCHAMPUS), Office of Civilian Health and Medical Program of the Uniformed Services Europe (OCHAMPUSEUR) and CHAMPUS fiscal intermediaries. It will simplify the appeal process and provide more timely responses to appeal requests at all levels.

EFFECTIVE DATE: This amendment is effective May 1, 1983.

FOR FURTHER INFORMATION CONTACT: Marion M. Blackburn, Policy Branch, OCHAMPUS, telephone (303) 361-4078.

SUPPLEMENTARY INFORMATION: In FR Doc. 77-7834, appearing in the **Federal Register** on April 4, 1977 (42 FR 17972), the Office of the Secretary of Defense published its regulation, DOD 6010.8-R, "Implementation of the Civilian Health and Medical Program of the Uniformed Services (CHAMPUS)," as Part 199 of this title.

In FR Doc. 82-26095 appearing in the **Federal Register** on September 22, 1982 (47 FR 41761), the Office of the Secretary of Defense published a proposed amendment to Part 199 revising the policies and procedures for appealing benefit decisions made by Office of Civilian Health and Medical Program of the Uniformed Services (OCHAMPUS), Office of Civilian Health and Medical Program of the Uniformed Services Europe (OCHAMPUSEUR) and CHAMPUS fiscal intermediaries. Public comments were to be submitted by October 22, 1982.

All comments supported the proposed rulemaking.

List of Subjects in 32 CFR Part 199

Health insurance, Military personnel, Handicapped.

Accordingly, 32 CFR, Chapter I, Part 199 is amended to read as follows:

PART 199—IMPLEMENTATION OF THE CIVILIAN HEALTH AND MEDICAL PROGRAM OF THE UNIFORMED SERVICES

1. Section 199.8 is amended by removing the paragraph designations and adding or revising the following definitions, which are to be inserted in alphabetical order:

§ 199.8 Definitions.

(a) * * *

Amount in Dispute. "Amount in Dispute" means the amount of money, determined in accordance with the provisions of this Regulation, which CHAMPUS would pay for medical services and supplies involved in an adverse determination being appealed if the appeal were resolved in favor of the appealing party. See § 199.16 for additional information concerning the determination of "amount in dispute" under this Regulation.

* * * * *

Appealable Issue. "Appealable Issue" means disputed questions of fact which, if resolved in favor of the appealing party, would result in the authorization of CHAMPUS benefits or approval as an authorized provider in accordance with this Regulation. An appealable issue does not exist if no facts are in dispute, if no CHAMPUS benefits would be payable, or if there is no authorized provider regardless of the resolution of any disputed facts. See § 199.16 for additional information concerning the determination of "appealable issue" under this Regulation.

Appealing Party. "Appealing Party" means any party to the initial determination who files an appeal of an adverse determination or requests a hearing under the provisions of this Regulation.

* * * * *

Initial Determination. "Initial Determination" means a formal written decision on a CHAMPUS claim, a request for benefit authorization, a request by a provider for approval as an authorized CHAMPUS provider, or a decision disqualifying or excluding a provider as an authorized provider under CHAMPUS. Rejection of a claim or a request for benefit or provider authorization for failure to comply with administrative requirements, including failure to submit reasonably requested information, is not an initial determination. Responses to general or specific inquiries regarding CHAMPUS benefits are not initial determinations.

* * * * *

Party to the Initial Determination. "Party to the Initial Determination" includes CHAMPUS and also refers to a CHAMPUS beneficiary and a participating provider of services whose interests have been adjudicated by the initial determination. In addition, a provider who has been denied approval as an authorized CHAMPUS provider is a party to that initial determination, as is a provider who is disqualified or excluded as an authorized provider under CHAMPUS, unless the provider is excluded based on a determination of abuse of fraudulent practices or procedures under another federal or federally funded program. See § 199.16 for additional information concerning parties not entitled to administrative review under the CHAMPUS appeals and hearing procedures.

* * * * *

Representative. "Representative" means any person who has been appointed by a party to the initial determination as counsel or advisor and who is otherwise eligible to serve as the counsel or advisor of the party to the initial determination, particularly in connection with a hearing.

* * * * *

2. Section 199.16 is revised as follows:

§ 199.16 Appeal and hearing procedures.

(a) *General.* This Section sets forth the policies and procedures for appealing decisions made by OCHAMPUS, OCHAMPUSEUR, and CHAMPUS fiscal intermediaries, adversely affecting the rights and liabilities of beneficiaries, participating providers, and providers denied the status of authorized provider under CHAMPUS. An appeal under CHAMPUS is an administrative review of program determinations made under the provisions of law and regulation. An appeal cannot challenge the propriety, equity or legality of any provision of law or regulation.

(1) *Initial Determination.*

(i) *Notice of Initial Determination and Right to Appeal.*

(A) OCHAMPUS, OCHAMPUSEUR, and CHAMPUS fiscal intermediaries shall mail notices of initial determinations to the CHAMPUS beneficiary at the last known address. For beneficiaries who are under 18 years of age or who are incompetent, a notice issued to the parent or guardian, under established CHAMPUS procedures, constitutes notice to the beneficiary.

(B) CHAMPUS fiscal intermediaries and OCHAMPUSEUR shall notify providers of an initial determination on a claim only if the providers participated in the claim. (See § 199.13, "Claims Submission, Review and Payment.")

(C) Notice of an initial determination on a claim processed by a CHAMPUS fiscal intermediary or OCHAMPUSEUR normally shall be made on a CHAMPUS Explanation of Benefits (CEOB) form.

(D) Each notice of an initial determination on a request for benefit authorization, a request by a provider for approval as an authorized CHAMPUS provider, or a decision to disqualify or exclude a provider as an authorized provider under CHAMPUS shall state the reason for the determination and the underlying facts supporting the determination.

(E) In any case where the initial determination is adverse to the beneficiary or participating provider, or to the provider seeking approval as an

authorized CHAMPUS provider, the notice shall include a statement of the beneficiary's or provider's right to appeal the determination. The procedure for filing the appeal also shall be explained.

(ii) *Effect of Initial Determination.* The initial determination is final unless appealed in accordance with this § 199.16, or unless the initial determination is reopened by OCHAMPUS or the CHAMPUS fiscal intermediary.

(2) *Participation in an Appeal.* Participation in an appeal is limited to any party to the initial determination, including CHAMPUS, and authorized representatives of the parties. Any party to the initial determination, except CHAMPUS, may appeal an adverse determination. The appealing party is the party who actually files the appeal.

(i) *Parties to the Initial Determination.* For purposes of the CHAMPUS appeals and hearing procedures, the following are not parties to an initial determination and are not entitled to administrative review under this § 199.16.

(A) A provider disqualified or excluded as an authorized provider under CHAMPUS based on a determination of abuse or fraudulent practices or procedures under another federal or federally funded program is not a party to the CHAMPUS action and may not appeal under this section.

(B) A sponsor or parent of a beneficiary under 18 years of age or guardian of an incompetent beneficiary is not a party to the initial determination and may not serve as the appealing party, although such persons may represent the appealing party in an appeal.

(C) A third party, such as an insurance company, is not a party to the initial determination and is not entitled to appeal even though it may have an indirect interest in the initial determination.

(D) A nonparticipating provider is not a party to the initial determination and may not appeal.

(ii) *Representative.* Any party to the initial determination may appoint a representative to act on behalf of the party in connection with an appeal. Generally, the parent of a minor beneficiary and the legally appointed guardian of an incompetent beneficiary shall be presumed to have been appointed representative without specific designation by the beneficiary.

(A) The representative shall have the same authority as the party to the appeal and notice given to the representative shall constitute notice required to be given to the party under this Regulation.

(B) To avoid possible conflicts of interest, an officer or employee of the United States such as an employee or member of a Uniformed Service, including an employee or staff member of a Uniformed Service legal office or a CHAMPUS advisor, subject to the exceptions in Title 18, United States Code, Section 205, is not eligible to serve as a representative. An exception usually is made for an employee or member of a Uniformed Service who represents an immediate family member. In addition, the Director, OCHAMPUS, or designee, may appoint an officer or employee of the United States as the CHAMPUS representative at a hearing.

(3) *Burden of Proof.* The "Burden of Proof" is on the appealing party, affirmatively to establish by substantial evidence, the appealing party's entitlement under law and this Regulation to the authorization of CHAMPUS benefits or approval as an authorized provider. Any cost or fee associated with the production or submission of information in support of an appeal shall not be paid by CHAMPUS.

(4) *Late Filing.* If a request for reconsideration, formal review, or hearing is filed after the time permitted in this section written notice shall be issued denying the request. Late filing may be permitted only if the appealing party can reasonably demonstrate to the satisfaction of the CHAMPUS fiscal intermediary, OCHAMPUSEUR, or the Director, OCHAMPUS, or designee, that timely filing of the request was not feasible due to extraordinary circumstances over which the appealing party had no practical control. Each request for an exception to the filing requirement will be considered on its own merits.

(5) *Appealable Issue.* An appealable issue is required in order for an adverse determination to be appealed under the provisions of this section. Examples of issues which are not appealable under this section include:

(i) A dispute regarding a requirement of law or regulation.

(ii) The amount of the CHAMPUS-determined allowable cost or charge, since the methodology for determining allowable costs or charges is established by this Regulation.

(iii) Certain other issues on the basis that the authority for the initial determination is not vested in CHAMPUS. Such issues include but are not limited to the following examples:

(A) Determination of a person's eligibility as a CHAMPUS beneficiary is the responsibility of the appropriate Uniformed Service. Although CHAMPUS, OCHAMPUSEUR, and CHAMPUS fiscal intermediaries must make determinations concerning a beneficiary's eligibility in order to ensure proper disbursement of appropriated funds on each CHAMPUS claim processed, ultimate responsibility for resolving a beneficiary's eligibility rests with the Uniformed Services. Accordingly, a disputed question of fact concerning a beneficiary's eligibility will not be considered an appealable issue under the provisions of this § 199.16, but will be resolved in accordance with § 199.9, "Eligibility."

(B) Similarly, decisions relating to the issuance of a Nonavailability Statement (DD Form 1251) in each case are made by the Uniformed Services. Disputes over the need for a nonavailability statement or a refusal to issue a nonavailability statement are not appealable under this section. The one exception is when a dispute arises over whether the facts of the case demonstrate a medical emergency for which a nonavailability statement is not required. Denial of payment in this one situation is an appealable issue.

(C) The decision to disqualify or exlude a provider because of a determination against that provider of abuse, or fraudulent practices or procedures, under another federal or federally funded program, is not an initial determination which is appealable under this Regulation. The provider is limited to exhausting administrative appeal rights offered under the federal or federally funded program that made the initial determination of abuse, or fraudulent practices or procedures. However, a determination to disqualify or exclude a provider because of abuse, or fraudulent practices or procedures under CHAMPUS is an initial determination which is appealable under this Regulation.

(6) *Amount in Dispute.* An amount in dispute is required for an adverse determination to be appealed under the provisions of this section, except as set forth below.

(i) The amount in dispute is calculated as the amount of money CHAMPUS would pay if the services and supplies involved in dispute were determined to be authorized CHAMPUS benefits. Examples of amounts of money that are excluded by the Regulation from CHAMPUS payments for authorized benefits include, but are not limited to:

(A) Amounts in excess of the CHAMPUS-determined allowable charge or cost.

(B) The beneficiary's CHAMPUS deductible and cost-share amounts.

(C) Amounts which the CHAMPUS beneficiary, or parent, guardian, or other responsible person has no legal obligation to pay.

(D) Amounts excluded under the provisions of § 199.14 "Double Coverage", of this Regulation.

(ii) The amount in dispute, for appeals involving a denial of a request for authorization in advance of obtaining care, shall be the estimated allowable charge or cost for the services requested.

(iii) There is no requirement for an amount in dispute when the appealable issue involves a denial of a provider's request for approval as an authorized CHAMPUS provider or the determination to disqualify or exclude a provider as an authorized CHAMPUS provider.

(iv) Individual claims may be combined to meet the required amount in dispute if all of the following exist:

(A) The claims involve the same beneficiary.

(B) The claims involve the same issue.

(C) At least one of the claims, so combined, has had a reconsideration decision issued by OCHAMPUSEUR or a CHAMPUS fiscal intermediary.

Note.—A request for administrative review under this appeal process which does not involve an appealable issue § 199.16(a)(5)) or a sufficient amount in dispute (§ 199.16(a)(6)) may not be rejected at the reconsideration level of appeal. However, an appeal shall involve an appealable issue and sufficient amount in dispute to be granted a formal review or hearing.

(7) *Levels of Appeal.* The sequence and procedures of a CHAMPUS appeal vary depending on whether the initial determination was made by the CHAMPUS fiscal intermediary, OCHAMPUSEUR, or OCHAMPUS.

(i) *Appeal Levels for Initial Determination Made by OCHAMPUSEUR or CHAMPUS Fiscal Intermediary.*

(A) Reconsideration by OCHAMPUSEUR or CHAMPUS fiscal intermediary.

(B) Formal Review by OCHAMPUS.

(C) Hearing.

(ii) *Appeal Levels for Initial Determinations Made by OCHAMPUS.*

(A) Formal Review by OCHAMPUS.

(B) Hearing.

(b) *Reconsideration.* Any party to the initial determination made by OCHAMPUSEUR or the CHAMPUS fiscal intermediary may request a reconsideration.

(1) *Requesting a Reconsideration.*

(i) *Written Request Required.* The request shall be in writing, shall state the specific matter in dispute, and shall include a copy of the notice of initial determination made by OCHAMPUSEUR or the CHAMPUS fiscal intermediary such as the CEOB Form.

(ii) *Where to File.* The request shall be submitted to the office that made the initial determination such as OCHAMPUSEUR, or the CHAMPUS fiscal intermediary, or any other fiscal intermediary designated in the notice of initial determination.

(iii) *Allowed Time to File.* The request must be mailed within 90 days after the date of the notice of initial determination.

(iv) *Official Filing Date.* A request for a reconsideration shall be deemed filed on the date it is mailed and postmarked. If the request does not have a postmark, it shall be deemed filed on the date received by OCHAMPUSEUR or the CHAMPUS fiscal intermediary.

(2) *The Reconsideration Process.* The purpose of the reconsideration is to determine whether the initial determination was made in accordance with law, regulation, policies, and guidelines in effect at the time the care was provided or requested, or at the time the provider requested approval under CHAMPUS as an authorized provider. The reconsideration is performed by a member of the OCHAMPUSEUR or fiscal intermediary's staff who was not involved in making the initial determination and is a thorough and independent review of the case. The reconsideration is based on the information submitted which led to the initial determination, plus any additional information that the appealing party may submit or OCHAMPUSEUR or the fiscal intermediary may obtain.

(3) *Timeliness of Reconsideration Determination.* OCHAMPUSEUR or the fiscal intermediary normally shall issue its reconsideration determination no later than 60 days from the date of receipt of the request for reconsideration by OCHAMPUSEUR or the fiscal intermediary.

(4) *Notice of Reconsideration Determination.* OCHAMPUSEUR or the CHAMPUS fiscal intermediary shall issue a written notice of the reconsideration determination to the appealing party at his or her last known address. The notice of the reconsideration determinations must contain the following elements:

(i) A statement of the issue or issues under appeal.

(ii) The provisions of law, regulation, policies and guidelines that apply to the issue or issues under appeal.

(iii) A discussion of the original and additional information that is relevant to the issue or issues under appeal.

(iv) Whether the reconsideration upholds the initial determination or reverses it, in whole or in part, and the rationale for the action.

(v) A statement of the right to further appeal in any case where the reconsideration determination is less than fully favorable to the appealing party and the amount in dispute is $50 or more.

(5) *Effect of Reconsideration Determination.* The reconsideration determination is final if either of the following exists:

(i) The amount in dispute is less than $50.

(ii) Appeal rights have been offered, but a request for formal review is not received by OCHAMPUS within 60 days of the date of the notice of the reconsideration determination.

(c) *Formal Review.* Any party to the initial determination may request a formal review by OCHAMPUS if the party is dissatisfied with the reconsideration determination and the reconsideration determination is not final under the provisions of paragraph (b)(5) of this section. Any party to the initial determination made by OCHAMPUS may request a formal review by OCHAMPUS if the party is dissatisfied with the initial determination.

(1) *Requesting a Formal Review.*

(i) *Written Request Required.* The request must be in writing, shall state the specific matter in dispute, shall include copies of the written determination (notice of reconsideration determination or OCHAMPUS initial determination) being appealed, and shall include any additional information or documents not previously submitted.

(ii) *Where to File.* The request shall be submitted to the Chief, Appeals and Hearings, OCHAMPUS, Aurora, Colorado 80045.

(iii) *Allowed Time to File.* The request shall be mailed within 60 days after the date of the notice of the reconsideration determination or OCHAMPUS initial determination being appealed.

(iv) *Office Filing Date.* A request for a formal review shall be deemed filed on the date it is mailed and postmarked. If the request does not have a postmark, it shall be deemed filed on the date received by OCHAMPUS.

(2) *The Formal Review Process.* The purpose of the formal review is to determine whether the initial determination or reconsideration determination was made in accordance with law, regulation, policies, and

guidelines in effect at the time the care was provided or requested, at the time the provider requested approval by CHAMPUS as an authorized provider, or at the time of the action by OCHAMPUS to disqualify or exclude a provider under CHAMPUS. The formal review is performed by the Chief, Appeals and Hearings, OCHAMPUS, or designee, and is a thorough review of the case. The formal review determination shall be based on the information upon which the initial determination or reconsideration determination was based, and any additional information the appealing party may submit or OCHAMPUS may obtain.

(3) *Timeliness of Formal Review Determination.* The Chief, Appeals and Hearings, OCHAMPUS, or designee, normally shall issue the formal review determination no later than 90 days from the date of receipt of the request for formal review by OCHAMPUS.

(4) *Notice of Formal Review Determination.* The Chief, Appeals and Hearings, OCHAMPUS, or designee, shall issue a written notice of the formal review determination to the appealing party at his or her last known address. The notice of the formal review determination must contain the following elements:

(i) A statement of the issue or issues under appeal.

(ii) The provisions of law, regulation, policies and guidelines that apply to the issue or issues under appeal.

(iii) A discussion of the original and additional information which is relevant to the issue or issues under appeal.

(iv) Whether the formal review upholds the prior determination or determinations or reverses the prior determination or determinations in whole or in part, and the rationale for the action.

(v) A statement of the right to request a hearing in any case where the formal review determination is less than fully favorable, the issue is appealable, and the amount in dispute is $300 or more.

(5) *Effect of Formal Review Determination.* The formal review determination is final if one or more of the following exists:

(i) The issue is not appealable. (See § 199.16(a)(5), "Appealable Issue.")

(ii) The amount in dispute is less than $300. (See § 199.16(a)(6), "Amount in Dispute.")

(iii) Appeal rights have been offered, but a request for hearing is not received by OCHAMPUS within 60 days of the date of the notice of the formal review determination.

(d) *Hearing.* Any party to the initial determination may request a hearing if the party is dissatisfied with the formal review determination and the formal review determination is not final under the provisions of paragraph (c)(5) of this section.

(1) *Requesting a Hearing.*

(i) *Written Request Required.* The request shall be in writting, state the specific matter in dispute, include a copy of the formal review determination and include any additional information or documents not previously submitted.

(ii) *Where to File.* The request shall be submitted to the Chief, Appeals and Hearings, OCHAMPUS, Aurora, Colorado 80045.

(iii) *Allowed Time to File.* The request shall be mailed within 60 days after the date of the notice of the formal review determination being appealed.

(iv) *Official Filing Date.* A request for hearing shall be deemed filed on the date it is mailed and postmarked. If a request for hearing does not have a postmark, it shall be deemed filed on the date received by OCHAMPUS.

(2) *The Hearing Process.* The hearing shall be conducted as a nonadversary, administrative proceeding to determine the facts of the case and to allow the appealing party the opportunity personally to present the case before an impartial hearing officer. The hearing is a forum in which facts relevant to the case are presented and evaluated in relation to applicable law, regulation, policies and guidelines in effect at the time the case was provided or requested, or at the time the provider requested approval under CHAMPUS as an authorized provider.

(3) *Timeliness of Hearing.*

(i) Except as otherwise provided in this section, within 60 days following receipt of a request for hearing, the Director, OCHAMPUS, or designee, normally will appoint a hearing officer to hear the appeal. Copies of all records in the possession of OCHAMPUS which are pertinent to the matter to be heard or which formed the basis of the formal review determination shall be provided to the hearing officer, and upon request, to the appealing party.

(ii) The hearing officer, except as otherwise provided in this Section, normally shall have 60 days from the date of written notice of assignment to review the file, schedule and hold the hearing, and issue a recommended decision to the Director, OCHAMPUS, or designee.

(iii) The Director, OCHAMPUS, or designee, may delay the case assignment to the hearing officer if additional information is needed which cannot be obtained and included in the record within the time period specified above. The appealing party will be notified in writing of the delay resulting from the request for additional information. The Director, OCHAMPUS, or designee, in such circumstances, will assign the case to a hearing officer within 30 days of receipt of all such additional information, or within 60 days of receipt of the request for hearing, whichever shall occur last.

(iv) The hearing officer may delay submitting the recommended decision if, at the close of the hearing, any party to the hearing requests that the record remain open for submission of additional information. In such circumstances the hearing officer will have 30 days following receipt of all such additional information, including comments from the other parties to the hearing concerning the additional information, to submit the recommended decision to the Director, OCHAMPUS, or designee.

(4) *Representation at a Hearing.* Any party to the hearing may appoint a representative to act on behalf of the party at the hearing unless such person is currently disqualified or suspended from acting in another federal administrative proceeding, or unless otherwise prohibited by law, this Regulation, or any other DoD regulation (See § 199.16 (a)(2)(ii).) A hearing officer may refuse to allow any person to represent a party at the hearing when such person engages in unethical, disruptive, or contemptuous conduct, or intentionally fails to comply with proper instructions, requests of the hearing officer, or the provisions of this Regulation. The representative shall have the same authority as the appealing party and notice given to the representative shall constitute notice required to be given to the appealing party.

(5) *Consolidation of Proceedings.* The Director, OCHAMPUS, or designee, may consolidate any number of proceedings for hearing when the facts and circumstances are similar and no substantial right of any appealing party will be prejudiced.

(6) *Authority of the Hearing Officer.* The hearing officer in exercising the authority to conduct a hearing under this Regulation will be bound by Chapter 55 of Title 10, United States Code, and this Regulation. The hearing officer in addressing substantive, appealable issues shall be bound by policy statements, manuals, instructions, procedures, and other guidelines issued by the Assistant Secretary of Defense (Health Affairs) (ASD(HA)) or designee or by the Director, OCHAMPUS, or designee, in effect for the period in which the matter in dispute arose. A

hearing officer may not establish or amend policy, procedures, instructions, or guidelines. However, the hearing officer may recommend reconsideration of the policy, procedures, instructions or guidelines by the Assistant Secretary of Defense (Health Affairs), or designee, when the final decision is issued in the case.

(7) *Disqualification of Hearing Officer.* A hearing officer shall voluntarily disqualify himself or herself and withdraw from any proceeding in which the hearing officer cannot give a fair or impartial hearing, or in which there is a conflict of interest. A party to the hearing may request the disqualification of a hearing officer by filing a statement detailing the reasons the party believes that a fair and impartial hearing cannot be given or that a conflict of interest exists. Such request shall immediately be sent by the appealing party or the hearing officer to the Director, OCHAMPUS, or designee, who shall investigate the allegations and advise the complaining party of the decision in writing. A copy of such decision shall also be mailed to all other parties to the hearing. If the Director, OCHAMPUS, or designee, reassigns the case to another hearing officer, no investigation shall be required.

(8) *Notice and Scheduling of Hearing.* The hearing officer shall issue by certified mail, when practicable, a written notice to the parties to the hearing of the time and place for the hearing. Such notice shall be mailed at least 15 days before the scheduled date of the hearing. The notice shall contain sufficient information about the hearing procedure, including the party's right to representation, to allow for effective preparation. The notice shall also advise the appealing party of the right to request a copy of the record prior to hearing. Additionally, the notice shall advise the appealing party of his or her responsibility to furnish the hearing officer, no later than 7 days prior to the scheduled date of the hearing, a list of all witnesses who will testify and a copy of all additional information to be presented at the hearing. The time and place of the hearing shall be determined by the hearing officer, who shall select a reasonable time and location mutually convenient to the appealing party and OCHAMPUS.

(9) *Dismissal of Request for Hearing.*

(i) *By Application of Appealing Party.* A request for hearing may be dismissed by the Director, OCHAMPUS, or designee, at any time prior to the mailing of the final decision, upon the application of the appealing party. A request for dismissal must be in writing and filed with the Chief, Appeals and Hearings, OCHAMPUS, or the hearing officer. When dismissal is requested, the formal review determination in the case shall be deemed final unless the dismissal is vacated in accordance with paragraph (d)(9)(v) of this § 199.16.

(ii) *By Stipulation of the Parties to the Hearing.* A request for a hearing may be dismissed by the Director, OCHAMPUS, or designee, at any time prior to the mailing of notice of the final decision under a stipulation agreement between the appealing party and OCHAMPUS. When dismissal is entered under a stipulation, the formal review decision shall be deemed final unless the dismissal is vacated in accordance with paragraph (d)(9)(v) of this § 199.16.

(iii) *By Abandonment.* The Director, OCHAMPUS, or designee, may dismiss a request for hearing upon abandonment by the appealing party.

(A) An appealing party shall be deemed to have abandoned a request for hearing, other than when personal appearance is waived in accordance with paragraph (d)(11)(xiii) of this section, if neither the appealing party nor an appointed representative appears at the time and place fixed for the hearing and if within 10 days after the mailing of a notice by certified mail to the appealing party by the hearing officer to show cause, such party does not show good and sufficient cause for failure to appear and failure to notify the hearing officer before the time fixed for hearing that an appearance could not be made.

(B) An appealing party shall be deemed to have abandoned a request for hearing if, before assignment of the case to the hearing officer, OCHAMPUS is unable to locate either the appealing party or an appointed representative.

(C) An appealing party shall be deemed to have abandoned a request for hearing if the appealing party fails to prosecute the appeal. Failure to prosecute the appeal includes, but is not limited to, an appealing party's failure to provide information reasonably requested by OCHAMPUS or the hearing officer for consideration in the appeal.

(D) If the Director, OCHAMPUS, or designee, dismisses the request for hearing because of abandonment, the formal review determination in the case shall be deemed to be final unless the dismissal is vacated in accordance with paragraph (d)(9)(v) of this section.

(iv) *For Cause.* The Director, OCHAMPUS, or designee, may dismiss for cause a request for hearing either entirely or as to any stated issue. If the Director, OCHAMPUS, or designee, dismisses a hearing request for cause, the formal review determination in the case shall be deemed to be final unless the dismissal is vacated in accordance with paragraph (d)(9)(v) of this section. A dismissal for cause may be issued under any of the following circumstances:

(A) When the appealing party requesting the hearing is not a proper party under the paragraph (a)(2)(i) of this § 199.16, or does not otherwise have a right to participate in a hearing.

(B) When the appealing party who filed the hearing request dies and there is no information before the Director, OCHAMPUS, or designee, showing that a party to the initial determination who is not an appealing party may be prejudiced by the formal review determination.

(C) When the issue is not appealable (see § 199.16(a)(5), "Appealable Issues").

(D) When the amount in dispute is less than $300 (see § 199.16(a)(6), "Amount in Dispute").

(E) When all appealable issues have been resolved in favor of the appealing party.

(v) *Vacation of Dismissal.* Dismissal of a request for hearing may be vacated by the Director, OCHAMPUS, or designee, upon written request of the appealing party, if the request is received within 6 months of the date of the notice of dismissal mailed to the last known address of the party requesting the hearing.

(10) *Preparation for Hearing.*

(i) *Prehearing Statement of Contentions.* The hearing officer may on reasonable notice require a party to the hearing to submit a written statement of contentions and reasons. The written statement shall be provided to all parties to the hearing, before the hearing takes place.

(ii) *Agency Records.*

(A) *Hearing Officer.* A hearing officer may ask CHAMPUS to produce for inspection, any records or relevant portions of records when they are needed to decide the issues in any proceeding before the hearing officer or to assist an appealing party in preparing for the proceeding.

(B) *Appealing Party.* A request to a hearing officer by an appealing party for disclosure or inspection of CHAMPUS records shall be in writing and shall state clearly what information and records are required.

(iii) *Witnesses and Evidence.* All parties to a hearing are responsible for producing, at each party's expense, meaning without reimbursement of payment by CHAMPUS, witnesses and other evidence in their own behalf, and for furnishing copies of any such documentary evidence to the hearing

officer and other party or parties to the hearing. The Department of Defense is not authorized to subpoena witnesses or records. The hearing officer may issue invitations and requests to individuals to appear and testify without cost to the Government, so that the full facts in the case may be presented.

(iv) *Interrogatories and Depositions.* A hearing officer may arrange to take interrogatories and depositions, recognizing that the Department of Defense does not have subpoena authority. The expense shall be assessed to the requesting party, with copies furnished to the hearing officer and other party or parties to the hearing.

(11) *Conduct of Hearing.*

(i) *Right to Open Hearing.* Because of the personal nature of the matters to be considered, hearings normally shall be closed to the public. However, the appealing party may request an open hearing. In that event, the hearing shall be open except when protection of other government purposes dictates closing certain portions of the hearing.

(ii) *Right to Examine Parties to the Hearing and Their Witnesses.* Each party to the hearing shall have the right to produce and examine witnesses, to introduce exhibits, to question opposing witnesses on any matter relevant to the issue even though the matter was not covered in the direct examination, to impeach any witness regardless of which party to the hearing first called the witness to testify, and to rebut any evidence presented. Except for those witnesses employed by OCHAMPUS at the time of the hearing, or records in the possession of OCHAMPUS, a party to a hearing shall be responsible, that is to say no payment or reimbursement shall be made by CHAMPUS, for the cost or fee associated with producing witnesses or other evidence in the party's own behalf, or for furnishing copies of documentary evidence to the hearing officer and other party or parties to the hearing.

(iii) *Burden of Proof.* The burden of proof is on the appealing party affirmatively to establish by substantial evidence the appealing party's entitlement under law and this Regulation to the authorization of CHAMPUS benefits or approval as an authorized provider. Any part of the cost or fee associated with producing or submitting information in support of an appeal shall not be paid by CHAMPUS.

(iv) *Taking of Evidence.* The hearing officer shall control the taking of evidence in a manner best suited to ascertain the facts and safeguard the rights of the parties to the hearing. Before taking evidence, the hearing officer shall identify and state the issues in dispute on the record and the order in which evidence will be received.

(v) *Questioning and Admission of Evidence.* A hearing officer may question any witness and shall admit any relevant evidence. Evidence which is irrelevant or unduly repetitious shall be excluded.

(vi) *Relevant Evidence.* Any relevant evidence shall be admitted, unless unduly repetitious, if it is the type of evidence on which responsible persons are accustomed to rely in the conduct of serious affairs, regardless of the existence of any common law or statutory rule that might make improper the admission of such evidence over objection in civil or criminal actions.

(vii) *CHAMPUS Determinations First.* The basis of the CHAMPUS determinations shall be presented to the hearing officer first. The appealing party shall then be given the opportunity to establish affirmatively why this determination is held to be in error.

(viii) *Testimony.* Testimony shall be taken only on oath, affirmation, or penalty of perjury.

(ix) *Oral Argument and Briefs.* At the request of any party to the hearing made before the close of the hearing, the hearing officer shall grant oral argument. If written argument is requested, it shall be granted, and the parties to the hearing shall be advised as to the time and manner within which such argument is to be filed. The hearing officer may require any party to the hearing to submit written memoranda pertaining to any or all issues raised in the hearing.

(x) *Continuance of Hearings.* A hearing officer may continue a hearing to another time or place on his or her own motion or, upon showing of good cause, at the request of any party. Written notice of the time and place of the continued hearing, except as otherwise provided here, shall be in accordance with this Regulation. When a continuance is ordered during a hearing, oral notice of the time and place of the continued hearing may be given to each party to the hearing who is present at the hearing.

(xi) *Continuance for Additional Evidence.* If the hearing officer determines, after a hearing has begun, that additional evidence is necessary for the proper determination of the case, the following procedures may be invoked:

(A) *Continue Hearing.* The hearing may be continued to a later date in accordance with subsection (d)(11)(x) of this section.

(B) *Closed Hearing.* The hearing may be closed, but the record held open in order to permit the introduction of additional evidence. Any evidence submitted after the close of the hearing shall be made available to all parties to the hearing, and all parties to the hearing shall have the opportunity for comment. The hearing officer may reopen the hearing if any portion of the additional evidence makes further hearing desirable. Notice thereof shall be given in accordance with paragraph (d)(8) of this section.

(xii) *Transcript of Hearing.* A verbatim taped record of the hearing shall be made and shall become a permanent part of the record. Upon request, the appealing party shall be furnished a duplicate copy of the tape. A typed transcript of the testimony will be made only when determined to be necessary by OCHAMPUS. If a typed transcript is made, the appealing party shall be furnished a copy without charge. Corrections shall be allowed in the typed transcript by the hearing officer solely for the purpose of conforming the transcript to the actual testimony.

(xiii) *Waiver of Right to Appear and Present Evidence.* If all parties waive their right to appear before the hearing officer for presenting evidence and contentions personally or by representation, it shall not be necessary for the hearing officer to give notice of, or to conduct a formal hearing. A waiver of the right to appear must be in writing and filed with the hearing officer or the Chief, Appeals and Hearings, OCHAMPUS. Such waiver may be withdrawn by the party by written notice received by the hearing officer or Chief, Appeals and Hearings, no later than 7 days prior to the scheduled hearing or the mailing of notice of the final decision, whichever occurs first. For purposes of this Section, failure of a party to appear personally or by representation after filing written notice of waiver, shall not be cause for a finding of abandonment and the hearing officer shall make the recommended decision on the basis of all evidence of record.

(12) *Recommended Decision.* At the conclusion of the hearing, and after the record has been closed, the matter shall be taken under consideration by the hearing officer. Within the time frames previously set forth in this section, the hearing officer shall submit to the Director, OCHAMPUS, or designee, a written recommended decision containing a statement of findings and a statement of reasons based on the evidence adduced at the hearing and otherwise included in the hearing record.

(i) *Statement of Findings.* A statement of findings is a clear and concise statement of fact evidenced in the

record or conclusions that readily can be deduced from the evidence of record. Each finding must be supported by substantial evidence which is defined as such evidence as a reasonable mind can accept as adequate to support a conclusion.

(ii) *Statement of Reasons.* A reason is a clear and concise statement of law, regulation, policies, or guidelines relating to the statement of findings which provides the basis for the recommended decision.

(e) *Final Decision.*

(1) *Director, OCHAMPUS.* The recommended decision shall be reviewed by the Director, OCHAMPUS, or designee, who may concur without comment or who may prepare a written evaluation of the recommended decision. The Director, OCHAMPUS, or designee, shall not alter the recommended decision; however, the Director, OCHAMPUS, or designee, may return the recommended decision to the hearing officer for correction of technical or procedural errors. The hearing officer shall take appropriate action within 60 days to correct the technical or procedural errors and return the recommended decision to the Director, OCHAMPUS. In the absence of technical or procedural errors, the Director, OCHAMPUS, or designee, normally will take action with regard to the recommended decision within 90 days of its receipt.

(i) *Final Action.* If the hearing officer recommends in favor of the appealing party and the Director, OCHAMPUS, or designee, concurs in the statement of findings and statement of reasons, no further agency review is required. The appealing party will be notified by certified mail of the recommended decision and its adoption by the Director, OCHAMPUS, or designee, as the final agency decision.

(ii) *Referral for Final Review.* If the hearing officer recommends against the appealing party, whether or not the Director, OCHAMPUS, or designee, concurs, or if the Director, OCHAMPUS, or designee disagrees with the recommended decision (whether or not the finding is for or against the appealing party), the Director, OCHAMPUS, or designee, shall forward the recommended decision, together with a statement of concurrence or statement giving the reasons for disagreement, to the ASD(HA) for final agency action.

(2) *Assistant Secretary of Defense (Health Affairs).* The decision by the ASD(HA), or designee, concerning a case arising under the procedures of this § 199.16, shall be the final agency decision.

(i) *Review of the Recommended Decision.* The ASD(HA), or designee, shall adopt or reject the recommended decision. In the case of rejection, the ASD(HA), or designee shall prepare a statement outlining the reasons for disagreement with the recommended decision and the underlying facts supporting such disagreement. In this circumstance, the ASD(HA), or designee, may have a final decision prepared based upon the record, or may remand the matter to the hearing officer for appropriate action. In the latter instance, the hearing officer than shall submit a new recommended decision within 30 days of receipt of the remand order.

(ii) *Final Decision.* The decision of the ASD(HA), or designee, is final. Copies of the final decision shall be sent by certified mail to the appealing party or parties.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[A-6-FRL 2320-1]

Approval and Promulgation of State Implementation Plans; Utah Fluoride Plan—Correction

AGENCY: Environmental Protection Agency.

ACTION: Final rulemaking; correction.

SUMMARY: This action corrects an error in the June 11, 1982 (47 FR 25335), approval of the Utah Fluoride plan under Section 111(d) of the Clean Air Act. In that action a new § 62.1110 under Subpart TT was erroneously established. That Section number is corrected to be § 62.11100.

FOR FURTHER INFORMATION CONTACT: David S. Kircher, Air Programs Branch, Environmental Protection Agency, 1860 Lincoln Street, Denver, Colorado 80295, (303) 837-3711.

SUPPLEMENTARY INFORMATION: On June 11, 1982 (47 FR 25335), EPA approved the Utah plan for the control of fluoride emissions which was submitted under Section 111(d) of the Clean Air Act. In that approval EPA estblished a new section under Subpart TT of 40 CFR Part 62. The new section entitled "Identification of Plan" was incorrectly assigned the Section number 62.1110. That number is corrected to be § 62.11100.

Dated: August 26, 1982.

Steven J. Durham,

Regional Administrator.

GENERAL SERVICES ADMINISTRATION

41 CFR Part 101-41

[FPMR Amdt. G-60]

Use of Facsimile Signature; Public Voucher for Transportation Charges, SF 1113

AGENCY: General Services Administration.

ACTION: Final rule.

SUMMARY: This regulation amends the current requirement that facsimile signatures of certifying officers that appear in the "Payee's Certificate" section of the Public Voucher for Transportation Charges, SF 1113, be initialed by duly authorized persons. Eliminating this requirement will reduce cost and time to carriers.

EFFECTIVE DATE: March 11, 1983.

FOR FURTHER INFORMATION CONTACT: John W. Sandfort, Chief, Regulations, Procedures, and Claims Branch, Office of Transportation Audits (202-786-3014).

SUPPLEMENTARY INFORMATION: The General Services Administration (GSA) has determined that this rule is not a major rule for the purposes of Executive Order 12291 of February 17, 1981, because it is not likely to result in an annual effect on the economy of $100 million or more; a major increase in costs to consumers or others; or significant adverse effects. GSA has based all administrative decisions underlying this rule on adequate information concerning the need for, and consequences of, this rule; has determined that potential benefits to society from this rule outweigh the potential costs and has maximized the net benefits; and has chosen the alternative approach involving the least net cost to society.

Background: A notice of proposed rulemaking was published in the **Federal Register** of September 29, 1982 (47 FR 42763), inviting comments for a period of 30 days ending October 29, 1982. No comments were received.

List of Subjects in 41 CFR Part 101–41

Air carriers, Accounting, Claims, Freight, Freight forwarders, Government property management, Maritime carriers, Moving of household goods, Passenger Services, Railroads, Transportation.

PART 101–41 [AMENDED]

Subpart 101–41.2—Passenger Transportation Services Furnished for the Account of the United States

1. Section 101–41.214–5(c) is revised as follows:

§ 101–41.214–5 Preparation of carrier billing form.

* * * * *

(c) The carrier shall complete the "Payee's Certificate" section of the voucher. Carriers may use a machine-typed name of the carrier's certifying official, provided the machine-typed official's name is initialed by a duly authorized person; or carriers may use a facsimile signature of the carrier's certifying official, as authorized by that official. The carrier shall complete the tear-off portion of the SF 1113 and shall not substitute a memorandum copy (SF 1113–A) for the tear-off portion.

* * * * *

Subpart 101–41.3—Freight Transportation Services Furnished for the Account of the United States

2. Section 101–41.310–2(c) is revised as follows:

§ 101–41.310–2 Preparation of carrier billing form.

* * * * *

(c) The carrier shall complete the "Payee's Certificate" section of the voucher. Carriers may use a machine-typed name of the carrier's certifying official, provided the machine-typed official's name is initialed by a duly authorized person; or carriers may use a facsimile signature of the carrier's certifying official, as authorized by that official.

BILLING CODE 6820-34-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Public Health Service

42 CFR Part 32

Medical Care for Seamen and Certain Other Persons

AGENCY: Health Resources and Services Administration, PHS, HHS.

ACTION: Final rulemaking.

SUMMARY: This action is taken in order to delete obsolete material from Part 32 of the Public Health Service regulations dealing with medical care for seamen and other persons.

EFFECTIVE DATE: March 11, 1983.

FOR FURTHER INFORMATION CONTACT: Mr. Walter W. Ward, Bureau of Health Care Delivery and Assistance, Health Resources and Services Administration, 5600 Fishers Lane, Rockville, Maryland 20857. Telephone number 301 443–1034.

SUPPLEMENTARY INFORMATION: Pursuant to section 986 of the Omnibus Budget Reconciliation Act of 1981 (Pub. L. 97–35), the entitlement of American seamen and certain other persons formerly eligible for care at Public Health Service facilities under 42 U.S.C. 249 was terminated effective October 1, 1981. This final regulation revises Part 32 to remove those sections related to such care and rendered obsolete by Pub. L. 97–35. Also removed are provisions at 42 CFR 36.6(c) referencing circular instructions governing the care and treatment or physical examination of certain other persons at PHS hospitals and clinics. These circulars are obsolete following closure and transfer of the PHS hospitals and clinics (other than the National Hansen's Disease Center at Carville, Louisiana) pursuant to sections 985 through 988 of Pub. L. 97–35.

The provisions of 42 CFR Part 32 concerning care and treatment of persons with Hansen's disease, and emergency treatment for non-beneficiaries, remain unchanged.

Rulemaking procedures under the Administrative Procedure Act (5 U.S.C. 553) generally involve publication of a notice of proposed rulemaking, affording interested persons the opportunity to comment, and publication of the final rule after consideration of the comments received. However, the statute allows the agency to dispense with notice and comment procedures:

(B) When the agency for good cause finds (and incorporates the finding and a brief statement of reasons therefore in the rules issued) that notice and public procedure thereon are impracticable, unnecessary, or contrary to the public interest.

In this case notice and comment procedures are unnecessary because, as explained above, the changes made to Part 32 merely remove material made obsolete by congressional action.

Determination Concerning Impact of the Rule

The Secretary certifies, pursuant to section 605(b) of the Regulatory Flexibility Act, that this regulation will not have a significant economic impact on a substantial number of small entities. The reason for the Secretary's certification is that the changes made to the regulation remove obsolete material and do not affect health care providers or current PHS beneficiaries. The Secretary has also determined, in accordance with Executive Order 12291 of February 17, 1981, entitled "Federal Regulation" that the proposed rule does not constitute a "major rule" because it will not: Have an annual effect on the economy of $100 million or more; result in major increase in costs or prices for consumers, any industries, any governmental agencies or any geographic regions; or have significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

List of Subjects in 42 CFR Part 32

Contagious diseases, Diseases, Emergency medical services, Hansen's disease, Health, Health care, Health facilities, Hospitals, Leprosy, Medical care, Medical facilities, Public health.

Dated: January 26, 1983.

Edward N. Brandt,

Assistant Secretary for Health.

Approved: February 18, 1983.

Thomas R. Donnelly, Jr.,

Acting Secretary.

For the reasons set out in the preamble, it is proposed to amend 42 CFR Part 32 as follows:

PART 32—[AMENDED]

1. The title and table of contents and authority citation for Part 32 are revised to read as follows:

PART 32—MEDICAL CARE FOR PERSONS WITH HANSEN'S DISEASE AND OTHER PERSONS IN EMERGENCIES

Definitions

32.1 Meaning of Terms.

Beneficiaries

32.6 Persons eligible.

Persons with Hansen's Disease

Sec.
32.86 Admissions to Service facilities.
32.87 Confirmation of diagnosis.
32.88 Examinations and treatment.
32.89 Discharge.
32.90 Notification to health authorities regarding discharged patients.
32.91 Purchase of services for Hansen's disease patients.

Nonbeneficiaries: Temporary Treatment In Emergency

32.111 Conditions and extent of treatment; charges.

Authority: Sec. 320, 321 and 322(b) of the Public Health Service Act (42 U.S.C. 247e, 248 and 249(b)).

2. Section 32.1 is amended by removing paragraphs (d), (e), (g) and (h), redesignating paragraph (f) as paragraph (d), and be revising paragraph (d), as so redesignated, to read as follows:

§ 32.1 Meaning of terms.

* * * * *

(d) "Authorizing official" means Service officers or eployees duly designated by the Director, Bureau of Health Care Delivery and Assistance, to authorize and provide care and treatment to beneficiaries at Service expense.

3. Section 32.6 is amended by removing paragraph (c) and revising paragraphs (a) and (b) to read as follows:

§ 32.6 Persons eligible.

(a) Under this part the following persons are entitled to care and treatment by the Service as hereinafter prescribed:

(1) Persons afflicted with Hansen's disease; and

(2) Non-beneficiaries for temporary treatment and care in cases of emergency.

(b) Separate regulations govern: (1) The medical care of certain personnel, and their dependents, of the Coast Guard, National Oceanic and Atmospheric Administration, and Public Health Service (see Part 31 of this chapter);

(2) Physical and mental examination of aliens (see Part 34 of this chapter); and

(3) Medical care for Native Americans (see Part 36 of this chapter).

§§ 32.11 through 32.76 [Removed]

4. Sections 32.11 through 32.76 are removed.

§§ 32.86 through 32.91 [Authority citation removed]

5. The authority citation appearing under the undesignated heading "Persons With Hansen's Disease" and before the text of §§ 32.86 through 32.91 is removed.

§ 32.106 [Removed]

6. Section 32.106 is removed.

[FR Doc. 83-6333 Filed 3-10-83; 8:45 am]
BILLING CODE 4160-16-M

---

42 CFR Part 51b

Project Grants for Preventive Health Services and Grants for Influenza Immunization Programs

AGENCY: Centers for Disease Control, Public Health Service, HHS.

ACTION: Removal of regulation.

SUMMARY: The Public Health Service (PHS) amends its regulations at 42 CFR Part 51b by removing Subpart E governing Grants for Influenza Immunization Programs. These programs formerly were authorized under Section 317 of the PHS Act. Changes in legislation in 1981 eliminated authority for influenza immunization programs. Therefore, the regulation is obsolete and should be removed.

EFFECTIVE DATE: The removal is effective on March 11, 1983.

FOR FURTHER INFORMATION CONTACT: Anthony M. Scardaci, Associate Director, Center for Prevention Services, Centers for Disease Control, 1600 Clifton Road, N.E., Atlanta, Georgia 30333, telephone (404) 329-3773 or FTS: 236-3773.

SUPPLEMENTARY INFORMATION: Subpart E, Grants for Influenza Immunization Programs, was published as an interim final rule on November 14, 1978 (43 FR 52707) in accordance with the then-existing section 317(g)(1)(C) of the PHS Act, which authorized appropriations for disease control programs other than programs for which appropriations were specifically authorized. This authority was utilized by Congress to appropriate funds for influenza programs in the second supplemental appropriation for 1978, approved September 8, 1978. Funds have not been appropriated for influenza immunization programs since 1978.

Section 317 of the PHS Act was subsequently amended by the Omnibus Budget Reconciliation Act of 1981 (Pub. L. 97-35 approved August 13, 1981). Section 928 of Public Law 97-35 eliminated the authority to appropriate funds for influenza immunization programs.

Due to changes in legislation, the current regulations are obsolete and should be removed. For this reason, the Secretary has determined that this final rule revoking an existing rule is not a "major rule" under Executive Order 12291. Further, because this rule does not have a significant economic impact on a substantial number of small entities, a regulatory flexibility analysis under the Regulatory Flexibility Act of 1980 is not required.

PART 51b—[AMENDED]

Subpart E—[Removed and reserved]

Part 51b of Title 42, Code of Federal Regulations, is amended by removing Subpart E, §§ 51b.501 through 51b.506.

List of Subjects in 42 CFR Part 51b

Communicable diseases, Immunization.

Dated: January 31, 1983.
Edward N. Brandt, Jr.,
Assistant Secretary for Health.

Approved: February 22, 1983.
Thomas R. Donnelly, Jr.,
Acting Secretary.

[FR Doc. 83-6331 Filed 3-10-83; 8:45 am]
BILLING CODE 4160-18-M

Centers for Disease Control

42 CFR Part 65

Fees for Direct Training—Centers for Disease Control

AGENCY: Centers for Disease Control, Public Health Service, HHS.

ACTION: Revocation of regulation.

SUMMARY: The Public Health Service revokes its regulation in 42 CFR Part 65 on direct training fees. The current regulation provides that the Centers for Disease Control may waive the fee requirement when such waiver is judged to be in the public interest. Changes in legislation in 1976 created separate authority for charging such fees and made the waiver provisions unnecessary, thus making the current regulation obsolete and requiring its revocation.

EFFECTIVE DATE: March 11, 1983.

FOR FURTHER INFORMATION CONTACT: Seth N. Leibler, Ed. D., Acting Director, Center for Professional Development and Training, Centers for Disease Control, Atlanta, Georgia 30333, telephone (404) 262-6671 or FTS: 236-6671.

SUPPLEMENTARY INFORMATION: Section 311(b) of the Public Health Service Act (42 U.S.C. 243(b)) authorizes the Secretary of Health and Human Services to train State and local health workers. Under this authority, technical training historically has been provided by the Centers for Disease Control (CDC) to help ensure that health workers

throughout the country possess the necessary skills and knowledge to achieve the objectives of disease prevention and control programs.

In 1973, the Office of Management and Budget ruled that tuition should be paid by persons attending CDC training courses. Under the authority of 31 U.S.C. 483a, a notice was published in the **Federal Register** on June 25, 1973 (38 FR 16658), to amend Subchapter E of Chapter I, Title 42, by establishing a new Part 65 which set forth a fee policy and a fee schedule for training conducted by CDC. Interested persons were invited to participate in the rulemaking through the submission of comments.

In response to these comments, a waiver procedure for States was included in the final rule published in the **Federal Register** on October 12, 1973 (38 FR 28290). The waiver procedure required a written request for waiver of fees on the basis that such training was in the public interest.

Legislation in 1976 created a specific authority to charge for training fees and made the waiver provision unnecessary. Section 202(c) of Public Law 94–317, Disease Control Amendments of 1976, approved June 23, 1976, amended Section 311(b) of the PHS Act to provide that "The Secretary may charge only private entities reasonable fees for the training of their personnel * * *." Furthermore, the subsequent appropriations bills have contained language stating "* * * That training of employees of private agencies shall be made subject to reimbursement or advances to this appropriation for the full cost of such training." See Department of Labor and HEW Appropriations Act, 1977; Public Law 94–439; 90 Stat. 1422; approved September 30, 1976; and Department of Labor and HEW Appropriations Act, 1979; Public Law 95–480; 92 Stat 1572; approved October 18, 1978; together with the various continuing resolutions.

In accordance with the 1976 amendment to Section 311, the waiver provisions are not applicable, since CDC now charges fees to all private agencies and does not charge fees to State and local Government agencies. Also the charging of fees is now done under the authority of Section 311, rather than under 31 U.S.C. 483a, which had required regulations.

Due to changes in legislation, the current regulations are obsolete and should be removed. For this reason, the Secretary has determined that this final rule revoking an existing rule is not a "major rule" under Executive Order 12291. Further, because this rule does not have a significant economic impact on a substantial number of small entities, a regulatory flexibility analysis under the Regulatory Flexibility Act of 1980 is not required.

Bureau of Land Management

43 CFR Public Land Order 6363

[NM 55270]

New Mexico; Restoration of Lands to Ownership of the Caddo and Delaware Tribes; Oklahoma

AGENCY: Bureau of Land Management, Interior.

ACTION: Public Land Order 6363.

SUMMARY: This action will terminate the withdrawal of 15 acres of ceded public lands and restore them to the ownership of the Caddo and Delaware Tribes.

EFFECTIVE DATE: March 11, 1983.

FOR FURTHER INFORMATION CONTACT: Delores L. Vigil, New Mexico State Office, 505–988–6659

SUPPLEMENTARY INFORMATION:

By virtue of the authority contained in Section 3 of the Act of June 18, 1934, 25 U.S.C. 463, and pursuant to the recommendations of the Tribal Council and the Acting Assistant Secretary of Indian Affairs, and a finding by the Secretary of the Interior that such action is in the public interest, it is ordered as follows:

The following described lands, ceded by the Caddo and Delaware Tribes of Indians to the United States pursuant to agreement ratified by the Act of March 2, 1895, 28 Stat. 876,896, having been reserved for use by the Bureau of Indian Affairs for school, agency, cemetery and administrative purposes and not needed for such uses, are hereby restored to tribal ownership for use and benefit of the Caddo and Delaware Tribes of Indians and are added to and made a part of the existing reservation, subject to valid existing rights:

Indian Meridian

T.8 N., R.10 W.,
sec. 34, W½NE¼NE¼NW¼NW¼ and S½NW¼NE¼NW¼NW¼ and SE¼NW¼NW¼NW¼ and SW¼NE¼NW¼NW¼ and NW¼SE¼NW¼NW¼ and N½NE¼NE¼NW¼.

The area described aggregates 15 acres in Caddo County.

Inquiries concerning the lands should be addressed to the Bureau of Land Management, P.O. Box 1449, Santa Fe, New Mexico 87501.

Garrey E. Carruthers,

Assistant Secretary of the Interior.

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 69

[CC Docket No. 78–72; FCC 82–579]

Access Charges; MTS and WATS Market Structure

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: FCC, pursuant to the Fourth Supplemental Notice of Inquiry and Proposed Rulemaking published on June 21, 1982, at 47 FR 26668, adopts rules for the computation and assessment of end user and carrier's carrier access charges and the creation of an exchange carrier association to prepare access charge tariffs and distribute pooled access charge revenues. The Commission concluded that this action was necessary because existing methods of access compensation produce unlawful discrimination and preferences in interstate rates. These rules were designed to eliminate such unlawful discrimination and preferences.

EFFECTIVE DATE: March 12, 1983.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Albert Halprin, Chief, Policy and Program Planning Division, Common Carrier Bureau, Federal Communications Commission, Washington, D.C. 20554 (202) 632–9342.

I. Introduction

A. Outline of the Plan

1. When this Commission initiated this proceeding to determine an optimal market structure for the MTS–WATS market, we concluded that it would also be necessary to prescribe the compensation that exchange carriers should receive for the origination or termination of all interstate and international services of all carriers. We recognized that it would be impossible to determine "access" compensation for services of carriers that compete with MTS or WATS without correcting existing disparities in access compensation among services offered by AT&T and its telephone company partners.

2. We subsequently invited comments upon a tentative plan for carrier's carrier access charges that would allocate exchange plant costs among four service categories on the basis of relative use. We hoped that such a plan would eliminate discrimination or preferences in rates that were charged to end users of all services that we regulate. Comments in this and other proceedings and other developments led us to conclude that the tentative plan would not produce a correct solution to the discrimination problem. The recovery of fixed costs through usage charges produces discrimination among MTS users that is a primary cause of the inter-service disparities. The comments in this proceeding reveal a fairly broad consensus that this is the case.

3. We have accordingly concluded that a substantial portion of fixed exchange plant costs that are assigned to interstate services should ultimately be recovered through flat per line charges that are assessed upon end users. We are adopting access charge computation rules that will accomplish that result.[1] Those rules incorporate exceptions for pay telephones, the portion of a local dial switch that is sometimes described as non-traffic sensitive, and "private line" facilities used for services that are not close substitutes for MTS. Certain other fixed costs assigned to interstate services for customer premises equipment, inside wiring, and a Universal Service Fund will not be recovered through end user charges and will continue to be recovered through carrier's carrier charges. The Universal Service Fund will be designed to preserve universal service by enabling high cost local exchange companies to establish local exchange rates that do not substantially exceed local exchange rates charged by other local exchange companies.

4. A transitional plan is necessary for several reasons. Immediate recovery of high fixed costs through flat end user charges might cause a significant number of local exchange service subscribers to cancel local exchange service despite the existence of a Universal Service Fund. Such a result would not be consistent with the goals of the Communications Act. Some transitional adjustments are also necessary to avoid anomalous effects of existing disparities in interstate costs in different areas and to establish access charges for competing carriers that reflect existing inequalities in the quality of access arrangements. The transitional plan will also enable us to adjust rules in the future if unexpected developments demonstrate that changes are warranted.

5. This combination of factors has led us to adopt rules that incorporate two transitions. Some fixed costs in addition to any high cost or Universal Service Fund costs will be recovered through carrier's carrier charges during a 5-year transition period. A substantial portion of those costs will initially be assessed to AT&T as a charge for premium access. The remaining costs will be assessed to end users and will be recovered through a combination of usage and flat charges during a 7-year transition period. Before the end of the fifth year of the 7-year transition, we will evaluate the rules and policies adopted in this *Report and Order* and, if necessary, will make adjustments needed to promote the expressed goals of this proceeding. A minimum charge will be assessed upon all end users. The remainder of the costs may be recovered through usage charges until the usage charge for any line equals a cap or maximum. We are giving the exchange carriers considerable discretion to devise a combination of minimum, usage and maximum charges. This will give the carriers discretion as to how rapidly to phase in flat charges. It will enable carriers to respond quickly to any bypass threat where this is a problem, while allowing for a more gradual phase-in where it is not. We are, however, imposing some limits upon carrier discretion. A minimum charge cannot be less than $2 per month for residential customers and $4 per month for business customers and the business minimum cannot exceed 200% of the residential minimum. Maximum charges will assure that customers do not pay more through end user charges for interstate use of a line that is used for local exchange and interstate services than they would pay for a line that is dedicated to a particular interstate service.

6. We are also prescribing rules for the computation of carrier's carrier

[1] The rules are contained in Appendix A. Appendices B and D list persons who filed comments in response to the *Second* and *Fourth Supplemental Notices*. Appendices C and E contain summaries of those comments. Appendix F contains supplemental information with respect to the "bypass" phenomenon and Appendix G contains supplemental information with respect to the universality of service.

charges for access services other than exchange plant. Although the tentative plan we described in 1980 would have limited the definition of access to facilities that are used in common by exchange and interexchange services, we have expanded the definition of access to correspond with the *Modified Final Judgment* in the AT&T antitrust case.[2] We have established nine different elements for such carrier's carrier changes and are prescribing rules for the computation of each element charge that are tailored to the nature of each service. We have established two elements for the use of local dial switches, three elements for operator services, and two elements for other switching and transmission facilities. We have also established a Billing and Collection element and a Special Access element that consists primarily of the use of a variety of "private line" facilities.

7. We have decided that we should neither compel all exchange carriers to join in pooled uniform charges for all access elements nor permit unrestricted deaveraging. We are mandating the creation of an exchange carrier association that will collect and distribute the carrier's carrier portion of the non-traffic sensitive charges and file tariffs and administer revenue pools for companies that choose to join in the association's common tariffs for other access elements.

8. We are directing AT&T to prepare the initial association tariffs in order to ensure that access charges will be in place on January 1, 1984.

B. Background: The Origins and Purpose of the Access Charge Proceeding

9. This proceeding began in February, 1978 with the issuance of a *Notice of Inquiry and Proposed Rulemaking* (the *"Initial Notice"*), 67 FCC 2d 757 (1978), to determine the MTS–WATS market structure that would best serve the public interest. To resolve this fundamental question, we have issued four subsequent notices of inquiry.[3] Each represented a refinement in our understanding of the issues requiring resolution. In the *Third Supplemental Notice*, we concluded that a general policy of open entry in the domestic MTS/WATS market, including Hawaii, would be in the public interest. While tentatively reaching the same conclusion for the Alaska submarket, we decided to give further consideration to issues relating to that submarket. In light of the conclusions reached in the *Third Supplemental Notice*, we determined that future proceedings in this docket would be restricted to consideration of two issues. In Phase I of the docket, we would develop a system of access charges by which local telephone companies would receive compensation for the use of their plant to complete competitive interstate telecommunications offerings. In Phase II we would determine the appropriate market structure for MTS/WATS in the Alaskan submarket.

10. We recently resolved Phase II of the docket by affirming our tentative conclusion that an open entry policy in the Alaskan interstate MTS/WATS market would be in the public interest. *See Second Report and Order* in CC Docket No. 78–72, FCC No. 82–515, released November 30, 1982. Today we resolve Phase I by adopting rules that will determine the rates interexchange carriers and end users will pay for access to local telephone company facilities used to complete interstate service offerings. We believe that through these rules we shall achieve the competitive market structure that is the explicit goal of both this proceeding and of the MFJ.

11. As we have noted above, this phase of the proceeding was instituted to determine, first, whether the existing methods of compensation for exchange plant used in interstate telephone service should be replaced by a tariffed access charge framework and, second, if so, what the structure of such tariffs should be. The entry of the MFJ has effectively mooted the first question. Currently, approximately 80% of revenues for this plant are covered by the Bell System's Division of Revenues process. This private contractual agreement has transferred revenues of almost $7 billion per year within the Bell System. On the date of divestiture, the system will no longer exist. The MFJ requires the termination of this system and its replacement by a generalized tariffed offering of access service.

12. While it would theoretically be possible to maintain the private settlements mechanism (which is equivalent to the Division of Revenues plan) to compensate non-Bell telephone companies, we believe that, even absent this *Report and Order*, some generalized access charge tariff scheme would result. We now decide that the public interest requires that the basic structure of such access tariffs be set by this Commission. We expect access tariffs to be filed in 1983 and require that such access tariffs be in conformance with the rules adopted herein.

13. The plan described in this *Report and Order* is, of course, limited to basic, or regulated, services. The plan is also limited to interstate and foreign services subject to our jurisdiction. We have assumed, for purposes of the proceeding, that the existing *Separations Manual* correctly identifies the costs assignable to those interstate and foreign services. Some commenting participants, *e.g.*, Satellite Business Systems, have argued that non-traffic sensitive access costs should no longer be allocated between the intrastate and interstate jurisdictions. They propose that a single charge should recover the entire revenue requirement associated with non-traffic sensitive facilities. They claim that such a charge should fall within Federal jurisdiction, despite the Supreme Court's decision in *Smith* v. *Illinois Bell Telephone*, 282 U.S. 133 (1930). In this proceeding we need make no determination as to whether *Smith* requires jurisdictional separations of NTS plant. As we said in the *Fourth Supplemental Notice*, 90 FCC 2d at 154, it is the separations process that determines what costs must be recovered from the interstate jurisdiction by means of an access charge. That process is currently being investigated by a Joint Board and is beyond the scope of this docket. In the *Order Requesting Further Comments* ("Joint Board Order" hereinafter), the Joint Board specifically invited parties to comment on whether separation of NTS costs by jurisdiction is required, and on the desirability of a discretionary assignment of 100 percent to either jurisdiction.[4] 47 Fed. Reg. 54479, 54517 (December 3, 1982).

14. Finally, we have limited our consideration here to the provision of that portion of interstate and foreign service which we consider to be "access" service. We had earlier used the term "access" to describe the use of certain exchange plant necessary to originate and terminate interexchange services. We have, however, decided to expand the scope of our access charge

[2] *See* Modified Final Judgment in United States v. American Telephone and Telegraph Co., Civil Nos. 74–1698 and 82–0192, —— F. Supp. ——, 47 Fed. Reg. 40, 392 (D.D.C. 1982), (hereinafter "MFJ").

[3] Supplemental Notice of Inquiry and Proposed Rulemaking ("First Supplemental Notice"), 73 FCC 2d 222 (1979), Second Supplemental Notice of Inquiry and Proposed Rulemaking ("Second Supplemental Notice"), 77 FCC 2d 224 (1980); Report and Third Supplemental Notice of Inquiry and Proposed Rulemaking ("Third Supplemental Notice"), 81 FCC 2d 177 (1980); and Fourth Supplemental Notice of Inquiry and Proposed Rulemaking ("Fourth Supplemental Notice"), 90 FCC 2d 135 (1982).

[4] A decision to assign 100% to either jurisdiction would, of course, require changes in the access charge rules we are adopting.

rules to conform to the boundaries established by MFJ. In the *Fourth Supplemental Notice* we suggested that it might be desirable to expand our access charge plan to encompass all services or facilities that will be included in access charges of the divested Bell Operating Companies ("BOCs") and invited "interested persons to submit suggestions for accomplishing that purpose." 90 FCC 2d at 153. We have concluded that such a course would be desirable because disparities would be likely to arise in the future if independent telephone companies and the undivested BOCs [5] are compensated through some other mechanism for services or facilities that are included in divested BOC access charges. The access rules we prescribe will therefore cover all services and facilities that are classified as exchange access for purposes of the MFJ. We are, however, adopting less detailed rules for the computation of charges for access elements that we might have excluded from our plan if the MFJ did not exist. For non-access interstate facilities and services, we have assumed that any questions concerning apportionment or allocation will be resolved in the *Interim Cost Allocation Manual* or a successor to that *Manual*.[6]

15. Although Phase I of this docket is a part of a larger proceeding to determine and encourage an optimal structure for a market that includes MTS and WATS, we have not limited this phase to the apportionment of access costs among competing interexchange carriers. The *Initial Notice* said that we expect to prescribe "divisions" for all interstate services of all carriers. 67 FCC 2d at 759.

16. We reiterated this view in the *Second Supplemental Notice*. We explained that subsequent events had confirmed our preliminary conclusion that it will not be possible to establish access compensation for the MTS–WATS equivalent services of the new interexchange carriers without correcting existing disparities in access compensation that is paid directly or indirectly by users of services offered by the telephone company partnership. AT&T had proposed access charges for MTS–WATS equivalent services that purported to establish parity with the access compensation for MTS and WATS that the BOCs receive through the Bell System division of revenues process. Carriers that provided the MTS–WATS equivalent services claimed that the proposed charges would create unlawful discrimination because the charges would be much higher than the charges that customers of Foreign Exchange ("FX") service pay for access service at the foreign exchange or "open" end. Those carriers alleged that the access they received was identical with the access FX customers received. The affected carriers eventually entered into an agreement known as "ENFIA" that established an intermediate rate for MTS–WATS equivalent (or "Execunet/SPRINT type") access for an interim period.[7] This Commission concluded that allowing the negotiated rate for an interim period would serve the public interest.

17. The *Second Supplemental Notice* concluded (77 FCC 2d at 230–231):

> The history of the ENFIA negotiations demostrates that it would be impossible to prescribe any charges for the origination and termination of services that are functionally equivalent to MTS or WATS without determining the appropriate relationship among origination and termination services for MTS–WATS, functional equivalents of MTS–WATS, and FX–CCSA open ends. That history also indicates that there is no basis for assuming that the present relationship is appropriate.

18. That *Notice* also concluded that "the discrimination problem" is not confined to differences in access compensation among MTS, WATS, FX, CCSA and MTS–WATS equivalent services and described a tentative access charge plan that included the origination and termination of private line services. *Id.* at 231. Some comments that were filed in response to the *Second Supplemental Notice* questioned the inclusion of private line services other than FX and CCSA in an access charge plan.[8]

19. Private line services are not as distinct from an engineering or an economic perspective as they are sometimes perceived to be. A private line between two customer locations is normally routed in much the same manner as are telecommunications that use the switch that is used also for local exchange service. The access portion of the private line service consists primarily of the provision of lines or loops that connect a customer terminal with the interexchange portion of the facilities. The exchange carrier uses the right-of-way that it was granted for the purpose of providing local exchange service to place that line between the customer location and the interexchange facility.

20. Private line and message services not only employ similar facilities, but are also frequently used by customers to satisfy the same telecommunications needs. The interchangeability factor necessarily requires that at least some private line access service be included in an access compensation scheme that is designed to establish parity among all services that are reasonably interchangeable with MTS. We have specifically established such parity with MTS for the "open end" of FX and CCSA services.

21. It would be possible to distinguish private line service that is a close substitute for MTS from private line service that is not. We could possibly accomplish our original purpose by limiting access charge rules to access for MTS, WATS, MTS–WATS equivalents, FX, CCSA and other private line service that is a close substitute for MTS, limiting the scope of access to the use of equipment, facilities, or right-of-way used in common with local exchange services.

22. As already noted, however, we have decided, in response to the MFJ, to expand the scope of access to include all tariffed services and facilities that the BOCs will provide for the origination or termination of interstate calls. The decree definition of access service—and thus the conforming definition of access service relied upon in this *Report and Order*—includes some services and facilities that we might exclude in designing access charges for the sole purpose of establishing parity among MTS and all telephone company or "other" carrier services that are close substitutes for MTS.

23. The provision of an origination-termination service could be viewed as providing an interexchange carrier with access to exchange facilities. The service could also be viewed as providing an end user or subscriber with access to interexchange services through exchange facilities that interconnect with interexchange facilities.[9] The earlier notices in this

[8] *E.g.*, American Satellite Co. Comments, p. 7; ARINC reply, p. 9.

[9] When a divested BOC provides interstate access to another carrier, "interexchange" will usually be synonymous with a service that is described as inter-LATA for purposes of the MFJ and the "exchange" facilities will correspond to intra-facilities. The geographic scope of access services provided by other local exchange telephone companies may be different. Such differences are

proceeding viewed access services as services that a local carrier provides to a long haul carrier. These notices assumed that the local carrier would receive access compensation from a long haul carrier. Most of the earlier notices assumed that a carrier's carrier charge would be the mechanism for access compensation. The *Fourth Supplemental Notice* invited comment upon some additional alternatives that could result in a combination of end user and carrier's carrier charges. We have decided to prescribe such a combination. Terms such as access, access service and access charges will be used in this *Third Report and Order* to encompass both end user and carrier's carrier charges.

24. The inequities between existing forms of compensation for the identical use of such access plant by different interstate services make these forms an inappropriate model for the development of access tariffs. We have decided that a single, uniform and nondiscriminatory structure for interstate access tariffs covering those services that make identical or similar use of access facilities is required by the Communications Act. While we have provided considerable flexibility for telephone companies within our access rules, we believe that the development of the competitive interstate telecommunications market requires certain uniform principles covering both BOC and independent telephone company access tariffs.

25. The amount of money that will have to be recovered through the access tariffs is immense. The revenue requirement for interstate NTS exchange plant alone will be approximately 8.5 billion dollars in 1984, the first year of our plan. An additional amount of approximately 2.5 to 3 billion dollars will be required to recover the costs of traffic sensitive plant for the first year. Based upon the assumption that 100 million lines will be in use in 1984 (as assumption we consider to be reasonably accurate), this translates into a total revenue requirement per access line of approximately $8.50 per month for NTS costs and $3.50 to $3.00 per month for traffic sensitive costs. In its first year the plan would assign $4.00 per line per month or $4.3 billion overall in interstate NTS costs to be recovered directly from the end user by his or her local telephone operating company. Of this amount a minimum of $2.00 for residential subscribers and $4.00 for business subscribers would have to be recovered through the use of a flat charge. The remainder of the $4.00 per line revenue requirement could be recovered, at the carrier's option, through traffic sensitive charges. The maximum amount that could be charged any customer directly would be no greater than the interstate costs of obtaining a private access facility dedicated to interstate use. NTS costs over $4.00 per line—approximately $4.2 billion—will continue to be collected in the first year of the plan through carrier's carrier charges. Of this amount, $1.4 billion will be paid by AT&T and its partners in the form of a charge for premium access.[10] The costs related to the Universal Service Fund, terminal equipment (CPE) ($1.4 billion in 1984) and inside wiring ($1.6 billion in 1984) will either be removed from the carrier revenue requirement through deregulation or will continue to be paid in subsequent years through carrier's carrier charges. The remaining amount collected through a carrier's carrier charge in the first year plus any additional amounts added in subsequent years will be converted to customer charges over a five year periiod. Over the same five year period the maximum end user charge that may be charged any specific customer for interstate access for message service will be reduced at the rate of 10% per year.

26. The plan is designed to move swiftly and surely from the present reliance on additions to the price of interstate toll minutes as the mechanism for recovery of these costs towards a pricing plan which recognizes that non-traffic sensitive costs covering plant dedicated to individual end users neither increase nor decrease as a result of usage made of that plant. We are taking this important step because we view this new direction as the only means of satisfying our goals of universal service, nondiscrimination, network efficiency, and prevention of uneconomic bypass.

27. Economics teaches us that, except in certain circumstances involving market failure, prices equal to the cost of producing another increment of a good, i.e., equal to the marginal cost of production, are optimal.[11] Provision of telephone services involves two marginal costs. One varies with the traffic level. The other varies with the number of access lines demanded. For this reason, efficient pricing requires both usage sensitive and non-usage sensitive charges for recovery of access costs.[12]

28. The cost imposed upon the nation's telecommunications system, and ultimately upon the general public, by our present usage sensitive method of recovering these NTS costs pose a substantial danger to the long term viability of our nation's telephone systems. New technologies and radical improvements in older technologies make available alternatives to the traditional telephone network. Telecommunications is substitutable for a wide variety of other goods and services produced by our society. Prices based upon the true cost characteristics of telephone company plant are necessary both to make a decision on whether use of the alternative technologies is appropriate and to make a decision on whether to substitute telecommunications for other activities.

29. As telecommunications plays a larger and larger role in fundamental U.S. industries, the problems resulting from inapproporiate pricing grow. Computer technology and communications have grown so similar that the Commission has redrawn its traditional definition of communications.[13] Access pricing that does not reflect cost can turn computer technologies from directions that would enhance the productivity of this essential U.S. industry and all of the industries that depend on computers and communications toward simple avoidance of non-cost based telecommunications prices. Investment may be misdirected as a result.

30. The possibility of users, particularly the nation's largest telecommunications users, abandoning the network for less efficient alternatives, *i.e.*, "uneconomic bypass", has been cited by many participants as a major justification for the movement

---

most likely to be reflect in the access element we have described as Common Transport. The formula we have adopted for the computation of access charges will enable carriers to devise charges for the "common transport" that a particular carrier provides. Adapting access charge rules to access service that a divested BOC provides to itself or another carrier for an intra-LATA transmission that is interstate for purposes of the Communications Act may require a special approach. We have decided that it would not be appropriate to establish guidelines for such situations before a final detrmination of LATA boundaries.

[10] Some independent telephone companies will continue to participate in joint rate offerings with AT&T after access charges become effective. Therefore, the premium will in fact be paid by an interexchange partnership. Section 69.307 describes that partnership as "the carriers that offer MTS and WATS * * *."

[11] *See*, for example, Francis M. Bator, "The Simple Analytics of Welfare Maximization," *The American Economic Review*, pp. 25–59, March 1957.

[12] *See also* P.R.G. Lazard and A.A. Walters, *Micro-Economic Theory*, McGraw-Hill Co., New York, 1978, p. 178.

[13] *See Amendment of Section 64.702 of the Commission's Rules and Regulations (Second Computer Inquiry)*, 77 FCC 2d 384 (1980) (Final Decision), *reconsideration*, 84 FCC 2d 50 (1980), *futher reconsideration*, 88 FCC 2d 512 (1981), *aff'd sub nom. CCIA v. FCC*, 693 F. 2d 198 (D.C. Cir. 1982).

toward cost based customer access charges. Bypass is a growing phenomenon.[14] We also recognize that the elimination of preferential rates covering NTS access plant for large users is certain to increase significantly the incentives of these users to bypass the local phone network. We could attempt to eliminate bypass through our facility authorization authority, but have determined that this is not a good solution. See Part III. A., *infra.*

31. Despite the uncertainty surrounding the precise size and threat of uneconomic bypass, a delay in the institution of a system of access charges that does not recover most fixed costs through usage rates is not justified. If we delayed making a change now, it is likely that circumstances would quickly force such changes upon us. In such a case, however, we would be unable to afford the luxury of the gradual transition needed to satisfy our objective of maintaining affordable service. Moreover, as a result of bypass, delay might mean higher long run costs for those who were required to remain on the network, and even for those who were able to use bypass services.

32. Moreover, were we to delay instituting the smooth movement towards a rational pricing system until a sufficient number of large users had initiated constructing alternative bypass systems, it could well be too late for any remedial action. Usually uneconomic bypass is uneconomic only before the construction of bypass facilities starts. Once a large telecommunications user has committed significant capital to building a private bypass system, the maintenance of that system is no longer uneconomic. Consequently, we believe that prompt action is essential to preserve the public interest.

33. We believe it is important to state explicitly that this decision does not, in any way, constitute a judgment that subsidizing the costs of basic telephone services for certain customers or for all customers is improper. Our decision is, rather, based upon the more limited judgment that an attempt to generate revenues for such subsidization through a permanent bundling of NTS costs into interstate toll rates would be a harmful and, ultimately, futile approach—one that could lead to the deterioration of a nationwide telephone network providing a variety of services to a wide variety of consumers.

34. In the *Second Supplemental Notice* we had described a plan for imposing usage based charges for access to the local network upon both private line and public switch services. We had first thought that such an approach would assure full, fair competition in the MTS/WATS market and also avoid unlawful preferences or discrimination between private line users and users of switched services. Comments filed in response to that *Notice* caused us to question whether the plan might have the fundamental flaw of encouraging heavy users of private line service to bypass the local network. Our concern has been heightened by the terms of the MFJ that require AT&T to divest itself of its operating companies (other than Cincinnati Bell and Southern New England). For the first time AT&T itself could have a significant incentive to bypass local exchange facilities if such bypass would be profitable.

35. Responding to these concerns, in the *Fourth Supplemental Notice* we introduced an alternative approach that we believed could achieve our primary goals of promoting competition and eliminating discrimination while avoiding the potential problems of the original plan. Instead of creating an access rate structure for private line services like the usage-base MTS/WATS rate structure, we considered the possibility of treating facilities used for access to the public switched network like private line facilities. Specifically, we discussed the possibility of assigning the costs of non-traffic sensitive subscriber plant directly to the customers using it. Thus the costs of private line facilities would continue to be directly assigned, removing one potential incentive for heavy users of such services to bypass local facilities. Every customer of interstate switched services would, however, pay a flat monthly charge reflecting the cost of the non-traffic sensitive subscriber plant dedicated to his use in connection with these services. The plan we adopt today will ultimately point toward this result. In order to avoid the adverse effects that could accompany such a departure from the traditional way in which end users have paid for their use of interstate services, the plan provides for the gradual introduction of these end user access charges. This plan, like the tentative plan of the *Second Supplemental Notice*, still imposes a carrier's carrier charge upon all interexchange carriers for the use of the remainder of local telephone company plant upon which they rely to complete their interstate service offerings.

II. Commission Authority To Adopt Access Charge Rules

36. Most comments that have been filed in response to the various notices we have issued in this proceeding do not discuss the scope of this Commission's statutory authority to prescribe access charges for the origination and termination of interstate and foreign services. Almost all of the participants have assumed that this Commission does have the power to prescribe some kind of access service compensation arrangement.

A. Section 201(a) Authority

37. After noting that the division of revenues and settlements "have traditionally been industry devised" (67 FCC 2d at 759), the *Initial Notice* said (*id.*) that "[i]t may be timely to exercise our jurisdiction under Section 201(a) of the Communication Act to establish the divisions of charges." The carriers that provide local exchange service receive most of their access compensation through the division of revenues and settlements procedures that have been devised to divide revenues from joint rate services among the members of the telephone company partnership. Section 201(a) authorizes this Commission to replace the industry-devised contractual arrangement with a Commission-devised formula.

38. Section 201(a) provides in pertinent part:

> It shall be the duty of every common carrier * * * in accordance with the orders of this Commission, in cases where the Commission, after opportunity for hearing, finds such action necessary or desirable in the public interest, to establish physical connections with other carriers, to establish through routes and charges applicable thereto and the divisions of such charges, and to establish and provide facilities and regulations for operating such through routes.

39. After received comments in response to the *Initial Notice* and considered filings that were provoked by AT&T's initial ENFIA taffif, we tentatively concluded that a system of carrier's carrier access charges should be established to replace the existing combination of carrier's carrier charges, end user charges, and contractual "divisions" and "settlements." That conclusion was announced in the *Supplemental Notice* and a tentative plan for carrier's carrier access charges was described in the *Second Supplemental Notice.*[15]

---

[14] Our staff has conducted a preliminary survey of the current status of bypass services. The results of that survey are set forth for informational purposes as Appendix F of the *Report and Order.*

[15] Several different methods have been used in the telecommunications and transportation industries to compensate participating carriers when two or more carriers participate in the transmission or transportation. The utlimate customer or end user

40. Western Union comments that were filed in response to the *Second Supplemental Notice* claimed that Section 201(a) cannot be invoked to replace carrier's carrier access charges with different carrier's carrier charges. Western Union noted that the term "divisions" is normally used to describe the division of joint rate revenues and that it does not maintain any joint rates with the telephone companies. We have concluded that Western Union's claim is incorrect because the language and history of Section 201(a) demonstrate that Congress used the term "divisions" in that particular provision to encompass any arrangement for the compensation of carriers that participate in a through service.[16] That term is at least broad enough to include carrier's carrier charges that compensate an exchange carrier for its participation in a through service that an interexchange carrier offers to the public.

41. Section 201(a) authorizes this Commission to prescribe "divisions" if we find that such action is "necessary or desirable."[17] We have concluded that it is necessary and desirable to establish access charges in lieu of existing access compensation arrangements in order to eliminate existing access compensation disparities and to prevent the development of disparities that might arise if a variety of access compensation mechanisms were used in the future.

B. Section 205 Authority

42. When we issued the *Fourth Supplemental Notice* that invited comments upon some alternative plans that included end user access charges, we expanded the list of Communications Act provisions we might invoke to include Section 205. Section 205(a) of the Act, 47 U.S.C. § 205(a), empowers this Commission to prescribe end user or carrier's carrier charges for any interstate or foreign service.

43. Although the rules we are adopting will not establish the precise charge for most access elements, we are establishing many of the steps that carriers must follow in order to compute access charges. Our Section 205(a) power to prescribe charges includes the power to prescribe steps in the computation of charges. We have exercised that power in the past in prescribing a rate of return that is to be used in computing charges and in prescribing an allocation of investment and expense among major service categories that is to be used in computing AT&T rates. Those actions were affirmed in *Nader* v. *FCC*, 520 F. 2d 182, 204 (D.C. Cir. 1975) and *MCI Telecommunications Corp.* v. *FCC ("ICAM")*, *supra*.

44. Section 205(a) provides in pertinent part that whenever "the Commission shall be of the opinion that any charge * * * is or will be in violation of any of the provisions of this Act, the Commission is authorized and empowered to determine and prescribe what will be the just and reasonable charge * * *." Thus, this Commission must find that existing charges are or will be unlawful and that the new methods for computing charges will be "just and reasonable" in order to prescribe methods for computing charges pursuant to Section 205(a).[18]

45. Paragraph 28 of the *Second Supplemental Notice* states that disparities in access service compensation "may also indirectly result in end user rates which violate Section 202(a) of the Communications Act * * *." 77 FCC 2d at 230. We refrained from using conclusory language in that paragraph in order to afford persons who might wish to defend the *status quo* an opportunity to do so before we made a final determination with respect to the legality of the existing combination of access service compensation arrangements. We are now prepared to make such a determination.

46. Section 202(a) provides:

> It shall be unlawful for any common carrier to make any unjust or unreasonable discrimination in charges, practices, classifications, regulations, facilities, or services for or in connection with like communications services, directly or indirectly, by any means, or device, or to make or give any undue or unreasonable preference or advantage to any particular person, class of persons, or locality, or to subject any particular person, class of persons, or locality to any undue or unreasonable prejudice or disadvantage.

47. The portion of Section 202(a) that prohibits "unreasonable discrimination" in connection with "like services" was derived from Section 2 of the original Interstate Commerce Act, 24 Stat. 379. Section 2 of the Interstate Commerce Act was designed primarily to eliminate rebates to favored shippers that produced different charges for the shipment of the same quantity of the same commodity at approximately the same time.

48. The portion of Section 202(a) that prohibits "undue" preferences was derived from Section 3(1) of the Interstate Commerce Act, 24 Stat. 380. Section 3(1) of that Act was designed to remedy disparities in rates to different points that did not reflect actual cost differences. Although Section 3(1) was designed primarily to remedy the locality discrimination problem, the prohibition also encompassed excessive rate differentials for different commodities and shipments of different quantities of the same commodity.

49. In view of the origin of Section 202(a) the unjust discrimination prohibition must be interpreted as imposing a heavy burden upon telecommunications carriers to justify any differential in rates for like services and the undue preference prohibition must be interpreted as imposing a duty upon carriers to maintain rational and reasonable differentials for unlike services.

---

could be billed separately for the service each carrier provides, but the end user usually pays one of the carriers and that carrier transmits money to the other carrier. The end user may pay a combination or end-on-end rate that is equal to the combined separate charges of the participating carriers. The end user may pay a joint rate and the carriers may divide joint rate revenues in accordance with an agreed or prescribed formula. Sometimes one of the carriers offers the service to the public and pays a charge to a connecting carrier for the use of the other carrier's facilities. We have used the term "carrier's carrier" charge to describe such an arrangement and have used the term "end user" to distinguish the ultimate user from a carrier or an enhanced service provider that obtains services as a customer of another carrier. The carrier's carrier charge arrangement produces essentially the same result as the remission of a "local" rate by a carrier that collected a combination rate charge. Changes in a carrier's carrier charge are not, however, automatically and instantaneously reflected in the rate that an end user pays.

[16] In *St. Louis Southwestern R. Co.* v. *United States*, 245 U.S. 135, 139 n.2 (1917), the Court defined "through route" as "an arrangement, express or implied, between connecting railroads for continuous carriage of goods from the originating point on the line of one carrier to destination on the line of another." The Court added (*id.*) "Through carriage implies a through rate. This 'through rate' is not necessarily a 'joint rate.' It may be merely an aggregation of separate rates fixed independently by the several carriers forming the through route * * *." The reports of the House and Senate Commerce Committees on bills that became the Communications Act of 1934 describe Section 201(a) as requiring carriers "to establish with other carriers physical connections, through routes, through rates, and divisions of through rates." Committee on Interstate Commerce, S. Rep. No. 781, 73rd Cong., 2d Sess., p. 4 (1934); Committee on Interstate and Foreign Commerce, H.R. Rep. No. 1850, 73rd Cong., 2d Sess., p. 5 (1934).

[17] *See United Telephone Co. of the Carolinas*, 54 FCC 2d at 289, 290 (1975), *Affirmed, United Telephone Co. of the Carolinas* v. *FCC*, 559 F. 2d 720 (D.C. Cir. 1977).

[18] Section 205(a) states that the prescription power may be exercised "after full opportunity for hearings, upon complaint or under an order for investigation and hearing made by the Commission on its own initiatives * * *." Notice and comment rulemaking proceedings are sufficient to satisfy that hearing requirement. *American Tel. & Tel. Co.* v. *FCC*, 572 F. 2d 17, 21–23 (2d Cir.), *cert. denied*, 439 U.S. 875 (1978). Such proceedings also satisfy the Section 201(a) hearing requirement. *Bell Telephone Co. of Pennsylvania* v. *FCC*, 503 F. 2d 1250, 1264–66 (3rd Cir. 1974), cert. denied, 422 U.S. 1026 (1975).

50. The existing access service compensation arrangements do not produce results that are consistent with those Congressional objectives. This is scarcely surprising in view of the manner in which those arrangements evolved. Neither the carriers nor the regulators viewed access service as a distinct service before this Commission ordered the telephone companies to provide access service to the new "specialized" carriers.[19] The preexisting access compensation arrangements were by-products of managerial or regulatory decisions that were made for some purpose other than fixing access service compensation. Access service compensation for the new carriers could not be fixed in a manner that established parity with each of the preexisting services offered by the telephone companies or the old "other" carriers.

51. Comments from the carriers that receive access service compensation generally acknowledge that there is no system. Although comments from some carriers and some end users that indirectly pay access service compensation claim that any discrimination or preference problem can and should be remedied without changing the access compensation for some services, none of the participants has attempted to demonstrate that there is any reasonable or rational relationship to justify the wide disparities among the charges for access that are directly or indirectly levied upon users of the various interstate services that might satisfy the requirements of Section 202(a). It is readily apparent that it would be impossible to do so. Indeed, the current methods of recovering costs of jointly used non-traffic sensitive subscriber plant for MTS, open-end FX, CCSA and WATS services and the ENFIA services are totally different and produce widely differing results even though each service uses the same plant in the same manner. The FX and CCSA services pay local exchange rates for open end access, the MTS/WATS equivalent services must pay the higher ENFIA rates, and MTS and WATS pay even higher access compensation through the settlements and divisions of revenues process. The level of the ENFIA charge has been negotiated to reflect a discount from the MTS access compensation. It was also designed to produce a rate that is higher than the local exchange rate paid by FX and CCSA customers. Since no one has attempted to justify the disparate rates charged for like access services in this proceeding, we must find them to be unlawfully discriminatory. Moreover, the access compensation differences among services that do use exchange plant differently bear little relationship to actual cost differences. In the absence of any justification for such rate disparities, we must also find that such disparities violate the prohibition of undue preferences. We accordingly conclude that the existing combination of access service compensation arrangements violates Section 202(a) of the Communications Act.[20]

52. Moreover, the existing access compensation arrangements produce results that conflict with Congressional goals other than the elimination of discrimination or preferences that are discussed in Subpart II.D, *infra*. Congress has conferred broad powers upon this Commission in Section 4(i) of the Act, 47 U.S.C. 154(i), to adopt orders and regulations to achieve those goals. Those powers would be sufficient to enable us to adopt the access charge rules we are adopting in this *Report and Order* apart from the powers conferred by Sections 201(a) and 205.[21]

53. We believe that the procedures for computing access charges that we are prescribing in this phase of this proceeding are "just and reasonable" or "just, fair and reasonable" for purposes of Section 205(a). Several comments that were filed in response to the *Second Supplemental Notice* urged us to consider the then recent decision in *MCI Telecommunications Corp. v. FCC*, 627 F. 2d 322 (D.C. Cir. 1980), in deciding how to proceed in prescribing new access service compensation arrangements. That court concluded that a Section 205(a) just and reasonable warranty does not require absolute certainty and precision. After noting that WATS tariffs had remained in effect for several years after this Commission concluded that AT&T had failed to demonstrate that existing tariffs are just and reasonable, that Court declared (*id.* at 340):

> [The Communications Act] assumes that rates will be finally decided within a reasonable time encompassing months, occasionally a year or two, but not several years or a decade. The standard of "just and reasonable" rates is subverted when the delay continues for several years. Rate making theories may change; new information may become relevant; one proceeding may have to take account of another. But there must be some reasonably prompt decisionmaking point at which the FCC says: "To the best of our knowledge and expertise at this time, the rates are just and reasonable. Perfect, perhaps not, but just and reasonable, yes." That is all the statute requires.

54. Thus, a prescribed rate is just and reasonable for purposes of Section 205(a) if it represents the best approximation of a rate that satisfies all statutory requirements that this Commission is capable of devising within a reasonable period of time. We proceeded on that assumption when we adopted an *Interim Cost Allocation Manual* for AT&T services that we described as "far from perfect." *Amer. Tele. and Tele. Co., supra*, 84 FCC 2d at 411. The Court of Appeals for the District of Columbia Circuit affirmed that exercise of our Section 205 prescription powers. *MCI Telecommunications Corp. v. FCC (ICAM), supra.*

55. The rules we are adopting in this order are designed in part as a replacement for ICAM allocations of exchange and certain interexchange plant costs. We believe that these rules represent a significant further improvement. In light of the Court of Appeals interpretation of the Section 205(a) warranty requirement, we can and do warrant that the rules for the computation of access charges and the allocation of access charge revenues that we are prescribing are "just and reasonable."[22]

---

[19] *See Specialized Common Carrier Services*, 29 FCC 2d 870, 940 (1971), *affirmed sub nom. Washington Utilities and Transportation Commission v. FCC*, 513 F. 2d 1142 (9th Cir.), *cert. denied*, 423 U.S. 836 (1975). See also *Bell System Tariff Offerings*, 46 FCC 2d 413 (1974), *affirmed sub nom. Bell Tel. Co. of Pennsylvania v. FCC, supra.*

[20] That conclusion is reinforced by the observations in a December 17, 1981 MCI filing. That filing was styled as a complaint, but could not be processed as a complaint because it was not directed at any existing tariff. We accordingly decided to incorporate that document as a comment in the access charge phase of this docket. *See Extension of ENFIA Agreement*, 90 FCC 2d 0, 9, n.3 (1982) *review pending sub nom. MCI Telecommunications Corporation v. FCC*, D.C. Cir. No. 82–1553. That MCI filing argued that "local exchange service" provided to business customers with PBXs, foreign exchange customers, WATS extension customers, Federal Telephone System customers, value-added carriers, domestic record carriers, international record carriers, time sharers and CCSA customers, was functionally identical to "local exchange service" provided to MCI. MCI requested that the Commission issue an order requiring that unlawful discrimination promptly be eliminated. As a result of this *Report and Order*, any discrimination among interstate services will be eliminated.

[21] In *Nader v. FCC, supra*, the Court observed (520 F. 2d at 203): The discretion that must be afforded the Commission in the exercise of its ratemaking power is enhanced by Section 4(i) of the Communications Act, 47 U.S.C. 154(i) (1970), which gives the Commission the power to issue such orders, not inconsistent with this chapter, as may be necessary in the execution of its functions.

[22] Our decision to adopt the ICAM at that time was based in part upon our desire to comply with the Court of Appeals schedule for the resolution of some questions relating to WATS tariffs. Similar considerations have caused us to conclude that we should not defer the adoption of access charge rules

C. Effect of Dual Regulation Upon Commission Powers

56. A number of participants have asserted that this Commission cannot prescribe particular types of access charges or cannot prescribe access charges at this particular time because such actions would intrude upon the jurisdiction or prerogatives of state regulatory commissions. One participant has even asserted that this Commission cannot prescribe interstate access charges of any kind because such power is vested in the state commissions.[22]

57. We believe the latter claim reflects a misconception with respect to the nature of jurisdiction to regulate interstate commerce. Any action of this Commission that establishes or prescribes charges for the origination and termination of interstate services cannot appropriately be described as a "preemption" of state regulation because such charges are appropriately within the federal jurisdiction, not state jurisdiction. Federal rate regulation began with the enactment of the Interstate Commerce Act in 1887. The creation of a federal commission to regulate interstate rail rates was prompted in part by the Supreme Court decision in *Wabash, St. Louis & Pacific Railway Co. v. Illinois,* 118 U.S. 557 (1886), that held that state legislatures and state commissions cannot regulate rates for interstate railroad shipments because such regulation is precluded by the Commerce Clause of the United States Constitution. The Interstate Commerce Act filled the gap in railroad regulation that was created by the *Wabash* decision. That Act was amended in 1910 to fill a similar gap in telecommunications regulation. The Communications Act of 1934 transferred jurisdiction to regulate interstate and foreign telecommunications rates from the Interstate Commerce Commission to this Commission.

58. The origination or termination of an interstate communication, including the use of a local loop between an end user's home or office and a local switch of a local exchange carrier, is necessarily a part of an interstate communication.[24] It is as much "in commerce" as the interexchange trunk that actually crosses a state line. If the *Wabash* principle is still applicable, the states would not acquire jurisdiction to regulate rates for such interstate access even if this Commission were abolished.

59. The Supreme Court's decision in *Smith v. Illinois Bell, supra,* supports this view of federal jurisdiction. In *Smith* the Court considered the validity of a state public utility commission prescription of telephone rates based on evidence that made no distinction between the interstate and intrastate uses of jointly used telephone property. The telephone companies and the regulators had been using a "board-to-board" separations methodology to determine toll and local exchange rates. The toll rates reflected transmission costs from one long distance switchboard to another. All the costs we have described as NTS and some of the traffic sensitive exchange plant costs were reflected in local exchange service rates. The Supreme Court concluded that the board-to-board method was improper. The Court said (*id.* at 148):

> The separation of the intrastate and interstate property, revenues and expenses of the company is important not simply as a theoretical allocation to two branches of the business. It is essential to the appropriate recognition of the competent governmental authority in each field of regulation.

60. We reject claims in some comments that the *Smith* decision in some way precludes this Commission from establishing any flat rates for interstate access.[25] The Supreme Court did not purport to determine whether state or federal commissions should mandate flat or usage rates or some combination of flat and usage rates for exchange or toll services. Such rate structure questions were not presented in that case and were not discussed in the opinion. The Court merely attempted to ensure that state or federal regulators do not exceed the limits of their respective powers when they determine economic and social policy questions that have been entrusted to their judgment.

61. The decision to exclude interstate access from local rates could have been implemented by including the interstate access costs in flat or usage rates regulated by federal regulators without violating any express or implicit directive in the *Smith* opinion. AT&T made the decision to recover the interstate exchange plant costs on a usage basis when it recomputed its interstate investment and expenses in 1943 to reflect some exchange plant costs in interstate MTS rates. It had always imposed distance-weighted usage charges upon MTS customers and did not change the pre-existing rate structure when some NTS costs were added to the MTS costs. The NTS exchange plant costs represented a relatively small part of interstate MTS costs at that time. Changes in relative costs and separations allocations during the intervening years have caused NTS costs to become a very significant part of MTS costs. No opinion of this Commission prior to the *Fourth Supplemental Notice* discusses legal, economic or policy implications of recovering the NTS portion of MTS costs through flat or usage charges. Thus, the inclusion of flat charges in an access charge plan does not conflict with precedent. It merely alters a carrier-initiated practice that appears to be the product of historical accident.

62. We accordingly conclude that this Commission's discretion to establish flat or usage charges or some combination of flat and usage charges for interstate access is not inconsistent with past court or Commission decisions.

63. Some comments have expressed the view that we are required to consult with state regulators though the Joint Board mechanism before we make any final decision to adopt an access charge plan.[26] We received extensive comments with respect to the appropriate role of a Joint Board in response to the *First Supplemental Notice*. We concluded in the *Second Supplemental Notice* that a Joint Board referral of questions with respect to interstate rates and the apportionment of interstate costs among interstate services would not be necessary or desirable. 77 FCC 2d at 236.

64. Most who claim that a Joint Board must or should be consulted claim that interstate access charges will affect jurisdictional separations.[27] Section

---

in order to achieve further refinements. The MFJ will cause the filing of BOC access charge tariffs that will become effective on the day of divestiture unless we reject or suspend the tariffs. The public interest would not be served if we allowed BOC access charge tariffs to become effective and implemented a significantly different methodology a few months later. We have decided that we should act now in order to establish Commission access charge rules that can be implemented at the beginning of 1984.

[25] *See* Kansas Corporation Commission, p. 8; California Public Utilities Commission, p. 3; Haviland Telephone Co., p. 6; NARUC Reply, p. 8; Roseville Reply, p. 4.

[26] *See* Kansas Corporation Commission Staff, pp. 1–2; Michigan Action Group, p. 6; NARUC, p. 4; Missouri Public Service Commission Staff, pp. 2–3; Michigan Public Service Commission, p. 4; California Public Utility Commission, p. 3; Rural Telephone Coalition, pp. 43–48; REA, p. 2; Haviland Telephone Co., p. 5; Utah Public Service Commission, p. 2; Ketchikan Public Utilities, pp. 3, 10; Rural Coalition Reply, p. 41; NARUC Reply, pp. 8–9.

[27] We are using the term "separations" to describe the process of apportioning investment and expense between the interstate and intrastate jurisdictions. We are not using the term "separations" to describe the divisions/settlements process that is described in the *Second Supplemental Notice. Id.* at 226–228.

410(c) of the Communications Act, 47 U.S.C. 410(c), requires that this — Commission obtain an Initial Decision of a Joint Board composed of three federal and four state commissioners before we adopt any change in separations rules.

65. The Missouri Public Service Commission Staff claims a Joint Board referral is mandatory because the implementation of access charges will affect the results that are produced by any separations formula. We do not believe Section 410(c) requires any Joint Board consideration of decisions that merely indirectly affect separations results. Every rate decision by this Commission or any state commission has some effect upon separations results. The regulatory processes would be paralyzed if consultation were required before a state or federal commission adopted any decision that affects separations results.

66. Most participants who say that interstate access charge questions should be referred to a Joint Board contend that the adoption of access charges rules will affect the final decision in the pending Docket 80-286 proceeding to reexamine separations rules for the apportionment of exchange plant. NARUC and the Rural Telephone Coalition even assert that the outcome of that proceeding will be "foreordained" by any decision to adopt rules for the computation of interstate access charges. *See* NARUC Reply, p. 9.

67. Such fears are unfounded. We have, of course, asked the Joint Board to consider consistency with access charges in formulating its recommendations for separations changes. *Amendment of Part 67 of the Commission's Rules*, 78 FCC 2d 837, 845 (1980).[28] We have also necessarily made some assumptions with respect to the likely outcome of the pending separations proceeding in order to devise access charge rules that can be implemented in 1984. These actions should not be interpreted as a final decision upon the part of this Commission with respect to questions in Docket No. 80-286 and should not be interpreted as inhibiting the discretion of the Joint Board in formulating its recommendations. If the final decision in that proceeding departs from our current assumptions in a manner that requires a revision of the access charge rules, we will, of course, revise the rules we are adopting in this *Report and Order*.

68. Some participants have recommended that we either refer access charge questions to the Docket 80-286 Joint Board or defer action on access charges until we make a final decision with respect to separations changes in order to avoid the possibility that access charge rules may have to be revised to fit unanticipated separations changes. We have concluded that such a course would not be desirable under the present circumstances because a delay of a few months in the adoption of access charges would not allow sufficient lead time to enable carriers to prepare access charge tariffs that can be filed on or before October 3.[29] If BOC access charges that are not based upon these rules become effective at the beginning of 1984 and radically different charges were substituted a few months later, we could expect considerable confusion and disruption. Such a scenario would be likely to create far greater problems than any changes that might be required to adapt access charges to fit unanticipated separations changes.[30]

69. Some participants have suggested that we refer access charge questions to a Joint Board because they hope that such a proceeding would produce a consensus among all regulators that would enable carriers to compute interstate and intrastate access charges in the same manner. It appears doubtful that such a consensus would emerge within a short period of time. Some participants have proposed alternative methods to achieve unified access charges. SBS has proposed that we preempt state regulation of intrastate access charges and others have suggested that we delegate responsibility for interstate access charges to the state commissions. We rejected somewhat similar suggestions when we adopted the *Second Supplemental Notice*. 77 FCC 2d at 232.

70. Unified access charges conceivably might be achieved without new legislation by assigning 100% of the exchange plant investment and related expenses to one jurisdiction or the other. Such a change in jurisdictional separations would, of course, have to be considered by a Joint Board in the first instance. The Joint Board has recently invited comments with respect to the legality and desirability of a 100% assignment of NTS costs in Docket 80-286. *See* para. 13, *supra*.

71. We believe there is reason to hope that a considerable degree of uniformity will in fact emerge even though this *Report and Order* does not require that state commissions follow this Commission's approach to charging for access. The same considerations that have led us to conclude that our plan is an appropriate strategy for reducing discrimination may lead many state commissions to reach similar conclusions. Moreover, all commissions will necessarily recognize that administrative efficiency is served when a single approach to structuring access charges for long distance use of local plant is adopted. State commissions that do not choose to recover all costs in precisely the same way will undoubtedly find many of our methodologies helpful. State commissions will also have an incentive to adopt end user charges because failure to adopt a similar approach to the recovery of non-traffic sensitive costs assigned to state toll would increase toll rate disparity.[31]

72. Our access charge plan for NTS plant is based upon the following four principles. First, it is important to move towards collecting these costs from customers rather than carriers and on a flat rather than on a usage sensitive basis. Second, it is important to accomplish the transition to flat rates in a smooth and measured way. Third, it is vital to ensure that the plan does not threaten the universal character of telephone service. Fourth, the plan should provide for sufficient flexibility so that telephone companies serving dramatically different service areas can adopt transitional approaches that best serve their unique areas.

73. While the precise timing and mechanics of our access charge plan are based upon the interstate telecommunications market, we believe that these same four principles can serve as the basis for appropriate and acceptable state access charge plans. Obviously, the precise minima, maxima and transition periods would reflect not only unique state usage characteristics but also the level of NTS assignment to state toll service. We stand ready to provide technical or other assistance to

[28] Part III of the *Joint Board Order* discusses possible separations changes to achieve consistency with access charges.

[29] Access charges must be filed on October 3, 1983, to provide a full 90 days notice before a January 1, 1984 effective date.

[30] Many decisions that affect the computation of access charges will, of course, be made in the separations proceeding. For example, the size of the Universal Service Fund, the characteristics of participating exchange carriers, and the formula that indirectly determines Fund distributions to particular local exchange carriers will be determined in Docket 80-286 after an Initial Decision of that Joint Board.

[31] Toll rate disparity describes the condition that occurs when, because of different ratemaking philosophies adopted by the federal and state jurisdictions and other factors, a call of given duration is priced at different levels depending upon whether it is intrastate or interstate. Toll rate disparity sometimes results in a price for a call to a city in the same state that is much higher than the price for a call to a more distant city in another state.

state commissions that wish to integrate their access charge plans with the interstate approach. This integration would also be appropriate, technically feasible and reasonable with respect to traffic sensitive plant.

D. Effect of Section 1 Upon Commission Discretion

74. Although we are establishing rules for the computation of interstate access charges in order to remedy discrimination and preferences that violate Section 202(a) of the Communications Act, we are also required to consider other policies in designing an appropriate remedy. A variety of different methods could be used to produce access charges that do not result in unreasonable discrimination or undue preferences. We must be guided by Congressional goals expressed in Section 1 of the Act, 47 U.S.C. 151, in choosing among such methods. We observed in the *First Supplemental Notice* that "[a]ll provisions of the Act must be read in the light of that statement of purpose." 73 FCC 2d at 230.

75. Section 1 provides in relevant part:

> For the purpose of regulating interstate and foreign commerce in communications by wire and radio so as to make available, so far as possible, to all people of the United States a rapid, efficient, Nation-wide, and world-wide wire and radio communication service with adequate facilities at reasonable charges, for the purpose of the national defense, for the purpose of promoting safety of life and property through the use of wire and radio communication, * * * there is hereby created a commission to be known as the "Federal Communications Commission," * * * which shall execute and enforce the provisions of this Act.

76. The *First Supplemental Notice* said (73 FCC 2d at 230):

> The reference to the rapidity and efficiency of service and the adequacy of facilities obviously means that Congress wanted to maintain and enhance the quality of communications services. The reference to reasonable charges demonstrates that Congress was also concerned with the level of rates and expected this Commission to follow policies which would minimize the cost of communications services to ultimate users. This concern with the cost and quality of service demonstrates that economic efficiency is one of the goals of the Act.

77. An efficient communication service could also be defined in a narrower sense as efficient utilization of a network that enables a carrier to provide service at the lowest possible unit cost. Customer choices that affect the utilization of a network are necessarily influenced by the rate structure. Therefore, the creation of customer incentives that will promote efficient network utilization necessarily must be one of the objectives of any rate structure proceeding.

78. The bypass phenomenon that we discussed in the *Fourth Supplemental Notice* can be viewed as a network utilization problem. Diversion of traffic to bypass facilities that are in fact more costly than the access facilities provided by the local exchange telephone companies obviously would not promote efficient utilization of telecommunications facilities. Therefore, we concluded that discouraging uneconomic bypass must be one of the criteria for the design of an access plan.

79. The *Fourth Supplemental Notice* identified a fourth objective in addition to eliminating discrimination or preferences, promoting efficient network utilization generally, and discouraging uneconomic bypass. We said that an access charge plan should be designed to "limit any substantial setback in the availability of telephone service" (90 FCC 2d at 147) and noted that some options could produce "an increase in the price of access to the public network, and a possible reduction in the subscriber base." *Id.* at 140.

80. Most participants who filed comments in response to the *Fourth Supplemental Notice* apparently agree that encouraging persons to subscribe to local exchange service must be one of the objectives of this proceeding. This is usually described as the "universal service" objective or goal. The term "universal service" has rarely been defined. Most participants apparently agree that "universal service" has existed on a nationwide basis for several years. In the context of this proceeding a "universal service objective" means avoiding actions that would cause a significant number of local exchange service subscribers to cancel that service.

81. Although interstate access charges will not have any effect upon local exchange service rates, a customer's decision to subscribe to local exchange service will necessarily be affected by the combined fixed charges that a customer must pay to access all services from a terminal in his own home or place of business. One could not describe every increase in fixed charges subscribers must pay for local, intrastate toll and interstate access as conflicting with a universal service objective. Such a conflict would arise only if the magnitude and timing of any increase in the fixed charges were sufficient to cause a significant number of subscribers to cancel service.[33]

82. Although most participants apparently agree that universal service is one of the goals of the Act, MCI has questioned the existence of such a statutory goal. Comments, p. 5, Reply, pp. 5–6. The term "universal service" does not appear in the Communications Act and the existence of a universal service goal may not be self-evident from the language Congress used to describe its purposes in Section 1.

83. The *First Supplemental Notice* noted that making service "available * * * to all the people of the United States * * * at reasonable charges" could mean that "Congress wanted to create conditions in which such services, or some of them, are 'affordable' to all." 73 FCC 2d at 231. We also said: "While this may be a credible interpretation of Section 1, it does not appear to be the only possible interpretation." *Id.* We have now concluded that the "available * * * to all" language does contemplate that telephone exchange service should be made available at reasonable rates. Such a universal service goal should also be inferred from the Congressional declaration that "promoting safety of life and property through the use of wire and radio communication" is one of the purposes of the Act. A subscription to local exchange service can be useful for safety purposes.

84. Many of the participants have argued that the relative universality of service affects the value of a telecommunications service for all users of a service. If some persons elected to cancel local exchange service, other customers would not be able to place local or long distance calls to those persons. Even if economic efficiency were the sole goal of the Act, a diminution of universal service might reduce economic efficiency in a broader sense.

85. In addition to those four objectives, we necessarily must consider the competitive effects of alternative rate structures. We concluded in the *Third Supplemental Notice* that a competitive interexchange market structure will further the goals of the Communications Act. If identical access services were offered to all competing interexchange carriers, we could assume that cost-based access charges will lead to an optimal interexchange market structure. This is not the case today and it will not be possible to remedy all inequalities in access service offerings before the initial access charges become effective. Therefore, preserving an

[33] Appendix G of this *Report and Order* describes and discusses past studies of the effect of rate increases upon demand for local exchange telephone service.

opportunity for fair competition during a transition period must also be viewed as an objective that will further the goals of the Act.

86. The relative priorities that should be afforded goals or factors that can be inferred from Section 1 is an open question. The priorities question was also discussed in the *First Supplemental Notice*. Paragraph 24 said (73 FCC 2d at 231):

> Some comments have suggested that we establish relative priorities in this Supplemental Notice which will be observed if some of the explicit or implicit goals of the Act conflict. It would be unwise to assign any priorities at this time. It seems unlikely that Congress intended to give priority to any particular goal under all conceivable circumstances. A public interest determination is necessarily a balancing process which requires the exercise of judgment, and different goals may take precedence depending on the facts of each case. Therefore, we shall wait until the facts have been developed in the record before we attempt to set priorities for goals in this case.

87. Although those observations related primarily to the entry policy question and a Section 214 public interest determination, we believe that a similar balancing process is required when we exercise our Section 201(a) power to establish through rate divisions or our Section 205 or Section 4(i) powers to prescribe steps in the computation of a charge.

88. An ideal access charge plan would eliminate all discrimination or preferences within or among services, create incentives for the most efficient utilization of all telecommunications facilities, discourage all uneconomic bypass, ensure that no local exchange service subscriber cancels that service, and establish full and fair competition in the interexchange services market. All of those objectives could not be fully accomplished simultaneously and immediately even if we had perfect knowledge. Therefore, we necessarily must exercise judgment and discretion in devising an access charge plan that takes all of those objectives into account.

89. Neither the language of the Act nor past court or Commission opinions preclude this Commission from striking a reasonable balance. On the contrary, Congress undoubtedly anticipated that an exercise of judgment would be required when he required when it declared that it was creating this Commission in order to achieve multiple purposes "so far as possible." Congress conferred broad discretion upon this Commission in order to enable us to fulfill that mandate.

III. Guidelines for Recovery of NTS Costs

A. Alternative Strategies For Reducing Discrimination

90. Exchange plant that an end user or subscriber would need in order to use any local or long distance service is often described as non-traffic sensitive or NTS plant because the cost of providing such equipment does not vary with usage. NTS encompasses all equipment that a subscriber would need to access the local exchange switch including terminals and other customer premises equipment, the protection block and drop wire and the line or loop between the customer's premises and a local exchange switch or a manual switchboard.

91. A portion of a local dial switch is also classified as non-traffic sensitive plant for separations purposes in order to segregate costs of terminating a line in the switch from the costs of switching. We proposed to include such costs in a non-traffic sensitive element in the tentative plan described in the *Second Supplemental Notice*. We subsequently asked a Joint Board to reexamine the classification of local dial switching equipment.[33] Inasmuch as that proceeding may produce new classifications we have decided that it would not be appropriate to include any local dial switching equipment in an NTS access plan at this time.

92. In order to achieve parity between interstate and international services that use the same subscriber line that is used for local exchange service and other services that are close substitutes for such services, an NTS plan must include comparable facilities that are used by such substitute services. Therefore, for purposes of this *Report and Order* NTS also includes portions of various lines on the customer's side of the class 5 or "end office" that are dedicated to a particular service. These include a WATS access line, an FX or CCSA "closed end" line, or a "private line" terminating in a PBX or other customer premises equipment that may be used for local exchange service. Our NTS plan does not encompass customer side dedicated lines that do not terminate in such equipment.

93. In the *Second Supplemental Notice* we presented a tentative plan to achieve parity among such services by apportioning the total NTS costs among four service categories—MTS/WATS, FX–CCSA Open End, OCC–ENFIA and Private Line—on the basis of relative use. This would have represented a substantial departure from the cost apportionment that is presently used to compute private line rates. The *Separations Manual* has generally assigned the entire cost of facilities that are used exclusively for interstate service to the interstate jurisdiction and has usually apportioned the cost of facilities used jointly for interstate and intrastate calling. A usage-based formula has traditionally been used to apportion jointly used NTS facilities between the jurisdictions. For ratemaking purposes all costs of AT&T assigned to the interstate jurisdiction are apportioned among interstate service categories through the *ICAM*.[34] The costs assigned by the *ICAM* to private line services are, in general, based upon the assignment of these costs to the interstate jurisdiction. Thus, the present rates for private line services reflect the "directly assigned" costs of private line loops. Inasmuch as private line customers normally have very high usage per line as compared to MTS customers, a usage cost allocation would produce a per line assigment to private lines that is much higher than the per line cost that is directly assigned under the *Separations Manual*.

94. Many of the comments that were filed in response to the *Second Supplemental Notice* contended that it would be unjust, inequitable and unlawful to compel private line customers to pay charges that are based upon a cost assignment that exceeds the actual cost of the line they use. Many of those comments also contended that a usage assignment of such fixed costs would be uneconomic because it would discourage usage by pricing the facilities in a manner that greatly exceeds the actual costs of the private line loops.

95. Those arguments caused us to reexamine the assumption that discrimination or preferences between private line and MTS users could best be corrected by assigning all NTS costs on a usage basis. The ratemaking principles advanced in those comments would compel the conclusion that the existing MTS rate structure is incorrect because the usage rates for MTS allocate some fixed costs on a usage basis. The same arguments would support the conclusion that the MTS rate structure compels large MTS users to subsidize other MTS users because a large user of that service would pay NTS costs that substantially exceed the cost of the NTS facilities such a customer uses to make MTS calls. That analysis also suggests

---

[33] *Amendment of Part 67 of the Commission's Rules*, *supra*, 78 FCC 2d at 942.

[34] *See* footnote 6, *supra*. With some exceptions the other telephone companies concur in AT&T's tariffs for MTS, WATS and private line service.

that the increasing use of private lines for purposes that could be served by MTS reflects an effort to avoid the subsidy that is inherent in the MTS rate structure and that private lines are being used inefficiently to serve purposes that from a network standpoint could be accomplished more economically through MTS.

96. The discrimination or preference problem could not be solved by maintaining the *status quo*. If one assumes that all users of competing services should pay per minute charges for NTS, total equality could be achieved by apportioning total NTS costs among such services on the basis of minutes of use. If one assumes that all users of competing services should pay per line charges, total equality could be achieved by continuing to assign private line NTS costs on a direct assignment basis and revising the MTS rate structure to include a flat charge for NTS and a reduced usage charge for the other exchange and interexchange facilities that are used to place an MTS call. We described those alternatives as "pure strategies" in the *Fourth Supplemental Notice* because they would produce equality on a per minute or on a per line basis. For convenience, we called the usage apportionment described in the *Second Supplemental Notice* "Pure 1" and the per line apportionment alternative "Pure 2."

97. Section 202(a) of the Communications Act does not require total equality of rates at all times or under all circumstances. The Act prohibits "unjust or unreasonable" discrimination, "undue or unreasonable" preferences, and subjecting persons or localities to an "undue or unreasonable prejudice or disadvantage." This necessarily implies that departures from total equality are permissible and may be required to achieve Communications Act goals other than the elimination of discrimination or preferences. The *Fourth Supplemental Notice* accordingly invited comments upon "mixed" strategies that might combine usage and flat charges or usage and fixed cost apportionments. We described two examples of such "mixed strategies" in that *Notice* and invited interested persons to suggest other alternatives. The *Notice* called the two examples "Mixed 1" and "Mixed 2" for convenience. "Mixed 1" would have allocated NTS costs between MTS/WATS and private line service using "equivalent lines." While the charge for private line users would have been a flat rate, each would be required to participate in the "contribution" to the local revenue requirement embodied in an interstate revenue requirement based on the subscriber plant factor. The "Mixed 2" strategy would have continued charging for private line services on a dedicated basis, but would have imposed a new rate structure on MTS. Under this plan, customers would be charged a usage based rate for recovery of NTS costs up to a cap. After this point, no additional NTS contribution would be required. Thus there would be economically efficient pricing for those calls made after the cap was reached.

98. Our decision to invite comments on alternative plans was based on developments that had occurred since the adoption of the *Second Supplemental Notice* and that suggested that Pure 1 might not be feasible even if we concluded that per minute equality would be ideal. At the time we adopted the *Second Supplemental Notice* we assumed that a reapportionment of costs among service categories would produce a shift from telephone company private line services to MTS that would enhance efficient utilization of the telephone companies network by discouraging the use of service-dedicated lines for purposes that could be served by the use of lines that can be commonly used for multiple services to multiple points. We also assumed that the reallocation of costs would produce a reduction in MTS rates.

99. The comments that were filed in this proceeding in 1980 did not dispute those assumptions, but some of the 1981 comments in the Joint Board proceeding did. Several of those comments noted that new technologies provide alternatives to the use of any telephone company loop for the origination or termination of interexchange telecommunications. Some asserted that any change in rate structure that increases telephone company private line charges would cause private line users to shift to such alternative services. Some also asserted that the access compensation that is reflected in MTS rates must also be reduced in order to avoid a shift to alternative technology services that "bypass" all telephone company facilities.

100. The subsequent settlement of the AT&T anti-trust case caused us to conclude that bypass may be an even more imminent possibility than it originally appeared to be. AT&T would have a much greater capability to provide bypass services on a large scale than other entrants in interexchange markets. AT&T would not have any incentive to do so as long as it retained a massive investment in local exchange facilities. The divestiture of all of its local exchange facilities would remove that inhibition.

101. The selection of a cost apportionment method necessarily affects the decision to prescribe end user or carrier's carrier access charges or some combination of such charges. Although some access charge options might be implemented through any of those methods, the Pure 2 alternative necessarily requires flat rates that are assessed upon end users in order to ensure that each end user pays the fixed costs that are attributable to NTS facilities that are dedicated to that particular user. Such a flat end user charge also must be collected by the exchange carrier because the subscriber line that is used for MTS access can be used for other interstate services including open end WATS, FX and CCSA originations and terminations and switched services offered by carriers that compete with AT&T interexchange services. The *Fourth Supplemental Notice* assumed that Pure 1 or Mixed 1 would be implemented through carrier's carrier access charges and Mixed 2 would be implemented through end user charges.

102. Each of the plans received support from at least some of the participants who responded to the *Fourth Supplemental Notice*. Several states and small telephone companies preferred the Pure 1 scheme. Mixed 1 received some support from commenting parties. This approach was supported (at least as an interim measure) by several participants who were convinced that a Pure 1 approach was overly restrictive.[35] Participants supporting this approach argued that private line users should be expected to contribute to the support of the nationwide system. To some extent the support for Mixed 1 appeared to be based on the perception that this approach represents a relatively small deviation from the current rate structure.

103. Pure 2, or some variation of Pure 2, was supported by many of the participants who filed comments in response to the *Fourth Supplemental Notice*. Most of the support for Mixed 2 came from those who saw it as the first step toward a Pure 2 approach. However, while the concept of a rate structure combining a flat fee with a usage-based charge to recover NTS costs received considerable support, the Mixed 2 scheme itself was viewed by most participants as unviable. Because many customers make few or no calls in any one period, and because the

[35] *See, e.g.*, Comments of Florida PSC, Michigan PSC Staff, NARUC, Oregon PUC, Washington UTC.

interstate jurisdiction is assigned NTS costs regardless of the actual use of those facilities, both the charge per unit of use and the cap would have had to be so great that the benefits of cost-based pricing would have been denied to most consumers. Thus, even those participants supporting a rate structure that combined a usage charge with a flat fee were almost unanimous in recommending that each end user be assessed some flat fee for access to the network regardless of his actual usage.

104. We have decided that none of the access charge options presented in our *Fourth Supplemental Notice* is entirely satisfactory. The access charge plan that we are adopting herein is more complex, and we believe it fair to say more sophisticated, than any of these options. Our new plan, however, incorporates elements of the options in the *Fourth Supplemental Notice* and reflects the ideas and suggestions expressed in many of the comments.

105. The pure strategies that were discussed in the *Fourth Supplemental Notice* do have the advantage of providing for a uniform rate structure for MTS and WATS service on the one hand, and private line services on the other. This is an important advantage because we have found that it is virtually impossible to eliminate discrimination among services while maintaining the current MTS/WATS structure and encouraging cost-based rates for other services. We have attempted for many years to eliminate unreasonable discrimination among private line, WATS, and MTS services. These attempts have imposed heavy burdens on users, carriers, and on the Commission, but have achieved, at best, mixed results. We conclude that the costs associated with the nontraffic sensitive plant used to provide these services must ultimately be recovered through charges based on the same rate structure.

106. These NTS facilities are essentially identical regardless of the service with which they are associated. Specifically, all of these facilities include access loops and associated wire and CPE that are dedicated to particular customers and allocated to the interstate jurisdiction. We have found in Part II. B, *supra*, that the rate structures for recovering the costs of these similar facilities are very different and result in unlawful discrimination. Only by charging for these facilities on a similar basis can the problems of discrimination be resolved.

107. Although the Pure 1 approach would have the advantage of charging all facilities on the same basis, we must reject the Pure 1 option. Comments by numerous participants have convinced us that bypass is an actual threat and present danger.[36] For this reason, and because of the dynamic economic distortions that Pure 1 would impose on the U.S. economy, we find Pure 1 to be an unacceptable solution.[37]

108. In the *Fourth Supplemental Notice*, we asked whether large users were likely to abandon the network if they were forced to pay prices equal to those paid by MTS users (the Pure 1 approach). Numerous comments indicated that bypass is real. Even with today's rate structure, which allows many large users to escape paying the full MTS rate through use of private line or other services, many large corporations and state, local, and federal governments are planning or using facilities that bypass the local loop. Newly available technologies such as digital termination service (DTS) and cellular radio provide valuable new services in their own right, but may also be used to provide uneconomic bypass if access pricing continues to diverge from cost. Alternative means of resolving unlawful discrimination among services (such as the plan proposed in the *Second Supplemental Notice)* would encourage still more bypass.

109. Because users have alternatives to the traditional telephone network, it is increasingly difficult to force heavy users to pay rates that greatly exceed their costs. Such users would abandon the network, leaving the small consumers who have fewer options with the full costs of the network. Indeed, attempts to overrecover cost from those groups most able to escape these charges may backfire and result in inferior service to large and small users alike.

110. Many participants responded to our expressed concern with the effects of uneconomic bypass by suggesting that we use our powers under Section 214 of the Communications Act, 47 U.S.C. 214, to deny authorizations to construct facilities that would bypass local telephone company facilities.[38] We reject that suggestion. We noted in the *Fourth Supplemental Notice* that a flat prohibition of bypass services would not be desirable because bypass services can serve functions that are not adequately served by existing telephone company services. We also noted that overpricing of telephone company services could lead to the substitution of bypass services that may in fact be more costly to provide than telephone company services that could serve the same purpose. We concluded that access charges should accordingly be designed to avoid this "uneconomic bypass" and invited interested persons to comment upon the compatibility of various pure or mixed NTS access plans with that objective.

111. We continue to adhere to this view. Development of bypass technology provides a competitive spur to ensure that the telephone system offers the type of service that is in demand and is technologically feasible. In many cases it may be appropriate to use some service other than the traditional wireline carrier. We are simply not in a position to determine what constitutes an uneconomic "bypass" service and what is a wholly new service that will attract a new set of users and enhance the ability of all users to make full use of telecommunications service-potential. For example, some comments assert that cellular services constitute a bypass technology. We have concluded, however, that cellular radio is a distinct service that serves distinct needs and that cellular service could be complementary to existing wireline service. Indeed, a given technology may be the efficient means of providing service to certain groups yet constitute uneconomic bypass for other services or groups.

112. In addition to the bypass problem, long run reliance upon usage-based prices for the recovery of fixed-costs will distort economy-wide investment decisions, artificially restrict calling patterns, and may jeopardize the competitive position the U.S. now holds in the world marketplace. In comments filed in response to the *Fourth Supplemental Notice,* NTIA has estimated that non-cost based pricing results in a $1.7 billion annual consumer loss due to repression of calls that would have been made at rates equal to cost. While we have some questions concerning the methodology used in this study, we find the prospect of losses of such a magnitude to be deeply disturbing.[39]

---

[36] *See, e.g.*, comments of Aeronautical Radio, Inc.; American Petroleum Institute; Association of Data Communications Users; AT&T and BOCs; Centel; Executive Agencies of the United States; Florida PSC; IBM; Ketchikan Public Utilities; Nevada PSC; NTIA; Pennsylvania PSC; Rochester Telephone; SBS; Southern New England Tel (SNET); Southern Pacific Communications (SPC); United Telephone System, Inc.; USITA; Western Union.

[37] Such distortions include the misdirection of investment and industry from paths that make the most productive use of communications to paths that respond to non-cost related communication pricing. For example, the development of computer and related technologies could be inhibited by such a rate structure.

[38] *See, e.g.*, NARUC and Rural Telephone Coalition comments.

[39] In an independent study, James Griffin estimates this loss (including the loss due to

113. Cost-based rates provide correct signals to the marketplace. Both investors and consumers are certain to respond to such cost-based rates by redirecting their behavior in ways that redound to the benefit of the U.S. economy. In the short run, substantial growth in toll calling could be expected as consumers make better use of the network. In the long run, technologies that make more intensive use of the telecommunications system will create even larger benefits. In an economy increasingly dependent upon information and communications, the dynamic losses caused by investment misdirection can no longer be afforded.

114. Arguments against the Mixed 1 option were similar to those leveled against Pure 1. As with the Pure 1 approach, rates for private line users would be substantially increased. As with Pure 1, it was argued that such substantial rate increases would result in bypass and in economic inefficiency. Several of these participants also argued that the means by which the contribution would have been allocated between private line and message services under Mixed 1 was arbitrary.[40]

115. We are persuaded that either the Pure 1 or Mixed 1 approaches would result in rates that are unrelated to costs for an important class of users and that any subsidy that could be collected from these rates would be shortlived. As users who are best served by the telephone network found lower priced (though higher cost) alternatives, society as a whole would be the loser and the public interest would be disserved.

116. The Mixed 2 plan would eliminate much of the discrimination between private line and message services through use of a ceiling rate. Telephone subscribers who make no use of the interstate network, however, would continue to pay nothing. Supporters of the Mixed 2 approach argued that this approach would resolve the bypass threat by greatly reducing the total bill paid by any large user, while continuing to allow small users and non-users to pay very little or nothing, maintaining universal service.[41]

117. We are convinced, however, that the Mixed 2 proposal, as described in the *Fourth Supplemental Notice*, is unworkable. The distribution of interstate calls by subscribers is highly skewed. A substantial portion of total callers make no calls in any given month. Under the Mixed 2 approach, such users would pay nothing. Heavy users are currently a small fraction of total users, but make a large majority of total calls. Such users would be protected by the maximum charge. The Mixed 2 approach, however, does not alter total revenue requirements. The costs allocated to the interstate jurisdiction are unlikely to fall as a result of the Mixed 2 approach. To recover revenue requirements, access tariffs would have to levy heavy usage charges on moderate users. These charges could be far in excess of the current payments. This approach could result in an inefficient and undesirable increase in the number of subscribers who make no interstate calls. As a result, telephone companies could find themselves unable to devise charges to meet their authorized revenue requirements. For these reasons, we conclude that the Mixed 2 approach is inappropriate.

118. Proponents of the Pure 2 approach[42] argue that Pure 2 corresponds with economic cost causation and that only the Pure 2 approach can eliminate bypass, encourage efficient use of the national telecommunications network, and be sustained in a competitive environment. Pure 2 would also resolve the discrimination between private line and message service, a fundamental objective of this proceeding. It would do so by charging all users in the same way. Only costs that vary on a usage basis would be recovered on a usage basis. Costs imposed on a non-usage basis would be recovered on a non-usage basis.

119. The majority of those commenting supported the Pure 2 option for the same reasons they found both the Pure 1 and Mixed 1 schemes objectionable.[43] They assert that the Pure 2 approach would enhance network efficiency in at least two ways. First, since under this plan charges would reflect costs, they claim that Pure 2 would eliminate uneconomic bypass. Only these alternative technologies that have real advantages over the telephone network would survive. Second, usage based rates could fall substantially since such rates would no longer recover NTS costs. As a result, telephone users would no longer artificially restrain their calling. Users could weigh the price of a call against the benefit that they would receive from a call, and would make that call whenever the value of the call is at least equal to its cost.

120. Opponents of the Pure 2 approach[44] make two arguments. First, some contended that we could not lawfully impose charges on end users. Access charges, they argue, must be paid from interstate carriers to exchange carriers. In the alternative, some argued that we could not impose charges on subscribers who make no interstate calls. Second, many argued that even if we could impose such a charge we should not. It was argued that Pure 2 would constitute a substantial step away from universal service since many users would be unable or unwilling to pay the flat fee for interstate access. Further, it was argued that the Pure 2 approach could lead to the loss of nationwide rate averaging. These drawbacks, it was felt, would be particularly severe in high cost rural areas. Some of these considerations have led us to reject the Pure 2 approach.

121. We reject the notion that we cannot impose a flat fee on subscribers, or that a subscriber must make interstate calls before a subscriber can be assessed such a charge. A subscriber who obtains a line to a local dial switch or a manual switchboard necessarily obtains access to interstate as well as local services. The cost of that access has traditionally been described as non-traffic sensitive because such costs do not vary with usage. A subscriber who does not use the subscriber line to place or receive calls imposes the same NTS costs as a subscriber who does use the line. A subscriber who does not make local calls would normally pay a flat fee

---

intrastate MTS pricing) as $1.5 billion annually. *See* James M. Griffin, "The Welfare Implication of Externalities and Price Elasticities for Telecommunication Pricing," *Review of Economics and Statistics*, February 1982, pp. 59–68. Certain assumptions underlying the results of this study are questionable or unclear. Nevertheless, while this Commission has been unable fully to corroborate estimates of damage, the evidence that significant harm results from current pricing structures seems strong.

[40] *See, e.g.*, Comments of Ad Hoc Telecommunications Users; Aeronautical Radio, Inc.; AT&T/BOCs; First Data Resources; GTE; IBM; Kansas Public Service Commission; NTIA; Pennsylvania PUC.

[41] *See, e.g.*, Comments of Rural Electrification Administration, Virginia Corporation Commission.

[42] Proponents of the Pure 2 approach include ABC/CBS/NBC; Ad Hoc TeleCommunications Users Committee; Aeronautical Radio; Association of Long Distance Telephone Companies; AT&T/BOCs; Business Telecommunications Corporation; Department of justice (in reply comments); First Data Resources; GTE; IBM; MCI; Rochester Tel; SNET; SPC; Tel. Systems Management Corp., *et al.*; US Tel; USTS; Western Union.

[43] AT&T and many other telephone companies that had supported the tentative plan in their comments filed in response to the *Second Supplemental Notice*, reversed their earlier position and agreed with heavy users that Pure 1 is an invitation to bypass.

[44] Those arguing against the Pure 2 approach include the California PUC; Consumers Union, *et al.*; Florida PSC; Haviland Telephone *et al.*; Michigan PSC staff; NARUC; National Association of State Utility Consumer advocates; North Dakota PSC; Rural Electrification Administration; Washington UTC; Wisconsin PSC.

for the exchange portion of such costs. Imposing a flat charge for the interstate portion of those costs is equally reasonable. Any other procedure violates the general principle that costs should be recovered from the cost-causative ratepayer whenever it is possible to do so.[45]

122. We find more merit, however, in the second point raised by the opponents of Pure 2. We cannot ignore the problems which the implementation of Pure 2, especially its implementation on an immediate basis, would have upon universal service and rural subscribers. It has become quite clear to us that the major goals in this proceeding—the continued assurance of universal service; the elimination of unjust discrimination or unlawful preferential rates; the encouragement of network efficiency; and the prevention of uneconomic bypass—are to some extent conflicting and that there is no possibility of devising a "perfect" plan that would fully and immediately effectuate all of our goals. Rather, it has become clear that any acceptable plan must balance these goals in a satisfactory manner. For example, it would be unacceptable for the Commission to put a plan into effect that ameliorates existing efficiency, bypass and discrimination problems, but which, at the same time, had serious consequences for universal service.

123. Moreover, we recognize that the balance to be drawn is a very delicate one and that some adjustments may be necessary. For this reason, we have felt it necessary to move cautiously and have incorporated a transition period for our plan. We have also taken the special precaution of establishing a Universal Service Fund to protect the needs of subscribers in rural or high costs areas. We now proceed in the succeeding sections to describe our plan.

B. The Long Range Plan

124. We are adopting a transition plan that will produce steps toward a rate structure that promotes optimal utilization of telecommunications facilities and a long range plan that will recover significant portions of NTS costs through flat charges that are collected from end users by exchange carriers. We believe it will be possible to achieve that result at the end of a transition period without jeopardizing universal service. We will, however, keep CC Docket 78–72 open in order to conduct a proceeding in the fifth year of the transition and to receive periodic or special reports during the course of the transition period that will enable this Commission to make any adjustments that might be necessary.

125. Although the long range NTS plan will not be fully effective until the 1990's, the total plan will probably be more understandable if we begin with a description of that plan. Under the long range plan, different charges will be assessed for the interstate use of lines that are also used for local exchange service and the use of lines that are dedicated to interstate service. The latter category includes interstate WATS access lines. It also includes all private lines, including closed end FX or CCSA lines, that terminate in a PBX, key system, or other customer premises equipment that is not used exclusively for a particular interstate service.

126. The charges for the line that is commonly used for multiple services will reflect the interstate portion of investment in that line, associated NTS plant, and other investment and expenses that are attributed to that element. We will call these the "Common Line" charges. The charge for the other category, which we will call "Dedicated Access Line", will inevitably be higher because it will reflect the total or unseparated cost of these facilities.[46]

127. We have made some revisions in the existing cost allocations to reflect private line usage of certain station equipment that is in fact jointly used by common line users and users of any private line that terminates in a PBX or similar equipment. Such jointly used equipment is apportioned to MTS and WATS under the current cost apportionment procedures. We are also apportioning a pro rata share of investment in unused or reserve lines to the Dedicated Access Line element. These changes will correct anomalies in the existing cost apportionment methods that impose an unfair burden upon MTS customers. We have decided to refrain from apportioning costs to a private line category as a surrogate for a leaky PBX charge as proposed in the *Second Supplemental Notice*. 77 FCC 2d at 241. This problem is likely to become much less significant in the future because the access charge plan will remove much of the incentive for substituting private line service for MTS. Moreover, any remaining inequity will be at least roughly balanced by the assignment of investment in unused lines to the Dedicated Access Line element on the basis of relative use. An apportionment that was based upon projected use would probably apportion a smaller portion of that investment to the Dedicated Access Line element because common line use is likely to grow at a faster rate than private line use in the future.

128. We are also establishing a third NTS category for pay telephones. Although the NTS costs associated with pay telephone calls do represent fixed costs, it would be impossible to recover such costs through flat rates. We are accordingly prescribing usage charges that will be collected from end users when an interstate or international call is made from a pay telephone. We will call this element the Pay Telephone Element.

129. We have also decided that a portion of the common line revenue requirement should be recovered through a carrier's carrier charge. At the present time most interstate common line costs are reflected in nationally averaged MTS and WATS rates, but the compensation that exchange carriers receive through the settlements and divisions of revenues process reflects the actual costs of each carrier that participates in the pool arrangement.[47] When we adopted the *Second Supplemental Notice* we assumed that we could eliminate discrimination and preferences in end user rates for interstate services without drastically altering the telephone industry's voluntary pooling arrangement. We accordingly proposed to establish carrier's carrier access charges that would be uniform in all exchanges of all carriers and proposed that access charge revenues be pooled in essentially the same manner that MTS and WATS revenues are pooled now.[48]

130. Although some comments that were filed in response to the *Second Supplemental Notice* questioned the desirability of uniform access charges with pooling, comments from both large and small telephone companies generally supported that proposal. None of the telephone companies indicated that it would not wish to be included in any such arrangement.

131. After the settlement of the AT&T antitrust case was announced, we recognized that it would probably be necessary to create different arrangements for the preparation of any common tariffs and the administration

[45] *See Phase II Final Decision and Order in Docket 19129*, 64 FCC 2d 1 (1977); *see also First Report and Order in CC Docket 78–105*, (uniform system of accounts), 85 FCC 2d 818 (1981).

[46] Although we are describing this element as the "Dedicated Access Line" element, it does not include all lines that are dedicated to interstate services. Some of those lines or portions of such lines are included in the Special Access and Dedicated Transport elements.

[47] That arrangement is described in the *Second Supplemental Notice*. *See* 77 FCC 2d at 226–228.

[48] The pool we proposed at that time would have differed from the settlements/divisions pool in some respects. *Id.* at 238–239.

of any revenue pools. The *Fourth Supplemental Notice* invited comment upon a proposal to create an association to perform administrative functions that AT&T would have performed under the tentative plan in the *Second Supplemental Notice*. The *Fourth Supplemental Notice* also invited further comments upon some possible alternatives to nationwide averaging of access charges.

132. The most recent comments demonstrate that the telephone industry consensus no longer exists. The AT&T comments indicate that the BOCs do not wish to participate in common access tariffs or access revenue pools. Rochester, Continental and Centel have also indicated that they do not wish to participate in such arrangements. Many telephone companies and others have argued that nationwide averaging of access charges should be maintained. Some contend that nationwide averaging with pooling is essential to avoid severe hardships for some subscribers.[49] Such national averaging would allow below cost rates in high cost rural areas with attendent gains in universal service. Opponents of nationwide averaging argue that averaging results in a deviation of costs from rates and the prospect of inefficient use of the network.[50] Some contend that averaging might also have an undesirable effect on incentives to contain costs.[51] Uniform rates also limit a carrier's flexibility to meet unique circumstances, such as an unusual threat of uneconomic bypass or a reduction in universal service in the area served by a particular carrier. If we adopt rules that require every carrier to follow the same path, we will be hardpressed to satisfy legitimate needs of companies that require more rapid movement toward cost-based pricing and those companies that require a more gradual transition.

133. For reasons that are explained more fully in Part VI, we have decided that we should not require every exchange carrier to participate in common tariffs for all access elements. We have also concluded that some adjustment in flat end user common line access charges must be made in order to balance the critical need to move towards a rational cost-based pricing system for access plant with the maintenance of universal service. We do not anticipate that end user rates will ever reflect the full common line NTS costs of the highest cost carriers.

134. Costs of different local exchange carriers do vary. Many of these cost variations are attributable to factors that carrier management cannot control. The Docket 80-286 Joint Board has tentatively endorsed an industry proposal to include a high cost factor in any new separations formula for the apportionment of NTS plant. *Joint Board Order, supra*, 47 FR at 54485. Such a factor would represent a percentage of the NTS costs of high cost companies that would be added to a base factor percentage to determine the portion of such a company's NTS costs that would be allocated to the interstate jurisdiction. Such a percentage factor would necessarily take into account any increasing cost pressures caused by inflation or other factors. The high cost factor would promote or preserve universal service by enabling high cost companies to establish local exchange rates that do not substantially exceed rates charged by other companies. In view of the purpose such a factor would serve, we will describe it as a universal service factor in this *Report and Order*. Revenues attributable to the universal service factor will be described as the Universal Service Fund.

135. The purpose that the Universal Service Fund would be designed to serve would obviously be frustrated if all NTS costs were recovered through end user charges that reflect the interstate NTS costs of a particular exchange carrier. Any reduction in the local exchange rates of such a carrier would be offset by increased end user access charges. We have accordingly decided that common line costs that are assigned to the interstate jurisdiction as a result of the application of a universal service factor should be recovered through an access charge that is assessed upon interexchange carriers.

136. Many parties have called for the creation of a "life line" exception to any mandatory flat customer access charge. Life line services have been introduced in a considerable number of state jurisdictions. Such rates have not always provided benefits to the class of users who are the intended beneficiaries.

137. We are, nevertheless, prepared to entertain waiver requests from carriers who wish to provide "life line" options under the following circumstances. First, any such waiver request should state with specificity the terms and conditions which apply to life line service. Second, such waiver requests must specify the revenues which would be lost were such a life line option to be instituted. Third, such waiver requests must specify the specific adjustment to the customer access charge tariff which has been made to secure the revenues lost through the life line option. During the transition period these measures may be either an increase in the minimum flat rates or an increase in the usage charge imposed upon customers for access service. An increase in the transitional maximum charge will not be permitted. Of course, states continue to have full authority to modify existing life line rates for local exchange telephone service or to institute such rates should they believe it is necessary to ameliorate the effects of interstate access charges.

C. The Transitional Plan for Carrier Common Line Charges

138. Although we expect that revenues from the Carrier Common Line element will eventually be limited to the Universal Service Fund portion of the Common Line revenue requirement, substantial additional amounts must be included in that carrier's carrier charge during an interim period to avoid anomalous results that would occur if deaveraged end user rates for all other Common Line costs were implemented in 1984.

139. We have recently adopted a change in jurisdictional separations rules that will accomplish the phased removal of CPE from the interstate rate base. We decided to implement that aspect of our decision in *Second Computer Inquiry, supra*, in that manner in order to avoid an abrupt increase in local exchange rates that would result if the interstate CPE allocation were removed on a flash cut basis. The Joint Board has recently invited comment upon an alternative formula that will achieve the same results even if the divested BOCs do not have any CPE to allocate after the divestiture occurs.[52]

140. The purposes of the phased removal of CPE or the allocation of surrogate CPE costs would be frustrated if costs assigned to the interstate jurisdiction to limit increases in local exchange service rates were added to end user access charges. Such a cost assignment could have the same effect upon end users as a local rate increase. In these circumstances, we have concluded that it would be more appropriate to recover such costs through a carrier's carrier charge. Since

[52] The alternative formula is described in Part IV. D. of the *Joint Board Order*.

such costs will disappear four years after the access charges become effective, the exclusion of such costs from End User Common Line charges will avoid churning effects upon End User Common Line charges that could make the transition to a new rate structure unnecessarily difficult.

141. Similar considerations warrant the exclusion of inside wiring costs from End User Common Line charges. Inside wiring that was capitalized as investment before this Commission required the expensing of inside wiring is being amortized and will disappear from the rate base in the early 1990's. We are also considering proposals to remove expenses associated with the installation of new inside wiring from interstate rate computations.[53] It would be inappropriate to add such costs to new flat charges imposed upon end users in view of the uncertainties with respect to the future status of inside wiring. It would also be inappropriate to recover inside wiring or CPE costs through a per line charge because there is little or no relationship between CPE or inside wiring costs of a particular subscriber and the number of loops used by that subscriber.

142. The present *Separations Manual* apportions NTS plant on the basis of a factor, which is called the Subscriber Plant Factor or SPF, that has been computed separately for each "study area." A study area normally means the area served by a particular telephone company within a particular state. The current factors differ widely from one study area to another and many companies that probably will not be classified as high cost companies have interstate NTS costs that are substantially higher than the national average because they happen to have a higher interstate SPF. If deaveraged end user rates were implemented under the present circumstances, their customers would be subjected to excessive rate increases.

143. The Joint Board is presently considering a number of alternatives to the current factors that would not be likely to produce such results. Any new factor that differs significantly from an existing factor is, however, likely to be phased in over a transition period. In these circumstances common line costs other than Universal Service Fund (USF), CPE and inside wiring costs that exceed an appropriate cut-off will be assigned to the Carrier Common Line element for an interim period.[54]

144. An additional assignment to the Carrier Common Line element is also desirable to place some limit upon the flat end user charges that carriers would be permitted to adopt during the transition period for End User Common Line charges. In view of all of these considerations, we have decided that, in 1984, Common Line revenue requirements that exceed $4 per line per month should be allocated to the Carrier Common Line charges.

145. The rules we are adopting establish a five-year transition period for the elimination of Common Line costs other than USF, CPE and inside wiring costs from the pooled Carrier Common Line charges. Common Line costs other than USF, CPE and inside wiring could be described as the third component of a Common Line revenue requirement. This third component contains all the residual costs. For each local telephone company, this total residual amount is calculated as follows:

Total interstate per line residual amount = total Common Line per line revenue requirement − $4. − (CPE + USF + Inside Wiring).

146. Over a five year period, the total residual amount is to be allocated annually between the End User Common Line charges and the Carrier Common Line charge under the following formula:

Year	Percent	
	Carrier contribution to total residual amount	End user contribution to total residual amount
1984	100	0
1985	80	20
1986	60	40
1987	40	60
1988	20	80
1989	0	100
1990	0	100

147. Thus, in the first year of the transition period these residual costs will be recovered fully through the Carrier Common Line charges imposed on all providers of interstate switched services. In the second year, only 80 percent of the residual costs for that year will be recovered from carriers, with 20 percent recovered from end users.

148. We recognize that end user charges constitute a substantial departure from the historic means of cost recovery. Exchange carriers are unfamiliar with this new system. Such carriers, especially small carriers that are unable to devote substantial resources to this task, might be subjected to unnecessary risks if forced to move immediately to full recovery of subscriber plant through subscriber charges. The Carrier Common Line charges, administered through the exchange carrier association, offer a limited degree of risk sharing and increased certainty to these exchange carriers in the early years of the new environment. The fairly rapid reduction of such charges through the transition appears likely to limit uneconomic bypass substantially during the transition to cost-based pricing.

149. The Carrier Common Line charge will also provide the mechanism to adjust the prices charged interexchange carriers for access to reflect differences in access quality. To achieve this result, we have required that the Carrier Common Line element be subdivided into two charges. The first charge, a usage charge, will be imposed upon all interexchange carriers. The second, a premium access charge, will be imposed upon only certain carriers described below.

1. The Usage Charge

150. This charge shall be calculated on a straightforward minutes of use basis for services using common lines (*e.g.*, MTS, WATS, FX, and OCC–ENFIA). This charge shall be levied on a nationwide equal per minute basis regardless of the costs of particular originating or terminating exchange carriers, the length of haul, or the rate charged by the interexchange carrier. An exchange carrier association, described in Part VI, shall be responsible for tariffing and collecting both the premium charge and this usage charge and distributing revenues to all participating carriers.

2. The Premium Access Charge

151. There is little disagreement that the quality of interconnection now received by the OCCs [55] through their ENFIA A arrangements is distinctly inferior to that received by the traditional interexchange partnership (predominantly AT&T). Indeed, it appears that the level of interconnection received by the OCCs even under ENFIA B and ENFIA C arrangements (if

[53] *See Deregulation of Customer Premise Inside Wiring*, 88 FCC 2d 885 (1981); *Notice of Proposed Rulemaking*, (CC Docket No. 82–881), 47 Fed Reg. 44770 (October 12, 1982).

[54] *See* Subpart F of the rules.

[55] The term "Other Common Carriers" or "OCCs" is often used to describe carriers other than telephone companies. The term "OCC" is used in the context of this *Report and Order* to describe an interexchange carrier that offers an MTS/WATS equivalent service such as Execunet or SPRINT.

available) is inferior to that received by the partnership.[56] Such quality differences would give a substantial advantage to the carriers that offer MTS and WATS unless access pricing is adjusted to account for quality differences until equal interconnection is available to all interexchange carriers. It is not clear, however, that this inferior level of interconnection is any cheaper to provide. Cost-based pricing would appear to require that all carriers pay their full costs regardless of any quality differences.

152. Over the past several years, BOCs have been compensated for use of their facilities for OCC interconnection through the ENFIA tariff. That tariff provides a 45 percent discount from the "SEP" amount, *i.e.*, the amount that AT&T calculates that BOCs receive for exchange access through the division of revenue process. This arrangement is the result of compromise, and was adopted only as an interim measure, until the issues involved in this proceeding are solved and an access charge devised.

153. While the OCCs have generally sought a continued rate differential, few participants in this proceeding now assert that any differential should take the form of a "discount". Southern Pacific argues, however, that the existing OCC rate should not be described as a discount since the concept of discount implies that the same good is being provided. While we shall not dispute that definition of discount, cost-based pricing does not appear to allow non-cost based rates, including reductions below the cost of service, regardless of whether the service being provided is inferior to an equally costly service provided others. Instead of justifying an OCC discount, MCI claims, in reply comments, that an AT&T surcharge is appropriate.

154. If the type of access received by AT&T can be provided only to one carrier (at least in the short run), then even if it does not cost much to provide this access to that one carrier, this access has an "opportunity cost" that is equal to the amount that other carriers would be willing to pay for this preferred access. The cost of providing the favored carrier with this unique level of access includes the denial of this access to other carriers. Those carriers who receive the level of service that could be provided to any number of carriers would pay the full costs of this service. Carriers who receive the premium access service would pay the observable costs and an additional amount reflecting these opportunity costs. A surcharge for such premium access could theoretically be computed to reflect such opportunity costs, but it would probably be necessary to conduct an auction to determine the amount a carrier would pay for such premium access. We have decided that an auction would not be feasible. We will, however, assess a charge upon AT&T and its interexchange partners that will reflect an estimate of premium value. We will describe that charge as the premium access charge. We will not, however, permit exchange carriers to recover premium value in addition to a total revenue requirement that is computed in the usual manner. The premium access payments will be deducted from the Carrier Common Line revenue requirement in order to compute usage charges.

155. Revenues collected from the premium carrier need not flow to the exchange carrier having the greatest value of premium access. Indeed, if exchange carriers were able to levy premium access charges, such exchange carriers would have strong incentives to continue to offer preferential service for a longer period than would be necessary. We have concluded, therefore, that the premium charge should be levied by the exchange carrier association on a nationwide basis.

156. By September of 1986, the quality of interconnection generally available to OCCs will have to be far closer to the quality of access offered the premium carrier because of MFJ requirements. Even then, however, there will still be differences having potential advantages to a premium carrier, including the premium carrier's position as fallback carrier for current subscribers not specifying some other default carrier, and the continued unique premium access to nonelectronic and small switches. This residual premium access will have some value, but will have a value far smaller than is given by its present position. A decreasing surcharge is, therefore, appropriate.[57]

157. A premium charge might be levied as either a lump sum or a per minute charge. We have determined that a lump sum approach serves the public interest. The value of premium access does not depend on the actual rate structure selected by the premium carrier or the usage generated through that rate structure. Rather, it depends on the value of premium access in its best alternative use. This value is constant without respect to the behavior of the particular carrier receiving premium access.

158. Thus, for example, the premium carrier may make investments to expand its network or reduce blockage in hopes of stimulating increased call volumes. If the premium charge were assessed on a usage basis, these investments might not be made even if they would redound to the benefit of the calling public. By levying a lump sum charge on the carrier receiving premium access, this distortion is avoided. The economic justification for a premium charge is, therefore, consistent with a lump sum charge rather than with a usage based premium charge.

159. We have invited proponents of a large or a small differential in the access compensation paid by OCCs and the telephone company partnership to submit a case for a particular differential both in this docket and in proceedings relating to the ENFIA agreement. Those participants have apparently been unable to produce submissions that have much evidentiary value. In these circumstances, we necessarily must exercise our best judgment to establish an appropriate premium amount.

160. The Element 3 discount in the ENFIA agreement was designed in part to reflect an estimate of the value of differences in access arrangements by the parties to that agreement, but that discount would not establish an appropriate 1984 premium even if that discount could be readily translated into a premium. We noted in *Extension of ENFIA Agreement, supra*, 90 FCC 2d at 16, that the formula for the computation of ENFIA charges was probably designed to produce a charge that would be higher than the FX Open End charge and lower than a charge that would replicate the compensation BOCs receive from the division of MTS revenues. This was apparently perceived to be necessary to achieve equity in view of access compensation disparities between MTS and FX.

161. The existence of those disparities was an important factor in our decision to extend the ENFIA agreement without altering the Element 3 discount factor. We said (*id.* at 16–17):

> We believe it is still reasonable to allow OCCs to pay charges that are lower than MTS/WATS access charges and higher than

[56] ENFIA A provides interconnection to the line side of a Class 5 switch, ENFIA B provides interconnection to the trunk side of a Class 5 switch, and ENFIA C provides interconnection through a tandem switch.

[57] Nothing in the record causes us to expect any carrier other than the AT&T partnership will receive premium access. Improved access received by other carriers appears to reduce the vaule of AT&T's premium, but not to constitute a replacement of AT&T as the premium carrier. Our prescribing the gradual elimination of the premium access charge reflects our belief that exchange carriers will quickly move toward equal access.

other access costs during the interim period. That interim period will, of course, end when access charges are established pursuant to the rules we are prescribing in CC Docket No. 78-72.

162. The access charge rules we are adopting do eliminate those disparities. We would have adopted a smaller discount factor when we extended the ENFIA agreement if that factor had been designed for the sole purpose of reflecting the value of qualitative differences between ENFIA and MTS/WATS access. We would have made a further reduction in the ENFIA Element 3 discount if ENFIA Element 2 had been computed to reflect differences in switching costs that will be reflected in our rules for the computation of charges for the Local Switching element. See Part IV.A, *infra*. A smaller premium is also necessary because OCCs will be receiving some access before and during 1984 that is better than the ENFIA A arrangements that existed at the time the ENFIA agreement was negotiated. Nothing has occurred during the years since the ENFIA agreement was signed that would indicate that the parties to the ENFIA agreement overestimated the value of the qualitative differences in OCC and partnership access arrangements. Therefore, the 1984 premium should be smaller than an amount that would replicate the present ENFIA discount.

163. Nevertheless, a substantial premium access assessment is required in 1984 because significant disparities in the quality of access will exist during that year. Those disparities will continue to provide AT&T with a significant competitive advantage.

164. Although we have not approved a differential in access compensation to provide artificial advantages for new competitors, we are, of course, mindful of the adverse effect than an abrupt elimination of access compensation disparities could have upon competition under existing conditions of unequal interconnection. In view of the uncertainties with respect to the magnitude of premium access value and the future progress to equal access, we have decided that a phased elimination of the access compensation differential is justified in order to encourage full and fair competition. That course is consistent with our determination in this proceeding that a competitive interexchange market will produce significant public benefits.

165. We have decided to implement that decision by using the dollar amount of the interstate CPE costs or surrogate CPE costs of all local exchange carriers to determine the premium access assessment.

166. Those costs have been fixed through our decision to remove a base amount from the interstate rate base during a five year transition period that begins in 1983. Thus, the interstate CPE costs will be declining at the rate of 25 percent per year during the first years that access charges are in effect. Disparities in the quality of access arrangements for OCCs and premium carriers will be phased out during approximately the same time frame.

167. We also believe that 1984 interstate CPE costs, which we estimate to be about $1.4 billion, will correspond with our present estimate of 1984 premium access value. Such an assessment will be substantial and is likely to be significantly smaller than an assessment that would replicate the ENFIA A Element 3 discount. The use of CPE costs also serves administrative convenience.

168. We cannot, however, be certain that the decline in the premium value will correspond to the decline in CPE costs. We have accordingly described the CPE costs as a default formula for the computation of the premium in the access charge rules. Section 69.207 of the Rules says that premium access shall be equal to a CPE or CPE surrogate revenue requirement "[i]n the absence of a Commission order designating the premium access portion * * *." We do not intend to designate a different amount for the 1984 premium assessment, but we may designate a different amount in subsequent years if we have reason to believe that premium value is declining at a much faster or slower rate than the interstate CPE costs.

D. Transitional End User Common Line Charges

169. Although the allocation of Common Line costs to Carrier Common Line charges should be sufficient to offset anomalies that could result from the application of transitional separations factors, this would not be sufficient to avoid the disruptive effects of immediate implementation of flat charges for the entire end user portion. The introduction of a $4 per month per line charge for residential end users on a flash cut basis could create an undue risk that a number of residential users would choose to cancel local exchange service.[88]

170. As we noted in the *Fourth Supplemental Notice*, we are quite concerned about the impact of flat charges for NTS costs, and especially a sudden shift to flat charges, on small users and on subscribers in high cost areas. Despite the attractiveness of such flat charges from the standpoint of economic efficiency, we are unwilling to require immediate implementation of flat charges for the entire end user portion. The guidelines that we adopt, however, constitute a gradual transition to a new approach to compensation for interstate access that balances the goals of the Communications Act in a manner that best serves the public interest.

171. Many participants who found at least some flat charges acceptable or desirable argue that a transition period is appropriate.[89] Such a transition would allow subscribers and telephone companies the opportunity to adjust to the new environment. Other participants take the opposite view that a flash-cut approach would be most appropriate.[90] Such a flash cut would allow cost-based pricing immediately to go into effect and confer the economic advantages of flat charges that much earlier.

172. We have concluded that a transition to the flat End User Common Line charge we require is appropriate. A gradual transition allows a more comfortable adjustment to the new economic realities. If the timing of the transition is known, the dynamic efficiency losses that result from failing immediately to move will be small. The extremely long transition advocated by MCI appears unnecessary.

173. The gradual transition we are adopting has several advantages that, we believe, will outweigh any drawbacks. First, it establishes a schedule for movement to a cost-based access arrangement over a medium length period. Companies that have invested heavily in technologies made economic only by the continuance of uneconomic and non-cost based prices will have several years in which to amortize these investments. A pre-set transition will encourage investors to target new investments on technologies that are consistent with the underlying costs of the network and hence on the most efficient possible use of the nationwide telecommunications system.

174. A pre-set transition plan like the one we are adopting has the advantage of providing some certainty to those who must make investments in communications technologies. A fairly rapid movement toward cost-based

---

[88] Possible effects of access charges upon the universality of service are discussed in Appendix G.

[89] *See, e.g.*, Comments of Ad Hoc Telecommunications User's Committee; AT&T; MCI; NTIA; Pennsylvania PUC; SNET; SPCC; United Telephone System, Inc.; USITA; U.S. Tel.; Vermont P&B.

[90] *See, e.g.*, Comments of Aeronautical Radio, Inc.; GTE; Rochester Tel; Tel. Systems Management Corp., *et. al.*

pricing can allow time for corrections in past investment, yet new investments would be made with the forthcoming prices in mind. It appears unlikely that any company would spend the thousands or even millions of dollars necessary to take advantage of the variance between price and cost during the transition if it understands that the gap is to be reduced year by year, until it is completely eliminated at the end of a mid-length transition period. Thus, while the transition plan incorporates some features in the Mixed 2 plan in the *Fourth Supplemental Notice*, it will not have the fundamental flaw that the maximum rate must remain many times higher than cost.

175. We believe that a more lengthy transition would unnecessarily delay the advantages of cost based rates and might encourage unnecessary bypass and inefficient development of the economy. While the seven-year transition plan we have adopted might appear unnecessarily slow to some users and exchange carriers, the flexibility it provides will allow those carriers who feel compelled to move rapidly the opportunity to do so, while not forcing all carriers to adjust at this same pace. The details of the transition plan are explained in the next subpart and in Subpart C of the access charge rules.

E. End User Common Line Rate Structure

1. The Minimum Change

176. As we have already indicated, the End User Common Line charges will meet an increasing share of total NTS costs assigned to the interstate jurisdiction. This element, combined with the Carrier Common Line charges, will recover most of the costs of subscriber plant, including CPE, inside wire, outside wire (*i.e.*, the drop line and interface) and loop costs allocated to the interstate jurisdiction. All of these costs are non-traffic sensitive and, for the most part, are dedicated to particular consumers. (Only party line loops and any investment associated with coin phones are non-dedicated.)

177. During the transition period for End User Common Line charges we shall require that the access tariff include a minimum flat fee of at least two dollars per month for each residential common line. This payment shall be imposed regardless of whether the particular customer makes or receives any interstate calls. The minimum business line customer charge shall be four dollars per common line loop per month. The difference in these charges should reflect the typically higher interstate revenue requirement generated by business lines as compared to residential lines. In addition, we believe that this differential should reduce the incentive a business subscriber might have to use its dedicated facilities in a way calculated to reduce the usage sensitive portion of its access charge, solely to escape usage payments.

178. We also believe that a differential in the transitional minimum charges for business and residential customers is justified because we have selected a low residential minimum in order to avoid an adverse effect upon universal service. Minimum charges for business customers are unlikely to have any meaningful effect upon universal service because demand for business local exchange service—at least for a single line—tends to be inelastic. We have, however, concluded that some limitations should be imposed upon carrier discretion to select a higher minimum rate. Section 69.203 of our Rules precludes any carrier from establishing a business minimum charge that is more than 200% of the residential minimum charge.

2. The Usage Charge

179. The difference between the minimum flat fee (which must be at least two dollars per month per line for residence and four dollars per month per line for business) and the total revenue requirement associated with the end user charge (four dollars per month per line in the first year and increasing amounts in later years) may be recovered through a usage charge, up to a maximum.

180. Traditionally usage has been measured on the basis of minutes of use. The *Fourth Supplemental Notice* had suggested that a per call (rather than per minute) usage measure might be more appropriate for any usage component in the end user access charge. Because nontraffic sensitive costs do not vary with minutes or number of calls, we find neither of these approaches to be clearly superior in all cases. The selection should be based on which will lead to the smaller distortion in usage patterns.

181. Charging users on a per minute basis will encourage users to make shorter calls than they would under efficient pricing. Charging users on a per call basis would encourage them to make fewer and longer calls. Once customers make a call they would have an incentive to communicate as long as efficient, but this efficiency gain must be evaluated against the efficiency loss of fewer calls.

182. The selection of a measure of usage should be based on relative elasticities of demand.[61] If most short calls are made to convey pressing information, the per call charge would not discourage too many callers and this alternative would be desirable. If this is not the case and customers would be willing to make fewer calls or take advantage of patterned calling (*e.g.*, making collect or person-to-person calls that are designed to be refused but to convey information in the request), the per minute option would be preferable. Either a per call or a per minute charge could be used as a valuable component in our transitional plan. Such a charge could be set in order to recover revenue directly from end users (rather than carriers) while prolonging the period before all rates are set on a flat basis. In the *Fourth Supplemental Notice*, we expressed our belief that the elasticity and measurement cost conditions might warrant a per call charge. Several of the comments suggest that under a Mixed 2 option the per call fee would be so high that it would discourage large numbers of calls, and that a per minute charge would be more appropriate. Under the rate structure we have prescribed the per minute or per call charge would be substantially lower than would be necessary under a zero-based Mixed 2 option. We have concluded, however, that the selection of a measure of usage should be left to the exchange carriers. It is certainly possible that different carriers may face customer demands of varying elasticities. The choice that is appropriate for some may be inappropriate for others.

3. The Maximum Charge

183. Because common lines are similar to dedicated interstate lines, we shall require that the maximum collected on any such line through end user charges (the sum of the minimum and any usage payment) be less than or equal to the rate established for dedicated access lines. Throughout the transition period we shall require that no one customer be charged in excess of a pre-set maximum. To eliminate unlawful discrimination among services, the maximum should be no more than the rate that a customer would pay as an end user Dedicated Access Line charge.[62] In special cases, however, we may allow local companies facing hardship in meeting our requirements to raise the maximum and

[61] For a discussion of how relative elasticities of demand are related to cost recovery, *see* W. J. Baumol and D. Bradford, "Optimal Departures from Marginal Cost Pricing," American Economic Review, vol. 60, pp. 265–283, June, 1970.

[62] *See* § 69.205 of the rules for a description of the computation of maximum rates in each transition year

the rate charged for the Dedicated Access Line element above the Dedicated Access Line per line cost. Such an exception would be allowed only as a temporary expedient in the early years of the transition.

184. In each of the five years subsequent to the introduction of the access charge, the maximum allowed each carrier shall be reduced by 10 percent, but shall never fall below total interstate costs. The exchange carrier or the exchange carrier association may adjust either the minimum, usage component, or both to recover revenue. At the end of the five year transition period, the highest maximum allowed would be reduced to 50 percent of its initial level and all Common Line costs, other than the Universal Service Fund and inside wiring costs would be recovered directly from end users.

185. For the last two years of the seven year transition period, we shall allow exchange carriers to continue to recover their End User Common Line revenue requirement through such a combination of flat fee minimum charges and usage charges with the pre-set maximum. Exchange carriers facing substantial bypass threat may wish to introduce flat rate pricing for recovery of all End User Common Line costs early in the transition period. In areas where bypass is a smaller threat, the more gradual transition permitted by continuing to allow usage recovery (to a maximum) appears to have benefits that outweigh the costs.

186. A maximum End User Common Line charge that is no greater than the price paid for a dedicated interstate loop (such as that associated with a closed end WATS line) or an interstate closed end FX line will allow heavy users to make a more rational choice among private line, MTS, WATS or FX service. It would resolve fundamental problems facing this Commission in this and other proceedings. The maximum is also desirable in its own right to reduce the threat of bypass. Since a substantial share of non-traffic sensitive costs is to be assigned to the End User Common Line element and recovered through minimum and maximum charges, the portion of NTS costs recovered in usage sensitive interstate rates will be substantially reduced. Heavy users, therefore, will find message rates that are dramatically reduced toward costs and would find bypass a less desirable option. The expectation of further reductions in both the maximum and the usage charge will further reduce the dangers of uneconomic bypass.

187. Generally, the usage charges will be imposed upon originating callers. We find, however, that it would be inappropriate to assess a usage charge upon the originating caller for certain calls that have traditionally been charged to the recipient. These include collect MTS calls, IN–WATS calls, and calls to an FX or CCSA subscriber that originate at the open end. The purposes that these services were designed to serve would be frustrated if usage charges were assessed to the originating caller.

188. It would be difficult to assess such usage charges directly to the party who receives the call because that end user will normally be served by a different local exchange carrier. We have, therefore, decided to impose a charge upon the interexchange carriers that provide such services as a surrogate for usage charge upon the recipient of the call. Such surrogate charges will, of course, be reflected in the interexchange carrier's charges to recipients in a manner that indirectly recovers appropriate costs from such recipients.

189. We have described this surrogate charge as a "transitional surcharge" in our Rules. Section 69.206 of the Rules describes the formula for computing the transitional surcharges. Although the transitional surcharge will be a carrier's carrier charge, it is an integral part of the transition plan for End User Common Line charges. Transitional surcharge revenues will be deducted from the End User Common Line revenue requirement in order to compute the usage charges that are assessed directly to end users.

190. As ENFIA A access is currently provided, it is difficult for some exchange companies to attribute usage to originating customers. It might appear difficult, therefore, to apply the usage sensitive charges and the maximum charge to these services. One solution is to develop a surrogate charge for these services. We believe, however, that coordination of billing between the exchange carrier and the interexchange carrier offering ENFIA A service is more desirable, efficient, and non-discriminatory.

191. In this *Report and Order* we require local exchange carriers to offer billing services to all interexchange carriers if they offer billing services to any. *See* Part IV. C, *infra*. We anticipate that the OCCs will take advantage of exchange carrier billing services and will submit their calling records to the exchange carriers doing the billing. The exchange carriers can, and are expected to, compare the identities of ENFIA A or C callers with their own subscriber rolls, coordinate calls and callers made over ENFIA A or C lines with calls made over other types of interconnection, and bill the end user with a usage charge appropriate for the totality of interstate calls made. If OCCs take advantage of exchange carrier billing services, or if ENFIA A or C minutes can be attributed to end users without this service, no surrogate charge is necessary.[63]

192. So long as the maximum End User Common Line charge differs from the minimum, we must deal with the incentives that might encourage heavy use of one line for interstate and other lines for local or intrastate toll calling. We have considered two options. First, all users, business or residential, could be required to pay the maximum for all lines in addition to their first line. Alternatively, total usage could be aggregated and divided over total lines regardless of use.

193. Transitional issues become important in making that choice. While such users should not expect to be subsidized in the long run, it might be unjust and inefficient to require them to pay high rates if they made their original investments in good faith and with the expectation that the current pricing structure would continue. Furthermore, the number of lines is likely to be a very poor proxy for ability to pay. Such users appear entitled to the benefits of a transition.

194. We, therefore, shall require customers having multiple lines to pay as if their calling had been spread evenly over all of their lines. Because the total usage of all of these phones is aggregated, customers would have no incentive to load all interstate calling inefficiently on any one line. Moreover, the transition plan will tend to limit the willingness of any user to distort investment strategies in response to differences in single line and multiline rates.

F. Monitoring of the Effects of End User Charges

195. We are well aware that the plan we adopt today constitutes a significant departure from interstate pricing approaches developed in a monopoly environment. We are totally committed to insure that this approach does not lead to a disruption of our nation's telecommunications system or to the elimination of universal service. That commitment is reflected in our decision to exclude Universal Service Fund costs from end user charges before and after the transition periods that are described

[63] We are not including such a surrogate charge in the rules we are adopting, but will consider waiver petitions to permit such surrogate ENFIA A charges if a carrier demonstrates that it would not be feasible to collect the charges from end users. We would expect a strong showing that alternative methods are not feasible.

in this *Report and Order*. That commitment is also reflected in our decision to conduct another notice-and-comment phase of this docket before taking the final steps in the transition to flat rate end user charges.

196. In view of the importance that we attach to the universal service objective, we have decided that this Commission should also monitor the effects of the implementation of end user access charges during the transition period. We are accordingly directing the Common Carrier Bureau to develop and present to us a monitoring system designed to insure that any developments based upon our access charge plan which threaten the "universal" character of service are brought to our attention in sufficient time for us to be able to take ameliorative action. We further direct that such a plan be in place on or before January 1, 1984, the date of institution of access charges. This monitoring plan should be designed to place as little a burden as possible upon the small businesses which constitute the overwhelming majority of our nation's telephone systems. The Common Carrier Bureau is directed to present to us within 90 days of the release of this *Report and Order* its proposal for such a monitoring program.

IV. Guidelines for Recovery of Traffic Sensitive Costs

197. In the *Second Supplemental Notice* we presented a plan to prescribe access charges for four categories of interstate service: MTS/WATS; FX/CCSA open-end access; private line; and OCC–ENFIA. Because it would have included toll connecting trunks which did not carry exchange traffic, we rejected the definition of "exchange circuit plant" appearing in the *Separations Manual* as a basis for defining the investment to be included in the access revenue requirement. Instead, in order to determine the investment that would be allocated to exchange access services, we defined "exchange plant" as plant used to furnish both toll and local service. Investment in other plant, called interexchange plant, would be excluded from the access revenue requirement. 77 FCC 2d at 239–240.

198. We had proposed that investment in exchange trunk outside plant (OSP) used jointly for exchange and toll message service (exchange trunk OSP in Category 1.22) and related exchange trunk circuit equipment (central office equipment in Category 8.12) be distributed among the three message service categories on the basis of minutes of use. Investment in exchange plant used for private line services and related equipment was to be directly assigned to the private line category. (OSP linking end offices and toll offices, however, was to be excluded and considered interexchange plant.)

199. Investment in traffic sensitive Category 6 central office equipment (local dial switching equipment) was to be distributed among the message access service categories (MTS/WATS; OCC–ENFIA, and FX/CCSA) on the basis of relative dial equipment minutes (DEMs), except for that portion directly assigned to private line services like CCSA. We proposed to rely on the factors specified in the *Separations Manual* for allocating investment in other traffic sensitive plant among the four access service categories. Direct investment in traffic sensitive equipment unrelated to OCC exchange access, however, was to be excluded from exchange plant. If *Manual* factors could not be used, we proposed at least to rely upon *Manual* principles or, alternatively, relative minutes of use to distribute the cost of the remaining traffic sensitive plant among the service categories.

200. Because the costs and revenues associated with interstate FX and CCSA open-end access services have been treated as intrastate, we found it necessary to adjust the revenue requirement for each access service category to reflect a credit to the FX/CCSA category. Only in this way could we prevent a double charge to users of this interstate service. By the time our access charge plan is implemented, however, we expect that the *Separations Manual* will be revised. We note that the Joint Board has unanimously proposed that the investment, expenses and revenue attributable to interstate FX and CCSA open-end access services be treated as interstate costs and revenues.[64] Thus, when the access charge tariff replaces the intrastate tariff for these services, there should be no need to make the proposed credit adjustment.

201. To compute the access charge for each message service, we proposed that its revenue requirement be divided by total holding time minutes of use for that category to obtain a charge per holding time minute of use. An interstate carrier using that message access service would then pay the local carrier an amount equal to the product of that unit charge and that carrier's holding time minutes of use.

202. The MFJ is, of course, a supervening event that occurred since we released the *Second Supplemental Notice*. The MFJ not only requires AT&T's divestiture of the BOCs, but also imposes upon the BOCs the obligation to provide exchange access to all interexchange carriers equal in price and quality to that provided to AT&T. Recognizing that facilities to provide such access do not presently exist, the MFJ sets a timetable for phasing in the required equal access. Each BOC must begin to offer such access to all interexchange carriers no later than September 1, 1984.[65] BOCs must file tariffs (to be effective on the date of divestiture) which will govern BOC provision of exchange access to all interexchange carriers.

203. Tariffs described in the MFJ must meet the following general criteria:

(1) That they provide unbundled schedules of charges for all exchange access services, including those provided to AT&T (MFJ, App. B, Section B, para. 1);
(2) that they discriminate against no carrier or other customer (MFJ, App. B, Section B, para. 1);
(3) that they require interexchange carriers to pay only for the type of access they use (i.e., no "take it or leave it" bundling of services) (MFJ, App. B, Section B, para. 2); [66]
(4) that their charge for each type of exchange access must be cost justified (MFJ, App. B, Section B, para. 2).[67]

204. The MFJ defines "exchange access" to include any activity or function that a BOC performs in connection with the origination or termination of interexchange telecommunications. The judgment envisions a tariffed "menu" of such services from which an interexchange carrier may select the options it wants. It expects that each BOC will unbundle the rates for as many of these services or functions as technology will permit. The goal of this requirement is to give an interexchange carrier maximum flexibility in requesting and paying for

[64] *See Joint Board Order, supra*, 47 FR at 54495.

[65] By September 1, 1985, equal access must be available through end offices serving at least one-third of that BOC's exchange access lines. Unless a BOC obtains a waiver of the schedule requirements, equal access through each of its end offices must be available by September 1, 1986. Such a waiver is available only for end offices using electromechanical switches or serving fewer than 10,000 access lines. To receive the waiver, the BOC must show the Court that for particular categories of service the cost of equal access through such end offices outweighs the potential benefits to users of telecommunications services. Any denial of access based on this exception must be minimized both to its extend and duration. *See MFJ*, App. B, Section A, para. 3.

[66] Nothing in the decree precludes a BOC from also offering exchange access superior or inferior in type or quality to that provided AT&T at charges reflecting the increased or reduced cost of access.

[67] This means that differences in charges must be justified on the basis of differences in services.

the precise type of exchange access it requires.

205. As the Competitive Impact Statement prepared by the Department of Justice makes clear,[68] the MFJ does not purport to prevent the Commission from prescribing access charges to recover BOC costs allocated to exchange access by jurisdictional separations that do not satisfy all the conditions imposed by the MFJ upon carrier initiated tariffs. Its intent is only to require that, given the Commission's ground rules, the BOCs use a cost-based tariff structure, non-discriminatory in effect, to differentiate among the access charges they levy for each element of service.[69]

206. In the *Second Supplemental Notice*, we had concluded that the only way to eliminate the discrimination among interstate and foreign services was to develop "new allocation procedures in which formulae would be applied uniformly for all services to those plant elements which are used in basically the same way by all services and applied selectively to specific services for those plant elements which are used differently for different services." 77 FCC 2d at 231. Thus, the general criteria that the MFJ imposes upon BOC initiated access charges are fundamentally consistent with the goals of this proceeding. The MFJ, however, would include in access charges compensation for the use of facilities and services that our tentative plan had excluded from its definition of access services. In the *Fourth Supplemental Notice* we noted that while the BOCs could comply with MFJ requirements by filing supplemental charges for elements excluded from our rules for computing access charges, it might be desirable to adapt our plan to include charges for such facilities and services.[70] 90 FCC 2d at 153. We sought suggestions to adapt that plan to include these additional services and facilities.

207. We have concluded that, for reasons we have already discussed, the better choice is to adapt our tentative plan to account for the additional access elements contemplated by the MFJ. In particular, we have added to the plan an element we call the "Dedicated Transport element" through which local telephone companies will recover the interstate revenue requirement associated with the costs of the facilities linking the switches of interexchange carriers to the distribution facilities of local carriers. While we recognize that this element reflects costs that are fundamentally non-traffic sensitive in nature, we have chosen to include the Dedicated Transport element in our discussion of traffic sensitive costs because we perceive it to be an intrinsic part of the costs associated with providing interexchange carriers with access to the local network. Moreover, while the costs associated with the Dedicated Transport element are not traffic sensitive and will not be recovered through usage sensitive rates, these facilities will continue to have such an impact upon the local carrier's configuration of the traffic sensitive components of its network that we believe it is logical to discuss recovery of the cost associated with this component of local network facilities in this Part of this *Report and Order*.

208. The *Separations Manual* classifies certain central office equipment as non-traffic sensitive and allocates the related investment between the jurisdictions as if it were subscriber plant equipment. As previously noted, we have decided that we should not include this non-traffic sensitive central office equipment in our NTS plan because the separations classifications may change in the future. We are, nevertheless, including separate elements for traffic sensitive and non-traffic sensitive portions of Category 6 central office equipment in this part of our plan for the initial access charges because it appears unlikely that any changes in the separations classifications for Category 6 central office equipment could be implemented in 1984.

209. In the *Fourth Supplemental Notice*, we stated that we still found it "reasonable to expect interchange carriers to compensate exchange carriers for traffic sensitive costs on a traffic sensitive basis." 90 FCC 2d at 152. The tentative plan in the *Second Supplemental Notice* called for interexchange carriers to compensate exchange carriers for traffic sensitive costs on a traffic sensitive basis. In their responses to the *Fourth Supplemental Notice*, some participants stated that end users should be charged directly for all costs associated with access services, including traffic sensitive costs.[71] This, they asserted, would reduce administrative expenses and eliminate the inaccuracies of separations and settlements. We believe it would accomplish neither. With the adoption of our access rules, the settlement process for access service compensation will end. While billing end users for all access costs might indeed reduce administrative expenses for the interexchange carriers, such an approach would impose a tremendous burden on the exchange carriers and end users. If the customer originating the call had to pay directly for the costs of the facilities used to terminate his interstate call, this would require the terminating exchange carrier, apparently through recourse to the interexchange carrier involved, to identify the end user originating the call and then to bill that user directly for the costs associated with the type of interconnection provided to the interexchange carrier. This would not only impose substantially greater administrative burdens upon these exchange carriers, but also would constitute a drastic change in the relationships among end users, local telephone companies and interexchange carriers, a change that we cannot perceive to be in the public interest. If instead all end users are expected to bear the costs of all plant in their exchange area used to provide access service to interstate carriers, whether the resulting charge is flat, usage sensitive or a combination of both, almost certainly that approach will result in costs being recovered from customers who have not caused the exchange carrier to incur those costs. In particular, end users will be subsidizing the use of their local facilities by those terminating calls in their exchange area. Such an unfair result cannot be in the public interest. Moreover, this approach would not eliminate any alleged inaccuracies in the separations process.

210. In general, those participants addressing the appropriate structure for charges to recover traffic sensitive costs agreed that the rates should be usage sensitive.[72] In its comments to the *Fourth Supplemental Notice*, Southern Pacific adds that these charges should be sufficiently unbundled to assure that each interexchange carrier pays only for the local access facilities it receives. We believe that the rules we have adopted to recover the costs of access facilities are sufficiently refined to achieve this

---

[68] *See* Competitive Impact Statement filed by United States Department of Justice at 35–36, United States v. American Telephone and Telegraph Co., D.D.C. Civil Action No. 74–169.

[69] An antitrust decree could not, of course, limit this Commission's power to prescribe a system of charges that is designed to satisfy Communications Act requirements. The MFJ does not purport to do so.

[70] Examples of such facilities and services include the lines or trunks between a telephone company end office and an interexchange switch and billing and collection services.

[71] *See, e.g.*, Comments of United States Transmission Services, pp. 12, 20; Comments of the Association of Long Distance Telephone Companies, p. 8 at n. 10, pp. 25–26; Joint Comments of Tel. Systems Management Corporation, Satelco, Inc. and Teltec Saving Communications Co., p. 2; Comments of Curtis M. Bushnell, Public Utility Consultant, pp. 15, 19.

[72] *See, e.g.*, Comments of Centel, SBS and USITA.

result. Southern Pacific also asserts that these charges should be adjusted to reflect the diminished value of interexchange service resulting from unequal interconnection. We have already explained why we have chosen to rely upon a premium access charge to account for differences in the quality of interconnection offered to different interexchange carriers. *See* Part III.C, *supra*. Consequently, our rules for computing charges to recover traffic sensitive costs rely only upon cost causation to compute charges.

211. In developing our access charge rules we have considered exchange access for interexchange carriers providing switched services to be composed of two categories or groups of elements. The first category consists of the transmission (and related switching) facilities which carry interexchange traffic between the interexchange carrier's facilities and the Class 5 (end) office at which this traffic originates or terminates. This plant always includes some dedicated trunks which carry only that interexchange carrier's traffic to a switch within the exchange. It also includes the interface between the dedicated transport line and the exchange carrier's switch. For the OCCs, it would correspond to Rate Element 1 in the ENFIA A tariff (BSOC–8) and in the ENFIA B and C tariff (BSOC–9). This is the element we have called "Dedicated Transport." If the local switch is not the end office switch used to terminate or originate an interexchange call, additional trunks and possible local tandem switches will be required to complete transmition between that end office switch and the interexchange carrier facilities. Most of this equipment is traffic sensitive (TS) and because it may be shared by several carriers, we call the associated access element "Common Transport."

212. The second category, called the "end office" category, corresponds to the central office equipment in the end office at which the interexchange carrier's traffic originates or terminates. This element includes all the traffic sensitive central office equipment (COE) used to provide switching and related services, including operator assistance services. In this Part, we describe the guidelines we have developed to recover the costs allocated to the different plant elements within the categories. We also discuss the rules that will govern recovery of costs for such special services as Billing and Collection.

A. End Office Charges

213. To complete transmission of interstate or foreign switched communications to and from the premises of an end user, an interexchange carrier must rely upon facilities located at the end office to which that end user's telephone is directly linked. In particular it must use local dial switching equipment and may use operator services to assure successful transmissions. We refer to the charges associated with the use of this equipment generically as "end office charges." In this section we unbundle these charges into five elements: (1) Line Termination; (2) Local Switching; (3) Intercept services; (4) Information services; and (5) Operator Assistance services. The first two elements reflect an interexchange carrier's use of local switching equipment, which the *Separations Manual* classifies as Category 6 central office equipment; the remaining three elements reflect an interexchange carrier's use of equipment that the *Separations Manual* classifies as Category 1 central office equipment. For this reason we are adopting these *Separations Manual* categories as the basis for defining the direct costs allocated to each of these elements.[73]

1. Category 6 Central Office Equipment.

214. *Line Termination Element.* The *Separations Manual* divides Category 6 Central Office Equipment (COE) into non-traffic sensitive (NTS) and traffic sensitive (TS) subcategories to distinguish the fixed costs of terminating lines in the switch from the usage sensitive costs of switching.[74] The Line Termination element consists of the portion of the investment in the local switch that separations considers non-traffic sensitive and the associated indirect investment and expenses. Such costs should be recovered from all interstate carriers providing switched services and allocated among these carriers based on their relative conversation minutes.[75]

215. Separations has relied upon factors developed by Bell-USITA studies to determine the portion of investment in different types of switches that is and is not traffic sensitive. In CC Docket No. 80–286, the Joint Board is considering whether these factors should be revised.[76] We believe, however, that to assure that our access charge plan becomes effective on January 1, 1984, we must provide carriers with specific guidelines for developing their access charges as early as possible. Consequently, we must proceed to establish these guidelines without the benefit of the Joint Board's recommendations. We have concluded that in developing the access charges to become effective in 1984 it is reasonable to rely upon existing Bell-USITA factors to distinguish NTS from TS Category 6 COE. If Joint Board recommendations result in the revision of these factors, we would expect these changes to be reflected in access charges for later years.

216. Our tentative plan in the *Second Supplemental Notice* had assigned Line Termination costs to private lines even though they do not terminate in a Class 5 (end office) switch. We intended that apportionment to serve as a surrogate for certain costs, including those attributable to "leaky PBXs", that cannot be easily identified.[77] In the plan we adopt today, we have already allocated to private lines the costs of other NTS plant that could serve to ensure recovery as a surrogate for these less easily identifiable costs. We also believe that the leaky PBX phenomenon may become much less significant in the

---

[73] The procedures for computing charges for those elements are described in §§ 69.108–69.110 of the rules.

[74] That portion of non-traffic sensitive category 6 central office equipment used to provide trunk conditioning and signalling between the carriers' switching facilities is included in the Dedicated Transport element.

[75] The allocation of NTS Central Office Equipment on a usage basis represents an apparent inconsistency with the approach we have taken to recover almost all other non-traffic sensitive plant. We believe, however, that this apparent inconsistency is resolved by a closer examination of the facilities involved.

Non-traffic sensitive facilities the costs of which are to be recovered through end user charges are all dedicated to particular subscribers or, in the case of party lines, groups of subscribers. (The only exception is pay phone service, the costs of which are apportioned on a usage basis).

As compared to older electro-mechanical facilities, a far larger fraction of modern central office facilities has been classified as non-traffic sensitive. Such modern facilities can offer subscribers many more or improved service options than could the facilities that they replace. Not all subscribers require or even desire such additional services. It does not seem appropriate, therefore, to treat these facilities as if they were dedicated.

The Joint Board will have the opportunity more closely to investigate whether the *Separations Manual's* treatment of the costs associated with these electronic switches should be revised. It is possible that after its investigation is completed we shall perceive a need to revise the rate structure for this element so that it reflects cost causation more accurately.

[76] *See Joint Board Order, supra*, 47 FR at 54496.

[77] These costs include the costs of "hard wiring" these lines into place or otherwise providing special arrangements or treatment for private lines. They also include costs attributable to the "leaky PBX" phenomenon that we described in the *Second Supplemental Notice*. *See* 77 FCC 2d at 241. This phenomenon arises whenever an interstate call is "patched" through a PBX from a private line to a common subscriber line. That common line, the local exchange switch, another subscriber's common line and another subscriber's station equipment are all used to complete the call, but such private line usage of those facilities is not presently reflected in the computation of private line access service compensation.

future as cost-based access charges produce a shift to MTS by those private line customers capable of "leaking." For these reasons we are not assigning any Line Termination costs to private line services.

217. *Local Switching Element.* Through charges associated with this element, local carriers will recover the costs associated with interexchange carriers' use of traffic sensitive (TS) Category 6 Central Office Equipment (COE) to complete interstate switched services.[78]

218. In the *Second Supplemental Notice* we had concluded that no traffic sensitive costs should be assigned to services not using the local exchange's switching facilities. Consequently, we proposed that these costs be allocated on a usage basis among three switched service categories: MTS/WATS; FX/CCSA open end access; and OCC–ENFIA. Weighted dial equipment minutes (DEMs) were used as the unit of measurement.

219. The *Separations Manual* uses DEMs as the unit of measurement for purposes of allocating the traffic sensitive portion of Category 6 COE between the interstate and intrastate jurisdictions. However, § 24.63 of the *Manual* applies a weighting factor known as TWF (Toll Weighting Factor) to the "toll" DEMs to reflect the difference in average cost per toll minute of use as compared to the average cost per exchange minute of use. The present *Manual* does not specify the TWF factors.[79] Different factors were developed for different types of switches in the Bell-USITA studies that developed NTS-TS ratios for the same categories of switches. The TWF factor differs from the subscriber plant factor (SPF) in that TWF is related to cost causational principles. Long distance calls require switching capabilities that local exchange calls do not. The TWF factor was designed to segregate costs that are peculiar to long distance calls.[80]

220. In comments filed in response to the *Second Supplemental Notice,* Southern Pacific suggested that costs that are assigned to the interstate jurisdiction as a result of the application of the TWF factor should be excluded from the computation of ENFIA A access charges because ENFIA A services use the local exchange in the same manner as local exchange service.[81] (Comments, pp. 49–50). In Reply Comments to the same *Notice,* AT&T agreed that some adjustment would be reasonable. It noted that at the open-end FX also uses local exchange switching in the same manner as local exchange service. (Reply, p. 63).

221. In the recent *Joint Board Order,*[82] the Joint Board proposed that both interstate FX/CCSA open-end access services and interstate ENFIA services be explicitly recognized in the *Separations Manual* as interstate services. It also recommended that for apportioning costs of traffic sensitive switching equipment, all FX/CCSA, ENFIA A and ENFIA C dial equipment minutes be treated like exchange service DEMs with no toll weighting factor applied to them. Recognizing that ENFIA B appeared to use the local switch more like MTS than like exchange service, the Joint Board is seeking to determine whether the similarity between ENFIA B and MTS warrants treating DEMs generated by ENFIA B use of local switches like DEMs generated by MTS use.

222. If the average costs associated with different interstate switched services' use of local dial switching equipment vary, these differences should be reflected in the rate structure of this element in order to assure that there will be no unlawful discrimination in rates for functionally equivalent services. As a first approximation to achieving this goal we are requiring that exchange carriers establish separate charges for two categories of service. The first category corresponds to local dial switching provided through line side termination at a Class 5 (or end) office or, for interstate services other than MTS and WATS, through termination in a local tandem switch. The second corresponds to a local dial switching provided through trunk side termination at a Class 5 office for MTS/WATS equivalent services and switching provided for MTS and WATS. Based on avilable information we believe these service categories result in a grouping together of those interstate service offerings for which the average cost per minute of using the local switch is approximately the same. In particular, use of switching equipment by FX/CCSA open-end access, ENFIA A and ENFIA C services should fall within the first category of service while end office switching for MTS, WATS and ENFIA B should fall within the second category.

223. For computing 1984 access charges, the costs associated with local dial switching equipment shall be allocated between the two service categories based on relative DEMs, after the toll weighting factors developed in the separations process have been applied to DEMs generated by services in the second service category.[83] To convert these allocations to monthly per minute charges, the revenue requirement for each service category shall be divided by that category's projected average conversation minutes.[84] For a given month, the local switching equipment charge levied upon a carrier providing a service (or services) included in that service category will be the product of that category's unit charge and the conversation minutes generated by the carrier's service(s).

224. In responses to our *Second Supplemental Notice,* some participants had suggested that the tentative plan be modified in order to incorporate peak and off-peak pricing in the prescribed access charges. (Consumers Union Reply, pp. 9–10; NTIA Reply, pp. 32–33). Such a modification would presumably be limited to the traffic sensitive components like the Local Switching element inasmuch as non-traffic sensitive costs do not vary with usage. That suggestion warrants consideration as a long-run solution. However, we

---

[78] Some services classified as private line are, in fact, switched (e.g., CCSA). If costs of some traffic sensitive switching equipment are now directly assigned to such services, we intend such direct assignment to continue.

[79] The Joint Board has tentatively recommended that this continue. *See Joint Board Order, supra,* 47 FR at 54505.

[80] Although the TWF factor was designed to reflect cost causational principles, it is not based on a historical cost causational principle. The *Manual* was designed to allocate costs between two "old" services that will continue to exist. Allocations are based upon actual relative use during a prior period rather than projected use during some future period.

[81] At the time these comments were filed, the ENFIA B and ENFIA C service offerings did not exist. ENFIA B and ENFIA C provide access through trunk side connections to end offices and through trunk side connections to tandem offices respectively. ENFIA B provides more signaling information to the interexchange carrier than does ENFIA A, as well as automatic number identification and answer supervision. ENFIA B also permits subscriber use of rotary dial telephones to reach OCC switches. While ENFIA C does not provide these additional services, it permits an OCC switch to serve subscribers in more than one exchange directly.

[82] *See Joint Board Order, supra,* 47 FR at 54496, 54498.

[83] We recognize that the Joint Board deliberations may result in development of new TWFs to be applied exclusively to ENFIA B services. We anticipate that the scheme for allocating investment in TS local dial switching equipment we prescribe here would be altered so that these new TWFs would be applied to ENFIA B DEMs. We believe, however, that it is unrealistic to expect that development of such new TWFs could be completed before the end of the third quarter of 1983. The carriers require a reasonable time to develop and file their 1984 access charges and we shall require time to review these filings. For this reason, we conclude that 1984 access charges should not reflect the development of any new TWFs for ENFIA B services.

[84] These averages shall be developed through traffic studies, with necessary information being supplied by the interexchange carriers if the exchange carrier is unable to obtain such information directly.

could not devise adequate rules for computing cost-based peak or off-peak access charges for this traffic sensitive plan from the information in this record. Therefore the rate structure, at least for 1984 access charges, will reflect no discount for off-peak usage of traffic sensitive exchange facilities.[86]

225. It should be noted that the efficiency benefits of peak pricing flow from the use of peak pricing in end user rates. The use of peak pricing in a carrier's carrier charge need not have any direct effect upon usage. Consistency between carrier's carrier charges and end user rates would be desirable, but time of day pricing of access service compensation is not a condition precedent for time of day pricing of end user services. MTS tariffs have established different rates for different times for a number of years even though the settlements formula for computing MTS access service compensation has never assigned different weights to different MTS minutes.

2. Manual Switchboard Services

226. Category 1 central office equipment consists of investment in manual switchboards. Manual switchboards are used primarily in connection with MTS and WATS service. In reply comments to the *Second Supplemental Notice*, however, AT&T asserted that the OCC–ENFIA and FX–CCSA services should share in costs relating to manual switchboards providing information and intercept services because both FX–CCSA open end access and OCC–ENFIA services also rely upon those operator services. AT&T indicated that directory and intercept switchboards can be identified without undue difficulty. Therefore, we propose to associate Category 1 investment allocated to the interstate access with one of three access elements: (a) The Intercept element; (b) the Information element; and (c) the Operator Assistance element.

227. *Intercept Element.* A local carrier provides Intercept services when it causes a telephone call directed to an improper telephone number to be redirected to an operator or a recording that tells the caller why the call, as dialed, could not be completed and if possible, provides the correct number. By its nature, this service must be provided either to all interexchange carriers or to none. We believe that because all rely upon this service to assure successful completion of their customers' interexchange calls, all should share in the costs associated with its provision. There do not appear to be any cost or value differences with respect to the use of Intercept services that would warrant the application of any weighting factors to distinguish one interexchange carrier's use from another's. Therefore, we have decided to subject all interexchange carriers to a per minute Intercept charge that is computed by dividing costs allocable to this element by total conversation minutes for all switched or partially switched interstate services.

228. *Information Element.* As its name suggests, Information service is provided when, by dialing the proper service code or number, a customer is connected to an operator who will tell him the telephone number of another customer, provided that the latter's number is or will be listed in the telephone directory. Based upon AT&T's *Second Supplemental Notice* Reply Comments we conclude that the costs associated with this service can be unbundled from those associated with the use of other Category 1 COE. We believe that these costs should be unbundled from other manual switchboard costs. At the present time directory information that is provided for long distance services is provided through transmission facilities of AT&T and its interexchange partners. These costs will accordingly be assessed upon those carriers unless other interexchange carriers establish connections with such directory assistance facilities.[86]

229. *Operator Assistance Element.* This element describes the remaining interstate operator services, primarily direct assistance in the completion of toll calls. To this element we allocate that investment in Category 1 COE not already allocated to either the Intercept or Information elements, as well as the indirect investment and expenses associated with this Category 1 investment under our allocation rules. The costs associated with this element should be recovered through a non-discriminatory, usage-sensitive rate structure imposed only upon those interexchange carriers who in fact use these interstate Operator Assistance services.

B. Transport Charges

230. As part of its access service, each local exchange carrier will provide transmission (and possibly) switching facilities to carry interstate switched traffic between an interexchange carrier's facilities and the end office through which this traffic originates or terminates. This plant always includes some dedicated trunks or lines, which carry only that interexchange carrier's traffic to a switch within the area served by the local carrier.[87] We refer to the element corresponding to this plant as the "Dedicated Transport" element. If this exchange carrier switch is not the end office switch used to originate or terminate the interstate call, additional trunks, local office and local tandem switches will be required to complete the communications path between the originating (or terminating) end office and the interexchange carrier's facilities. We refer to the element corresponding to this plant as the "Common Transport" element.[88] The cost associated with both Dedicated Transport and Common Transport will be recovered as part of the carrier's carrier charge for access to the local company's facilities needed to complete interstate communications.[89]

1. Dedicated Transport Element

231. This element consists of the dedicated voice grade transmission facilities and the interface at which those facilities and the exchange carrier's switch are joined.[90] For non-

---

[86] We intend shortly to establish a Joint Board that will consider the need for changes to the *Separations Manual* that will allocate investment and expenses between the jurisdictions based on peak and off-peak use of exchange facilities. When that Board has completed its work on this subject, we shall reconsider our decision concerning a peak/off-peak rate structure for traffic sensitive access charge elements.

[86] If that contingency arises, exchange carriers that provide the information service will be required to devise an appropriate method to apportion such costs among all interexchange carriers that are connected with such directory assistance switchboards.

[87] In some cases, two exchange companies jointly might provide such a trunking service.

[88] The procedures for computing changes for the Transport elements are described in §§ 69.111 and 69.112 of the Rules.

[89] We are not, however, including any use of switching in a local dial (Category 5) switch in the Common Transport element.

[90] The facilities included in this element and other elements are the subject of the Settlement Agreement between the Bell System companies and the OCCs that we accepted as a disposition of Docket 20099. *See* 52 FCC 2d 727 (1975). That agreement established interim rates for the OCCs' use of certain Bell System facilities. It also established procedures for revising such rates that are still in effect. In particular, it permitted a carrier-initiated increase in the rates only on six months' notice to the OCCs. *Id.* at 734–35. We predicated our acceptance of that agreement on our finding that "the responsibilities undertaken by the parties are in the public interest because they expedite and further the implementation of established Commission policy." *Id.* at 732. If applied to the access tariffs which will replace the existing tariffs under which the BOCs provide dedicated transport facilities to the OCCs, such a notice requirement could prevent the timely implementation of these access tariffs. We have not determined whether the agreement purports to establish a notice requirement under these circumstances. Because we find such delay contrary to the public interest, we

premium carriers, *i.e.* the OCCS, this element would correspond to what is now designated as rate element 1 in the ENFIA A tariff. To this element we allocate investment in the outside plant linking the carriers' switching facilities as well as any Category 8 and non-traffic sensitive Category 6 central office equipment used to provide trunk conditioning and signaling between the carriers switching facilities.

232. USITA has suggested that the costs associated with this element be recovered through rate structures reflecting "capacity ordered." A rate structure based on "capacity ordered" may bear little relationship to what is, in fact, provided. We believe that an interexchange carrier should pay only for facilities it in fact receives. We can appreciate that in order to plan its network to assure the highest quality of service to all its customers a local carrier requires advance information of an interexchange carrier's anticipated needs and demands upon the local system. We do not believe that this information bears any intrinsic relationship to the costs incurred in currently providing services to these carriers.[91]

233. We are requiring that the revenue requirement associated with the Dedicated Transport element be split into three parts on the basis of relative net investment in: (1) Interface arrangements; (2) voice grade transmission facilities; and (3) equipment used to provide conditioning for such transmission facilities. As a result, the charge associated with the Dedicated Transport element will be the sum of a charge reflecting the costs of voice grade transmission facilities dedicated to an interexchange carrier's use, a charge reflecting the costs of conditioning those facilities and a charge reflecting the costs of any additional central office equipment located at the boundary between those facilities and the local carrier's switch to which they are joined. In requiring this unbundling of charges our aim is to assure that the charges imposed upon an interexchange carrier for its use of dedicated transport facilities reflect the costs associated with the facilities provided to that carrier.[92]

234. *Interface Arrangements.* To this subelement we have allocated all investment in central office equipment used to provide interface arrangements. We have taken this step because we recognize that exchange carriers will be offering to interexchange carriers access arrangements that rely upon central office equipment to provide different signaling and other capabilities. We shall require that each exchange carrier establish in its access tariff a separate charge for each additional kind of interface arrangement it proposes to offer.[93]

235. We shall require that each exchange carrier present a listing of subelements corresponding to all the interface arrangements it intends to offer. It is through these subelements that the carrier will recover the share of its projected revenue requirement for Dedicated Transport that our allocation rules have apportioned to interface arrangements. To provide carriers with sufficient flexibility to develop access charges reflecting the many kinds of interface arrangements they may choose to offer, we have refrained from prescribing rules specifying precisely how the charges associated with these subelements must be calculated. We do require, however, that differences in the charges for these interface arrangements reflect cost differences.

236. *Conditioning arrangements.* The quality of voice communications over transmission facilities may be impaired by such factors as trunk loss, noise or echo. Alone or in combination, these factors may partially or sometimes completely obscure the information content of voice transmissions. Transmission facilities, however, may be conditioned to control these parameters [94] in order to improve the quality of such transmissions.

237. We shall require that each exchange carrier present a system of subelements corresponding to all the conditioning arrangements it intends to offer. Subelement charges will also be designed to recover the aggregate conditioning revenue requirement and charges for particular subelements will be designed to reflect cost differences among conditioning arrangements.[95]

238. *Transmission facilities.* To this subelement we allocate investment in all dedicated voice grade transmission facilities to be provided to interexchange carriers to complete their interstate or international communications service. These dedicated facilities are analogous to the non-traffic sensitive subscriber line plant dedicated to an end user's use. Consequently, we shall require local telephone companies to recover the costs associated under our allocation rules with this subelement through a flat monthly charge imposed upon each interexchange carrier receiving access through such facilities. The costs associated with Dedicated Transport facilities are a function of two parameters. The first is the distance between the interexchange carrier's facilities and the "entry switch" through which that carrier's traffic enters the exchange area. The second is the number of voice grade channels provided to the interexchange carrier. The latter we shall call "conversation capacity." We shall require that the monthly charge levied upon an interexchange carrier for voice grade facilities dedicated to its use shall be based upon the conversation capacity provided by these facilities and a distance factor.

239. At this time all AT&T toll offices are linked to local offices through 4-wire or 4-wire equivalent voice grade facilities. At least some AT&T offices are collocated with end office switches. Other interexchange carriers, however, have never been allowed to collocate their switches with local telephone company switches. A strictly distance-sensitive rate structure for dedicated transmission facilities would thus give AT&T an unfair competitive advantage. Consequently, we shall require that for

---

are abrogating any contractual notice requirement of the Settlement Agreement that might be applicable. Any other provision of the agreement or the subsequent ENFIA agreement that may be inconsistent with the Rules we are adopting will of course, cease to be effective when access charges become effective. The decision in *MCI Telecommunications Corp. v. FCC*, 665 F. 2d 1300 (D.C. Cir. 1981) does not preclude us from abrogating provisions that are inconsistent with our prescription of an access charge plan. That decision related to carrier-initiated tariff charges.

[91] *See* Reply Comments of United States Independent Telephone Association.

[92] We believe that this is very similar to the refinements within this rate element advocated by the Ad Hoc Committee and Southern Pacific in their comments submitted in response to the *Fourth Supplemental Notice*. *See* Report on Access Charges attached to Comments on the Fourth Supplemental Notice filed by the Committee and Comments of Southern Pacific Communications Company, Appendix B.

[93] Such arrangement might include, for example, an E & M lead interface, which is:

A specific form of interface between a switching system and a trunk in which the signaling information is transferred across the interface via 2-state voltage conditions on two leads, each with ground return, separate from the leads used for message information. The message and signaling information are combined (and separated) by a signaling system appropriate for application to the transmission facility.

Engineering and Operations in the Bell System (1977) at 652. For a general discussion of common interface arrangements, *see id.* at 161–66, 394–403.

[94] *See, e.g.*, the family of "W types" of conditioning offered in the Bell System's Facilities for Other Common Carrier Tariffs.

[95] Association tariffs may contain exceptions for participating carriers that offer interface and conditioning arrangements that differ from any standard subelements in the association tariff. Similar exceptions will be permitted for Special Access subelements.

purposes of computing a monthly charge associated with this subelement, for an interexchange carrier other than AT&T the distance between the interexchange carrier's facility and the "entry switch" to which it is linked shall be deemed to be the minimum of the following: the airline distance between the entry switch and this interexchange carrier facility; and the airline distance between the entry switch and any AT&T toll switch within 5 miles of the interexchange carrier's facility.[96]

240. We recognize that the costs of providing Dedicated Transport to a particular interexchange carrier also depend upon the transmission media selected to carry its traffic between its facilities and the "entry switch." A purely cost-based rate structure would tie the charges imposed on an interexchange carrier to this factor also. With all the permutations and combinations of transmission media possible, however, such a rate structure could easily become unworkably complicated. The rate structure we have adopted today, while not purely cost-based, avoids the administrative problems associated with such a rate structure and provides local exchange carriers with the incentive to use the most efficient means of transmitting traffic and the flexibility they need in planning their network. We believe that these advantages warrant this limited departure from cost-based pricing, at least during the first year in which access charges are in effect.

2. Common Transport Element

241. To this element we allocate the investment in all outside plants used in whole or in part to transmit an interexchange carrier's switched traffic between the end office at which it originates or terminates and the transport facilities dedicated to that carrier's use. We also allocate some investment in intermediate switching facilities such as local tandem offices.[97]

242. The costs associated with this access element are both usage and distance sensitive. Consequently, we are prescribing a rate structure that is both usage and distance sensitive. The measure of usage shall be conversation minutes of use, while the measure of distance shall be the airline distance from "entry switch" to the end office at which a call originates or terminates.

C. Other Charges

1. Billing and Collection Services

243. To this element we are allocating all the costs associated with a local carrier's providing billing and collection services to an interexchange carrier. In particular this would include investment in Category 4 central office equipment, automatic message recording equipment, and most of the revenue accounting expenses allocated to the interstate jurisdiction.[98]

244. The MFJ would permit a BOC to restrict its offer of billing and collection services to only some interexchange carriers unless the BOC threatened to withhold service from a customer failing to pay charges levied by such interexchange carriers.[99] The MFJ does require, however, that if a BOC offers billing and collection services to even one interexchange carrier, that the charge for this service must be in the BOC's access tariff. Only common carrier services can be tariffed. The hallmark of a common carrier service is that it is offered to all indifferently. *See CCIA* v. *FCC, supra,* slip op. at 25. Consequently, to assure a result consistent with our powers under Title II of the Communications Act of 1934, as amended, 47 U.S.C. 201 *et seq.*, and the intent of the MFJ, we shall require that an exchange carrier offering billing or collection or billing information services to one interexchange carrier must offer them to all.

245. In contrast with our treatment of rates related to other access elements, the only restrictions we shall place upon a local carrier offering Billing and Collection services is that it not discriminate among carriers selecting these services. Any differences in charges levied for these services must be cost justified.

2. Special Access

246. Special Access includes a variety of services and facilities that we have decided to include in our system of access charges in order to ensure that tariffed access charges of all exchange carriers encompass services and facilities that the divested BOCs will be offering pursuant to tariffed access charges.[100] If the MFJ did not exist, we would probably exclude these facilities from the access charge scheme and classify them as "Interexchange" for this purpose. Most services that use these facilities—such as program transmission, telex, etc.—are not close substitutes for MTS and changes in existing rate structures would not be required in order to eliminate discrimination or preferences among MTS and services that are close substitutes for MTS.

247. The Special Access category also includes a portion of interstate or international private lines that terminate in a PBX or similar equipment and interstate WATS lines. We limit the Dedicated Access Line element to the portion of those lines on the customer side of an end office in order to create a Dedicated Access Line element that is analogous to the Common Line element. We use the demarcation in order to establish parity for comparable elements. A portion of such private lines and a portion of some WATS access lines that are not included in the Dedicated Access Line element are included in access service for purposes of the MFJ. We are assigning those portions of those lines to Special Access in order to make access charges for all carriers correspond with the BOC access charges.

248. Although we have described Special Access as an element for cost allocation purposes, the Special Access category in fact encompasses a number of elements that must be priced separately. The same charges could not be applied to video "lines", telex lines and pieces of WATS access lines without creating unlawful preferences. Such facilities have very different cost characteristics and are used for very different purposes.

249. We have not attempted to provide guidelines for apportioning the Special Access revenue requirement among the rate elements or subelements within that category and we have not described the subelements that should

[96] This "five-mile" requirement is similar to one imposed in the MFJ upon any BOC-initiated tariff to reduce the competitive advantage AT&T enjoys over other interexchange carriers because of the location of some of its switches. The MFJ has required that under such tariffs until September 1, 1991, the charge for delivery or receipt of traffic of the same type between an end office and each interexchange carrier's facilities located within the exchange area (or any reasonable subarea) be equal per unit of traffic delivered or received for all such carriers. If the facilities of another interexchange carrier are located within 5 miles of an AT&T Class 4 switch, with respect to any end office served by that switch, the OCC facility is to be considered within the same subarea as the AT&T switch. This requirement applies even if a BOC uses different transmission and switching facilities to serve AT&T and the other interexchange carriers; it exists to assure that the OCCs are not charged more for transmission merely because AT&T's switches are more advantageously located with respect to or linked to an end office.

[97] We note that the plan we adopt today for developing a carrier's carrier charge will accommodate access arrangements provided by the independent telephone companies and by the divested BOC, regardless of the shape of the local access and transport areas (LATAs) ultimately approved by the court in United States v. Western Electric Company, D.D.C. Civil Action No. 82-0192.

[98] Computation of charges for this element is described in § 69.124 of the Rules.

[99] In the latter case the MFJ does require the BOC to offer billing and collection services to all.

[100] Computation of charges for this element is described in § 69.123 of the Rules.

be used. This proceeding was not designed to develop criteria for designating such subelements or for apportioning costs among appropriate subelements and the record in this docket does not contain much information that would be useful for those purposes. Such questions have been or will be addressed in other Commission proceedings.[101] We are accordingly directing exchange carriers to establish subelements and methods for computing subelement charges that are consistent with applicable Commission rules and decisions.

V. Computation of Access Charges

250. In order to compute a charge for an access element it will generally be necessary to compute a revenue requirement for that element. Under the rate base—rate of return method of ratemaking costs or revenue requirements consist of two components. The return component is computed by multiplying the rate base or investment by an allowed rate of return. The expense component covers the carrier's allowable operating expenses.

251. We have decided that the usual rate base—rate of return method should be used to compute access charges for each element except Billing and Collection. We are not imposing any constraint upon the return carriers may earn for that service because local exchange carriers do not possess sufficient market power with respect to that service to warrant a rate of return prescription. If the local exchange carriers establish excessive Billing and Collection charges, the interexchange carriers can, and undoubtedly will, do their own billing and collection.

A. Rate of Return

252. We will require the exchange carriers to compute charges for all the other access elements that are targeted to earn the same return. We are not, however, specifying a prescribed return in the text of the access charge rules. Such prescriptions necessarily must be revised from time to time in *ad hoc* proceedings that are designed for that purpose. It would not be appropriate to effect changes in a prescribed rate of return through amendments to the rules. We are, however, requiring exchange carriers to use the currently authorized rate of return to compute access charges until that prescription is superseded by further order of this Commission.

253. We have already prescribed a rate of return of 12.75% for AT&T interstate operations. This targeted rate was established after consideration of all AT&T interstate capital costs, including capital costs associated with the provision of access service. Although that prescription has not been imposed directly upon other telephone companies, the existing partnership interstate settlements arrangement has been designed to enable every telephone company to realize the same achieved rate of return that AT&T realizes on interstate operations. Thus, the use of any rate of return other than 12.75% for the purpose of targeting access charges for BOCs or independent telephone companies would be a departure from the *status quo*.

254. Although the *Second Supplemental Notice* did propose to use the AT&T authorized rate of return for purposes of targeting access charges, the *Fourth Supplemental Notice* invited comment on the desirability of prescribing a different return inasmuch as BOC costs of capital may diverge from AT&T costs of capital after divestiture.[102] Most participants who have discussed this subject have suggested that the 12.75% return be used for the initial access charges. No evidence has been developed in this record that would enable us to predict any future divergence in AT&T and BOC costs of capital. Therefore, we will require that a 12.75% return be used to target access charges of any exchange carrier and interexchange services of AT&T until a different authorized rate of return is established in subsequent proceedings. We may or may not conduct separate proceedings to consider any future revisions in the prescribed rate of return for access and interexchange services.

B. Identification of Access Costs

255. Several steps are necessary to identify the investment and expense that is attributable to a particular access element. Investment and expenses relating to telephone operations must be segregated from other investment and expense. Interstate telephone operations investment and expense must be segregated from intrastate investment and expense. The access charge or exchange plant portion of interstate investment and expense must be segregated from other interstate investment and expense. The access portion must be allocated among the access elements.

256. Carriers are already obliged to perform the first two steps in order to compute revenue requirements for interstate services. This Commission has provided guidance for the identification of regulated service costs through accounting rules and decisions in tariff proceedings. We have also prescribed rules for the separation of investment and expense between the interstate and intrastate jurisdictions. Those rules are contained in the *Separations Manual* that has been incorporated as Part 67 of our Rules, 47 CFR Part 67. The telephone companies have developed detailed and elaborate procedures to implement the separations rules.

257. The tentative plan described in the *Second Supplemental Notice* would have used the division of revenue or "DR" procedure that AT&T developed to implement the *Separations Manual* in order to determine interstate investment and expense for the computation of access charges. Several comments that were filed in response to that *Notice* questioned the wisdom or propriety of using the DR procedures for that purpose. MCI noted that there is no single fixed document describing Bell System DR procedures that could be incorporated by reference in access charge computation rules. MCI observed that the 11-volume DR Manual is revised monthly and does not contain a complete description of the procedures used to separate interstate and intrastate costs. In its *Second Supplemental Notice* comments, MCI said (p. 55):

> The operative steps are actually taken by a computer located in Atlanta referred to as ISIS. AT&T has informally advised MCI that the programming for ISIS was developed sequentially over a period of many years and that there is no complete set of program inputs in existence.

258. Inasmuch as there is no fixed set of DR procedures we could not incorporate the DR procedures in access charge rules even if we could warrant that the DR procedures have produced accurate results in the past. Moreover, we are not in a position to give such a warranty. The SBS *Second Supplemental Notice* comments observed (p. 48) that the 11-volume DR Manual implements a 96-page *Separations Manual*. SBS implied that some errors of interpretation must have been introduced into the separations

---

[101] *See AT&T Private Line Rate Structure and Volume Discount Practices*, 74 FCC 2d 226 (1979).

[102] The *Fourth Supplemental Notice* also suggested that returns allowed by state commissions might be used if access charges are disaggregated on a state-by-state basis. The Executive Agencies of the United States recommended that procedure (Comments, p. 18), but Southern New England Telephone Company said (Comments, p. 12) that it would probably be "inappropriate" to use a state rate of return for any interstate service. Inasmuch as we have decided that such disaggregation would not be appropriate, there is no reason to give further consideration to that approach. Any nationwide charges necessarily must be based upon a nationwide rate of return.

implementation process in the course of amplifying the prescribed rules. Although our staff does monitor these processes, this Commission has not formally addressed the myriad of interpretation questions that are lurking within the separations implementation process.

259. USTS filed a petition for evidentiary hearing that was based in large part upon its contention that an evidentiary hearing would be required to compile a record that would enable us to prescribe any separations implementation procedures. We agree that an evidentiary hearing may be necessary to prescribe separations implementation procedures. We have, however, concluded that it will not be necessary to prescribe such procedures in order to prescribe rules for the computation of access charges. We are adopting rules for the computation of access charge revenue requirements that are based upon the premise that investment and expense attributable to regulated interstate operations has already been identified. We can proceed on that assumption without sanctioning separations implementation procedures that may be questionable or foreclosing interested persons from raising questions with respect to the accuracy of the underlying data when access service tariffs are filed.

260. We recognize that the information filed pursuant to Rule § 61.38 may not at present be sufficient to enable this Commission or affected persons to identify all questions with respect to the accuracy of interstate costs that might be raised in a tariff proceeding. We have, however, decided that we should not delay the adoption of access charge rules to resolve data problems that are not unique to access charges. Any errors in the separations implementation process affect all state and federal tariffs for services offered by telephone companies. Proceedings other than this docket can and will be used to make separations implementation more visible to regulators and all affected persons. [103]

261. The allocation rules we are adopting do establish procedures for segregating access investment and expense from other interstate investment and expense and procedures for apportioning the access investment and expense among access elements. We have generally used the term "interexchange category" to describe investment, etc., that is not apportioned to any access element. For convenience, we have combined apportionments between interexchange and access and apportionments among access elements in a single set of rules. We have included the Billing and Collection element in that apportionment scheme even though our rules do not require the computation of a revenue requirement for that element because it is necessary to apportion costs to that element in order to identify the costs that are attributable to the other elements.

262. The plan we have adopted for the allocation of certain non-traffic sensitive costs between end user and carrier's carrier charges requires a further step in order to compute charges for the End User Common Line and Carrier Common Line elements. The combined charges for those elements will be designed to recover a revenue requirement for the provision of common lines. Subpart F describes the procedure for segregating that revenue requirement among those elements. We have described the combined revenue requirement for those elements as the Common Line element in the investment and expense allocation rules. [104]

C. Apportionment of Investment

263. Investment can be described as direct investment or indirect investment. The direct investment includes the facilities and equipment such as terminals, lines and switches that are actually used in the telephone operations. Indirect investment includes land, buildings, vehicles, office furniture, etc.

264. The allocation of direct investment is generally determined by the nature of the access elements we have described in Parts III and IV of this *Report and Order*. The elements encompass functions that usually correspond to particular categories of facilities and equipment. [105] For example, the Intercept element encompasses the switching facilities and operator services that perform the intercept function and the portion of manual switchboard facilities that are used for that purpose are assigned to the Intercept element.

265. The direct investment allocation rules (§ 69.303–69.306) relate the description of access elements in Parts III and IV to the plant categories that have traditionally been used for separations purposes. The *Separation Manual* describes three major categories of direct investment—station equipment, outside plant or OSP and central office equipment or COE.

266. Station equipment consists primarily of equipment included in Account 231 (station apparatus), 232 (station connections) and 234 (large PBXs). All such equipment is normally described as nontraffic sensitive plant. Some station equipment is used exclusively in connection with Special Access or Pay Telephone services and is assigned to those access elements. Some station equipment is used by the telephone companies in their own operations and should be viewed as indirect investment that is not directly associated with any access element. That investment will be apportioned in the same manner as furniture, office equipment, vehicles, etc.

267. Most of the station equipment is used in conjunction with common lines, but this same equipment is often used in connection with WATS access lines or private lines. Whenever a private line terminates in a PBX, the PBX, the terminals and the inside wiring between the terminals and the PBX are used to originate or terminate calls that are transmitted over the private line. Therefore, this category must be apportioned between the Common Line element and the Dedicated Access Line element. We have decided to use an equivalent line concept that is similar to the Mixed 1 proposal for that purpose. The total number of common or local exchange subscriber lines will be multiplied by the applicable interstate separations factor to determine the Common Line element line count that will be used for purposes of that apportionment.

268. The Joint Board in Docket 80–286 is considering a new formula in order to replicate the results that would be produced by the present transitional plan for the elimination of CPE from the interstate rate base in an environment in which some local exchange telephone companies may not own any CPE. We have generally described such an interstate apportionment as surrogate CPE in the access charge rules. Inasmuch as any surrogate CPE investment or expense is indirectly attributable to the use of CPE, surrogate CPE will be apportioned in the same manner as CPE investment or expenses if we adopt such a transitional separations factor.

269. The apportionment of Outside Plant or OSP reflects the basic scheme of the access charge plan. The rules use the term "Customer OSP" to describe

[103] The exchange plant Joint Board has invited comments upon a proposal that may serve that purpose. *See Joint Board Order, supra*, 47 FR at 54499.

[104] Total revenue requirements for some other elements such as Local Switching, Dedicated Transport and Special Access will also have to be segregated to compute subelement charges.

[105] In view of the functional nature of the access charge elements, the rules for apportionment of direct investment in subpart D essentially define each access element except the End User Common Line and Carrier Common Line Elements.

lines that are included in our NTS plan and comparable portions of Special Access lines. That category does not include any line that connects an interexchange carrier or an enhanced service provider with the local exchange switch. The Customer OSP lines in use will, or course, be assigned to the Common Line, Pay Telephone, Dedicated Access Line or Special Access elements. An equivalent line apportionment will be used to apportion the unused voice grade lines among those elements.

270. The present separations formula includes common lines and WATS access lines in the same category for purposes of determining interstate investment. If we elect to retain that approach in the separations proceeding, an adjustment will be necessary in the apportionment between the Dedicated Access Line and Common Line elements in order to assign an amount to the Dedicated Access Line element that reflects unseparated investment in interstate WATS access lines. The access charge rules describe such a contingent adjustment.

271. OSP that is not classified as Customer OSP must be apportioned between access elements and the interexchange category. The MFJ demarcation points will be used for that purpose in order to produce traffic sensitive access elements for the independent telephone companies and the undivested BOCs that will be comparable to the access elements of the divested BOCs.

272. The remaining OSP will be apportioned between Special Access and the Transport elements. Special Access not only includes the portion of lines or trunks used for special services such as telex and video that are not located on the customer side of the end office, but also includes comparable portions of lines or trunks that are used for the "Dedicated Access Line" services. We have used this demarcation in order to produce charges for a Dedicated Access Line element that are comparable to the NTS common line charges.

273. The Transport elements encompass the trunks between the end office and the interexchange facility. These may include exchange trunks between Class 5 offices or Class 5 offices and tandem offices. The assignment to Dedicated Transport or Common Transport is, of course, determined by the definition of those elements that is described in Part IV. If the line or trunk is used exclusively for interexchange services of a particular interexchange carrier it is assigned to Dedicated Transport. Other lines or trunks that are classified as Transport facilities are assigned to the Common Transport element.

274. The description of traffic sensitive elements in Part IV of this *Report and Order* necessarily determines the apportionment of Central Office Equipment that is included in COE Categories 1 and 6 in the present *Separations Manual*. COE 1 equipment will be apportioned among the Intercept, Information and Operator Assistance elements. COE 6 equipment will be apportioned between the Line Termination and Local Switching elements.

275. Inasmuch as the Transport elements encompass facilities between the end office switch and the interexchange switch, tandem switch investment (COE Category 2) and any portion of COE Category 3 investment that is classified as exchange investment for purposes of the MFJ will be included in the Common Transport element. We are not, however, assigning any COE 6 investment to Common Transport when an interexchange transmission is routed through more than one local dial switch at the originating or terminating end. The apportionment formula for COE 6 investment has been designed to take such usage into account.

276. The *Separations Manual* classifies Automatic Message Recording Equipment as COE Category 4. Inasmuch as information recorded by such equipment is used primarily for billing purposes that investment will be assigned to the Billing and Collection element.

277. Although COE Category 5 is described as Other Toll Dial Switching Equipment, it includes equipment "used primarily for operator dialed toll * * * traffic." Any Category 5 equipment that may be classified as exchange for MFJ purposes will accordingly be assigned to the Operator Assistance element. Category 5 equipment that is not exchange equipment for MFJ purposes will, of course, be assigned to the interexchange category.

278. COE Category 7 includes the type of switching equipment that is used for services we have described as Special Access. Such investment will accordingly be assigned to Special Access unless it would be classified as interexchange for MFJ purposes.

279. The circuit equipment that is included in the COE 8 category will be assigned or allocated in the same manner as the associated OSP.

280. The *Second Supplemental Notice* proposed to use factors in the 1978 AT&T FDC 7 Central Submission for purposes of apportioning indirect investment and expenses. 77 FCC 2d at 243. Upon further reflection we have concluded that we should not use those factors for this purpose. Those factors were developed for an analogous but somewhat different allocation purpose and would accordingly have to be modified to fit our access charge plan.[105] Even if each factor could be adapted, it would not be desirable to use a cost allocation methodology that employs such a large number of different factors. Both BOC and independent telephone company data must be used to compute access charges. Some limitation must be placed upon the number of different categories that are used in order to enable independents to develop or provide data for the computation of access charges and the computation of distributions from any access charge revenue pools. We have accordingly used indirect investment and expense categories that are more aggregated than either the 1978 Central Submission categories or the categories described in the appendix to the AT&T *Second Supplemental Notice* comments.

281. Land and building investment represents the bulk of the indirect investment. We have accordingly concluded that we can strike an appropriate balance between excessive disaggregation and excessive aggregation by apportioning subcategories of Land and Building investment in a particularized manner and apportioning all other indirect investment on the basis of the apportionment of combined direct investment and land and building investment.

282. We have decided to use the space categories in the *Separations Manual* for purposes of apportioning building investment. This should not impose an undue burden on the carriers because such investment has already been assigned to those categories in order to identify the interstate investment. Many of the space categories are closely related to equipment categories that we are using for purposes of apportioning the direct investment.

283. The *Separations Manual* divides Space Category 1 (Operating Room and Central Office Equipment Space) into three subcategories—Manual Switchboard, Circuit equipment, and Dial switching—that do correspond with identifiable equipment categories. Each of those categories will be apportioned

[105] Categories and factors that were subsequently adopted in the *ICAM* would also have to be adapted because they were designed for four service categories that are quite different from the functional access categories described in this *Report and Order*.

in the same proportions as the associated COE. Space Categories 2 and 3 also consist primarily of operator space and will be apportioned in the same proportions an manual switchboard investment.

284. Space Categories 4, 6 and 9 (Commercial Office, Revenue Accounting and General Office) are associated with major expense categories and will be apportioned in the same manner as combined expense in each such category.

285. Space Categories 5, 8 and 11 describe investment that is not related to any access service. Such investment will accordingly be assigned to the interexchange category.

286. Space Category 7 includes garage and storeroom space. Inasmuch as equipment that would be contained in such space is likely to be used primarily for OSP installation and repair that investment will be apportioned in the same proportions as combined OSP investment.

287. Space Category 10 investment (Antenna Support) will necessarily be apportioned in the same proportions as the antenna supported.

288. Most land investment can and will be apportioned in the same manner as the buildings that occupy the land. Storage space is likely to be used in the same manner as garage and storage space in buildings and will accordingly be apportioned in accordance with the same formula. Land other than storage space that is not occupied by a building obviously cannot be related to any particular category. Such investment will be apportioned in the same proportions as combined land investment in the other land categories.

D. Apportionment of Expenses

289. Expenses can also be classified as direct or indirect expenses. Certain expenses such as depreciation and maintenance can be directly associated with particular tangible investments in buildings, facilities and equipment. Such expense will be apportioned in the same manner as the associated investment. Property taxes can also be associated with a particular investment and will be apportioned in the same manner.

290. We have concluded that rental payments for the use of a switch or a building, etc., should be apportioned in the same manner that investment would have been apportioned if the carrier owned the equipment or the facility. Therefore, we are also describing such rental payments as direct expense.

291. Indirect expense includes taxes and certain hypothetical taxes that are treated as expenses for ratemaking purposes as well as the expenses in the 600 series of accounts. We have departed somewhat from the separations methodology for apportioning income taxes because that methodology includes some steps that appear to be unnecessary when charges for almost all the relevant categories are to be targeted to earn the same rate of return.[107] Inasmuch as the income taxes are taxes upon profits and the profits will be directly related to net investment, such tax expense will be apportioned upon the basis of relative net investment.

292. Hypothetical tax expenses, such as expense related to investment tax credits that are claimed for tax purposes, are associated with particular investments. Such expenses and related credits will accordingly be attributed to the associated investment and apportioned in the same manner as such associated investment.

293. Traffic expenses consist primarily of operator activities and will accordingly be apportioned among the three operator elements in the same proportions as th COE 1 investment.

294. A substantial portion of Commercial Expenses are generated by sales and advertising activities that should be excluded from access charges because there is no reason to anticipate that the local exchange carriers will have any reason to advertise exchange access services. We have accordingly assigned expenses in Accounts 642 and 643 to the interexchange category.

295. Commercial expense also includes Connecting Company Relations, Local Commercial expense, Public Telephone Commissions, Directory expenses and other commercial expenses. The public telephone commissions are obviously attributable to the Pay Telephone element and the directory expenses are obviously attributable to the Information element. Local Commercial expense consists primarily of billing and collection activities and will accordingly be assigned to the Billing and Collection element.

296. At the present time a substantial portion of Connecting Company Relations expense is attributable to the administration of the settlements process. That process will be replaced in large part by access charges. Companies will still incur expenses in connection with the computation of access charges and the computation of distributions from access charge revenue pools. We have, however, decided to classify the access charge expenses as revenue accounting expenses for purposes of this expense apportionment. Inasmuch as most of the expenses that will remain in the Connecting Company Relations category will be attributable to interexchange settlements, the Connecting Company Relations expense will be assigned to the interexchange category.

297. The remaining commercial expenses cannot readily be attributed to any category or element. Those expenses will be apportioned in the same proportions as the combined commercial expenses that have been directly assigned to an access element or the interexchange category.

298. Revenue accounting expenses that are not attributable to access charges will be assigned to the Billing and Collection element because such expenses are generated primarily by such activities. We have also established a formula for the allocation of access charge revenue accounting expenses among access charge elements. Most of those expenses will be allocated to end user access elements because the billing and collection of end user charges is likely to generate greater expense.

299. The Big 4 Wage Factor from the *Separations Manual* will be used to apportion certain expenses such as social security taxes and pensions that are closely related to wage expenses. The Big 4 Wage Factor is based upon the wage portion of maintenance, traffic, commercial and revenue accounting expenses.

300. The *Separations Manual* also uses the Big 4 Wage Factor to apportion general office expenses other than engineering expenses. We have concluded that it would be appropriate to use the same factor for this purpose. Inasmuch as engineering expense is related to the equipment and facilities that are used in telephone operations, we have decided to apportion that expense on the basis of the apportionment of the combined direct investment.

301. Although the existing license contracts between AT&T and the BOCs will be terminated before access charges become effective, it will still be necessary to apportion this type of expense because some independents have similar arrangements and the BOC central organization will probably perform some services that AT&T General Departments have performed in the past. We believe expenses for services that are performed by an affiliated company should be

[107] The separations methodology computes taxable income separately for interstate and intrastate services and uses that ratio to apportion tax expense. That step appears to be necessary for separations purposes because state and federal regulators authorize different returns.

apportioned in the same manner as expenses for services that a company performs for itself. We are accordingly requiring that license contract expense be apportioned in that manner.

302. Expenses and income charges and credits that are not included in one of the specific categories described in the rules will be apportioned on an aggregate basis. The Other Investment factor for indirect investment that is not land and building investment will be used for that purpose.

VI. Levels of Aggregation

A. Prior Proposals

303. The tentative plan described in the *Second Supplemental Notice* proposed nationally averaged carrier's carrier access charges and the creation of an access charge revenue pool. Uniform charges necessarily require revenue pooling because different exchange carriers have different costs. Some carriers would be overcompensated and others would be deprived of a compensatory return if each carrier kept the proceeds from access charges that are computed to reflect the average costs of all carriers.

304. The *Second Supplemental Notice* said that distributions from an access charge revenue pool would reallocate total access charge revenues "among the exchange carriers in order to enable each exchange carrier to receive its interstate exchange plant costs and a share of the residue that reflects its pro rata share of the interstate exchange plant investment." 77 FCC 2d at 233.

305. Some comments that were filed in response to the *Second Supplemental Notice* observed that we did not specify whether distributions taken from a pool would be based upon the authorized or the achieved rate of return. We always contemplated that any pool distributions would be based upon an achieved return although the charges would, of course, be designed to produce revenues that are equal to the authorized revenue requirement.

306. The *Fourth Supplemental Notice* invited comments upon the desirability and feasibility of some alternatives to nationwide uniform charges. One of those alternatives—separate access charges on a state-by-state basis—would have required revenue pooling. The other two alternatives—a separate schedule for a limited number of classes of exchange carriers or a separate schedule for a limited number of classes of exchanges—would not require revenue pooling.

307. All four alternatives were based upon the assumption that all exchange carriers would be participating in common tariff arrangements. We assumed that this would be the case because none of the telephone company comments that were filed in response to the *Second Supplemental Notice* expressed a desire to opt out of such arrangements. Inasmuch as some telephone company comments that were filed in response to the *Fourth Supplemental Notice* do express such a desire, the advantages or disadvantages of the alternatives described in that *Notice* may be academic unless we conclude that we can and should compel unwilling carriers to participate in common tariff arrangements.

B. Compulsory Common Tariffs

308. Most comments that discuss the advantages and disadvantages of common tariff arrangements apparently assume that this Commission does have discretion to require averaging or deaveraging, but a few participants have raised questions with respect to the scope of our discretion. Some carriers who do not desire to join in common tariff arrangements apparently believe that any carrier has an absolute right to establish its own rates based on its own costs.[108] Other participants who state that averaging is essential to achieve Communications Act goals contend, or at least imply, that it would be unlawful for us to permit any carrier to withdraw from averaged common tariff arrangements.

309. No provision of the Communications Act explicity supports either position. That Act does not expressly require averaged rates and it does not confer any express right to deaverage. Neither this Commission nor the courts have been required to determine whether a carrier has a right to establish separate charges because no carrier has ever attempted to withdraw completely from the uniform MTS rate structure.[109]

310. We believe that our general powers under Section 4(i) of the Act, 47 U.S.C. 154(i), are sufficient to enable this Commission to compel carriers to participate in common tariff arrangements if we find that such arrangements are necessary to accomplish Communications Act goals. Section 4(i) provides:

> The Commission may perform any and all acts, make such rules and regulations, and issue such orders, not inconsistent with this Act, as may be necessary in the execution of its functions.[110]

311. A rule that requires a common tariff arrangement would not conflict with any express provision of the Act. A rule that makes participation in such arrangements voluntary also would not conflict with any express provision of the Act. Therefore, we do not have discretion to compel, or to refrain from compelling, participation in a common tariff arrangement.

312. We believe that our power to compel participation in such arrangements should be used sparingly. A carrier should not be prohibited from pursuing a course that its management believes to be in its best interests unless the public interest requires such a prohibition. A carrier obviously should not be precluded from filing separate access charge tariffs that reflect the costs of that carrier if such a prohibition would produce results that are less consistent with Communications Act goals than results that the filing of a separate tariff would produce.

313. In view of these conclusions we have decided that the advantages and disadvantages of mandatory common tariff arrangements should be examined separately for different groups of access elements. We have reached different conclusions for different groups.

314. The Carrier Common Line element was designed in part to mitigate the effects that unlimited deaveraging would produce. Therefore, we believe it is essential to recover those charges through interexchange carrier assessments that are computed on a uniform nationwide basis and to create a pool arrangement for the distribution of such revenues. Our purpose would be frustrated if some exchange carriers recovered the carrier's carrier portion of the Common Line revenue requirement directly from the interexchange carrier. Such a practice could lead to a deaveraging of MTS and other switched service rates that would reflect cost differences among carriers. This would impose burdens upon the customer of high cost or high SPF carriers that the Carrier Common Line charge was designed to avoid.

---

[108] *See* especially Rochester Telephone Corporation Reply, p. 14.

[109] Rochester Telephone cites *American Telephone and Telegraph Company v. FCC*, 487 F. 2d 864 (2d Cir. 1973) and *MCI Telecommunications Corp. v. FCC*, 561 F. 2d 365, 375 (D.C. Cir.), *cert. denied*, 434 U.S. 1040 (1977), to support its claim that it has an absolute right to file its own tariffs. Neither case involved any question with respect to separate or common tariffs. Moreover, the general language with respect to carrier's rights related to revisions of carrier-initiated tariffs that had never been found to be unlawful. Those courts were not describing the scope of the remedial powers we may exercise after we have found that the entire telephone industry has been maintaining an unlawful rate structure.

[110] Those powers have been construed very broadly in the past. *See, e.g., U.S. v. Southwest Cable Co.*, 392 U.S. 157 (1968); *National Broadcasting Co. v. U.S.*, 319 U.S. 190 (1943).

315. A common tariff arrangement is also necessary at this time because a large portion of the Carrier Common Line revenue requirement will be recovered through the premium access assessment during the early years of the transition. Differences in the quality of interconnection will vary from place to place and from month to month during the transition period. Any effort to measure premium value in a particular exchange in a particular month would create significant administrative burdens for all carriers and for this Commission. We have decided that it would be preferable to compute an annual premium on a national basis that reflects our best estimate of the premium access that will exist during a particular year. It may be impossible to compute a premium access charge in any other manner.

316. The considerations that require a uniform nationwide charge for the carrier's carrier portion do not apply to the end user portion of the Common Line revenue requirement. Premium access is not a factor and separate tariffs for the end user portion need not impose hardships in high cost or high SPF areas.[111] There is accordingly no reason to preclude a carrier from devising its own charges if it wishes to do so.

317. Moreover, a compulsory common tariff arrangement for that element would not only be unnecessary, but would also be undesirable. We have designed transitional rules for End User Common Line charges that give carriers considerable discretion in designing a transition to flat rates for all end users. Flexibility is desirable because different approaches are likely to be appropriate for different carriers in different areas.

318. Our effort to achieve parity among services would be frustrated if a carrier filed a tariff for one or two end user elements that reflected its own costs and joined a common tariff for other end user elements that reflected average costs of a group of carriers. Some restriction upon the filing of separate end user tariffs is accordingly necessary in order to achieve the primary objective of this phase of this proceeding. Section 69.3 of our Rules permits a carrier to file a separate tariff for an end user access element if, but only if, that carrier files a separate tariff for all end user access elements.[112]

319. We do not perceive any significant advantage from requiring a common tariff for the other carrier's carrier elements that we have described as traffic sensitive. Any deaveraging of the access charges will not, of course, automatically lead to a deaveraging of the interexchange carrier's end user rates. Even if that result did occur, it appears doubtful that the differentials would be large enough to impose a significant hardship upon end users in particular areas. Present and proposed separations methods for the apportionment of traffic sensitive plant do not create the same kind of discrepancies that are or may be reflected in interstate NTS costs. Therefore, we will not preclude separate tariffs for the traffic sensitive elements.

320. We will, however, preclude a carrier from filing a separate tariff for any traffic sensitive element if the carrier does not file a separate tariff for all traffic sensitive elements. Many of these elements are closely interrelated and a combination of separate and common tariffs for the same carrier could produce anomalous results that are inconsistent with the goals and requirements of the Communications Act.

321. The existence of multi-carrier extended area arrangements also requires a further restriction upon the filing of separate tariffs for traffic sensitive elements. If an extended area arrangement exists an interexchange carrier that interconnects with any local exchange carrier in the extended area necessarily obtains access to the entire extended area. The local exchange carriers are essentially providing a joint access service. Therefore, we will not permit any local exchange carrier to file separate traffic sensitive tariffs for a portion of an extended area. We will permit carriers in an extended area to file a joint tariff for traffic sensitive elements that differs from any national common tariff if all of the participating carriers concur in the rate and agree upon an apportionment of the revenues. Such a joint tariff must, of course, reflect the combined costs of all participating carriers.

322. If carriers in an extended area cannot agree upon a rate for a particular area, common tariff arrangements that have been established nationally will have to be used for that purpose. Such a requirement is necessary to assure that some access charge will be effective in all areas even if the participating exchange carriers cannot agree upon rates or the division of revenues.

C. Deaveraging by a Carrier

323. A separate tariff for end user or traffic sensitive elements might be computed to reflect the average costs of a particular carrier or group of carriers. A tariff could also be devised to reflect greater disaggregation. The comments indicate that a few carriers may wish to file separate tariffs that are highly disaggregated.

324. Our discussion of deaveraging in the *Third Supplemental Notice* noted that past efforts to devise deaveraged rates for a particular carrier or group of carriers have not produced lawful rates. We also concluded that our past decisions have established a policy that precludes selective deaveraging by a carrier in the absence of a showing that such deaveraged rates reasonably approximate actual cost differences. 81 FCC 2d at 194. We said that we would continue to enforce that policy and we noted that Central Submission data submitted by AT&T indicates that AT&T did not have the data that would be necessary to justify a deaveraged rate schedule. 81 FCC 2d at 195.

325. We have not received any information in or out of this record during the intervening two years that would indicate that any carrier is presently in a position to devise highly disaggregated access tariffs that will not create new forms of discrimination. We have, therefore, concluded that unlimited deaveraging within tariffs of a particular carrier or group of carriers should not be permitted at this time.

326. Data that are collected on a study area basis may, however, be sufficient to enable a carrier to justify rate differentials among different study areas. We will, therefore, permit a carrier to file access tariffs with different rates in different study areas if it chooses to do so. Our decision to permit such filings does not, of course, relieve such a carrier of its duty to submit cost support data that will justify any such differentials.

D. Voluntary Common Tariffs

327. Most participants in this proceeding agree that exchange carriers who wish to enter into a voluntary common tariff arrangements and a voluntary revenue pool should be permitted to do so. Some participants have, however, observed that any averaging and pooling arrangement has some disadvantages. Some have said that such arrangements do not create incentives for users or carriers that promote economic efficiency.

328. AT&T observed (Comments, p. 71): "Because rate averaging separates prices from local costs, averaging encourages the overuse of the more costly but underpriced facilities and the underuse of the less costly but overpriced facilities."

---

[111] Universal Service Factor costs and transitional SPF costs will, of course, be assigned to the carrier's carrier portion. *See* Subparts III.B and III.C, *supra*.

[112] All of the restrictions upon separate tariffs and deaveraging are described in § 69.3.

329. Voluntary common tariff arrangements for access elements other than the Carrier Common Line element would not be likely to produce significant distortions because the lowest cost carriers are likely to withdraw from such pooling arrangements in due course. An access plan that includes such arrangements will probably ultimately produce common tariffs and revenue pools for a large number of relatively small companies that do in fact have comparable costs.

330. Some comments have observed that pooling does not create efficiency incentives for carriers that participate in a pool. For example, Rochester Telephone said (Comments, p. 34):

> If the pooled revenues are distributed according to each carrier's costs, as presumably they would have to be, there is little or no economic incentive to reduce the cost of access under this system. Indeed, an exchange carrier that reduces its costs becomes relatively more disadvantaged, for it receives from the pool a smaller proportion of the interstate revenues contributed by its subscribers to the pool.

331. The present partnership settlements arrangement for BOCs and independent telephone companies that are described as "cost study" companies essentially provides cost plus compensation for each carrier. This method of compensation does appear to create little or no incentive to improve efficiency. Many participants do believe, however, that any access charge revenue pool should be designed to provide a uniform return for all pool participants.[113]

332. Although a uniform common tariff arrangement necessarily requires a revenue pool, it does not inevitably require pool distributions that are based upon the settlements partnership model. It may be possible to create greater efficiency incentives by devising a pool distribution formula that does not guarantee a uniform return for all participants. Since such questions apply to involuntary as well as voluntary pools, we believe this possibility warrants further study. We do not, however, have sufficient information at this time to devise pool distribution rules that differ from the settlements model. The public interest would not be served by delaying initial access charges to devise such an alternative. We have accordingly decided to adopt distribution rules that do follow the settlements model.[114]

333. Rochester Telephone also asserts (Comments, p. 39) that companies that participate voluntarily in a common tariff and pooling arrangement "would run the risk of antitrust liability under the Sherman Act." It appears doubtful that common tariff and revenue pooling arrangements that are limited to access services could provide a basis for a colorable antitrust claim. The Sherman Act does not prohibit concerted activities, it merely prohibits concerted activities that are likely to produce an unreasonable restraint of trade.

334. We observed in the *Second Supplemental Notice* that such arrangements are unlikely to produce anticompetitive effects. That *Notice* said (77 FCC 2d 235):

> Local exchange facilities are presently provided exclusively on a monopoly basis and carriers providing such service do not compete with each other in the provision of that service. We recognize that this situation may change with time as improving technology (*e.g.*, direct satellite, cellular radio) makes exchange competition more economically feasible. However, these changes will not occur in the short run. (footnote omitted).

335. Access service competition between the carriers that are likely to participate in a pool is not likely to occur even in the more distant future. Alternative access that bypasses wireline facilities of a local exchange carrier is likely to be offered in conjunction with an interexchange service. Therefore, a local exchange carrier is not likely to be providing bypass in the franchise area of another local exchange carrier if that carrier is not providing interexchange services. The MFJ bars the divested BOCs from the interexchange market and most smaller independents do not have the means to enter that market. One can imagine large independents offering bypass services in BOC exchanges, but the BOCs are not likely to remain in any pools by the time that becomes a realistic possibility. Therefore, any common tariff and pooling arrangements that we are mandating or permitting cannot be viewed as price-fixing or profit-pooling by actual or potential competitors in an access service market.

336. The Justice Department apparently shares our perception of the competitive implications of voluntary access pools. The Justice Department comments do not oppose voluntary common tariffs or voluntary pools as such.

337. Such voluntary arrangements not only do not have disadvantages that would warrant a prohibition, but also have important advantages. The telephone industry is composed of a limited number of large companies that serve over 90% of the local exchange subscribers and a very large number of small companies that serve the remaining subscribers. Most of these smaller companies have never filed any tariff of any kind with this Commission. It would be totally unrealistic to expect such companies to prepare and justify separate tariffs in accordance with the rules we are adopting in this *Report and Order*. It would also be unrealistic to suppose that this Commission could review 1500 access tariffs in a meaningful manner if they did choose to do so. A common tariff arrangement that most of the exchange carriers can use is clearly necessary to make any access charge rules work. Such arrangements would, therefore, presumably be immune from antitrust sanctions because they are necessary to make the regulatory scheme work even if this Commission did not mandate or sponsor such arrangements. *See Silver v. New York Stock Exchange*, 373 U.S. 341 (1963).

338. The involuntary arrangements for universal service charges should not, of course, present any antitrust question because participation in those arrangements would be the product of regulatory coercion.[115]

E. Creation of the Association

339. A voluntary or involuntary common tariff arrangement necessarily requires that some entity compute the charges and prepare and justify the tariffs on behalf of all the participating carriers. A revenue pool requires that some entity compute the distributions that each participant is entitled to receive from the pool.

340. In the past AT&T has acted as a tariff filing agent for the entire industry and has also performed most of the administrative functions in connection with the settlements pooling arrangement. The AT&T role as a tariff filing agent is implicitly recognized in Section 203(a) of the Act. Section 203 requires every common carrier "except connecting carriers" to file tariffs with this Commission for interstate and international services. It also requires

---

[113] *See* GTE, p. 23; United Telephone System, Inc., p. 2; Ketchikan Public Utilities, p. 7, Curtis M. Buehner, p. 21.

[114] The distribution of revenues to carriers that are not average schedule companies is described in Sections [illegible] of the Rules.

[115] The decision in *Cantor v. Detroit Edison Co.*, 428 U.S. 579 (1976), would not be analogous because the regulatory coercion in the rules we are adopting does not have the same *pro forma* character as the actions of the Michigan Commission.

that the tariffs describe charges between points on the carrier's system and between points on the carrier's system and "points on the system of its connecting carriers." This essentially relieved a "connecting carrier" of the burden of filing its own tariffs with this Commission and imposed that burden upon the carrier that is not described as a "connecting carrier." The term "connecting carrier" encompasses most independent telephone companies and probably encompassed almost all non-Bell companies when the Act was adopted. Thus, Congress effectively made AT&T a tariff filing agent for the entire industry.

341. The *Fourth Supplemental Notice* invited comment on a proposal to create a new intra-industry entity to perform the tariff filing and pool distribution functions because such an AT&T role in the post-divestiture environment would appear to conflict with the spirit, and possibly the letter, of the then proposed consent decree. Most comments from participants who do not oppose any common tariff or pooling arrangement have endorsed the industry association concept.

342. A few comments have questioned the desirability or legality of Commission action to mandate the creation of such an association. Such participants apparently believe that we should allow institutional arrangements for common tariffs and pools to emerge spontaneously. We do not believe that would be a feasible option if an access charge system is to be in place by the beginning of 1984. Such an association must have a functioning organization by the time the divestiture occurs. We necessarily must mandate the creation of an exchange carrier association and adopt some rules with respect to its organization and functions in order to ensure that an access charge system will work.[116]

343. Rochester Telephone has questioned our authority to mandate the creation of such an association and has described such an action as a delegation of powers to a private organization. Comments, p. 39; Reply, p. 13. We do not believe it would be appropriate to describe our action as a "delegation" because the preparation of tariffs and the administration of revenue pools is not a governmental function. It would probably be more accurate to describe our action as an exercise of our Section 203(b)(2) power to modify the requirements of Section 203 by creating a new entity to perform functions that Section 203(a) assigned to AT&T. If we failed to exercise our power to transfer such functions from AT&T to a new entity we would be creating an unnecessary conflict between the regulatory scheme and the MFJ. Moreover, as previously noted, the creation of such an association is essential to the success of an access charge system and is accordingly within our Section 4(i) power to issue orders that are necessary to the performance of our statutory functions.

344. Although the Justice Department did not oppose common tariffs or voluntary pooling of access charge revenues, the Department has expressed the view that this Commission should not sponsor a carrier association. That view may reflect a concern that a Commission-sponsored association could become a vehicle for other concerted activities that might have anti-competitive implications. We feel that such activities are unlikely. Nevertheless, we have decided that we should impose some restrictions upon the scope of the association's activities. We will preclude the association from engaging in activities that are not directly related to the preparation of access charge tariffs or the distribution of access charge revenues unless such additional activities are expressly authorized by this Commission. We will, of course, expect the association to seek prior approval for any additional association activities.

F. Organization of the Association

345. We have concluded that membership in the association should be limited to *exchange* carriers that participate in access charge revenue pools that are administered by the association and that the governing board should be composed exclusively of exchange carrier representatives. Although the *Fourth Supplemental Notice* invited comment upon the advisability of including a Commission representative on the association board, further reflection leads us to conclude that it would be unwise to do so. This Commission will be obliged to review the tariffs that the association files and to determine the merits of any petitions to investigate, suspend or reject such tariffs. An appearance of a conflict of interest might be created if a Commission representative participated in the association decisions that might be challenged in such proceedings. We have also decided not to accept suggestions that state commissions, interexchange carriers or consumers be represented on the governing board of the association. As we stated in the *Fourth Supplemental Notice*, "the Communications Act already provides safeguards adequate to protect the interests of these groups in the fair, evenhanded implementation of any access charge plan we might adopt." 90 FCC 2d at 150.

346. We have concluded that we should adopt a rule describing the membership of the governing board in order to establish appropriate representation for different classes of carriers. We are not, however, adopting that rule at this time. We will issue a supplemental order in this docket adopting such a rule and prescribing some organizational steps after the notice period expires for carriers that may choose not to participate in common tariffs for 1984.[117]

347. We do not plan to adopt rules that would restrict the association's discretion in acquiring staff or borrowing staff from its members or contracting with accounting firms, banks or others to perform some of the association's tasks. The observation in the *Fourth Supplemental Notice* that the BOC central organization might continue to perform many tariff preparation and pool distribution functions that have traditionally been performed by AT&T personnel was presented as a possible solution to staffing problems the association may encounter. We do not believe, and have never believed, that it would be necessary or desirable for this Commission to prescribe the staffing arrangements the association would be required to adopt.

348. The association will be responsible for filing the Carrier Common Line tariffs and common tariffs for every other access element for those carriers that choose to join in association tariffs.[118] In general, carriers may choose to participate in common tariffs for the end user elements or the traffic sensitive carrier's carrier elements or both. In order to enable the association to adjust its tariffs to reflect the costs of carriers that do choose to participate in common tariffs, we shall require that any exchange carrier that does not desire to participate in a common tariff provide ample advance notice that it has chosen to file a separate tariff.

349. The costs of managing the pooling and distribution, along with the costs of actually filing tariffs, are to be included among costs recovered through association charges.

---

[116] Those rules are set forth in Subpart G.

[117] We do not plan to invite further supplemental comments before we issue that supplemental order.

[118] This will, of course, take the form of a single tariff with multiple elements. We will permit carriers who do not join some elements to cross-reference the association tariff for elements such carriers join.

G. AT&T Role in Preparation of Initial Tariffs

350. It appears doubtful that the association could have an organization in place in sufficient time to prepare the initial access service tariffs that must be filed by October 3, 1983. We have accordingly decided that AT&T should continue to perform its traditional role in the preparation of tariffs for the telephone industry until the initial access charge tariff is ready for filing.[119] AT&T should, of course, respond to policy directives from the association directors when a governing board has been selected.

351. AT&T participation in the preparation of the initial access charge tariffs would probably be necessary even if the association could create a functioning organization immediately. AT&T will necessarily be required to file new end user tariffs for interstate and international services in order to reflect the effect of the access charges. In view of the magnitude of the changes that the implementation of initial access charges will produce, access charges and new end user charges for interexchange services should become effective simultaneously. We could not responsibly permit massive changes in end user rates to become effective upon less than 90 days notice and it appears doubtful that we could require more than 90 days notice for access tariff filings. In these circumstances, coordination in the development of access charge tariffs and new end user tariffs for AT&T services is essential to ensure a smooth transition.[120]

352. Such coordination problems should not be as significant in subsequent years because the changes in access charges probably will not be significant enough to require simultaneous changes in end user rates. It should be possible to achieve a smooth transition by mandating an AT&T role in the preparation of common tariffs for access charges that ends when the initial access charges are filed. We do not envision, mandate or sanction any AT&T role in the preparation of access charge tariffs or the distribution of access charge revenues after divestiture of the BOCs occurs.

353. The Justice Department comments indicate that the Department does not object to a pre-divestiture AT&T role in the preparation of access charge tariffs. We accordingly assume that the procedure we envision will not conflict with the letter or the spirit of the MFJ.

354. The preparation of the initial access charge tariffs will undoubtedly be a difficult task. In order to enable AT&T to begin collecting the necessary data, we are making this *Order* effective on the day after the date of publication in the **Federal Register**. We have decided to require exchange carriers that choose to file any separate tariffs for 1984 to notify AT&T of their decision within 40 days after the release of this *Report and Order*. We are also requiring that AT&T notify all the affected carriers that this notice requirement exists within 10 days of the release of this *Report and Order*.

355. It is vitally important that acceptable access tariffs become effective by the day on which divestiture of the BOCs occurs. We therefore feel compelled to monitor the progress of access charge preparation. To this end, we require AT&T to file progress reports until the initial access charges have been filed. The first report will be filed 8 weeks after the release of this *Report and Order* and subsequent reports will be filed at 6-week intervals.

356. We also expect that AT&T and any carrier that may choose to file a separate tariff will file petitions for waiver if shortcuts must be used to adapt readily available data to the methods we are prescribing for the computation and assessment of access charges. We recognize that some carriers will not be able to provide all of the data that would be required and that some kind of sample procedure will be necessary to develop data for average schedule companies. The filing of such waiver petitions will provide an additional opportunity to monitor the progress of access charge preparation.[121]

357. We believe the procedures we are adopting will achieve the purposes of this proceeding without imposing undue burdens upon any carrier or creating administrative burdens that exceed the capabilities of our staff.[122]

H. Regulatory Flexibility Certification

358. For the following reasons, we certify that the Regulatory Flexibility Act is not applicable to the rules we are adopting in this proceeding.

359. A few of the comments have questioned the adequacy of the initial regulatory flexibility analysis in the *Fourth Supplemental Notice*.[123] The Regulatory Flexibility Act is not literally applicable to this proceeding. That Act was apparently designed for the protection of small businesses that are directly subject to administrative rules rather than businesses that are indirectly affected by the results that any rules will produce. the access charge rules are, of course, imposed upon the local exchange carriers that will be required to compute and collect access charges in accordance with those rules. Those carriers are accordingly the only businesses that might be entitled to claim some protection under that Act.

360. Although some local exchange carriers are very small, no telephone company appears to fall within the Regulatory Flexibility Act's very special definition of a "small entity." That Act incorporates the definition of a "small business" in Section 3 of the Small Business Act as a definition of a "small entity." The latter definition excludes any business that is dominant in its field of operation. Exchange carriers, even small ones, enjoy a dominant monopoly position in their local service area. This Commission has found all exchange carriers to be dominant in the *Competitive Carrier Rulemaking*, 85 FCC 1, 23–24 (1980). Indeed the smallest exchange carriers are probably even more dominant than the large ones because bypass competition is very unlikely to develop in the areas they serve.

361. Although the Regulatory Flexibility Act is not applicable to this proceeding, Congress did express essentially the same policy objective in the Communications Act. Sections 2(b) and 203(a) of the 1934 Act were designed to relieve most small telephone companies from many reporting and other burdens that the Act imposed upon AT&T.

362. We recoginize that we cannot and should not expect a telephone company with eight employees to do everything that Pacific Telephone is expected to do. We have designed the access charge rules to minimize the administrative burdens that are imposed upon smaller companies. We have mandated the creation of an association

---

[119] Inasmuch as the association will be relieving AT&T of burdens imposed by Section 203, we expect that AT&T will lend funds to the association to permit it to function until it receives a disbursement from access charge revenues.

[120] End user rates of other interexchange carriers will undoubtedly also be changed to reflect access charges. We do not, however, expect to require 90 days notice from those carriers.

[121] The Chief of the Common Carrier Bureau will, of course, act upon any waiver petitions that do not present fundamental policy questions that require a Commission decision.

[122] We have necessarily been obliged to impose some restrictions upon the option of carriers that do not choose to join in common tariffs in order to prevent the filing of tariffs that could not be adequately reviewed. For example, the rules we are adopting preclude tariffs that are disaggregated within a study area. We may relax such restrictions in the future after we have acquired more experience with access service tariffs.

[123] *See* especially Small Business Administration comments.

that will perform tariff preparation and pool distribution functions and we have designed requirements for those functions that will adapt the existing average schedule settlements procedures to an access charge system. We believe that we have complied fully with the requirements of the Communications Act and the spirit of the Regulatory Flexibility Act.

VII. Conclusion

363. We emphasize how difficult and how important has been the task of devising an access charge plan. In this proceeding, we have focused on the present and the future rather than the past. The monopoly telecommunications environment of the past has ended. The approaches, taken in the past to balance the four goals of universal service, non-discriminatory, cost-based prices and a viable, efficient telecommunications network—goals which we believe have been the aim of the Communications Act since its passage—are no longer appropriate. These past approaches have essentially been nothing more than the development of special, discriminatory rates for different customers making identical use of access plant in interstate service. It is readily apparent that in an era of facilities-based competition and resale such approaches are not viable. Any attempt to insure continued support for local telephone service through the prohibition of bypass systems would lead to a stifling of innovation and, quite probably, to the transformation of the nation's telephone system—currently the best in the world—into an outmoded and technically inefficient system. Such a system would almost certainly be unable to attract sufficient capital to maintain, much less upgrade, the system.

364. In our *Fourth Supplemental Notice* we put forth for comment four differing approaches to the resolution of the principal question in the access charge docket. These were not presented as specific plans subject to a vote of the parties. Rather they were propounded as examples of the types of plans which could be developed. In issuing that *Notice* we hoped that participants would propose methods to combine or improve upon the simplistic approaches we described. Our hope was well justified. The comments filed by participants in this proceeding have, in overwhelming measure, been constructive and of tremendous value to us in fulfilling our task. Our task, we state once again, is to devise that access charge plan which best balances the many objectives of the Communications Act.

365. The plan we adopt today is largely based upon those comments. It recognizes both the need for some national averaging and the clear advantages of disaggregation when such disaggregation is desired by the carriers and is in the public interest. It clearly recognizes the need for a smooth transition from the existing system of discriminatory but largely usage based carrier charges to a new system relying chiefly upon flat customer charges. Such a movement is, in our opinion, necessary to serve the public interest and to insure the maintenance of our nationwide network of telephone service. Despite this we have, through our plan, insured that universal service will not be eliminated. The inclusion of a permanent, nationally averaged, carrier's pool to direct revenues to high cost areas is a central feature of this plan. We have not been limited by the traditional division between "traffic sensitive" and "non-traffic sensitive" costs in determining which costs should ultimately be placed upon individual customers. Rather, we have attempted to differentiate network functions, which may appropriately be recovered through carrier's carrier charges, from end user service, which can only be ordered by end users, which is dedicated to individual end users, and which must, in our opinion, be recovered from those end users.

366. We have directed the Common Carrier Bureau to develop a monitoring function to insure that the changes that will result from this *Report and Order* do not impair universal service. Such a monitoring function must and will be in place before the institution of access charges. Along with our transition plan, this will insure that, should unforeseen circumstances arise, we have an ample opportunity to act before irreparable harm to the universal character of telephone service takes place. We now commit ourselves to taking such action should, contrary to our expectations, it be necessary. Such actions might include adjusting end user flat charges, adjusting the Universal Service Fund, adjusting the degree of nationwide pooling, or requiring that certain transitional benchmarks be met.

367. Finally, we have provided a two-year period after individual phone companies are responsible for collecting most dedicated NTS costs from their subscribers before equal flat customer access charges will be required. We recognize that during the transition period some telephone companies may develop mechanisms for recovering those costs from their customers which will better balance the four goals of the Communications Act than can a single national plan. We will conduct a further notice and comment phase of this proceeding in the fifth year and will evaluate nationwide and local effects of the transition before proceeding with the final steps in the transition plan. We recognize that a plan that may be ideal for most of the country may not be ideal for all of the country. This *Report and Order* recognizes that individual carrier flexibility is fully consistent with the Communications Act. We expect to work with State regulatory commissions, and State legislatures, during the transition period to continue to seek better ways to reconcile the need for an efficient, cost-based cost recovery scheme with the need for a universal telephone system and to harmonize our efforts so as not to frustrate the achievement of our policies and objectives.

368. The task we have faced in designing our access charge plan has been, perhaps, the most difficult ever to come before the Commission. It is also, quite probably, the most important to have come before us. The correct resolution of this phase of this docket is an essential prerequisite for the development of meaningful competition in interstate telecommunications, for the assurance that common carrier telecommunications can play the central role in our nation's economy and, indeed, in the world economy that is warranted by its value to citizens and by its unique characteristic of being substitutable for a wide variety of goods and services. No one, and no commission, can predict the future of telecommunications with any degree of certainty. Our access charge plan is, in our opinion the best plan for the present and immediate future that can be devised based upon our present level of knowledge. We remain committed to careful monitoring of developments in the field of common carrier telecommunications and to making any adjustments that may be warranted, based upon these future developments, to serve the public interest.

VIII. Ordering Clauses

369. Accordingly, it is hereby ordered, That pursuant to 47 U.S.C. §§ 154(i) and (j), 201, 202, 203, 205, 218 and 403 and 5 U.S.C. § 553, Part 69 is added to the Rules of this Commission as set forth in the attached Appendix A, effective on the date following publication in the Federal Register.

370. It is further ordered, That each revenue requirement that is computed in accordance with such rules shall be

based upon a 12.75% return until further order of this Commission.

371. It is further ordered, That in accordance with the rules in Appendix A and the directives of this *Report and Order*, AT&T shall prepare the initial tariffs for interstate access services provided by members of telephone company association and shall file these tariffs no later than October 3, 1983.

372. It is further ordered, That AT&T file reports describing its progress in preparing these initial access tariffs with the Chief, Common Carrier Bureau. These reports shall continue until AT&T has filed the initial access tariffs. The first report shall be filed eight (8) weeks after the release of this *Report and Order*. Subsequent reports shall be filed thereafter at six (6) week intervals.

373. It is further ordered, That within ten (10) days of the release of this *Report and Order* AT&T shall notify each telephone company that has participated in the division of revenues or settlements process that the company is required to decide whether to file any tariffs separate from those filed by the association and to notify AT&T of its decision.

374. It is further ordered, That each telephone company that has participated in the division of revenues or settlements process shall notify AT&T of its decision to file any separate tariffs within forty (40) days of the release of this *Report and Order*.

375. It is further ordered, That the Petition for Evidentiary Hearing of the United States Transmission Systems, Inc. filed on June 26, 1980, is denied.

376. It is further ordered, That the Motions for Leave to File Late Comments filed by the Federal Executive Agencies and the Council on Wage and Price Stability are granted.

(Secs. 1, 2, 4, 201–205, 208, 215, 218, 313, 314, 403, 404, 410, 602; 48 Stat. as amended; 1064, 1066, 1070, 1071, 1072, 1073, 1076, 1077, 1087, 1094, 1098, 1102; 47 U.S.C. 151, 152, 154, 201–205, 208, 215, 218, 313, 314, 403, 404, 410, 602.)

Federal Communications Commission.[136]

William J. Tricarico,

Secretary.

Note.—Due to the continuing effort to minimize publishing costs, Appendices B, C, D, E, F, G, and Attachments will not be printed herein. However, copies of this document in its entirety may be obtained from the Downtown Copy Center, 1114 21st St., N.W. Washington, D.C. 20037, (202) 452–1422. A copy is filed as part of the original and also available for public inspection in the FCC Dockets Branch, Rm. 239, and the FCC Library, Rm. 639, 1919 M St. N.W., Washington, D.C. 20554.

[136] See attached separate statements of Commissioners Quello, Fogarty and Sharp. Separate statements of Commissioners Jones and Dawson will be issued at a later date.

Appendix A

Part 69 is added to Chapter I of Title 47 of the Code of Federal Regulations to read as follows:

PART 69—ACCESS CHARGES

Subpart A—General

Sec.
69.1 Application of access charges.
69.2 Definitions.
69.3 Filing of access service tariffs.
69.4 Charges to be filed.

Subpart B—Computation of Charges

69.101 General.
69.102 Dedicated access line.
69.103 Pay telephone.
69.104 End user common line.
69.105 Carrier common line.
69.106 Line termination.
69.107 Local switching.
69.108 Intercept.
69.109 Information.
69.110 Operator assistance.
69.111 Common transport.
69.112 Dedicated transport.
69.113 Special access.
69.114 Billing and collection.

Subpart C—Computation of Transition Charges

69.201 General.
69.202 End user common line charges.
69.203 Minimum charges.
69.204 Usage charges.
69.205 Maximum charges.
69.206 Transitional surcharges.
69.207 Premium access.
69.208 Transitional Carrier Common Line.

Subpart D—Apportionment of Net Investment

69.301 General.
69.302 Net investment.
69.303 Station equipment.
69.304 Customer OSP.
69.305 Carrier OSP.
69.306 Central office equipment.
69.307 Buildings.
69.308 Land.
69.309 Other investment.

Subpart E—Apportionment of Expenses

69.401 Direct expenses.
69.402 Current taxes.
69.403 Deferred tax expenses.
69.404 Traffic expenses.
69.405 Commercial expenses.
69.406 Revenue Accounting expenses.
69.407 General Office expenses.
69.408 Relief and pensions.
69.409 License contract expenses.
69.410 Other expenses.

Subpart F—Segregation of Common Line Element Revenue Requirement

69.501 General.
69.502 Base factor apportionment.
69.503 Apportionment of transitional portion.

Subpart G—Exchange Carrier Association

69.601 Exchange carrier association.
69.602 Board of directors.
69.603 Association functions.
69.604 Billing and collection of access charges.
69.605 Distribution of Carrier Common Line revenues.
69.606 Computation of average schedule company payments.
69.607 Disbursement of Carrier Common Line residue.
69.608 Carrier Common Line hypothetical net balance.
69.609 End User Common Line hypothetical net balances.
69.610 Other hypothetical net balances.

Authority: Secs. 4, 201, 202, 203, 205, 218, 403, 48 Stat. 1066, 1070, 1072, 1077, 1094, as amended, 47 U.S.C. 154, 201, 202, 203, 205, 218, 403.

Subpart A—General

§ 69.1 Application of access charges.

(a) This Part establishes rules for access charges for interstate or foreign access services provided by telephone companies on or after January 1, 1984.

(b) Charges for such access services shall be computed, assessed and collected and revenues from such charges shall be distributed as provided in this Part. Access service tariffs shall be filed and supported as provided under Part 61 of this chapter, except as modified herein.

§ 69.2 Definitions.

For purposes of this Part:

(a) "Access Service" includes services and facilities provided for the origination or termination of any interstate or foreign telecommunication that is subject to regulation pursuant to Title II of the Communications Act or provided for the origination or termination of any interstate or foreign enhanced service that is exempt from tariff regulation pursuant to Subpart G of Part 64 of this chapter;

(b) "Annual revenue requirement" means the sum of the return component and the expense component;

(c) "Association" means the telephone company association described in Subpart G of this Part;

(d) "Big 4 Wage Factor" means that ratio of combined wage expense except building maintenance wage expense attributable to general office space in the following expense categories:

(1) Maintenance;

(2) Traffic;

(3) Commercial; and

(4) Revenue Accounting;

(e) "Buildings" includes investment that is described as building investment in the *Separations Manual;*

(f) "Carrier Outside Plant" or "Carrier OSP" means all outside plant that is not Customer OSP;

(g) "Central Office Equipment" or "COE" includes all equipment or

facilities that are described as Central Office Equipment in the *Separations Manual;*

(h) "Commerical Expenses" includes all expenses that are described as Commercial Expenses in the *Separations Manual,* except for any expense incurred in computing, billing or collecting access charges which shall be deemed to be Revenue Accounting expense;

(i) "Current taxes" includes taxes other than property taxes that are actually accured during the relevant period less credits attributable to past deferrals and does not include hypothetical taxes that are allowable expenses for ratemaking purposes or taxes assessed upon end users;

(j) "Customer Outside Plant" or "Customer OSP" means all lines or trunks on the customer side of a Class 5 or end office switch, including lines or trunks that do not terminate in such a switch, except lines or trunks that connect an interexchange carrier or enhanced service provider facility with such a switch;

(k) "Dedicated access line" means a WATS access line or a private line that does not terminate in customer premises equipment that is used exclusively for a particular interexchange service;

(l) "Direct Expense" means expenses that are attributable to a particular category of tangible investment described in Subpart D of this Part and includes:

(1) Maintenance;

(2) Depreciation and amortization;

(3) Rental payments for buildings, facilities or equipment; and

(4) Property taxes;

(m) "End user" means any customer of an interstate or foreign telecommunications service or enhanced service that is not a carrier or enhanced service provider except that a carrier other than a telephone company or an enhanced service provider shall be deemed to be an "end user" when such carrier or enhanced service provider uses a telecommunication service for administrative purposes and a person or entity that offers telecommunications services exclusively as a reseller shall be deemed to be an "end user" if all resale transmissions offered by such reseller originate on the premises of such reseller;

(n) "Entry switch" means the telephone company switch in which a dedicated transport line or trunk terminates;

(o) "Expense component" means the total expenses and income charges for an annual period that are attributable to a particular element or category;

(p) "Expenses" include allowable expenses in the 600 series of the Uniform System of Accounts apportioned to interstate or international services pursuant to the *Separations Manual* and allowable income charges apportioned to interstate and international services pursuant to the *Separations Manual;*

(q) "General Office Expenses" includes Executive (Account 661) expense, Treasury (Account 663) expense, Law (Account 664) expense, Other General (Account 665) expense and the portion of Accounting (Account 662) expense that is not Revenue Accounting expense;

(r) "Interexchange" or the "interexchange category" includes services or facilities provided as an integral part of an interstate or foreign telecommunications or an interstate or foreign enhanced service that is not described as "access service" for purposes of this Part;

(s) "License contract" means an agreement to reimburse an entity that is jointly owned by telephone companies or companies that own telephone companies or an entity that directly or indirectly controls or is controlled by, or is under direct or indirect control with, a telephone company, for services, facilities, patents or other know-how;

(t) "Line" or "trunk" includes transmission facilities such as microwave towers, satellites, earth stations, etc. as well as wire and cable;

(u) "Net investment" means allowable original cost investment in Accounts 100.1–100.4 and 122 that has been apportioned to interstate and foreign services pursuant to the *Separations Manual* from which depreciation, amortization and other reserves attributable to such investment that has been apportioned to interstate and foreign services pursuant to the *Separations Manual* have been subtracted and to which working capital that is attributable to interstate and foreign services has been added;

(v) "Origination" of a service that is switched in a Class 4 switch or an interexchange switch that performs an equivalent function ends when the transmission enters such switch and "termination" of such a service begins when the transmission leaves such a switch, except that:

(1) Switching in a Class 4 switch or transmission between Class 4 switches that is not deemed to be interexchange for purposes of the Modified Final Judgment entered August 24, 1982, in *United States v. Western Electric Co.,* D.C. Civil Action No. 82–0192, will be "origination" or "termination" for purposes of this Part, and;

(2) "Origination" and "termination" does not include the use of any part of a line, trunk or switch that is not owned or leased by a telephone company;

(w) "Origination" of any service other than a service that is switched in a Class 4 switch or a switch that performs an equivalent function ends and "termination" of any such service begins at a point of demarcation that corresponds with the point of demarcation that is used for a service that is switched in a Class 4 switch or a switch that performs an equivalent function;

(x) "Outside Plant" or "OSP" includes all equipment or facilities that are described as outside plant in the *Separations Manual;*

(y) "Private line" means a line that is used exclusively for an interexchange service other than MTS or WATS, including a line that is used at the closed end of an FX or CCSA service or any service that is substantially equivalent to a CCSA service;

(z) "Return component" means net investment attributable to a particular element or category multiplied by the authorized annual rate of return;

(aa) "Revenue Accounting Expenses" includes all expenses that are described as Revenue Accounting Expenses in the *Separations Manual* and expenses associated with the preparation of access charge tariffs and the distribution of access charge revenues;

(bb) "Station equipment" includes all equipment or facilities that are described as station equipment in the *Separations Manual* except station equipment that is used by telephone companies in their own operations;

(cc) "Telephone company" means a carrier that provides telephone exchange service as defined in Section 3(r) of the Communications Act of 1934;

(dd) "Traffic Expenses" includes all expenses that are described as traffic expenses in the *Separations Manual;*

(ee) "Unit of capacity" means the capability to transmit one conversation; and

(ff) "WATS access line" means a line or trunk that is used exclusively for WATS service.

§ 69.3 Filing of access service tariffs.

(a) A tariff for access service shall be filed with this Commission for an annual period. Such tariffs shall be filed so as to provide a minimum of 90 days notice, with a scheduled effective date of January 1.

(b) The requirement imposed by paragraph (a) of this Section shall not preclude the filing of revisions to those

annual tariffs that will become effective on dates other than January 1.

(c) Any access service tariff filing, the filing of any petitions for rejection, investigation or suspension and the filing of any responses to such petitions shall comply with the applicable rules of this Commission relating to tariff filings.

(d) The association shall file a tariff as agent for all telephone companies that participate in an association tariff.

(e) A telephone company or group of telephone companies may file a tariff that is not an association tariff. Such a tariff may cross-reference the association tariff for some access elements and include separately computed charges of such company or companies for other elements. Any such tariff must comply with the requirements hereinafter provided:

(1) Such a tariff must cross-reference association charges for the Carrier Common Line element or elements if such company or companies participate in the distribution of revenues from such elements;

(2) Such a tariff that cross-references an association charge for any end user access element or the transitional surcharge must cross-reference association charges for all end user access elements and the transitional surcharge;

(3) Such a tariff that cross-references an association charge for any carrier's carrier access element other than the Carrier Common Line element or elements and the transitional surcharge must cross-reference association charges for all carrier's carrier access charges other than the Carrier Common Line element or elements and the transitional surcharge;

(4) Any charge in such a tariff that is not an association charge must be computed to reflect the combined investment and expenses of all companies that participate in such a charge;

(5) A telephone company or companies that elect to file such a tariff for 1984 access charges shall notify AT&T on or before the 40th day after the release of the Commission order adopting this Part;

(6) A telephone company or companies that elect to file such a tariff for any year subsequent to 1984 shall notify the association not later than June 30 of the preceding year if such company or companies did not file such a tariff in such preceding year or cross-referenced association charges in such preceding year that will not be cross-referenced in the new tariff;

(7) Such a tariff shall not contain charges for any access elements that are disaggregated or deaveraged within a study area that is used for purposes of jurisdictional separations;

(8) Such a tariff for a company that provides extended area local exchange telephone service shall not establish any charge for a carrier's carrier access element that does not apply to the entire extended area; and

(9) Such a tariff shall not include a charge other than an association charge for an extended area that is served by two or more telephone companies without the concurrence of all telephone companies that serve such extended area.

§ 69.4 Charges to be filed.

(a) The end user charges for access service filed with this Commission shall include charges for each of the following elements:

(1) Dedicated Access Line;
(2) Pay Telephone; and
(3) End User Common Line.

(b) Except as provided in Subpart C of this Part, the carrier's carrier charges for access service filed with this Commission shall include charges for each of the following elements:

(1) Carrier Common Line;
(2) Line Termination;
(3) Local Switching;
(4) Intercept;
(5) Information;
(6) Operator Assistance;
(7) Common Transport;
(8) Dedcated Transport; and
(9) Special Access.

(c) The carrier's carrier charges for carriers that offer a billing and collection or billing information service shall also include a Billing and Collection element.

Subpart B—Computation of Charges

§ 69.101 General.

Except as provided in Subpart C of this Part, charges for each access element shall be computed and assessed as provided in this Subpart.

§ 69.102 Dedicated access line.

(a) A charge that is expressed in dollars and cents per line per month shall be assessed upon end users for each interstate or foreign dedicated access line.

(b) Such charge will be computed by dividing one-twelfth of the projected annual revenue requirement for the Dedicated Access Line element by the projected average number of interstate or foreign dedicated access lines in use during such annual period.

§ 69.103 Pay telephone.

(a) A charge that is expressed in dollars and cents per call shall be assessed upon end users for each interstate or foreign call that is placed from a pay telephone, except that collect or third number billing calls will not be assessed.

(b) Such charge shall be computed by dividing the projected annual revenue requirement for the Pay Telephone element by the projected annual number of calls that are subject to assessment.

§ 69.104 End user common line.

(a) A charge that is expressed in dollars and cents per line per month shall be assessed upon end users that subscribe to local exchange telephone service. Such charge shall be assessed for each line between the premises of an end of an end user and a Class 5 office that is or may be used for local exchange service transmissions.

(b) Charges to multi-line subscribers shall be computed by multiplying a single line rate by the number of lines used by such subscriber.

(c) Charges to party line subscribers shall be computed by dividing a single line rate by the number of users that share such line.

(d) The single line rate or charge shall be computed by dividing one-twelfth of the projected annual revenue requirement for the End User Common Line element by the projected average number of local exchange service subscriber lines in use during such annual period.

§ 69.105 Carrier common line.

(a) A charge that is expressed in dollars and cents per conversation minute shall be assessed upon all interexchange carriers that use local exchange switching facilities for the provision of interstate or foreign telecommunications services.

(b) A per minute charge shall be computed by dividing the projected annual revenue requirement for the Carrier Common Line element by the projected annual conversation minutes for all interstate or international services that use local exchange switching facilities. Each minute of use of any local exchange switch by such services shall be counted for purposes of computing and assessing this charge.

§ 69.106 Line termination.

(a) A charge that is expressed in dollars and cents per conversation minute shall be assessed upon all interexchange carriers that use local exchange facilities for the provision of interstate or foreign telecommunications services.

(b) A per minute charge shall be computed by dividing the projected annual revenue requirement for the Line

Termination element by the projected annual conversation minutes for all interstate or foreign services that use local exchange switching facilities. Each minute of use of any termination in a local exchange switch by such services shall be counted for purposes of computing and assessing this charge.

§ 69.107 Local switching.

(a) Charges that are expressed in dollars and cents per conversation minute shall be assessed upon all interexchange carriers that use local exchange switching facilities for the provision of interstate or foreign services.

(b) Separate charges shall be established for two categories of service. The first category, or LS 1, shall consist of local dial switching for services other than MTS or WATS that is provided through a line side termination in a Class 5 switch or through a termination in a local tandem switch. The second category, or LS 2, shall consist of local dial switching for MTS and WATS and local dial switching for a service other than MTS or WATS that is provided through a trunk side termination in a Class 5 switch.

(c) The projected annual revenue requirement for Local Switching shall be apportioned between LS 1 and LS 2 on the basis of weighted relative usage. LS 1 dial equipment minutes shall be counted as one. LS 2 dial equipment minutes shall be multiplied by the Toll Weighting Factor or TWF that is used for jurisdictional separations purposes to allocate investment in a particular type of switch.

(d) A per minute charge for the LS 1 category shall be computed by dividing the LS 1 portion of the annual revenue requirement by the projected annual LS 1 conversation minutes.

(e) A per minute charge for the LS 2 category shall be computed by dividing the LS 2 portion of the projected annual revenue requirement by the projected annual LS 2 conversation minutes.

(f) If end users of an interstate or foreign service that uses local switching facilities pay message unit charges for such calls in a particular exchange, a credit shall be deducted from the Local Switching element charges to such carrier for access service in such exchange. The per minute credit for each such exchange shall be multiplied by the monthly conversation minutes for such service to compute the monthly credit to such a carrier.

(g) If all local exchange subscribers in such exchange pay message unit charges, the per minute credit described in paragraph (f) of this Section shall be computed by dividing total message unit charges to all subscribers in a particular exchange in a representative month by the total minutes of use that were measured for purposes of computing message unit charges in such month.

(h) If some local exchange subscribers pay message unit charges and some do not, a per minute credit described in paragraph (f) of this Section shall be computed by multiplying a credit computed pursuant to paragraph (g) of this Section by a factor that is equal to total minutes measured in such month for purposes of computing message unit charges divided by the total local exchange minutes in such month.

§ 69.108 Intercept.

(a) A charge that is expressed in dollars and cents per conversation minute shall be assessed upon all interexchange carriers that use local exchange facilities for the provision of interstate or foreign telecommunication services.

(b) A per minute charge shall be computed by dividing the projected annual revenue requirement for the Intercept element by the projected annual conversation minutes for all interstate or foreign services that use local exchange switching facilities.

§ 69.109 Information.

(a) A charge shall be assessed upon all interexchange carriers that are connected to assistance boards through interexchange directory assistance trunks.

(b) If such connections are maintained exclusively by carriers that offer MTS, the projected annual revenue requirement for the Information element shall be divided by 12 to compute the monthly assessment to such carriers.

(c) If such connections are provided to additional carriers, charges shall be established that reflect the relative use of such directory assistance service by such interexchange carriers.

§ 69.110 Operator assistance.

(a) A charge shall be assessed upon all interexchange carriers that offer an operator-assisted service that uses local exchange switching facilities and uses the services of telephone company operators.

(b) If such service is provided exclusively to the carriers that offer MTS, the projected annual revenue requirement for the Operator Assistance element shall be divided by 12 to compute the monthly assessment to such carriers.

(c) If such a service is provided to additional carriers a charge that is expressed in dollars and cents per call shall be assessed upon each carrier that receives such a service.

(d) Such a per call charge shall be computed by dividing the projected annual revenue requirement for the Operator Assistance revenue requirement by the projected annual number of operator-assisted calls.

§ 69.111 Common transport.

(a) A charge that is expressed in dollars and cents per conversation minute shall be assessed upon all interexchange carriers that use switching or transmission facilities that are apportioned to the Common Transport element for purposes of apportioning net investment.

(b) The per minute charge shall be weighted by a distance factor that reflects the airline distance between the Class 5 or end office switch that serves an end user and the entry switch.

(c) Charges shall be designed to produce annual revenue that is equal to the projected annual revenue requirement for the Common Transport element.

§ 69.112 Dedicated transport.

(a) The projected annual revenue requirement for Dedicated Transport shall be divided into three parts. The revenue requirement shall be apportioned on the basis of relative net investment in the following investment categories:

(1) Interface arrangements;

(2) Voice grade transmission facilities; and

(3) Conditioning arrangements.

(b) Appropriate subelements shall be established for the use of interface arrangements. Charges for such subelements shall be assessed and computed as follows:

(1) Such charges shall be assessed upon all interexchange carriers for the interface arrangements they use to provide interstate or foreign services;

(2) Charges for all such subelements shall be designed to produce total annual revenues that are equal to the portion of the projected annual revenue requirement for Dedicated Transport that has been apportioned to the interface arrangements subelements; and

(3) Charges for individual subelements shall be designed to reflect cost differences among such subelements in a manner that complies with applicable Commission rules or decisions.

(c) A charge for the use of voice grade transmission facilities shall be assessed upon interexchange carriers that use such facilities to provide interstate or foreign services. Such charges shall be

expressed in dollars and cents per unit of capacity. Total units of capacity provided to an interexchange carrier shall be measured by ascertaining the number of conversations that could be transmitted simultaneously without producing blocking in the dedicated transport facilities. The capacity unit charge for carriers that offer MTS shall be weighted by a distance factor that reflects the airline distance between the entry switch and the interexchange facility. The capacity unit charge for other carriers shall be weighted by a distance factor that reflects the lesser or least of the airline distance between the entry switch and such carrier's interexchange facility or the airline distance between the entry switch and any interexchange facility of carriers that offer MTS that is located within 5 miles of such carrier's interexchange facility.

(d) Appropriate subelements shall be established for the use of conditioning arrangements. Charges for such subelements shall be assessed and computed as follows:

(1) Such charges shall be assessed upon all interexchange carriers that use conditioning arrangements in their provision of interstate or foreign services;

(2) Charges for all such subelements shall be designed to produce total annual revenues that are equal to the portion of the projected annual revenue requirement for Dedicated Transport that has been apportioned to the conditioning arrangements subelements; and

(3) Charges for individual subelements shall be designed to reflect cost differences among such subelements in a manner that complies with applicable Commission rules or decisions.

§ 69.113 Special access.

(a) Appropriate subelements shall be established for the use of equipment or facilities that are assigned to the Special Access element for purposes of apportioning net investment.

(b) Charges for all subelements shall be designed to produce total annual revenue that is equal to the projected annual revenue requirement for the Special Access element.

(c) Charges for an individual subelement shall be assessed upon all interexchange carriers or enhanced service providers that use the equipment or facilities that are included within such subelement.

(d) Charges for individual subelements shall be designed to reflect cost differences among subelements in a manner that complies with applicable Commission rules or decisions.

§ 69.114 Billing and collection.

(a) Billing and collection service shall be offered to all interexchange carriers if such a service is offered to any interexchange carrier. Charges shall be assessed upon all interexchange carriers that elect to use such services.

(b) Any difference in charges for such service or for a billing information service shall reasonably approximate cost differences in the service provided.

Subpart C—Computation of Transition Charges

§ 69.201 General.

Notwithstanding §§ 69.4, 69.104 and 69.105, charges for the access elements described in this subpart shall be computed in the manner described in this subpart for the period commencing January 1, 1984 and ending December 31, 1990.

§ 69.202 End user common line charges.

(a) Common line charges shall consist of a minimum charge that is expressed in dollars and cents per line per month, a maximum charge that is expressed in dollars and cents per line per month, and a usage charge that is expressed in dollars and cents per conversation minute or dollars and cents per call. Except as provided for in Section 69.206, all End User Common Line charges shall be assessed upon end users.

(b) The transitional End User Common Line charges shall be computed as provided in §§ 69.203–69.205.

§ 69.203 Minimum charges.

(a) A minimum charge shall be assessed upon each local exchange service subscriber that does not pay the maximum charge. A minimum charge may be established at any level that does not exceed the charge that would have been computed pursuant to § 69.104(d) for the year in question, provided that the minimum charge for a single line residential or party line subscriber shall not be less than $2 and the minimum charge for a single-line business local exchange service customer shall not be less than $4 or more than 200% of the residential minimum charge.

(b) The minimum for a multi-line local exchange service subscriber shall be computed by multiplying the applicable single line rate by the number of local exchange subscriber lines such subscriber uses.

(c) For purposes of this section, a line shall be deemed to be a residential line if the subscriber pays a rate for such line that is described as a residential rate in the local exchange service tariff. All other lines shall be deemed to be business lines.

§ 69.204 Usage charges.

(a) A usage charge shall be assessed for each originating conversation minute or originating call except originating minutes or calls for a collect MTS call, an In-WATS call or an open end FX, CCSA or CCSA equivalent call until the combined minimum and usage charges equal or exceed the maximum charge in a particular month. Third party billing calls shall be assessed to the line billed. Usage charges for a multi-line local exchange service subscriber shall be attributed equally to each line for purposes of determining whether such a subscriber shall pay the maximum charge for any line in any month.

(b) The usage charge shall be computed by subtracting projected annual revenues from maximum and minimum charges and the surcharges described in § 69.206 from the projected End User Common Line annual revenue requirement. That residual revenue requirement shall either be divided by the projected annual conversation minutes of end users that do not pay the maximum charge to compute a per minute charge or divided by the projected annual number of calls by such end users to compute a per call charge.

§ 69.205 Maximum charges.

(a) A maximum charge may be established at any level that is not less than the charge that would have been computed pursuant to section 69.104(d) for the year in question, provided that the maximum shall not be more than the charges described in paragraph (b) of this section unless a charge described in paragraph (b) of this section is less than the applicable § 69.104(d) charge.

(b) The maximum for each transition year shall be as follows:

(1) 1984—the Dedicated Access Line per line rate;

(2) 1985—90% of the 1985 Dedicated Access Line per line rate;

(3) 1986—80% of the 1986 Dedicated Access Line per line rate;

(4) 1987—60% of the 1987 Dedicated Access Line per line rate; and

(5) 1988–1990—50% of the 1988 Dedicated Access Line per line rate.

§ 69.206 Transitional surcharges.

(a) During the period that a usage charge is assessed upon end users, a surcharge shall be assessed upon interexchange carriers that offer MTS, In-WATS, FX, CCSA or CCSA equivalent service as a surrogate for usage charges upon an end user that

originates a collect MTS call or originates an In-WATS call or an FX, CCSA or CCSA equivalent call that originates at the open end.

(b) If usage charges are assessed upon a per minute basis, the transitional surcharge shall be computed by multiplying the conversation minutes of such originating calls transmitted to a particular interexchange carrier by a per minute charge that is computed by multiplying the end user per minute usage charge by a factor that is equal to projected annual non-collect MTS conversation minutes of end users that do not pay maximum charges divided by total projected annual non-collect MTS conversation minutes.

(c) If usage charges are assessed upon a per call basis, the transitional surcharge shall be computed by multiplying such originating calls transmitted to a particular interexchange carrier by a per call charge that is computed by multiplying the end user per call usage charge by a factor that is equal to projected annual non-collect MTS calls of end users that do not pay maximum charges divided by total projected annual non-collect MTS calls.

§ 69.207 Premium access.

(a) Until the Commission determines that equivalent access arrangements are being offered to all interexchange carriers in all or almost all exchanges a portion of the Carrier Common Line revenue requirement shall be designated by Commission order as premium access. Such premium access shall be assessed to the carriers that offer MTS and WATS and shall be billed in equal monthly installments.

(b) In the absence of a Commission order designating the premium access portion, the premium access portion shall be equal to a projected annual revenue requirement for CPE other than Category 2 CPE or any surrogate for CPE costs that may be assigned to interstate and foreign services, but in no event shall premium access exceed the total annual Carrier Common Line revenue requirement.

§ 69.208 Transitional Carrier Common Line.

Premium access revenues shall be deducted from the projected Carrier Common Line annual revenue requirement to determine the Transitional Carrier Common Line annual revenue requirement. Charges for the Transitional Carrier Common Line element shall be assessed and computed in the same manner as the post-transition Carrier Common Line element.

Subpart D—Apportionment of Net Investment

§ 69.301 General.

(a) For purposes of computing annual revenue requirements for access elements net investment shall be apportioned among the interexchange category and access elements as provided in this subpart and expenses shall be apportioned as provided in Subpart E of this Part.

(b) The End User Common Line and Carrier Common Line elements shall be combined for purposes of this subpart and Subpart E of this Part. Those elements shall be described collectively as the Common Line element. The Common Line element revenue requirement shall be segregated in accordance with Subpart F of this Part.

§ 69.302 Net investment.

(a) Investment in Accounts 100.1 and 122 shall be apportioned among the interexchange category and appropriate access elements as provided in §§ 69.303–69.309.

(b) Investment in Accounts 100.2–100.4 shall be apportioned in the following manner:

(1) COE investment shall be apportioned among the interexchange category and appropriate access elements in the same proportions as total Account 100.1 COE investment;

(2) OSP investment shall be apportioned among the interexchange category and appropriate access elements in the same proportions as total Account 100.1 OSP investment;

(3) Buildings investment shall be apportioned among the interexchange category and appropriate access elements in the same proportions as total Account 100.1 Buildings investment; and

(4) Investment that is not COE, OSP or Buildings investment shall be apportioned among the interexchange category and appropriate access elements in the same proportions as total Account 100.1 investment that is not COE, OSP or Buildings investment.

§ 69.303 Station equipment.

(a) Investment in station equipment that is included in Separations Category 2 shall be assigned to the Special Access element.

(b) Investment in pay telephones and appurtenances shall be assigned to the Pay Telephone element.

(c) Investment in all other station equipment shall be apportioned between the Dedicated Access Line and Common Line elements on the basis of the relative number of equivalent lines in use. Each interstate or foreign dedicated access line shall be counted as one Dedicated Access Line. Local exchange subscriber lines shall be multiplied by the applicable interstate separations factor to determine the number of equivalent local exchange subscriber lines attributable to the Common Line element.

(d) Any investment that is apportioned to interstate and foreign services as a surrogate for customer premises equipment shall be apportioned between the Dedicated Access Line and Common Line elements in the same manner as investment apportioned pursuant to paragraph (c) of this section.

§ 69.304 Customer OSP.

(a) Interstate and foreign private lines that are described as dedicated access lines in this Part shall be assigned to the Dedicated Access Line element. All other private lines shall be assigned to the Special Access element.

(b) Interstate WATS access lines shall be assigned to the Dedicated Access Line element. In the event that a portion of investment in interstate WATS access lines is allocated to intrastate services and a portion of intrastate WATS access lines is allocated to interstate services, the total unseparated investment in interstate WATS access lines that are described as dedicated access lines shall be assigned to the Dedicated Access Line element and investment apportioned to the Common Line element shall be adjusted to reflect the difference between unseparated interstate WATS access line investment and the WATS access line investment apportioned to interstate services pursuant to the *Separations Manual*.

(c) Investment in pay telephone lines shall be assigned to the Pay Telephone element.

(d) Investment in local exchange subscriber lines shall be assigned to the Common Line element.

(e) Investment in voice grade lines that are not in use shall by apportioned among the Dedicated Access Line, Pay Telephone, Common Line and Special Access elements on the basis of the relative number of equivalent voices grade lines in use. Each interstate or foreign dedicated access line shall be counted as one line. Pay telephone lines and local exchange subscriber lines shall be multiplied by the applicable interstate separations factor to determine the number of equivalent pay telephone or local exchange subsriber lines.

(f) Investment in unused lines that are not voice grade shall be assigned to the Special Access element.

§ 69.305 Carrier OSP.

(a) Carrier OSP that is not used for "origination" or "termination" as defined in sections 69.2(v) and 69.2(w) shall be assigned to the interexchange category.

(b) Carrier OSP other than WATS access lines not assigned pursuant to paragraph (a) of this section that is used for interexchange services that use switching facilities that are also used for local exchange telephone service shall be apportioned between the Dedicated Transport and Common Transport elements. Such OSP shall be assigned to the Dedicated Transport element if it is used exclusively for the interexchange services of a particular carrier.

(c) All Carrier OSP that is not apportioned pursuant to paragraphs (a) and (b) of this section shall be assigned to the Special Access element.

§ 69.306 Central office equipment.

(a) The *Separations Manual* categories shall be used for purposes of apportioning investment in such equipment except that any Central Office Equipment attributable to a Dedicated Transport subelement shall be assigned to the Dedicated Transport element.

(b) Category 1 COE (Manual Switchboards) shall be apportioned among the interexchange category and the Intercept, Information and Operator Assistance access elements. COE 1 of a telephone company that is not required to transfer assets pursuant to the Modified Final Judgment in *United States v. Western Electric Co.* shall be assigned to the interexchange category if such equipment would have been transferred to an interexchange carrier pursuant to that Modified Final Judgment. COE 1 that is used for intercept services shall be assigned to the Intercept element. COE 1 that is used for directory assistance service shall be assigned to the Information element. COE 1 that is not assigned to the interexchange category or the Intercept and Information elements shall be assigned to the Operator Assistance element.

(c) Category 2 COE (Tandem Switches) shall be assigned to the Common Transport element.

(d) Category 3 COE (Intertoll Dial Switching Equipment) that is deemed to be exchange equipment for purposes of the Modified Final Judgment in *United States v. Western Electric Co.* shall be assigned to the Common Transport element. All other COE 3 shall be assigned to the interexchange category.

(e) Category 4 COE (Automatic Message Recording Equipment) shall be assigned to the Billing and Collection element.

(f) Category 5 COE (Other Toll Dial Switching Equipment) that is deemed to be exchange equipment for purposes of the Modified Final Judgment in *United States v. Western Electric Co.* shall be assigned to the Operator Assistance element. All other COE 5 shall be assigned to the interexchange category.

(g) Category 6 COE (Local Dial Switching) that is classified as non-traffic sensitive for purposes of jurisdictional separations shall be assigned to the Line Termination element except as provided in paragraph (a) of this section. COE 6 that is classified as traffic sensitive for jurisdictional separations purposes shall be assigned to the Local Switching element. In the event that any COE 6 is not used for local dial switching, such equipment shall be deemed to be Category 7 equipment for purposes of this Part.

(h) Category 7 COE (Special Services Switching) that is deemed to be exchange equipment for purposes of the Modified Final Judgment in *United States v. Western Electric Co.* shall be assigned to the Special Access element. All other COE 7 shall be assigned to the interexchange category.

(i) Category COE 8 (Circuit Equipment) shall be apportioned among the interexchange category and the Dedicated Access Line, Pay Telephone, Common Line, Dedicated Transport, Common Transport and Special Access elements. 8 COE shall be apportioned in the same proportions as the associated OSP except as provided in paragraph (a) of this Section.

§ 69.307 Buildings.

(a) The *Separations Manual* space categories and subcategories shall be used for purposes of apportioning Buildings investment.

(b) Category 1A space investment (Manual Switchboard) shall be apportioned among the interexchange category and the Intercept, Information and Operator Assistance elements. Such investment shall be apportioned in the same proportions as COE 1 investment.

(c) Category 1B space investment (Circuit Equipment) shall be apportioned among the interexchange category and the Dedicated Access Line, Pay Telephone, Common Line, Dedicated Transport, Common Transport and Special Access elements. Such investment shall be apportioned in the same proportions as COE 8 investment.

(d) Category 1C space investment (Dial Switching) shall be apportioned among the interexchange category and the Line Termination, Local Switching, Operator Assistance, Common Transport and Special Access elements. Such investment shall be apportioned in the same proportions as combined investment in COE categories 2, 3, 5, 6 and 7.

(e) Category 2 space investment (Operator Quarters) and Category 3 space investment (General Traffic Supervision) shall be apportioned among the interexchange category and the Intercept, Information and Operator Assistance elements. Such investment shall be apportioned in the same proportions as COE 1 investment.

(f) Category 4 space investment (Commercial Office) shall be apportioned among the interexchange category and the Pay Telephone, Information and Billing and Collection elements. Such investment shall be apportioned in the same proportions as combined commercial expenses.

(g) Category 5 space investment (Used Interstate by Another Company) and Category 11 space investment (Constructed for Another Company for interstate use) shall be assigned to the interexchange category.

(h) Category 6 space investment (Revenue Accounting) shall be apportioned among the interexchange category and all access elements in the same proportions as combined revenue accounting expenses.

(i) Category 7 space investment (Garages and Storerooms) shall be apportioned among the interexchange category and the Dedicated Access Line, Pay Telephone, Common Line, Dedicated Transport, Common Transport and Special access elements. Such investment shall be apportioned in the same manner as combined OSP investment.

(j) Category 8 space investment (Rented to others) shall be assigned to the interexchange category.

(k) Category 9 space investment (General Office) shall be apportioned among the interexchange category and all access elements in the same proportions as combined General Office expenses.

(l) Category 10 space investment (Antenna Support) shall be apportioned among the interexchange category and the appropriate access elements in the same manner as the antenna supported.

§ 69.308 Land.

(a) Investment in land other than storage space that is occupied by a building or buildings or a building or buildings under construction shall be apportioned among the interexchange category and the appropriate access

elements in the same manner as the buildings on such land.

(b) Investment in parcels of land other than storage space that are contiguous with a parcel described in paragraph (a) of this section shall be apportioned in the same proportions as investment in such contiguous parcel.

(c) Investment in storage space shall be apportioned among the interexchange category and the Dedicated Access Line, Pay Telephone, Common Line, Dedicated Transport, Common Transport and Special Access elements. Such investment shall be apportioned in the same proportions as combined OSP investment.

(d) Investment in land that is not apportioned pursuant to paragraphs (a), (b) and (c) of this section shall be apportioned among the interexchange category and all access elements in the same proportions as the combined land investment that is apportioned pursuant to paragraphs (a), (b) and (c) of this section.

§ 69.309 Other investment.

Investment that is not apportioned pursuant to §§ 69.303–69.308 shall be apportioned among the interexchange category and all access elements in the same proportions as the combined investment that is apportioned pursuant to §§ 69.303–69.308.

Subpart E—Apportionment of Expenses

§ 69.401 Direct expenses.

(a) Direct expense shall be assigned to the appropriate investment category and shall be apportioned among the interexchange cateogy and appropriate access elements in the same proportions as the associated investment.

(b) Amortization of embedded inside wiring investment and installation of new inside wiring and any maintenance or depreciation expense that is apportioned to interstate and foreign services as a surrogate for CPE maintenance or depreciation shall be deemed to be associated with § 69.303(c) other station equipment investment for purposes of the apportionment described in paragraph (a) of this section.

§ 69.402 Current taxes.

(a) State income taxes and state gross receipts or gross earnings taxes that are collected in lieu of a corporate income tax shall be apportioned among the interexchange category and all access elements in the same proportions as the combined Station Equipment, OSP, COE, Buildings and Land investment attributable to property that is located within the state that imposed the tax.

(b) Social Security taxes shall be apportioned among the interexchange category and all access elements in accordance with the Big 4 Wage Factor.

(c) All other current taxes including federal income taxes shall be apportioned among the interexchange category and all access elements in the same manner as § 69.309 Other Investment.

§ 69.403 Deferred tax expenses.

(a) Account 304 investment tax credits shall be assigned to the investment category that produced the tax credit. Credits from amortization of past investment tax credits shall be deducted from the balance for the relevant investment category. The net balance shall be apportioned among the interexchange category and appropriate access elements in the same proportions as the associated investment.

(b) Other deferred tax expenses, including Account 308.1 and 308.2 expenses and comparable expenses in Account 307, shall be assigned to the investment category that produced the hypothetical tax. Such expense shall be apportioned among the interexchange category and appropriate access elements in the same proportions as the associated investment.

§ 69.404 Traffic expenses.

Traffic expenses shall be apportioned among the interexchange category and the Intercept, Information and Operation Assistance elements in the same proportions as COE 1 investment.

§ 69.405 Commercial expenses.

(a) Sales, Advertising and Connecting Company Relations expenses (Accounts 642, 643 and 644) shall be assigned to the interexchange category.

(b) Local Commercial expenses (Account 645) shall be assigned to the Billing and Collection element.

(c) Public Telephone Commissions expense (Account 648) shall be assigned to the Pay Telephone element.

(d) Directory expenses (Account 649) shall be assigned to the Information element.

(e) All other Commercial Expenses shall be apportioned among the interexchange category and the Pay Telephone, Information and Billing and Collection elements in the same proportions as the combined expense apportioned pursuant to paragraphs (a)–(d) of this section.

§ 69.406 Revenue accounting expenses.

(a) Revenue Accounting Expenses that are attributable to End User access billings shall be apportioned among the Dedicated Access Line, Pay Telephone and Common Line elements. Such expenses shall be apportioned on the basis of relative investment other than revenue accounting space investment apportioned to each such element.

(b) Revenue Accounting Expenses that are attributable to carrier's carrier access billings shall be apportioned among all carrier's carrier access elements except the Common Line element. Such expenses shall be apportioned on the basis of relative investment other than revenue accounting space investment apportioned to each such element.

(c) All other Revenue Accounting Expenses shall be assigned to the Billing and Collection element.

§ 69.407 General office expenses.

(a) The portion of Account 665 expense that is attributable to engineering expenses shall be apportioned among the interexchange category and all access elements in the same proportions as the combined investment in Station Equipment, OSP and COE.

(b) All other General Office Expenses shall be apportioned among the interexchange category and all access elements in accordance with the Big 4 Wage Factor.

§ 69.408 Relief and pensions.

Relief and pensions expense shall be apportioned among the interexchange category and all access elements in accordance with the Big 4 Wage Factor.

§ 69.409 License contract expenses.

License contract expenses shall be assigned to expense categories in the same manner as expenses that are incurred directly by the telephone company and shall be apportioned in the same manner as such directly incurred expenses.

§ 69.410 Other expenses.

Expenses that are not apportioned pursuant to §§ 69.401–69.409 shall be apportioned among the interexchange category and all access elements in the same manner as § 69.309 Other Investment.

Subpart F—Segregation of Common Line Element Revenue Requirement

§ 69.501 General.

(a) Any portion of the Common Line element annual revenue requirement that is attributable to the application of a jurisdictional separations factor that is described as a High Cost Factor or a Universal Service Factor shall be

assigned to the Carrier Common Line element or elements.

(b) Any portion of the Common Line element annual revenue requirement that is attributable to CPE investment or expense or surrogate CPE investment or expense shall be assigned to the Carrier Common Line element or elements.

(c) Any portion of the Common Line element annual revenue requirement that is attributable to inside wiring investment or expense shall be assigned to the Carrier Common Line element or elements.

(d) Any portion of the Common Line element revenue requirement that is not assigned to Carrier Common Line elements pursuant to paragraphs (a), (b) and (c) of this section shall be apportioned between End User Common Line and Carrier Common Line pursuant to §§ 69.502 and 69.503. Such portion of the Common Line element annual revenue requirement shall be described as the base factor portion for purposes of this Subpart.

§ 69.502 Base factor apportionment.

(a) The base factor portion shall be divided by the projected average number of subscriber local exchange lines in use during the relevant year in order to determine a base factor per line annual revenue requirement.

(b) If the base factor per line annual revenue requirement is $48 or less per year the base factor portion shall be assigned to the End User Common Line element.

(c) If the base factor per line revenue requirement is more than $48 per year—

(1) An amount that equals $48 multiplied by the projected average number of local exchange subscriber lines in use during the relevant year shall be assigned to the End User Common Line element; and

(2) The remainder of the base factor portion or transitional portion shall be apportioned in accordance with Section 69.503.

§ 69.503 Apportionment of transitional portion.

(a) The transitional portion shall be assigned to the Carrier Common Line elements in 1984 access charges.

(b) In 1985 access charges 80% of the transitional portion shall be assigned to the Carrier Common Line elements. The residue shall be assigned to the End User Common Line element.

(c) In 1986 access charges 60% of the transitional portion shall be assigned to the Carrier Common Line elements. The residue shall be assigned to the End User Common Line element.

(d) In 1987 access charges 40% of the transitional portion shall be assigned to the Carrier Common Line elements. The residue shall be assigned to the End User Common Line element.

(e) In 1988 access charges 20% of the transitional portion shall be assigned to the Carrier Common Line elements. The residue shall be assigned to the End User Common Line element.

(g) The transitional portion shall be assigned to the End User Common Line element in access charges for 1989 and subsequent years.

Subpart G—Exchange Carrier Association

§ 69.601 Exchange carrier association.

(a) An association shall be established in order to prepare and file access charge tariffs on behalf of all telephone companies that do not file separate tariffs or concur in a joint access tariff of another telephone company for all access elements.

(b) All telephone companies that participate in the distribution of Carrier Common Line revenues collected by the association shall be deemed to be members of such association.

§ 69.602 Board of directors. [Reserved]

§ 69.603 Association functions.

(a) The association shall not engage in any activity that is not related to the preparation of access charge tariffs or the collection and distribution of access charge revenues unless such additional activity is expressly authorized by order of the Commission.

(b) Participation in Commission or court proceedings relating to access charge tariffs, the billing and collection of access charges, or the distribution of access charge revenues shall be deemed to be authorized association activities.

§ 69.604 Billing and collection of access charges.

(a) The association shall bill and collect all Carrier Common Line access charges including any premium access assessment.

(b) Telephone companies shall bill and collect all other End User or Carrier's Carrier access charges.

(c) All access charges shall be billed monthly.

§ 69.605 Distribution of Carrier Common Line revenues.

(a) Carrier Common Line revenues received by the association shall be distributed monthly in accordance with this Subpart.

(b) Association expenses incurred during the month that are allowable access charge expenses shall be reimbursed before any other funds are disbursed.

(c) Except as provided in paragraph (b) of this section, payments to average schedule companies that are computed in accordance with § 69.606 shall be disbursed before any other funds are disbursed. For purposes of this Part, a telephone company that was participating in average schedule settlements on December 1, 1982, shall be deemed to be an average schedule company except that:

(1) Any company that directly or indirectly controls, is directly or indirectly controlled by, is under direct or indirect control with, or merges with a telephone company that did not participate in average schedule settlements on December 1, 1982, shall not be deemed to be an average schedule company; and

(2) Any company that does not join in association tariffs for all access elements shall not be deemed to be an average schedule company.

(d) The residue shall be disbursed to telephone companies that are not average schedule companies in accordance with §§ 69.607–69.610.

§ 69.606 Computation of average schedule company payments.

(a) Payments shall be made in accordance with a formula approved or modified by the Commission. Such formula shall be designed to produce disbursements to an average schedule company that simulate the disbursements that would be received pursuant to § 69.607 by a company that is representative of average schedule companies.

(b) AT&T shall submit a proposed 1984 formula to the Commission on or before June 30, 1983. The association shall submit a proposed revision of the formula for each year after 1984 or certify that a majority of the directors of the association believe that no revisions are warranted for such year on or before June 30 of the preceding year.

§ 69.607 Disbursement of Carrier Common Line residue.

(a) The association shall compute a monthly net balance for each member telephone company that is not an average schedule company. If such a company has a negative net balance, the association shall bill that amount to such company. If such a company has a positive net balance, the association shall disburse that amount to such company.

(b) The net balance for such a company shall be computed by multiplying a hypothetical net balance for such a company by a factor that is computed by dividing the Carrier

Common Line residue by the sum of the hypothetical net balances for such companies.

(c) The hypothetical net balance for each company shall be the sum of the hypothetical net balances for each access element except the Billing and Collection element. All Carrier Common Line elements shall be deemed to be one element and all End User Common Line elements including transitional surcharges assessed to interexchange carriers shall be deemed to be one element for purposes of computing such hypothetical net balances. Such hypothetical net balances shall be computed in accordance with §§ 69.606–69.610.

§ 69.608 Carrier Common Line hypothetical net balance.

The hypothetical net balance shall be equal to a Carrier Common Line revenue requirement for each such company that is computed in accordance with Subpart F of this Part.

§ 69.609 End User Common Line hypothetical net balances.

(a) If the company does not participate in the association tariff for such element, the hypothetical net balance shall be zero.

(b) If the company does participate in the association tariff for such element, the hypothetical net balance shall be computed by multiplying an amount that is computed by deducting access revenues collected by such company for such element from an End User Common Line revenue requirement for such company that is computed in accordance with Subpart F of this Part by a factor that is computed by dividing access revenues collected by all such companies for such element by an End User Common Line revenue requirement for all such companies that is computed in accordance with Subpart F of this Part.

§ 69.610 Other hypothetical net balances.

(a) The hypothetical net balance for an access element other than Billing and Collection or a Common Line element shall be computed as provided in this section.

(b) If the company does not participate in the association tariff for such element, the hypothetical net balance shall be zero.

(c) If the company does participate in the association tariff for such element, the hypothetical net balance shall be computed by deducting access revenues collected for such element from the sum of expense attributable to such element and the element residue apportioned to such company. The element residue shall be apportioned among such companies in the same proportions as the net investment attributable to such element.

(d) The element residue shall be computed by deducting expenses of all participating companies attributable to such element from revenues collected by all participating companies for such element.

Statement of FCC Commissioner James H. Quello

In Re: Report and Order in CC Docket No. 78–72, Phase 1, In the Matter of MTS and WATS Market Structure

To state that this was a difficult decision would be to carry the use of understatement to its extreme. The decision was difficult because of its complexity, to be sure, but it was made even more difficult because it is so far reaching. It's difficult to imagine that any American will be untouched by the action the Commission has taken today.

It would have been easy to resist taking any action at this time, merely postponing action until it was forced upon us. But delay would not serve the public, the telecommunications industry nor would it serve the Commission itself. The die was cast long ago and we are rapidly moving into a new era of telecommunications in this country and throughout the world. Moving toward competition and away from monopoly requires that the industry move toward cost-based pricing. Equal access to the network has been mandated by both this Commission and by the Court in its approval of the Modified Final Judgment. It is also mandated by competition and by technology. We cannot turn back the clock.

This decision was bounded by two very strong considerations. The first is the abiding concern of this Commission and the Congress that the concept of universal service not be sacrificed. In my mind, this is the overriding concern as we attempt to fashion a new rate structure. It bears very heavily upon our second constraint; i.e., the threat that the local exchange will be bypassed by large users. Bypass, while not widely understood and appreciated, provides perhaps a greater threat to universal service than do increased local rates of a magnitude far above those implied by our action today. For example, AT&T has claimed that 5 percent of its customers generate 63 percent of its revenues. By ignoring the threat of bypass, we could only encourage more and more of those large users to leave the local exchanges across the country leaving those exchanges with most of their present costs but without present revenues. Bypass is a phenomenon which feeds upon itself. As more large users leave the exchange, those which remain must bear a larger share of the costs, encouraging more bypass and even higher costs. Clearly, we do not want to encourage such a scenario.

The Report and Order, in my view, is a measured, carefully considered step along a path which will lead to an even better telecommunications service in the future without destroying what we must rely upon in the present. Is it a perfect approach to this very complex problem?

In the words of Voltaire:

Perfection is attained by slow degrees; it requires the hand of time.

Separate Statement of Commissioner Joseph R. Fogarty

In Re: MTS and WATS Market Structure, CC Docket No. 78–72, Phase I

The adoption by the Federal Communications Commission of this Access Charge Order is of historic importance. This decision marks the culmination of a long and tortuous inquiry into a proper access charge structure.[135] Because this Order prescribes the manner of compensation that all exchange carriers will receive for the origination and termination of all interstate and international telecommunications or enhanced service, every ratepayer in this country will be affected. In the first year alone, the access charge plan will require the restructuring of rates for 11 to 13 billion dollars in non-traffic sensitive (NTS) and traffic sensitive (TS) plant.

Given the magnitude of our decision, I believe that I am correct in asserting that the *MTS and WATS Market Structure* rulemaking is one of the most important proceedings which has come before the Commission during my tenure, if not during the entire history of the Commission. The issues before the Commission in Phase I were not only technically complex, but also raised several important and competing policy considerations. In adopting this access charge plan, the Commission has succeeded admirably in balancing these competing values. The Commission has resisted the Siren-song lure of theoretical purity, recognizing the reality of the need for reasonable rates and maintenance of universal service. In the process, we have developed a plan which advances the overall public interest and is the best solution that could be fashioned under the circumstances. I wholeheartedly support this decision.

Section 1 of the Communications Act mandates that this Commission regulate "so as to make available, so far as possible, to all the people of the United States a rapid, efficient * * * communications service with adequate facilities at reasonable charges." In my judgment, the most critical factor in this proceeding has been the need to structure an access charge plan which would protect this principle and value of universal service. While local exchange service is not so elastic as toll service, it certainly is not inelastic.[136] In the monopoly environment of the past, the FCC and the State commissions made deliberate compromises in favor of the immediate, pragmatic objective of universal service at the expense of more theoretical objectives, such as economic efficiency. The

---

[135] *See MTS and WATS Market Structure*, CC Docket No. 78–72, Notice of Inquiry and Proposed Rulemaking, 67 FCC 2d 757 (1978); Supplemental Notice of Inquiry and Proposed Rulemaking, 73 FCC 2d 222 (1979), Second Supplemental Notice of Inquiry and Proposed Rulemaking, 77 FCC 2d 224 (1980); Report and Third Supplemental Notice of Inquiry and Proposed Rulemaking, 81 FCC 2d 177 (1980); and Fourth Supplemental Notice of Inquiry and Proposed Rulemaking, 90 FCC 2d 135 (1982).

[136] *See generally*, Appendix G.

dilemma created by technological progress and competition is that such compromises have become increasingly difficult to forge, implement, and maintain. No longer are regulators free to increase the load of NTS costs on long distance users in order to keep local residential rates low. Technological advance now affords major toll users the option of bypassing the public network altogether to avoid uneconomic charges. This phenomenon of bypass, with its negative revenue consequences, must still be weighed, however, against the harm that the direct assignment of all NTS costs to end users might cause. Even though bypass would be discouraged, such a strategy of total direct assignment could result in an unacceptable loss in the subscriber base as rural users, the poor and the elderly would be put to a hard choice between essentials.

The access charge structure adopted by the Commission meets this concern by striking an appropriate balance between the need to encourage efficiency and the need to preserve universal service. Under this structure, uneconomic bypass should be discouraged while at the same time there should be no substantial service dislocations. Universal service in rural, high cost areas will be protected by the universal service factor element of the carrier common line charge. Similarly, service discontinuance by those too poor to absorb large rate increases will be discouraged by the implementation of a reasonable maximum end user charge based upon the anticipated joint Board recommendation in Docket 80-286.[127]

In achieving this balance, the access charge plan affords both protection to ratepayers and flexibility to telephone companies. The transition period is structured so that the increase in the end user charge to its maximum cost will be gradual, starting with a $4 per month average revenue requirement. Heavy toll users will be protected by a cap on the amount that they may be charged for NTS costs. Telephone companies will be afforded the flexibility to determine how customer charges will be collected during the transition through a combination of usage and flat charges. As a consequence, those low-cost companies facing significant bypass problems and little threat of subscriber loss may move quickly to their full end user charge, while those companies with less significant bypass problems may move more slowly. In addition, the Exchange Carriers Association will allow companies the option to pool their costs in a manner somewhat reminiscent of current practice. This is crucial because of many small carriers developing and administering access charges would present an impossible burden.

Flexibility is also granted to the States as this decision permits them to recover intrastate NTS costs in any fashion they desire. This is important because the amount of NTS plant in the intrastate jurisdiction dwarfs the amount of interstate NTS plant. Further, the circumstances differ between the States, and it may be impossible to develop uniform Federal rules for the access charge treatment of intrastate NTS costs.[128] Leaving this discretion with the States will promote the regulatory flexibility and experimentation which has proved so beneficial in the past.

Of even more importance is the fact that there will be a monitoring system, in place by January 1, 1984, designed to ensure that any unforeseen developments that threaten universal service are discovered in time for corrective action to be taken. This built-in flexibility is critical because of the uncertainties involved. In addition, the requirements of periodic staff reports to the Commission and further Commission action before continuing the plan beyond the fifth year will ensure the fulfillment of our statutory mandate.

In addition to striking a realistic balance between the new imperative of economic efficiency and the continuing mandate of universal service, this decision takes the long overdue step of ending what has been an intolerable discrimination between MTS/WATS and ENFIA. Under the rules we have adopted, the OCCs will finally pay the full cost of interconnection—even during the transition. There will be no more discounts. Further, open-end Private Line and FX will also contribute fully for the first time to the recovery of common costs. This is only fair. For too long MTS and WATS ratepayers have been picking up costs which should have been borne by ENFIA and open-end Private Line and FX users.[129] Although during transition AT&T will pay a premium access charge theoretically based on its superior interconnection, the differential will be smaller than the current ENFIA discount and will end at approximately the same time as the OCCs are afforded equal access under the divestiture decree.[130]

In conclusion, I believe that the Commission has succeeded in developing the best possible access charge plan—a plan which carefully balances competing policy values and recognizes a continuing need for surveillance and possible adjustment in the public interest.

Separate Statement of Commissioner Stephen A. Sharp

In the past, local telephone companies have been compensated in different ways when their plant has been used for the origination or termination of interstate of foreign communications. In general, local telephone companies receive the highest compensation when their plant is used in the provision of interstate MTS/WATS. The lowest rate of compensation is the so-called B-1 rate, which is the monthly rate, usually flat, that local telephone companies charge business customers for local exchange telephone service. Vast interstate private line networks have been created by connecting private lines to B-1 service in each area where the customer wishes to communicate; in some cases these networks rival the public switched telephone network in their coverage. Yet these networks pay only the B-1 rate for "access";[131] in part because the B-1 rate is in most instances considerably cheaper than the rate for access that is bundled into the cost of a MTS/WATS call,[132] the same telephone call often costs the customer less on a private line network than it does under MTS/WATS.

With the rise of competition, the other common carriers (OCCs) sought to utilize B-1 service for access. The established telephone industry naturally opposed this and sought to obtain compensation at the higher MTS/WATS rate. The result of this dispute was a compromise: the OCCs were charged the ENFIA rate for access,[133] which was higher than the B-1 rate but lower than that received by local telephone companies under MTS/WATS.[134]

The Commission seeks to resolve these rate disparities with a single federal access charge. While this is a laudable goal, I wish to point out that there are many services tariffed with the various states which can be and are being used for purposes of access. Some examples of these services are intrastate WATS and intrastate private line service. It is not always obvious or simple to determine whether these services, tariffed with the states, are in fact being used for interstate and foreign communications. And to the extent that these services are priced lower than the federal access charge, users will attempt to substitute the former for the latter.[135]

If *all* rates, including those tariffed with the states, were based upon the cost of providing the respective service, it would not be necessary to establish a federal access charge since users would be free to use *any* service, whether tariffed with this Commission or the states, for interstate or intrastate communications as they saw fit. Carriers would remain financially whole regardless of differences in the way the same service is *used*. There would be no incentives on the part of customers to substitute one service for another because of non-cost based rate disparities, and no need for either the

---

[127] The alternative of a government-sponsored "phone stamps" program is not viable. Among the many problems with such a plan are the fact that the program would be difficult to target and the fact that it would call for increased government expenditures at a time when such expenditures are not feasible.

[128] We face a very different situation here on access charges than that which we recently confronted on depreciation policy. *See Amendment of Part 31*, on reconsideration, —— FCC 2d —— (1982).

[129] *See* Dissenting Statement of Commissioner Joseph R. Fogarty. *Extension of ENFIA Agreement*, 90 FCC 2d 6, 20-21 (1982).

[130] *See* Modified Final Judgment, *United States* v. *Western Electric Co.*, Civil Action No. 82-0192 (D.D.C., entered August 24, 1982).

[131] The term "access" is used henceforth to denote the use of a local telephone company's plant for the origination and termination of interstate *and* foreign communication.

[132] AT&T has estimated that the rate for access in an MTS/WATS call is approximately 7¢ per minute in each local exchange.

[133] As the Commission has recognized, ENFIA service is local exchange (i.e., B-1) service at a rate different from that on file with local jurisdictions for that service. *See* AT&T, 89 FCC 2d 1000, 1091 n. 4 (1982).

[134] *See* ENFIA, 71 FCC 2d 440 (1979).

[135] In page 20 of Appendix F of the order, for example, the Commission notes that in its 1981 Annual Report, Aeronautical Radio, Inc., a large user of communications services, stated that it had replaced federally tariffed private lines in its private line intercity network with cheaper private lines obtained under state tariffs.

Commission or the telephone companies to police the use to which various services were put in order to make the federal access charge workable.[136]

We know that local exchange service can be employed practically to interconnect any two points within that local calling area, including points at which access to interstate and intrastate toll can be obtained. In the long run, it appears neither reasonable nor practical to maintain differences in rates for the same service depending on the use to which local exchange service is put; i.e., for interstate and foreign communication, intrastate toll communication, or local exchange communication.

It is true that different jurisdictions, in seeking to implement their own policies, may see fit to use different ratemaking approaches which can result in different charges for similar or identical products. From a practical point of view, however, as distinctions between jurisdictionally interstate and jurisdictionally intrastate communications become increasingly blurred and resale becomes more widespread, the desirability of cost-based local exchange rates for each local area will become increasingly apparent. In this way, users of telephone service will pay the same rates regardless of how they use their local service, thereby discouraging uneconomic bypass and eliminating opportunities for arbitrage based upon differing rates for the same service or services.

I hope that the Commission will keep this long term solution in mind when it revisits and reviews the progress in implementing access charges.

Separate Statement of Commissioner Henry M. Rivera

In re: MTS and WATS Market Structure, CC Docket No. 78–72, Phase I (Access Charge)

I write separately to emphasize my concern that any access charge plan assure that universal service is maintained. Being from a state with a low population density, I am especially mindful of how necessary telephone communications are to the health and well-being of rural America. I am delighted that the Commission apparently shares my concerns.[137]

No doubt should exist that the immediate, overriding policy concerns of the Commission for assurance of universal service and network preservation will set the future development and evolution of this plan.

BILLING CODE 6712–01–M

INTERSTATE COMMERCE COMMISSION

49 CFR Parts 1190, 1191, and 1192

[Ex Parte No. 432]

Reorganizations of Rail and Motor Carriers

AGENCY: Interstate Commerce Commission.

ACTION: Removal of rules.

SUMMARY: The Commission is removing its regulations dealing with reorganizations of rail and motor carriers. These regulations no longer serve any purpose in view of the 1978 amendments to the Bankruptcy Act, Title 11, U.S. Code. We no longer have a direct role in the organization of protective committees, ratification of trustees, and confirmation of rail reorganization plans with respect to bankruptcies occurring after passage of the 1978 Act. Consequently, parts 1190, 1191, and 1192 are now used rarely, if at all. An *ad hoc* procedure is implemented for present rail reorganization under former section 77 of the Bankruptcy Act.

EFFECTIVE DATE: March 11, 1983.

FOR FURTHER INFORMATION CONTACT: Louis E. Gitomer (202) 275–7245, Richard Gaynor (202) 275–6019.

SUPPLEMENTARY INFORMATION: By notice of proposed rulemaking (NPR) published in the **Federal Register** on September 16, 1982, at 47 FR 40816, this proceeding was instituted to excise the Commission's regulations in Title 49 of the Code of Federal Regulations, Chapter X, Parts 1117—Reorganization of Railroads, 1118—Corporate Reorganization of Carriers and Corporations, and 1135—Corporate Reorganizations of Motor Carriers.[1] The notice explained that the Bankruptcy Act of 1978 Pub. L. No. 95–598, 92 Stat. 2549 (1978 Act) has substantially reduced our involvement in rail and motor carrier reorganizations. In particular, we no longer have a direct role in the organization of protective committees, ratification of trustees, and confirmation of rail reorganization plans with respect to bankruptcies occurring after passage of the 1978 Act. Consequently, Parts 1190, 1191, and 1192 are now used rarely, if at all.

The only problem we foresaw concerned applications that may be filed in reorganization proceedings begun before 1979. However, our records showed only a handful of rail reorganizations now pending with the Commission, and no ongoing motor reorganizations.[2] We determined that in these circumstances retention of those regulations is unwarranted. We stated that should an application under former sections 77 or 177 of the Bankruptcy Act be contemplated in the future, we would inform the parties on an *ad hoc* basis of the information required.

Comments in response to the NPR were filed by Burlington Norther n Railroad Company (BN), Chicago and North Western Transportation Company (CNW), the Milwaukee Road, and the Association of American Railroads (AAR). BN maintains that, because of the substantial changes which have resulted from the 1978 Act, the Commission's role in authorizing protective committees of creditors and shareholders, in the ratification of the appointment of trustees, and in the certification of a plan of reorganization, is now obsolete. While it offers no comment on Part 1192, it supports the NPR with respect to parts 1190 and 1191. BN agrees that the eventual Milwaukee

---

[136] If users were free to substitute other, cheaper services for the federal access charge, they would have no incentive to obtain service under federal access tariffs. Under these circumstances, either the Commission or the telephone companies would have to police how substitutable services were being used in order to prevent avoidance of the federal access charge.

[137] The Commission has adopted a plan that recognizes that the national interest is best served if universal service is maintained. This plan accomplishes this objective by:

- the contemplated *monitoring* program and commitment to take corrective action and to undertake a formal *"revisitation"* of this proceeding to ensure immediate, appropriate modifications should any unanticipated disruptive or deteriorating effects upon the nationwide telecommunications system or upon the continued maintenance of universal service develop (paras. 124, 195–196, 366–367);
- the establishment of the *Universal Service Fund*, enabling high cost companies to maintain affordable local exchange rates that do not substantially exceed rates charged by other companies, and selective mandatory *pooling* requirements (and voluntary participation in common tariff and revenue pool arrangements) to assure continuation of universal service in rural America and other high cost areas (paras. 134–135, 308–338);
- the provision for waivers to allow *"life line"* service (paras. 136–137);
- our recognition of possible justified *local deviations* from a single national plan requiring all dedicated end user costs be recovered through flat and equal charges on all customers (para. 367);
- a *transition* with a smooth and gradual, yet flexible, pace to allow a more "comfortable" adjustment to the new economic realities (para. 172);
- the allowed rate structure *flexibility* for the exchange carrier to implement the transition in a manner, within reason, to fit its individual situation and requirements (paras. 132, 175, 182, 185); and
- the careful balancing of conflicting objectives including the elimination of unlawful discrimination and preferences, and the promotion of competition, network economic and engineering efficiencies and, importantly, universal service as mandated by Section 1 of the Communications Act (". . . to make available, so far as possible, to all the people of the United States a rapid efficient, Nation-wide . . . communications service with adequate facilities at reasonable charges . . ."]—see para. 83.

[1] Now 49 CFR Parts 1190, 1191, and 1192, respectively. For consistency, we will refer to these regulations by their current numbers.

[2] Railroads involved in such proceedings include the Boston and Maine Corporation; the Chicago, Milwaukee, St. Paul and Pacific Railroad Company (Milwaukee Road); the Morristown and Erie Railroad Company; and the New York, Susquehanna and Western Railroad Company. The Milwaukee Road is the only railroad that has not submitted a reorganization plan for approval by the Commission.

Road plan can be accommodated by the Commission on an *ad hoc* basis.

AAR supports the proposal to delete the regulations in Parts 1190 and 1191. It offers no comment on Part 1192. AAR agrees that the retention of regulations rendered outmoded and obsolete by the 1978 Act is not justified.

CNW does not object to elimination of Part 1192 but it maintains that the proposal goes too far at this time in suggesting elimination of Parts 1190 and 1191. CNW urges that those regulations be preserved until completion of all reorganizations presently pending under former section 77 of the Bankruptcy Act. CNW is of the view that the existing regulations constitute an orderly and known procedure and that, in effect, the NPR would substitute uncertainty for a respectable body of precedent.

The Milwaukee Road argues that the Part 1190 procedures which deal with protective committees and the ratification of trustees may be needed in the future by those railroads now in reorganization. It also argues that those railroads which must file a plan of reorganization need the procedural guidelines of Part 1191. The Milwaukee Road maintains that elimination of established procedures will cause delays and engender disputes regarding the fairness, adequacy, and legality of procedures adopted on an *ad hoc* basis. Milwaukee makes no comment with respect to Part 1192.

After giving full consideration to the comments submitted, we conclude that our regulations dealing with reorganizations of rail and motor carriers should be deleted. Although certain rail reorganizations are pending, and the Milwaukee Road has yet to file its plan of reorganization, it is not necessary to preserve Parts 1190 and 1191 until such time as those reorganizations are completed. We will be able adequately to discharge our responsibilities in regard to rail reorganizations under former section 77 of the Bankruptcy Act by means of an *ad hoc* procedure employing the same rules as are now contained in Parts 1190 and 1191. This will assure fairness to the parties, eliminate any uncertainty and disputes engendered by deletion of those sections, and provide for a continuation of established guidelines. There are no pending motor carrier reorganizations under former section 77 of the Bankruptcy Act, and the likelihood that Part 1192 may be required in the future is remote. Moreover, no party objects to elimination of that part.

Environmental and Energy Considerations

We adopt our preliminary finding in our NPR that this action will not have any significant impact on the quality of the human environment or the conservation of energy resources. No comments have been submitted on any matter indicating that a contrary position is warranted.

Regulatory Flexibility Analysis

We affirm our previous determination that this proceeding will not have a significant impact on a substantial number of small entities, and that this action will further the general regulatory goal of eliminating unneeded regulations.

List of Subjects

49 CFR Part 1190

Administrative practice and procedure, Bankruptcy, Railroads, Trusts and trustees.

49 CFR Part 1191

Bankruptcy, Railroads.

49 CFR Part 1192

Bankruptcy, Motor carriers.

PARTS 1190, 1191, and 1192—[REMOVED]

It is ordered: Parts 1190, 1191, and 1192 (formerly Parts 1117, 1118, and 1135) of Title 49, Code of Federal Regulations, are removed.

This action is taken under the authority of 49 U.S.C. 10321 and 5 U.S.C. 553 and 559.

Decided: March 4, 1983.

By the Commission, Chairman Taylor, Vice Chairman Sterrett, Commissioners Andre, Simmons, and Gradison. Commissioner Simmons did not participate.

Proposed Rules

Federal Register
Vol. 48, No. 49
Friday, March 11, 1983

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 1033

Milk in the Ohio Valley Marketing Area; Proposed Suspension of Certain Provisions of the Order

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed suspension of rule.

SUMMARY: This notice invites written comments on a proposal to suspend certain order provisions affecting the regulatory status of milk plants under the Ohio Valley Federal milk order. The action was requested by a proprietary handler operating four distributing plants pooled under the order. It would suspend for the months of April through September 1983 the requirement that a distributing plant dispose of not less than 45 percent of its receipts as route disposition in March through August, and 50 percent during September through February.

DATE: Comments are due on or before March 18, 1983.

ADDRESS: Comments (two copies) should be filed with the Hearing Clerk, Room 1077, South Building, U.S. Department of Agriculture, Washington, D.C. 20250.

FOR FURTHER INFORMATION CONTACT: Clayton H. Plumb, Marketing Specialist, Dairy Division, U.S. Department of Agriculture, Washington, D.C. 20250, (202) 447–6273.

SUPPLEMENTARY INFORMATION: This proposed action has been reviewed under USDA procedures established to implement Executive Order 12291 and has been classified as a "non-major" action.

It also has been determined that any need for suspending certain provisions of the order on an emergency basis precludes following certain review procedures set forth in Executive Order 12291. Such procedures would require that this document be submitted for review to the Office of Management and Budget at least 10 days prior to its publication it the Federal Register. However, this would not permit the completion of the required suspension procedures and the inclusion of April 1983 in the suspension period if this is found necessary. The initial request for the action was received on March 2, 1983.

William T. Manley, Deputy Administrator, Agricultural Marketing Service, has certified that this proposed action would not have a significant economic impact on a substantial number of small entities. Such action would lessen the regulatory impact of the order on certain milk handlers and would tend to ensure that dairy farmers would continue to have their milk priced under the order and thereby receive the benefits that accrue from such pricing without the necessity of inefficient handling and transportation of milk.

Notice is hereby given that, pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 *et seq.*). The suspension of the following provisions of the order regulating the handling of milk in the Ohio Valley marketing area is being considered for April through September 1983:

In § 1033.12, paragraph (a)(2). All persons who want to send written data, views, or arguments about the proposed suspension should send two copies to the Hearing Clerk, U.S. Department of Agriculture, Washington, D.C. 20250, by the 7th day after publication of this notice in the Federal Register. The period for filing comments is limited to 7 days because a longer period would not provide the time needed to complete the required procedures and include April 1983 in the suspension period.

The comments that are sent will be made available for public inspection in the Hearing Clerk's office during normal business hours (7 CFR 1.27(b)).

Statement of Consideration

The proposed suspension would make inoperative for April through September 1983 the provision requiring a distributing plant to dispose of not less than 45 percent of its receipts as route disposition during the months of March through August, and 50 percent during September through February, in order to remain pooled. The suspension was requested by Beatrice Foods Company, a proprietary handler which operates four pool distributing plants under the order.

In support of its request, Beatrice cites producer milk deliveries in the Ohio Valley market which are increasing both seasonally and over the level of previous years. At the same time that milk production is at its seasonal peak, Beatrice anticipates a decline in Class I disposition from its plants due to summer closure of schools and the resulting loss of fluid milk sales to schools.

For January 1983, producer receipts in Ohio were 3.8 percent over December 1982 production and 5.3 percent above January 1982. With the combination of increasing production and summer school closures, Beatrice states that it expects that the proportion of milk regularly associated with its distributing plants which will be needed to meet its route disposition requirements will be less than 45 percent in the months of April through August, and less than 50 percent in the month of September this year.

In the absence of suspension action, Beatrice indicated that it would be necessary to make costly and inefficient movements of milk solely for the purpose of pooling its distributing plants and the milk of dairy farmers who regularly have supplied the fluid milk needs of the market.

BILLING CODE 3410-02-M

FEDERAL DEPOSIT INSURANCE CORPORATION

12 CFR Parts 304, 307, 308, 333, 337, 339 and 344

Review of Regulations

AGENCY: Federal Deposit Insurance Corporation.

ACTION: Notice of Regulations Selected for Review.

SUMMARY: In compliance with a requirement of the Regulatory Flexibility Act, the Board of Directors of the Federal Deposit Insurance Corporation (the "FDIC") is publishing a list of its regulations selected for review during 1983. FDIC is inviting public comment on each of the regulations selected.

ADDRESS: Comments may be addressed to Hoyle L. Robinson, Executive Secretary, Federal Deposit Insurance Corporation, 550–17th Street, NW., Washington, D.C. 20429.

FOR FURTHER INFORMATION CONTACT: Alan J. Kaplan, Deputy Executive Secretary, Office of the Executive Secretary, (202) 389–4446.

SUPPLEMENTARY INFORMATION: Pursuant to the Regulatory Flexibility Act (Pub. L. No. 96–354, 5 U.S.C. 601–612), The FDIC must review each of its existing rules that has a significant economic impact upon a substantial number of small entities by September 1990. The FDIC will satisfy this requirement by following the more stringent requirements of its statement of policy entitled "Development and Review of FDIC Rules and Regulations" (44 FR 31007, May 30, 1979; 44 FR 32353, June 6, 44 FR 76858, December 28, 1979), which prescribes the review of each rule (whether or not it has a significant economic impact on a substantial number of small entities) at least every five years.

Reviews will address all relevent issues, including whether the regulations should be continued, revised, or eliminated. Any change to a regulation as a result of a review will be published in the **Federal Register** in accordance with the requirements of the Administrative Procedure Act, as either a proposed rulemaking action subject to public comment or as a final rulemaking action. Each review will evaluate:

(a) The continued need for the regulation;

(b) Alternative methods of accomplishing the purpose of the regulation;

(c) The type and number of complaints or suggestions received;

(d) The need to minimize the burden imposed on those affected by the regulation, especially small banks;

(e) Possible simplification or clarification of the regulation;

(f) The need to eliminate overlapping and duplicative regulations; and

(g) The length of time since the regulation was last evaluated and the extent to which technology, economic conditions, and other factors have changed in the area affected by the regulation.

The regulations of the FDIC are set forth in the several parts which constitute chapter III of title 12 of the Code of Federal Regulations. The Board of Directors has directed the review during 1983 of the following regulations.

Part 304—Forms, Instructions, and Reports

Legal basis: 12 U.S.C. 1819.

Description and need: Part 304 identifies the forms and reports used for submitting information to the FDIC, describes the circumstances under which a particular form or report should be used, identifies sources for obtaining preprinted forms, and prescribes the required contents of a report for which there is no preprinted form. The forms and reports serve various supervisory functions. The particular need for information collected by means of each of FDIC's forms and reports has been cleared by the Office of Management and Budget in accordance with requirements of the Paperwork Reduction Act of 1980.

Part 307—Termination of Insured Status

Legal basis: 12 U.S.C. 1818(a), 1818(o), 1818(q), 1819.

Description and need: Part 307 requires an FDIC insured bank to provide its depositors with specific information when its insured status is terminated other than by action of the FDIC. The requirements address situations where deposits are assumed by another institution insured by the FDIC or the Federal Savings and Loan Insurance Corporation, or where Federal insurance will not continue. The regulation ensures that individual depositors are given timely and adequate notification of changed circumstances that may materially affect the safety of their funds.

Part 308—Rules of Practice and Procedures

Legal basis: 12 U.S.C. 1819; 15 U.S.C. 78w; 12 U.S.C. 1972; 5 U.S.C. 504.

Description and need: Part 308 contains the procedural rules applicable to administrative enforcement proceedings conducted by the FDIC. The regulation is subdivided into thirteen subparts, two of which set out generally applicable rules and the remainder of which address specific types of proceedings. For example, subpart H recites the procedures applicable to the assessment and collection of civil penalties for the violation of cease-and-desist orders or certain Federal statutes. The regulation establishes procedures necessary for the fair disposition of the FDIC's administrative enforcement responsibilities and provides parties with due process guaranties.

Part 333—Extension of Corporate Powers

Legal basis: 12 U.S.C. 1816, 1819.

Description and need: Part 333 applies to insured State nonmember banks and consists of two brief sections plus two interpretations. The regulation classifies banks into five categories and prohibits a bank from changing the nature of its business from one classification to another without the FDIC's prior consent. The five classifications are: Commercial banks, banks and trust companies, savings banks (including mutual and stock), industrial banks, and cash depositories. The regulation serves to clarify the meaning of general language appearing in section 6 of the Federal Deposit Insurance Act (12 U.S.C. 1816).

Part 336—Employee Responsibilities and Conduct

Legal basis: Executive Order No. 11222, 3 CFR 1964–1965 Comp., p. 306; 5 CFR 735.104.

Description and need: This regulation prescribes acts of misconduct and conflicts of interest by FDIC employees and provides for surveillance over potential conflicts of interest by requiring certain employees to periodically submit statements of employment and financial interest to the FDIC Ethics Counselor. The regulation's high standards of honesty, intergrity, impartially, and conduct by FDIC employees are essential to maintaining the proper performance of the FDIC's regulatory and supervisory responsibilities and maintaining the public's confidence in its public employees.

Part 337—Unsafe and Unsound Banking Practices

Legal basis: 12 U.S.C. 1819, 1828(j)(2); sec. 442, 96 Stat. 1469, Pub. L. No. 97–320.

Description and need: The provisions of this part define the term "standby letter of credit" and fix limitations on the use by insured State nonmember banks of letters of credit. Additionally, the regulation generally makes insured State nonmember banks subject to the Federal Reserve Board's Regulation O which limits extensions of credit by a bank to its officers, directors and principal shareholders. The regulation is needed as a deterrent against banks engaging in practices that are likely to have adverse effects on their safety and soundness or that are likely to result in violations of law or regulations.

Part 339—Loans in Areas Having Special Flood Hazards

Legal basis: 42 U.S.C. 4012a(b), 4104a, 4106(b).

Description and need: Part 339 requires that improved real estate or a mobile home located in an area for which flood insurance is available under the National Flood Insurance Act of 1968 must be covered by flood insurance before an insured State nonmember bank may extend credit secured by such property. The regulation also specifies related recordkeeping and notice requirements. The regulation implements provisions of the Housing and Community Development Act of 1974 and the Flood Disaster Protection Act of 1973.

Part 344—Recordkeeping and Confirmation Requirements for Securities Transactions

Legal basis: 12 U.S.C. 1817, 1818, 1819.

Description and need: Part 344 requires insured State nonmember banks effecting securities transactions for customers to maintain chronological and account records of transactions and underlying order tickets reflecting specified information, provide customers with timely specified information, and establish written policies and procedures applicable to the securities activities performed for customers. The regulation serves to assure that customers are provided with adequate information about their securities transactions effected by the bank and that banks are maintaining adequate business records.

By Order of the Board of Directors, February 28, 1983.

Federal Deposit Insurance Corporation.

Hoyle L. Robinson,

Executive Secretary.

21 CFR Part 1030

[Docket No. 75N-0007]

Microwave Diathermy Products; Withdrawal of Proposal

AGENCY: Food and Drug Administration.

ACTION: Proposed rules; withdrawal for reconsideration.

SUMMARY: The Food and Drug Administration (FDA) is withdrawing for reconsideration an advance notice of proposed rulemaking and a proposed performance standard for microwave diathermy products. This action is part of the agency's reconsideration of proposed and existing regulations in light of the purposes of Executive Order 12291 entitled "Federal Regulation."

FOR FURTHER INFORMATION CONTACT: Melvyn R. Altman, National Center for Devices and Radiological Health (HFX-460), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-3426.

SUPPLEMENTARY INFORMATION: In the Federal Register of June 3, 1975 (40 FR 23877), FDA published an advance notice of its intent to propose a performance standard for microwave diathermy equipment under the Radiation Control for Health and Safety Act of 1968 (Pub. L. 90-602 (42 U.S.C.

263b et seq.)). In the Federal Register of July 29, 1980 (45 FR 50359), FDA published the proposed standard. The proposed performance standard was to apply only to microwave diathermy devices intended for use in physical medicine and manufactured after the effective date of the standard.

Comments received on the advance notice of proposed rulemaking expressed concern that the proposed standard would not cover existing microwave diathermy devices and shortwave diathermy devices. the agency agrees that the approximately 15,000 microwave diathermy units already in use also deserve attention. However, under the Radiation Control for Health and Safety Act of 1968, performance standards may not apply to equipment existing before the effective date of the standard. Little, if any, new microwave diathermy equipment for use in physical medicine is now being marketed. FDA also agrees that shortwave diathermy devices merit serious consideration, but further investigations are needed before the agency can decide how best to regulate these devices.

In 1980, FDA began a program to reconsider and to withdraw outstanding proposed rules that had become obsolete because of the development of the new technology, the passage of time, changes in agency priorities and policies, comments received, availability of regulatory alternatives that achieve the same consumer protection goals, or other reasons.

Furthermore, Executive Order 12291 requires Federal agencies, to the extent permitted by law, to undertake regulatory actions only when potential benefits to society outweigh potential costs to society. In addition, in both the Regulatory Flexibility Act (Pub. L. 96–354) and the Paperwork Reduction Act of 1980 (Pub. L. 96–511), Congress intended that Federal agencies reduce unwarranted regulatory burdens.

As a result of the agency's reevaluation of pending proposed rules and in light of the purposes of the Presidential and statutory directives described above, FDA is withdrawing for reconsideration the proposed performance standard. Withdrawal of the proposal does not mean that FDA has lost interest in the subject. FDA may reinstitute rulemaking if, after reconsideration, it decides that publishing a proposed rule, guideline, or recommendation on microwave diathermy products is necessary.

Even without establishing a performance standard for microwave diathermy and shortwave diathermy devices, FDA has authority under both the Radiation Control for Health and Safety Act of 1968 and the Federal Food, Drug, and Cosmetic Act to take regulatory action against microwave diathermy or shortwave diathermy devices that present a risk to health. Therefore, FDA has decided not to establish a mandatory performance standard at this time.

The agency will continue to gather data on both microwave diathermy and shortwave diathermy devices. The essential features of the withdrawn standard will be included in a technical report whose availability will be announced in the Federal Register. This technical report could form the basis of voluntary standards efforts. The agency also will continue to work with professional organizations to encourage voluntary efforts to assure the safe performance of microwave diathermy and shortwave diathermy devices.

In the Federal Register of August 28, 1979 (44 FR 50511, 44 FR 50512, 44 FR 50514, and 44 FR 50531), FDA proposed to classify, as physical medicine devices, four generic types of diathermy devices. The withdrawal by FDA of the proposed performance standard for microwave diathermy products has no effect on FDA's classification of these four devices.

The agency welcomes public participation in the development of its education program concerning the above matter. Individuals or organizations who wish to receive technical reports or further details on program development or to review draft copies of educational materials may have their names placed on the mailing list by writing to the National Center for Devices and Radiological Health, Division of Electronic Products (HFX–200), 5600 Fishers Lane, Rockville, MD 20857.

This notice is issued under the Public Health Service Act, as amended by the Radiation Control for Health and Safety Act of 1968 (secs. 356, 358, 82 Stat. 1174–1179 (42 U.S.C. 263d, 263f)) and the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 302 et seq., as amended) and under 21 CFR 5.11 as revised (see 47 FR 16010; April 14, 1982).

The administrative record in this proceeding, including copies of any comments received and related correspondence, is on public display in the Dockets Management Branch (HFA–305), Food and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857, under the docket number found in the heading of this document and may be seen in that office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: March 1, 1983.

Arthur Hull Hayes, Jr.,

Commissioner of Food and Drugs.

Thomas R. Donnelly, Jr.,

Acting Secretary of Health and Human Services.

[FR Doc. 83–6666 Filed 3–10–83; 8:45 am]

BILLING CODE 4160–01–M

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Part 1

[EE–133–80]

Refund of Mistaken Contributions

February 25, 1983.

AGENCY: Internal Revenue Service, Treasury.

ACTION: Notice of proposed rulemaking.

SUMMARY: This document contains proposed regulations relating, in the case of multiemployer plans, to the return of employer contributions or withdrawal liability overpayments determined to have been made due to a mistake of fact or law. Changes to the applicable laws were made by the Multiemployer Pension Plan Amendments Act of 1980. The regulations would provide the public with the guidance needed to comply with that act and affect employers contributing to multiemployer plans.

DATES: Written comments and requests for a public hearing must be delivered or mailed by May 10, 1983. The amendments are to be generally effective on January 1, 1975.

ADDRESS: Send comments and requests for a public hearing to: Commissioner of Internal Revenue, attention: CC:LR:T (EE–133–80), Washington, D.C. 20224.

FOR FURTHER INFORMATION CONTACT: Michael A. Thrasher of the Employee Plans and Exempt Organizations Division, Office of Chief, Counsel, Internal Revenue Service, 1111 Constitution Avenue, NW., Washington, D.C. 20224 (attention: CC:LR:T) (202–566–6212) (not a toll-free number).

SUPPLEMENTARY INFORMATION:

Background

This document contains proposed amendments to the Income Tax Regulations (26 CFR Part 1) under section 401(a)(2) of the Internal Revenue Code of 1954. These amendments are to be issued under the authority contained in section 7805 of the Internal Revenue Code of 1954 (68A Stat. 917; 26 U.S.C. 7805).

Under prior law, employer contributions to pension plans were generally not refundable. However, a contribution made due to a mistake of fact was permitted to be returned if returned within one year after the date of the contribution.

The Multiemployer Pension Plan Amendments Act of 1980 amended section 401(a) of the Internal Revenue Code to reflect the belief that the requirement of a mistake of fact for the return of an employer contribution was too narrow in the multiemployer context. Thus, under conditions set out in these regulations, a contribution made due to a mistake of fact or law may be returned within six months of the date that the plan administrator determines that it was made in error.

The regulations also reflect the amendment of section 401(a)(2) by the Act to permit the return of any withdrawal liability payment determined to be an overpayment made due to a mistake of fact or law within six months of that determination.

The amendments are retroactive to January 1, 1975. For multiemployer plans maintained before the date of enactment, the date on which the plan administrator determines that the contribution or overpayment resulted from a mistake of fact or law is deemed to be the date of enactment of the statute, September 26, 1980.

Nonapplication of Executive Order 12291

The Treasury Department has determined that this regulation is not subject to review under Executive Order 12291 or the Treasury and Office of Management and Budget implementation of the Order dated April 28, 1982.

Regulatory Flexibility Act

Although this document is a notice of proposed rulemaking which solicits public comment, the Internal Revenue Service has concluded that the regulations proposed herein are interpretative and that the notice and public procedure requirements of 5 U.S.C. 553 do not apply. Accordingly, these proposed regulations do not constitute regulations subject to the Regulatory Flexibility Act (5 U.S.C. Chapter 6).

Drafting Information

The principal author of this proposed regulation is Michael A. Thrasher of the Employee Plans and Exempt Organizations Division of the Office of Chief Counsel, Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service and Treasury Department participated in developing the regulations both on matters of substance and style.

List of Subjects in 26 CFR 1.401-0-1.425-1

Income taxes, Employee benefit plan, Pension, Multiemployer pension plans.

Proposed Amendments to the Regulations

The proposed amendments to 26 CFR Part 1 are as follows:

PART 1—[AMENDED]

Paragraph 1. The following new section is added immediately after § 1.401 (a)-2:

§ 1.401(a)-3 Refund of mistaken employer contributions and withdrawal liability payments.

(a) *Introduction*—(1) *In general.* Section 401(a)(2) provides that a contribution or payment of withdrawal liability made to a multiemployer plan due to a mistake of fact or mistake of law can be returned to the employer under certain conditions. This section specifies the conditions under which an employer's contribution or payment may be returned.

(2) *Effective date.* This section generally is applicable to multiemployer plans for taxable years beginning after December 31, 1974. For years prior to the date of enactment of the Multiemployer Pension Plan Amendments Act of 1980, the date on which the plan administrator determines that the contribution or payment resulted from a mistake of fact or mistake of law is deemed to be the date of enactment of that statute, September 26, 1980.

(b) *Conditions for return of contributions*—(1) *In general.* In the case of a contribution or a withdrawal liability payment to a multiemployer plan which was made because of a mistake of fact or mistake of law, the contribution or payment may be returned without penalty within six months after the date the plan administrator determines that the contribution or payment was the result of a mistake of fact or law. It is sufficient for purposes of this section that the employer establish a right to a refund of the amount mistakenly contributed or paid by filing a claim with the plan administrator within six months from the date in which the plan administrator determines that a mistake did occur. For purposes of this section, "plan administrator" is defined in section 414(g) and the regulations thereunder.

(2) *Applicable conditions*—In general. The employer making the contribution or withdrawal liability payment must demonstrate that an excessive contribution or overpayment, subsequent to January 1, 1975, has been made due to a mistake of fact or law. A mistake of law relating to plan qualification under section 401 or to trust exemption under section 501 is not considered to be a mistake of law which entitles an employer to a refund under this section. These rules are applicable only to multiemployer plans. For purposes of this section, a multiemployer plan is defined in section 414(f) and the regulations thereunder.

(ii) *Amount to be returned.* The amount to be returned to the employer is the excess of the amount contributed or paid over the amount that would have been contributed or paid had no mistake occurred. This amount is the "excess contribution" or "overpayment."

(A) Any earnings attributable to the excess contribution or overpayment as a return on investment to the trust may not be returned to the employer. Losses attributable to the excess contribution or overpayment must reduce the amount to be returned.

(B) In no event may a participant's account be reduced to an amount less than that amount which would properly have been in that participant's account had no mistaken occurred. The excess contribution or overpayment returned to the employer may not exceed this overall limitation.

(iii) *Amount refunded includible in employer's income.* Generally the amount of the excess contribution or overpayment must be included in gross income by the employer in the taxable year in which it is returned if the excess contribution or overpayment resulted in a tax benefit in a prior year.

(iv) *Application of section 412.* The amount of the excess contribution of overpayment for which the funding standard account was credited under section 412 creates an offsetting charge to the funding standard account in the year in which the excess contribution or overpayment is returned.

(3) *Examples.* The provisions of this section are illustrated by the following examples:

Example (1) Contributions are made to a pension trust fund maintained by several employers pursuant to various collective bargaining agreements. Under the terms of the trust and the collective bargaining agreements, self-employed individuals and people holding partnership interests of ten percent or more are not eligible to receive benefits from the fund and employer contributions are not required on their behalf. Over several years, contributions have been made to the fund on behalf of members of those groups under a mistaken belief that

such contributions were required by the agreement. These contributions were based on a mistake of law as to the proper interpretation of the eligibility standards of the trust documents and terms of the collective bargaining agreement. The employers who made the mistaken contributions may obtain a refund of the excess contributions.

Example (2). The facts are the same as in Example (1), except that a computational error was made in the calculation of the amount of an employer's contribution to the plan. Because this arithmetical error is a mistake of fact, the employer may receive a refund of the excess contribution.

Example (3). The fact are similar to those in Example (1), except that the plan is not qualified under section 401(a). Contributions to the plan were made by an employer based on its assumption that the plan was qualified under section 401(a). This is not considered as a mistake of fact or law for purposes of this section and this section does not permit the employer to receive a refund of the contributions.

Roscoe L. Egger, Jr.,

Commissioner of Internal Revenue.

26 CFR Part 1

[LR-252-81]

Deductibility of Employee Awards; Public Hearing on Proposed Regulations

AGENCY: Internal Revenue Service, Treasury.

ACTION: Notice of public hearing on proposed regulations.

SUMMARY: This document provides notice of a public hearing on proposed regulations that provide rules governing the deductibility by employers of expenses for awards to employees.

DATES: The public hearing will be held on May 3, 1983, beginning at 10:00 a.m. Outlines of oral comments must be delivered or mailed by April 18, 1983.

ADDRESS: The public hearing will be held in the IRS Auditorium, Seventh Floor, 7400 Corridor, Internal Revenue Building, 1111 Constitution Avenue, NW., Washington, D.C. The requests to speak and outlines of oral comments should be submitted to the Commissioner of Internal Revenue, Attn: CC:LR:T (LR-252-81), Washington, D.C. 20224.

FOR FURTHER INFORMATION CONTACT: Charles Hayden of the Legislation and Regulations Division, Office of Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue, NW., Washington, D.C. 20224, 202-566-3935, not a toll-free call.

SUPPLEMENTARY INFORMATION: The subject of the public hearing is proposed regulations under section 274(b) of the Internal Revenue Code of 1954. The proposed regulations appeared in the Federal Register for Thursday, December 16, 1982 (47 FR 56307).

The rules of § 601.601(a)(3) of the "Statement of Procedural Rules" (26 CFR Part 601) shall apply with respect to the public hearing. Persons who have submitted written comments within the time prescribed in the notice of proposed rulemaking and also desire to present oral comments at the hearing on the proposed regulations should submit not later than April 18, 1983, an outline of the oral comments to be presented at the hearing and the time they wish to devote to each subject.

Each speaker will be limited to 10 minutes for an oral presentation exclusive of time consumed by questions from the panel for the government and answers to these questions.

Because of controlled access restrictions, attendees cannot be admitted beyond the lobby of the Internal Revenue Building until 9:45 a.m.

An agenda showing the scheduling of the speakers will be made after outlines are received from the speakers. Copies of the agenda will be available free of charge at the hearing.

By direction of the Commissioner of Internal Revenue.

George H. Jelly,

Director, Legislation and Regulations Division.

Oil From a Stripper Well Property; Public Hearing on Proposed Regulations

AGENCY: Internal Revenue Service, Treasury.

ACTION: Notice of public hearing on proposed regulations.

SUMMARY: This document provides notice of a public hearing on proposed regulations dealing with the definition of oil from a stripper well property for purposes of tier 2 and for the exemption from the windfall profit tax for exempt stripper well oil.

DATES: The public hearing will be held on April 27, 1983, beginning at 10:00 a.m. Outlines of oral comments must be delivered or mailed by April 13, 1983.

ADDRESS: The public hearing will be held in the I.R.S. Auditorium, Seventh Floor, 7400 Corridor, Internal Revenue Building, 1111 Constitution Avenue, NW., Washington, D.C. The requests to speak and outlines of oral comments should be submitted to the Commissioner of Internal Revenue, Attn: CC:LR:T (LR-217-81), Washington, D.C. 20224.

FOR FURTHER INFORMATION CONTACT: Charles Hayden of the Legislation and Regulations Division, Office of Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue, NW., Washington, D.C. 20224, 202-566-3935, not a toll-free call.

SUPPLEMENTARY INFORMATION: The subject of the public hearing is proposed regulations under section 4991 and 4994(g) of the Internal Revenue Code of 1954. The proposed regulations appeared in the Federal Register for Thursday, January 20, 1983 (48 FR 2562).

The rules of § 601.601(a)(3) of the "Statement of Procedural Rules" (26 CFR Part 601) shall apply with respect to the public hearing. Persons who have submitted written comments within the time prescribed in the notice of proposed rulemaking and also desire to present oral comments at the hearing on the proposed regulations should submit not later than April 13, 1983, an outline of the oral comments to be presented at the hearing and the time they wish to devote to each subject.

Each speaker will be limited to 10 minutes for an oral presentation exclusive of time consumed by questions from the panel for the government and answers to these questions.

Because of controlled access restrictions, attendees cannot be admitted beyong the lobby of the Internal Revenue Building until 9:45 a.m.

An agenda showing the scheduling of the speakers will be made after outlines are received from the speakers. Copies of the agenda will be available free of charge at the hearing.

By direction of the Commissioner of Internal Revenue:

George H. Jelly,

Director, Legislation and Regulations Division.

BILLING CODE 4830-01-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control

42 CFR Parts 85 and 85a

Use of Personal Sampling Devices During NIOSH Investigations

AGENCY: National Institute for Occupational Safety and Health, Centers for Disease Control, HHS. (NIOSH), Centers for Disease Control, Public Health Service, HHS.

ACTION: Notice of proposed rulemaking.

SUMMARY: NIOSH proposes to amend its regulations covering health hazard evaluations (42 CFR Part 85) and research investigations (42 CFR Part 85a) of the workplace to expressly provide for the use of personal sampling devices as an investigative technique. This action is necessary to give notice that employees may be requested to wear personal sampling devices as part of the environmental sampling procedures used by NIOSH during its investigations.

DATE: Comments must be submitted on or before April 11, 1983.

ADDRESS: Comments should be submitted to: Mr. Larry W. Sparks, Executive Officer, NIOSH, Bldg. 1, Room 3106, Centers for Disease Control, 1600 Clifton Rd. N.E., Atlanta, GA 30333.

FOR FURTHER INFORMATION CONTACT: Larry W. Sparks, (404) 329–3061 or FTS 236–3061.

SUPPLEMENTARY INFORMATION: The Occupational Safety and Health Act (29 U.S.C. 651 et seq.) and the Federal Mine Safety and Health Act (30 U.S.C. et seq.) direct the Secretary of Health and Human Services to conduct occupational health and safety research. To implement these functions, the Secretary promulgated Parts 85 and 85a of Title 42, Code of Federal Regulations, to establish the procedures for NIOSH's conduct of occupational health and safety research investigations at places of employment. Part 85 governs the evaluation of workplace conditions requested by employers or authorized representatives of employees, while Part 85a concerns the conduct of investigations under NIOSH-initiated research projects.

Included among these procedures is a recital of the various investigative activities NIOSH is authorized to perform. Thus, § 85.7(c) and § 85a.5(d) provide that NIOSH is authorized to, among other things, collect environmental samples and samples of substances, to measure environmental conditions and employee exposures, and to employ other reasonable investigative techniques. Since the promulgation of these regulations, NIOSH has interpreted its regulations as authorizing the use of personal sampling devices to measure individual employee exposures to substances and physical agents. The most common personal sampling devices are those that use sampling pumps to draw air through liquid or solid sorbents, filters, etc., and those in which a reaction takes place directly on the sorbent. The latter devices are known as passive chemical monitors. The other common personal sampling device, the noise dosimeter, is used for measuring cumulative employee noise exposures over a given period of time. The sampling medium or dosimeter is attached to the worker's clothing as near as possbile to the worker's breathing or hearing zone. The remainder of the sampling device (if required), such as a sampling pump or recording unit, is connected by flexible hose or wire to the sampling medium or dosimeter and also is attached to the worker in a place that interferes the least with work requirements (e.g., on the employee's belt). NIOSH uses personal samplers because they are the most accurate way to monitor a worker's exposures during the normal work routine and workday.

NIOSH use of personal sampling devices to measure individual employee exposure has been judicially upheld. In *Establishment Inspection of Keokuk Steel Castings, Division of Kasty Metals*, 638 F. 2d 42 (8th Cir. 1981), the Court upheld enforcement of the warrant issued to NIOSH which included the use of personal samplers by workers willing to wear them. In so holding, the Eighth Circuit expressly disagreed with the Ninth Circuit decision in *Plum Creek Lumber Co., v. Hutton*, 608 F. 2d 1289 (9th Cir. 1979) which involved an Occupational Safety and Health Administration (OSHA) compliance inspection. In *Plum Creek*, the Court held that it was without authority to order an employer to permit its employees to wear personal sampling devices contrary to the employer's written policy in absence of a regulation or law specifying the use of such devices.

In *Establishment Inspection of Metro-East Manufacturing Co.*, 655 F. 2d 805 (7th Cir. 1981), the only other Circuit Court decision on this issue, a divided panel held that the OSHA regulations did not give employers fair warning of what is required or prohibited because they failed to specify the use of personal samplers as a reasonable investigative technique. The Court suggested that the OSHA regulations be amended to give employers this fair warning. Since the NIOSH inspection regulations are similar to those of OSHA, NIOSH announces its intention to amend Parts 85 and 85a to expressly authorize the use of personal sampling devices in the conduct of NIOSH research investigations. Although there are some employers who have contended that personal samplers pose a safety hazard, many other employers are now routinely using these devices in conducting their own industrial hygiene operations. The public record from a similar OSHA rulemaking appears to corroborrate NIOSH's experience that personal samplers do not cause any undue hazards to workers.

This rule is primarily a clarification of procedures currently in use. Experience indicates that these devices are compact, take minimal time to attach to the employee, and neither hinder nor obstruct employee job performance. Thus, there are not substantive adverse effects on productivity due to the use of personal samplers. NIOSH is unaware of any injuries or accidents caused by the use of these devices. Personal samplers used during an investigation are provided by NIOSH at no cost to the employer. For these reasons, the Secretary has determined that this rule is not a "major rule" under Executive Order 12291. Further, because these regulations do not have a significant economic impact on a substantial number of small entities, a regulatory flexibility analysis under the Regulatory Flexibility Act of 1980 is not required.

The recordkeeping and reporting requirements contained in 42 CFR Parts 85 and 85a have been reviewed and approved by the Office of Management and Budget (OMB Approval Nos. 0920–0102 and 0920–0037, respectively). These programs are not subject to OMB Circular A–95 (revised) nor Health Systems Agency review.

List of Subjects

42 CFR Part 85

Investigations, Mine safety and health, Occupational safety and health, Poison prevention.

42 CFR Part 85a

Investigations, Mine safety and health, Occupational safety and health.

For the reasons stated in the preamble, Parts 85 and 85a of Title 42, Code of Federal Regulations, are amended as set forth below.

Dated November 4, 1982.

Approved: Feburary 18, 1983.

Edward N. Brandt, Jr.,

Assistant Secretary for Health.

Thomas R. Donnelly, Jr.,

Acting Secretary.

PART 85—REQUESTS FOR HEALTH HAZARD EVALUATIONS

1. In § 85.7, paragraph (c) is revised to read as follows:

§ 85.7 Conduct of investigations.

* * * * *

(c) NIOSH officers are authorized to collect environmental samples and samples of substances or measurements of physical agents (including measurement of employee exposure by the attachment of personal sampling devices to employees), to take or obtain photographs related to the purpose of the investigation, employ other reasonable investigative techniques, including medical examinations of employees with the consent of such employees, and to question privately any employer, owner, operator, agent or employee. The employer shall have the opportunity to review photographs taken or obtained for the purpose of identifying those which contain or might reveal a trade secret.

* * * * *

PART 85a—OCCUPATIONAL SAFETY AND HEALTH INVESTIGATIONS OF PLACES OF EMPLOYMENT

1. In § 85a.5, paragraph (d)(1) is revised to read as follows:

§ 85a.5 Conduct of investigations of places of employment.

* * * * *

(d)(1) NIOSH authorized representatives are authorized: To collect environmental samples and samples of substances; to measure environmental conditions and employee exposures (including measurement of employee exposure by the attachment of personal sampling devices to employees); to take or obtain photographs, motion pictures or video tapes related to the purpose of the investigation; to employ other reasonable investigative techniques, including medical examinations, anthropometric measurements and standardized and experimental functional tests of employees with the informed consent of such employees; to review, abstract, and duplicate such personnel records as are pertinent to mortality, morbidity, injury, safety, and other similar studies; and to question and interview privately any employer, owner, operator, agency, or employee from the place of employment. The employer, owner, operator, or agent shall have the opportunity to review photographs, motion pictures, and video tapes taken or obtained for the purpose of identifying those which contain or might reveal a trade secret.

BILLING CODE 4160-19-M

Health Care Financing Administration

42 CFR Parts 431, 435, 440, 441, and 447

Medicaid Program; Relation With Other Agencies and Miscellaneous Medicaid Definitions

AGENCY: Health Care Financing Administration (HCFA), HHS.

ACTION: Proposed rule.

SUMMARY: We proposed to amend the Medicaid regulations to allow States the option of paying cost sharing amounts for Medicaid beneficiaries who are covered under Medicare Part B "Buy-in" agreements. We also propose to revise several definitions and clarify ambiguities in existing Medicaid regulations. The proposed definition changes are related to private duty nursing services, inpatient psychiatric services, inpatient and outpatient and outpatient. All changes are a part of the Department's regulatory reform effort which targets for revision those regulations that are ambiguous or that have been identified as problematic.

DATE: To assure consideration, comments should be received by May 10, 1983.

ADDRESSES: Address comments in writing to: Administrator, Health Care Financing Administration, Department of Health and Human Services, P.O. Box 17076, Baltimore, Maryland 21235, ATTN: BPP-513-P.

In commenting, please refer to file code BPP-513-P.

If you prefer, you may deliver your comments to Room 309-G Hubert H. Humphrey Building, 200 Independence Ave., S.W., Washington, D.C., or to Room 132, East High Rise Building, 6325 Security Boulevard, Baltimore, Maryland 21207.

Comments will be available for public inspections as they are received, beginning approximately three weeks after publication, in Room 309-G of the Department's offices at 200 Independence Ave., S.W., Washington, D.C. 20201, on Monday through Friday of each week from 8:30 a.m. to 5:00 p.m. (202- 245-7890).

Thomas Hoyer, Miscellaneous Medicaid Definitions, (301) 594-9446.

SUPPLEMENTARY INFORMATION:

Background

A. General

In the spring of 1981, HCFA established a Task Force on Regulatory Reform as part of its efforts to reduce the burden of existing regulations. The Task Force reviews and analyzes existing regulations and makes specific recommendations to delete or revise provisions that are ambiguous or that imposes excessive and unnecessary burdens on the public or that are not cost effective. With one exception, the revisions proposed in this document were recommended by the Task Force to resolve problems with and clarify various Medicaid regulations in 42 CFR Chapter IV. The exception, a clarification of 42 CFR 447.40 regarding reserved beds, is discussed in paragraph II.F.

B. Relations with Other Agencies—Buy-In

Medicaid program (Title XIX of the Social Security Act) provides medical assistance to certain categories of individuals with low income. The program is jointly funded by the State and Federal government but is administered by the State. Section 1843(a) of the Act specifically permits State agencies to enter into "buy-in" agreements with the Secretary under which the State agency enrolls in Medicare Part B (Supplementary Medical Insurance) Those Medicaid beneficiaries who are also eligible for Medicare. Medicare Part B, generally, covers certain physicians' and medical services and supplies, home health care services, outpatient hospital services and therapy, and other health services not requiring stays in institutions such as hospitals or skilled nursing facilities. State agencies which "buy-in" to Medicare Part B on behalf of those persons who are eligible for both programs enroll their Medicaid clientele and agree to pay the Part B premium on their behalf. In addition, States may elect to pay the Medicare Part B premiums for eligible Medicaid recipients even in the absence of a "buy-in" agreement. (See sections 1840(a) and 1902(a)(10)—clause (II) following (D) of the Act.)

The primary intent of the "buy-in" program has been to make Medicare Part B services available to individuals who are eligible but financially unable

to pay the monthly Part B premium amounts. States may claim Federal matching through the Medicaid program for Part B premiums paid on behalf of Medicaid beneficiaries who also receive cash assistance.

Since 1971, HHS policy has been to require State agencies that have a "buy-in" agreement to pay, in addition to the Part B premium, the Part B coinsurance and deductible amount for services provided to beneficiaries under Part B, even if the services are not routinely provided under the Medicaid State plan. The only Medicare Part B services not generally covered under Medicaid are the following: speech and physical therapy services, podiatric services, chiropractic services, and rental of certain medical equipment. In effect, if a State agency enters into a "buy-in" agreement, all the benefits under Part B have become part of the State plan for beneficiaries covered under the agreement.

Several States have objected to this policy of reimbursing for what they consider to be noncovered services under their State plans because they believe to do so is not efficient and cost-effective. In addition, in the case of Fob James v. Harris 499 F. Supp. 594 (U.S.D.C.M.D. Alabama, 1980), the court held that our policy was not supported by the statute. We have reviewed our policy in light of these factors and decided that since there is not express statutory basis for our requirements, States should be given flexibility in the area of program administration. Therefore, we are proposing to revise our "buy-in" policy so that States may choose whether to pay the Part B deductible and coinsurance amounts on the full range of Part B services

II. Provisions of the Regulations

A. Relations With Other Agencies—Buy-In

We are proposing to revise 42 CFR 431.625 so that States may choose whether to pay the Part B deductible and coinsurance amounts on the full range of Part B services.

Specifically, we are adding a provision, redesignated § 431.625(c) that states that a State payment of Part B premiums on behalf of a Medicaid recipient does not obligate it to pay on the recipient's behalf of the Part B deductible and coinsurance amounts on the full range of Part B services not covered in the Medicaid State plan.

In addition, we propose to make technical changes to update cross references and other information. For example, current regulations at § 431.625(a) state that, if the State desired to do so, it must have entered into a "buy-in" agreement before January 1, 1970. Section 945 of the Omnibus Reconciliation Act of 1980 (Pub. L. 96-499) provided an additional one-year period, January 1 through December 31, 1981, during which any State which had not already done so could request to enter into or modify its "buy-in" agreement with the Secretary. Therefore, we propose to amend the regulations to reflect this additional period. We are changing the statutory citation in § 431.625(a)(2) from "Section 1902(a)(10)(C)(ii)(II)" to "Section 1902(a)(10) (in clause (II) following subparagraph (D)" in order to correctly reference the law as amended, most recently by the Tax Equity and Fiscal Responsibility Act of 1982 (Pub. L. 97-248).

B. Definitions

1. Private Duty Nursing Services. The current definition in Medicaid regulations of private duty nursing services (42 CFR 440.80) states that these services are provided to a recipient in three settings: the recipient's home, a hospital, or a skilled nursing facility. The current regulations have been interpreted to mean that a State providing private duty nursing services must provide those services in all three settings. Since that was not our intent, we propose to amend the definition to clarify that States have flexibility and may limit the provision of these services to any one or more of the three cited locations.

2. Inpatient Psychiatric Services. Two provisions in the regulations contained in Part 440 and Part 441 concerning inpatient psychiatric services for individuals under age 21 are inconsistent. Section 440.160 defines inpatient psychiatric services for individuals under age 21 as those that are provided "in a facility or program" accredited by the Joint Commission on Accreditation of Hospitals (JCAH). In contrast, regulations at § 441.151 specify that the psychiatric services be provided "by a psychiatric facility or an inpatient program in a psychiatric facility * * *" accredited by the JCAH. This unintentional inconsistency between provisions has created confusion regarding whether services in non-psychiatric facilities are included within the scope of the inpatient psychiatric services benefit. We believe the language in § 441.151 is more consistent with statutory language (section 1905(h)(1)(A) of the Act) that specifies that these services include only those provided "in an institution which is accredited as a psychiatric hospital * * *" We, therefore, are proposing to make the language in the two sections consistent and to clarify that inpatient psychiatric services for recipients under age 21 must be provided in a psychiatric facility. We note that Federal financial participation (FFP) for inpatient psychiatric services is available to individuals of all ages when these services are provided as inpatient services in an acute general hospital.

We are also proposing to clarify language in § 441.151(c) regarding continuing eligibility for inpatient psychiatric services for individuals attaining age 21. The statutory provision (section 1905(h)(1)(C) of the Act) permits an individual who was receiving inpatient psychiatric services "in the period immediately preceding the date on which he attained 21" to continue to receive them until he reaches age 22 if he requires the services. We propose to revise the language in the regulations to clarify that receipt of services "immediately preceding the date on which he attained age 21" means that the recipient was receiving the services on the day before the date he or she reached age 21.

3. Inpatient Hospital Services. Current Medicaid regulations at 42 CFR 440.10 defining "inpatient hospital services" specify among other requirements that the services be furnished "in an institution that * * * (b) Is licensed or formally approved as a hospital * * *; (c) Meets the requirements for participation in Medicare * * *" We are concerned that taken together, these requirements could be misinterpreted as making FFP available for "inpatient hospital services" in a skilled nursing facility. This misinterpretation is possible because there are facilities or distinct parts of facilities that are licensed or formally approved as a hospital, but meet the requirements for participation in Medicare as a skilled nursing facility. We, therefore, propose to add the phrase "as a hospital" following "* * * Meets the requirements for participation in Medicare * * *" in order to clarify the intent of the regulations.

4. Outpatient Hospital Services. Similarly, the current Medicaid regulations at 42 CFR 440.20 defining "outpatient hospital services" also specify that the services be provided "* * * by an institution that * * * (1) Is licensed or formally approved as a hospital * * * and (2) Meets the requirements for participation in Medicare." Our concern, as in the definition of "inpatient hospital services," is that the requirements might be misinterpreted as providing FFP for "outpatient hospital services" provided

by a skilled nursing facility. Again, in order to clarify the intent of the regulation, we propose to add the phrase "as a hospital" following "* * * Meets the requirements for participation in Medicare."

We are also proposing to amend this section to enable States at their discretion to limit the scope of the outpatient hospital services benefit to exclude those outpatient services not generally furnished by most hospitals in the State. States have expressed the concern that services that are otherwise optional under the State plan become mandatory services when provided in the outpatient hospital setting, because outpatient services are *mandatory*. This result conflicts with a State's prerogative to choose which optional services will be covered under the State's program. Although States would still be required to cover the other mandatory services (such as physicians services) and some optional services when they are provided in the outpatient hospital setting, the States would have greater flexibility under the proposed amendment to exclude any optional services that are not generally furnished by most hospitals in the State. The definition of "services that are generally furnished" would be left to the State and could conceivably be limited by a time frame (e.g., services generally furnished by most hospitals in the State within the last ten years).

5. Inpatient, Outpatient. Current Medicaid definitions defining "inpatient" (42 CFR 435.1009) and "outpatient" (42 CFR 440.2(a)) are unclear regarding the patient's status when admitted to a medical institution for less than 24 hours. The current definition of "inpatient" refers to a patient receiving room, board and professional services "* * * on a continuous 24-hour-a-day basis."

The definition of outpatient refers to a patient who does not receive room, board and professional services "on a continuous 24-hour-a-day basis." The phrase "on a continuous 24-hour-a-day basis" is vague and could be interpreted to mean that services must be provided for at least a 24 hour period for them to be reimbursed as inpatient hospital services.

Our intent is that "inpatient" status be determined by a patient's stay of at least 24 hours or by the facility's decision to admit the patient as an inpatient with the expectation that the patient will remain for a period of at least 24 hours. Thus, if a patient is admitted to a hospital as an inpatient and remains at least 24 hours, he or she is considered an inpatient. If a patient is admitted to a hospital as an inpatient and is expected by the hospital to remain for a period of at least 24 hours, the patient would also be considered an inpatient even though it might later develop that the patient is discharged, is transferred to another facility or dies and does not actually stay for 24 hours. If a patient enters a hospital and is expected to remain less than 24 hours, and this expectation is realized, the patient would be considered an outpatient regardless of the hour of admission, whether or not the patient used a bed, or whether or not the patient remained in the hospital past midnight.

We propose to amend the current definitions of "inpatient" and "outpatient" in Medicaid regulations to clarify our intent. These proposed definitions are more consistent with the Medicare definitions of these terms (*Medicare Part A Intermediary Manual*, Section 3101.).

Additionally, we believe that the definitions should be located in both Parts 435 and 440 to facilitate use of the regulations, to eliminate any possibility of either definition being overlooked and to make the relationship between "inpatient" and "outpatient" clear. We, therefore, propose to add the definition of "outpatient" to § 435.1009 (which currently defines "inpatient") and to add the definition of "inpatient" to § 440.2 (which currently defines "outpatient" and "patient").

6. Payments for Reserving Beds in Institutions. We are proposing to clarify an ambiguity in the existing Medicaid regulations at 42 CFR 447.40. Current regulations have been erroneously interpreted to mean that FFP is available for reserving a bed in a facility only when a recipient's absence is for some purpose other than hospitalization. Therefore, we are amending this provision to clearly indicate that the intent of current regulations is to allow FFP for a reserved bed when a recipient is hospitalized, as well as in other circumstances.

III. Impact Analysis

A. Executive Order 12291

We have determined that these proposed regulations are not likely to result in an annual economic effect of $100 million or meet other threshold criteria of section 1(b) of the Order.

This regulation would not obligate States to pay on behalf of the beneficiary the Part B deductibles and coinsurance amount on the full range of Part B services. Our actuary assumes that two-thirds of the States would elect this option. They estimate that the Federal savings resulting from these States exercising this option would be approximately $5 million in FY 1984 and $6 million in FY 1985. As these estimates are significantly less than the $100 million threshold, a regulatory impact analysis is not required.

The revision to the definition of outpatient hospital services provides that the States may, at their discretion, exclude services not generally furnished as outpatient hospital services by most hospitals in the State. Data are not currently available to determine the extent to which States are now paying for these services or the extent to which they will choose to exercise this option. Therefore, our actuaries believe that it is not possible to estimate, with precision, the economic effect of this provision, although it would be less than $100 million annually.

The remaining proposed provisions are simply clarifications of existing regulations. Our actuaries estimate at most, negligible effect to result from these provisions.

B. Regulatory Flexibility Analysis

The Secretary certifies under 5 U.S.C. 605(b), enacted by Pub. L. 96-354, that these proposed regulations would not have a significant impact on a substantial number of small entities.

The provision, allowing States the option of paying cost sharing amounts for Medicaid beneficiaries covered under "buy-in" agreements, does not require a regulatory flexibility analysis because there is no impact upon small entities. As defined by the Regulatory Flexibility Act, the term "small entity" has the same meaning as the term "small governmental jurisdiction" which means "governments of cities, counties, towns, townships, villages, school districts, or special districts, with a population of less than fifty thousand". No State meets this definition, and as this provision only affects States, a regulatory flexibility analysis is not required.

The provision allowing State flexibility in the definition of outpatient hospital service may have an impact on some hospitals. Although, as noted in the Executive Order discussion, our actuaries are not able to estimate the impact with precision, we believe it would not be significant.

The remaining proposals are simply clarifications of existing regulations. We believe that these proposals would not result in a significant impact on a substantial number of small entities.

IV. Response To Comments

Because of the large number of comments we receive, we cannot acknowledge or respond to them

individually. However, in preparing the final rule, we will consider all comments and will respond to them in the preamble to that rule.

Accounting, Clinics, Contracts (Agreements), Copayments, Drugs, Grant-in-Aid program—health, Health facilities, Health professions, Hospitals, Medicaid, Nursing homes, Payments for services—general, Payments—timely claims, Reimbursement, Rural areas.

We are proposing to amend 42 CFR Chapter IV as set forth below.

PART 431—STATE ORGANIZATION AND GENERAL ADMINISTRATION

The authority citation for Part 431 reads as follows:

Authority: Sec. 1102 of the Social Security Act, (42 U.S.C. 1302), unless otherwise noted.

Subpart M—Relations With Other Agencies

Section 431.625 is amended by revising paragraph (a), redesignating paragraph (c) as paragraph (d) and by adding a new paragraph (c) to read as follows:

§ 431.625 Coordination of Medicaid with Medicare part B.

(a) *Basis and purpose.* (1) Section 1843(a) of the Act requires the Secretary to have entered into an agreement with any State that requested that agreement before January 1, 1970, or during calendar year 1981, under which the State could enroll certain Medicare-eligible recipients under Medicare part B and agree to pay their premiums.

(2) Section 1902(a)(10)(C) of the Act (in clause (II) following subparagraph (D)), allows the State to pay the premium, deductibles, cost sharing, and other charges for recipients enrolled under Medicare part B without obligating itself to provide the range of part B benefits to other recipients; and

(3) Section 1906 (a)(1) and (b) of the Act authorize FFP for State payment of Medicare part B premiums for certain recipients.

* * * * *

(c) *Effect of payment of premiums on State liability for cost sharing.* State payment of Part B premiums on behalf of a Medicaid recipient does not obligate it to pay on the recipient's behalf the Part B deductible and coinsurance amounts on the full range of Part B services not covered in the Medicaid State plan.

(d) *Federal financial participation.* (1) No FFP is available in State expenditures for Medicare part B premiums for Medicaid recipients who receive no money payments under title I, IV-A, X, XIV, XVI (AABD), or XVI (SSI) of the Act. However, FFP is available in these expenditures for—

* * * * *

PART 435—ELIGIBILITY IN THE STATES, DISTRICT OF COLUMBIA AND THE NORTHERN MARIANA ISLANDS

The authority citation for Part 435 reads as follows:

Authority: Sec. 1102 of the Social Security Act, (42 U.S.C. 1302), unless otherwise noted.

§ 435.1009 [Amended]

Section 435.1009 is amended by revising the definition of "inpatient" and by adding in alphabetical order the definition of "outpatient".

* * * * *

"Inpatient" means a patient who has been admitted to a medical institution as an inpatient on recommendation of a physician or dentist and who—

(1) Receives room, board and professional services in the institution for a 24 hour period or longer; or

(2) Is expected by the institution to receive room, board and professional services in the institution for a 24 hour period or longer even though it later develops that the patient dies, is discharged or is transferred to another facility and does not actually stay in the intitution for 24 hours.

* * * * *

"Outpatient" means a patient of an organized medical facility, or distinct part of that facility who is expected by the facility to receive, and who does receive, professional services for less than a 24-hour period regardless of the hour of admission, whether or not a bed is used, or whether or not the patient remains in the facility past midnight.

* * * * *

PART 440—SERVICES: GENERAL PROVISIONS

The authority citation for Part 440 reads as follows:

Authority. Sec. 1102 of the Social Security Act (42 U.S.C. 1302), unless otherwise noted.

1. Section 440.2(a) is amended by revising the definition of "Outpatient" and by adding in alphabetical order the definition of "Inpatient".

§ 440.2 Specific definitions; definitions of services for FFP purposes.

(a) *Specific definitions.*

"Inpatient" means a patient who has been admitted to a medical institution as an inpatient on recommendation of a physician or dentist and who—

(1) Receives room, board and professional services in the institution for a 24 hour period or longer; or

(2) is expected by the institution to receive room, board and professional services in the institution for a 24 hour period or longer even though it later develops that the patient dies, is discharged or is transferred to another facility and does not actually stay in the institution for 24 hours.

* * * * *

"Outpatient" means a patient of an organized medical facility, or distinct part of that facility who is expected by

the facility to receive and who does receive professional services for less than a 24-hour period regardless of the hour of admission, whether or not a bed is used, or whether or not the patient remains in the facility past midnight.

* * * * *

2. Section 440.10 is amended by revising paragraph (a)(3)(iii) to read as follows:

§ 440.10 Inpatient hospital services, other than services in an institution for tuberculosis or mental diseases.

(a) "Inpatient hospital services means services that—

* * * * *

(3) Are furnished in an institution that—

* * * * *

(iii) Except in the case of medical supervision of nurse-midwife services, as specified in § 440.165, meets the requirements for participation in Medicare as a hospital; and

* * * * *

3. Section 440.20 is amended by revising paragraph (a)(3)(ii) and adding paragraph (a)(4) to read as follows:

§ 440.20 Outpatient hospital services and rural health clinic services.

(a) *"Outpatient hospital services"* means preventive, diagnostic, therapeutic, rehabilitative, or palliative services that—

* * * * *

(3) Are furnished by an institution that—

* * * * *

(iii) Except in the case of medical supervision of nurse-midwife services, as specified in § 440.165, meets the requirements for participation in Medicare as a hospital; and

(4) May be limited by a Medicaid agency in the following manner: A Medicaid agency may exclude from the definition of "outpatient hospital services" those items and services that are not generally furnished by most hospitals in the State.

* * * * *

4. Section 440.80 is revised to read as follows:

§ 440.80 Private duty nursing services.

"Private duty nursing services" means nursing services for recipients who require more individual and continuous care than is available from a visiting nurse or routinely provided by the nursing staff of the hospital or skilled nursing facility. These services are provided—

(a) By a registered nurse or a licensed practical nurse;

(b) Under the direction of the recipient's physician; and

(c) To a recipient in one or more of the following locations at the option of the State—

(i) His or her own home;

(ii) A hospital; or

(iii) A skilled nursing facility.

5. Section 440.160 is amended by reprinting the first paragraph and revising paragraph (b) as follows:

§ 440.160 Inpatient psychiatric services for individuals under age 21.

"Inpatient psychiatric services for individuals under age 21" means services that—

* * * * *

(b) Are provided in a psychiatric facility or an inpatient program in a psychiatric facility, either of which is accredited by the Joint Commission on Accreditation of Hospitals; and

* * * * *

PART 441—SERVICES: REQUIREMENTS AND LIMITS APPLICABLE TO SPECIFIC SERVICES

The authority citation for Part 441 reads as follows:

Authority: Sec. 1102 of the Social Security Act (42 U.S.C. 1302), unless otherwise noted.

Section 441.151 is amended by reprinting the first paragraph and revising paragraphs (b) and (c) to read as follows:

§ 441.151 General requirements.

Inpatient psychiatric services for recipients under age 21 must be provided—

* * * * *

(b) In a psychiatric facility or an inpatient program in a psychiatric facility, either of which is accredited by the Joint Commission on Accreditation of Hospitals; and

(c) Before the recipient reaches age 21 or, if the recipient is receiving the services on the day before the date he or she reaches age 21, before the earlier of the following—

(1) The date he or she no longer requires the services, or

(2) The date he or she reaches age 22.

PART 447—PAYMENT FOR SERVICES

The authority citation for Part 447 reads as follows:

Authority: Sec. 1102 of the Social Security Act (42 U.S.C. 1302), unless otherwise noted.

Section 447.40 is amended by revising paragraph (a) to read as follows:

§ 447.40 Payments for reserving beds in institutions.

(a) The Medicaid agency may make payments to reserve a bed during a recipient's temporary absence from an inpatient facility, if—

(1) The absence is for—

(i) Hospitalization, or—

(ii) A purpose other than hospitalization, and the recipient's plan of care provides for those absences; and

(2) The State plan provides for such payments and describes any limitations on the reserved bed policy.

BILLING CODE 4120-03-M

DEPARTMENT OF THE INTERIOR

Office of the Secretary

43 CFR Part 2

Privacy Act of 1974; Records and Testimony

AGENCY: Interior Department.

ACTION: Proposed rule.

SUMMARY: Department of the Interior regulations relating to certain exemptions to provisions of the Privacy Act of 1974 and Departmental regulations relating thereto are proposed to be revised. This revision proposes to: Add Privacy Act System of Records entitled Investigative Records, Interior/Office of Inspector General to those systems of records listed in 43 CFR 2.79(a).

DATES: Comments must be received on or before April 11, 1983.

ADDRESS: Comments concerning the proposed regulations may be submitted to: Assistant Inspector General for Administration, U.S. Department of the Interior, Office of Inspector General, Room 5354, 18th and C Streets, N.W., Washington, D.C. 20240.

FOR FURTHER INFORMATION CONTACT: Danny P. Danigan, Assistant Inspector General for Administration, at (202) 343-8231, or Maurice O. Ellsworth, Associate Solicitor, Audit and Inspection, at (202) 343-8275. These are not toll free numbers.

SUPPLEMENTARY INFORMATION: The principal author of this proposed rule is Betty J. Foyes of the Office of the Assistant Inspector General for Administration, Office of Inspector General, telephone number (202) 343–5459.

A discussion of the proposed revisions to 43 CFR 2.79(a) is provided below:

Privacy Act System of Records entitled Investigative Records, Interior/Office of Inspector General—2 is being added to those systems of records listed in 43 CFR 2.79(a) which are exempt under 5 U.S.C. 552a(j)(2) of the Privacy Act of 1974 from all of the provisions of 5 U.S.C. 552a and Department of Interior regulations in 43 CFR, Part 2, Subpart D—Privacy Act, except subsections (b), (c) (1) and (2), (e) (4) (A) through (F), (e) (6), (7), (9), (10), and (11) and (i) of 5 U.S.C. 552a and the portions of the rgulations in Subpart D implementing these subsections. The system of records is maintained in the Office of Inspector General pursuant to the provisions of the Inspector General Act of 1978, 5 U.S.C. app. sections 1–12. The office is a recognized criminal justice agency under the provisions of 28 CFR, Part 20, § 20.3(c) and is a component of the Department of the Interior with its principal function the investigation of violations of criminal provisions of the U.S. Code. Promulgation of this rule will prevent premature disclosure of information that a criminal investigation is being conducted; premature disclosure of information gathered for criminal prosecution; and premature release of information furnished to the Justice Department or other law enforcement agency. The rule is necessary to safeguard, in some instances, the physical well-being of investigators assigned to the investigation. This exemption would also remove the requirement that when engaged in investigations of violations of criminal statutes the agency collect information to the greatest extent practicable from the subject individual and that the agency inform each person whom it asks to supply information of its authority, purposes, routine uses of the information, and the effects on him/her of not providing the information.

The Department of the Interior has determined that this document is not a major rule under E.O. 12291 and certifies that this document will not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*).

This rule does not contain information collection requirements which require approval by the Office of Management and Budget under 44 U.S.C. 3501 *et seq.*

The Department of the Interior has determined that this rule does not constitute a major Federal action significantly affecting the quality of the human environment under the National Environmental Policy Act of 1969.

The policy of the Department of the Interior is, whenever practicable, to afford the public an opportunity to participate in the rulemaking process. Accordingly, interested persons may submit written comments, suggestions or objections regarding the proposed amendment and rule to the location identified in the Addresses section of this preamble. Comments must be received on or before April 11, 1983.

List of Subjects in 43 CFR Part 2

Administrative practice and procedure, Classified information, Freedom of Information, Privacy.

PART 2—[AMENDED]

Accordingly, under authority of 5 U.S.C. 301, 552a and 5 U.S.C. app. section 9(a)(1)(D) and 9(b), it is proposed to amend 43 CFR 2.79 by adding paragraph (a)(4) to read as follows:

§ 2.79 Exemptions.

(a) *Criminal Law enforcement records exempt under 5 U.S.C. 552a(j)(2).*

* * * * *

(4) Investigative Records, Interior/Office of Inspector General—2.

BILLING CODE 4310-10-M

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 611

[Docket No. 30304-32]

Foreign Fishing, Groundfish of the Bering Sea and Aleutian Island Area

AGENCY: National Oceanic and Atmospheric Adminstration (NOAA), Commerce.

ACTION: Proposed rule.

SUMMARY: NOAA issues this proposed rule for Amendment 3 to the Fishery Management Plan for the Groundfish Fishery of the Bering Sea and Aleutian Island Area. The amendment would establish a management system to reduce the incidental catch of salmon, Pacific halibut, king crab, and Tanner crab, which are prohibited species for the foreign groundfish fishery in the Bering Sea and Aleutian Islands area. This management system is proposed in response to a growing concern that the general prohibition against taking and retaining prohibited species has not reduced their incidental catch in the foreign trawl fishery, which adversely affects the domestic target fisheries that fully utilize salmon, Pacific halibut, king crab, and Tanner crab.

The intended effect of this action is to reduce the incidental catch and unnecessary mortality of salmon, Pacific halibut, king crab, and Tanner crab in foreign groundfish operations, while still allowing the foreign fisheries an opportunity to harvest their groundfish allocations.

DATE: Comments are invited until April 22, 1983.

ADDRESSES: Comments should be addressed to Robert W. McVey, Director, Alaska Region, National Marine Fisheries Service, P.O. Box 1668, Juneau, Alaska 99802. Individual copies of the amendment, the environmental impact statement, and the regulatory impact review/initial regulatory flexibility analysis may be obtained by contacting the North Pacific Fishery Management Council, P.O. Box 3136 DT, Anchorage, Alaska 99510, 907–274–4563.

FOR FURTHER INFORMATION CONTACT: Susan J. Salveson (Regional Plan Coordinator), 907–586–7220.

SUPPLEMENTARY INFORMATION:

Background

The Fishery Management Plan for the Groundfish Fishery of the Bering Sea and Aleutian Islands Area (FMP) was implemented January 1, 1982, (46 FR 63295, December 31, 1981) by the NOAA Assistant Administrator for Fisheries (Assistant Administrator) under the Magnuson Fishery Conservation and Management Act (Magnuson Act). Eight amendments to the FMP have been adopted by the North Pacific Fishery Management Council (Council). The notice of final approval and implementation of Amendments 1a and 2 was published January 12, 1982 (47 FR 1295). The proposed rule for Amendment 4 was published on December 12, 1983 (47 FR 57306). Amendment 1 has been submitted for review to the Assistant Administrator. Amendment 5 was approved by the Assistant Administrator on December 30, 1982; proposed rules are pending.

Amendment 1 would establish a framework management system for the Bering Sea and Aleutian Islands area

groundfish complex and would change the time of the foreign trawl closure in the area known as Petrel Bank. Amendment 4 adjusts various species quotas and apportionments to the foreign and domestic fisheries. Amendment 5 would reduce the number of chinook salmon that may be taken incidentally in the eastern Bering Sea foreign trawl fishery. Amendments 6 and 7 are being prepared for submission to the Assistant Administrator. Amendment 6 would establish a fishery development zone in which fish may be harvested only by U.S. vessels. Amendment 7 would reduce a restriction on foreign longline vessels.

Amendment 3 to the FMP is the subject of this action and was adopted by the Council on September 28, 1981. This amendment would establish prohibited species catch (PSC) limits for salmon, Pacific halibut, king crab, and Tanner crab, which are prohibited species in the foreign groundfish fisheries and are caught incidentally in those operations. These proposed rules are published under section 304(a)(1)(C)(ii) of the Magnuson Act, as amended by Pub. L. 97-453, which requires the Secretary of Commerce (Secretary) to publish regulations proposed by a Council within 30 days of receipt of the amendment and regulations. Consequently, publication of these proposed rules does not indicate that the amendment they would implement has been determined to be consistent with the national standards, other provisions of the Magnuson Act, and other applicable law. The Secretary, in making that determination, is required to take into account the data, views, and comments received from interested persons during the 75-day comment period running from receipt of the amendment.

Under this amendment, when U.S. observer data, or other reported statistics that are considered reliable, indicate that trawl vessels of a particular nation have caught incidentally a specified portion of the PSC for one of the above species, those vessels will be subject to a significant time/area closure in order to redure or eliminate further taking of these species in the Bering Sea and Aleutian Islands area. This action is taken in response to the growing concern that the current requirement to return to the sea immediately those salmon, Pacific halibut, king crab, and Tanner crab caught incidentally in foreign groundfish operations has not reduced the incidental catch and associated mortality of these species. This situation has complicated the management of salmon, Pacific halibut, king crab, and Tanner crab, and the impacts have adversely affected the domestic target fisheries that utilize these species.

Salmon, Pacific halibut, and Tanner crab are also prohibited species in the domestic groundfish fishery, and king crab will become so upon implementation of a Bering Sea/Aleutian Islands king crab fishery mangement plan. While the Council advocates and strongly supports the development of the domestic groundfish fishery, it maintains that domestic groundfish fishermen must share in the responsibility of avoiding incidental catches of these species to the fullest extent possible. It is the present policy of the Council, that through voluntary measures developed cooperatively with domestic groundfish fishermen, stocks of salmon, Pacific halibut, king crab, and Tanner crab can be sufficiently protected from needless and wasteful incidental catch to make unnecessary the imposition of special protective regulations upon the domestic groundfish fishery.

Management decisions made by the Secretary to carry out the intent and purpose of Amendment 3 and its implementing rules will be made in consultation with the Council whenever possible.

Determination of annually reduced prohibited species catches

Part 1: Pacific halibut, king crab and Tanner crab

Incidental catches of Pacific halibut, king crab, and Tanner crab will be reduced by reducing incidental catch rates in the directed groundfish fisheries. Maximum annual catch rates for prohibited species (R) have been established for these three prohibited species, as shown in Table 3 of § 611.93(c)(2)(ii)(D)(*2*)(*iii*). The Rs have been calculated as percentage reductions of the average 1977–80 incidental catch rates (weight or number of each prohibited species per metric ton of groundfish caught). R is different for halibut, king crab, and Tanner crab.

The average 1977–80 incidental catch rate for Pacific halibut is to be reduced 50 percent by 1986. This catch rate reduction was chosen over a more stringent one due to the difficulty of avoiding halibut in the yellowfin sole fishery.

The average 1977–80 incidental catch rate for king and Tanner crab will be reduced 25 percent by 1986. Currently, golden king crab, *Lithodes aequispina*, and the Tanner crab, *Chionoecetes opilio*, comprise 72–91 percent and 50–78 percent of the incidental catch for king and Tanner crab, respectively. *L. aequispina* and *C. opilio* are less valuable to the domestic fisheries relative to other king and Tanner crab species utilized by domestic fishermen. The 25 percent reduction schedule for the king and Tanner crab incidental catch (Table 6) was chosen upon consideration of (1) the relatively slight biological impact of the incidental crab catches on crab stocks utilized by domestic crab fisheries, and (2) the lesser socio-economic impact of the incidental catches on the domestic crab fishing industry.

An initial amount of PSC for halibut, king crab, and Tanner crab (species j) will be calculated each year (year i) by the following equation:

PSC_{ij} equal R_{ij} multiplied by Total Groundfish TALFF.

The PSC_{ij} for halibut, king crab, and Tanner crab will increase in accordance with increases in the total groundfish TALFF (total allowable level of foreign fishing) which result from the apportionment of groundfish reserves or the surplus domestic annual harvest (DAH) to TALFF.

The total annual PSC for halibut, king crab, or Tanner crab will equal R_{ij} multiplied by the final groundfish TALFF. The annual PSCs for these species in any year will be distributed to each nation in direct proportion to a nation's groundfish allocation by the following equation.

Nation's PSC_{ij} equals R_{ij} multiplied by Nation's Groundfish Allocation.

Since the total PSC_{ij} for halibut, king crab, and Tanner crab is based upon an incidental catch rate and will increase throughout the fishing year as TALFF is increased, a nation's PSC_{ij} for these species may also increase accordingly.

If the Regional Director projects that a nation will not catch its groundfish allocation due to its interception of prohibited species, he will caution the nation to avoid further prohibited species by-catches. Once a nation's specified portion of the PSC for Pacific halibut, king crab, or Tanner crab has been caught, the entire Bering Sea and Aleutian Islands area will be closed to all trawling by vessels of that nation unless the Regional Director notifies the nation that specific areas and/or selected elements of the trawl fleet are exempted from such a closure, as specified under "Exemptions to PSC Regulations," below.

Part 2: Salmon

The absolute number of salmon established as PSC amounts will be reduced annually. The annual

reductions for chinook salmon and for all species of salmon combined are shown in Table 2 of § 611.93(c)(2)(ii)(D)(*1*)(*i*) These values are based on the Council's approved PSC reduction schedule for chinook salmon, negotiated between the principal domestic and foreign user groups (western Alaska residents and Japanese trawl industry representatives).

Salmon PSCs are indicated for 1981, 1982, and 1983 in Table 2. A complete review of the salmon PSC reduction program will be conducted by the Council in 1983 to determine the PSCs to be established during 1984 and 1985. The objective is to achieve a 75-percent reduction of the 1981 salmon PSC level by 1986. The 1983 review will consider the status of the chinook salmon resource, the economic and technological possibility of further PSC reductions, the economic and technological reasonableness of the 75-percent reduction goal by 1986, and other relevant matters.

The total salmon PSC for any year is based upon a negotiated absolute number which will not vary with TALFF. The salmon PSC will be allocated among foreign nations so that a nation's share of the salmon PSC at the beginning of a fishing year will be in the same proportion to the total salmon PSC as its initial groundfish allocation is to the total initial groundfish TALFF plus reserves, and is automatically established by the following equation:

Nation's Initial Salmon PSC equals Total Salmon PSC multiplied by the Nation's Initial Groundfish Allocation divided by Total Initial Groundfish TALFF plus Reserves.

At the beginning of the fishing year, a portion of the salmon PSC will not be distributed to nations because groundfish reserves will not be apportioned and some of the initial TALFF may not be allocated. This remaining portion of the salmon PSC will be subsequently distributed to nations in proportion to increases in their groundfish allocations which result from the apportionment of the initial unallocated TALFF or groundfish reserves.

The PSC reduction schedule established for salmon will be subject to a "rolling PSC limit" which fixes the incidental catch levels over a period of three successive years. A nation's incidental salmon catch may exceed its specified portion of the salmon PSC established for a fishing year by up to 10 percent, provided that the total incidental catch by that nation in any consecutive 3-year period does not exceed the sum of its specified portion of the salmon PSC established for those three years. All calculations of the rolling PSC limit will start with the 1982 fishing season.

Once a nation's rolling PSC limit is reached for salmon or a nation has exceeded by 10 percent in a fishing year that nation's annual PSC, Fishing Area II and that portion of Fishing Area I lying between 55°N. and 57°N. latitude and 165°W. and 170°W. longitude will be closed to trawling by vessels of that nation for so much of the months of January, February, March, October, November, and December as remains in that fishing year. If any more salmon are caught by vessels of that nation in the areas which remain open, those incidental catches will be deducted from its next year's salmon PSC consistent with the rolling PSC limit.

Annual Review and Adjustment of PSCs

Since fisheries resources and socioeconomic conditions of the fishing industry are expected to change, the PSC management system for salmon, Pacific halibut, king crab, and Tanner crab will be reviewed annually by the Council. Annual PSCs, incidental catch rates, periods of PSC reductions, and the percentage reduction in PSCA or incidental catch rates over the previous year may be adjusted by the Secretary. The annual review by the Council will be conducted to respond to concerns arising from changes in the following:

1. The stock condition and abundance of prohibited species;
2. The stock condition and abundance of target groundfish species, except that in the annual reviews, this concern will not be applied to salmon; however, it will be included in the 1983 review of the salmon PSC which is referenced above and in Table 2;
3. The socioeconomic impact of catches of prohibited species on domestic fisheries dependent on them; and
4. The impact of PSCs on the ability of foreign fisheries to take their groundfish TALFF.

When annual adjustments of the PSCs or incidental catch rates are determined to be necessary during the annual review process, the Secretary will consider all of the following, in descending order of priority, when making such adjustments:

1. The need to protect prohibited species for biological and other conservation reasons;
2. The impact of PSCs on the domestic fisheries dependent on these species;
3. The impact of the PSC regulations on development and operation of domestic groundfish fisheries; and
4. The impact of PSCs on the foreign groundfish fisheries.

Prior to the beginning of each year, the latest scientific and technical information bearing on changes to the fishery resources and their associated fisheries will be provided to the Secretary and the Council so that timely decisions are made on annual PSC adjustments and notifications to foreign nations of such adjustments are given by the beginning of the fishing year.

Exemptions to PSC Regulations

Although a nation's PSC for Pacific halibut, king crab, or Tanner crab may have been reached, the Regional Director may notify the nation that selected fishing elements of the nation's fleet will be allowed to continue fishing under specified conditions until the nation's groundfish allocation is reached. The Regional Director will take into account the following considerations when making such allowances: (1) the risk of biological harm to prohibited species stocks and of socioeconomic harm to authorized users of prohibited species posed by continued trawling by the selected elements; (2) the extent to which the selected elements have avoided incidental prohibited species catches up to that point in the fishing year; (3) the confidence of the Regional Director in the accuracy of the estimates of prohibited species catches by the selected elements up to that point in the fishing year; (4) whether observer coverage of the selected elements is sufficient to assure adherence to the prescribed conditions, and to alert the Regional Director to increases in the elements' prohibited species catch; and (5) the enforcement record of owners and operators of vessels included in the selected elements, and the confidence of the Regional Director that adherence to prescribed conditions can be assured in light of available enforcement resources. Any additional; incidental catches of prohibited species by vessels which have been allowed to continue fishing will be considered when establishing future PSC limits.

The foreign longline fishery is currently exempted from the PSC regulations established for salmon, halibut, king crab, and Tanner crab, but it will be closely monitored for its impact on these species. The decisions to include or exclude this or other selected gear types from PSC regulations shall be made by the Secretary after his evaluation of their impact on prohibited species.

Incentives to Reduce Prohibited Species Catches

Under Amendment 3, every foreign nation fishing for groundfish in the Bering Sea and Aleutian Islands area must make an earnest attempt to reduce its catch of prohibited species and remain within its PSC limitation for salmon, Pacific halibut, king crab, Tanner crab. A nation's efforts to reduce its prohibited species catch rate or number will be an important consideration when the Secretary of State allocates supplemental TALFF to foreign nations. The annual and inseason supplemental allocations to a nation will be intended as a reward to that nation for its compliance with PSC regulations and should serve as an incentive to that nation to continue developing fishing methods which avoid incidental catches of prohibited species.

In order to arrive at long-term solutions for controlling the incidental catch of prohibited species, foreign nations fishing for groundfish in the Bering Sea and Aleutian Islands area are encouraged to; (1) Conduct NMFS-approved gear experiments which are intended to reduce the incidental catch of prohibited species; (2) collect detailed information on the characteristics of incidental catches; and (3) transfer information and technology gained during gear experiments to the United States for use by government and industry.

As an incentive to a nation to conduct these sanctioned gear experiments, any prohibited species which are caught during the experiments will be exempted from the PSC limits for that nation for that year. Groundfish catches which are retained for commercial purposes during the experiments will continue to be counted towards the nation's groundfish allocations.

In the event that the rule implementing Amendment 3 becomes effective sometime during 1983 (year i), each nation's portion of the PSC_{ij} for Pacific halibut, Tanner crab, and king crab (species j) will be determined based on the unharvested amount of each nation's current 1983 groundfish allocation so that:

PSC_{ij} = (Nation's groundfish allocation − Nation's groundfish catch) × R_{ij}.

The foreign trawl fishery is currently limited to a chinook salmon PSC of 55,250 fish under Amendment 1a to the FMP and Amendment 5 proposes to further reduce the chinook salmon PSC to 45,500 fish. In 1982, a total of 15,726 salmon (all species) were caught by foreign trawl vessels operating in the Bering Sea and Aleutian Islands area. This amount represents only about 26 percent and 32 percent of the 1982 and 1983 salmon PSCs proposed by Amendment 3. While foreign nations will be accountable for all salmon caught during 1983, the mid-season implementation of the salmon PSC limit of 48,925 fish is liberal in relation to their recently demonstrated ability to minimize incidental catches.

Changes to the Proposed Regulations

Two changes have been made to the Council's proposed rule to implement Amendment 3 and the explanations for those changes are as follows: (1) Table 2 referenced in § 611.93(c)(2)(ii)(D) was revised to eliminate specific reference to chinook salmon so that only the PSC for total salmon is listed. This change was necessary to clarify that the Council intends to limit the total incidental catch of all salmon; and (2) § 611.93(c)(2)(ii)(D)(*2*) was revised to clarify how the time/area closure of the entire management area will be applied to trawl vessels of a foreign nation which has caught its current portion of the PSC for Pacific halibut, king crab, and Tanner crab prior to receiving its final groundfish allocation.

Classification

The environmental impact statement written for the FMP and filed with the Environmental Protection Agency addresses Amendment 3 and is available from the Council at the address set forth above.

The Assistant Administrator has determined that this amendment is consistent, to the maximum extent practicable, with the Alaska Coastal Management Program, as required by section 307(C) of the Coastal Zone Management Act of 1972 and its implementing regulations, 15 CFR Part 930, Subpart C.

This proposed regulation is exempt from the procedures of E.O. 12291 under provisions of Section 8(a)(2) of that order. A delay in publishing this proposed rule beyond 30 days after its receipt by the Secretary would conflict with deadlines imposed under Magnuson Act, as amended by Pub. L. 97–453. The proposed regulation is being reported to the Director, Office of the Management and Budget, with an explanation of why it is impracticable to follow procedures of the order.

The rulemaking was estimated to have maximum net benefits of $14.8 million and, although not quantified, the regulatory impact review/initial regulatory flexibility analysis (RIR/IRFA) concludes that the amendment will not produce any measurable adverse impacts on unemployment, distributional stability, product availability, or price to consumers. The rulemaking, therefore, is not a "major rule" under E.O. 12291 and does not require the preparation of a regulatory impact analysis.

The net benefits derived by U.S. directed fisheries as a result of the reduced incidental loss to groundfish trawls of juvenile Pacific halibut, crab, and salmon are considerable. The specific methodology employed in estimating these net benefits is summarized in the RIR/IFRA. The discounted real present value of the savings to U.S. target fisheries from the implementation of Amendment 3 range from $1.17 million from the 1982 PSC reduction to nearly $4 million from the 1986 PSC reduction. Assuming maintenance of the 1983 salmon interception figures as a base for 1984 through 1986 (PSC reductions for salmon during these years are unknown at this time), the total discounted real present value of the five-year PSC reduction program for halibut, king crab, Tanner crab, and salmon is more than $14.8 million at the ex-vessel level. Considerably greater total benefits will accrue to regional as well as U.S. economies as the impact of these savings move through the support, processing, wholesale/distribution, and retail sectors.

Other benefits accruing from the implementation of Amendment 3 are associated with the enhanced development opportunities of the domestic groundfish fishery. Under the amendment, no restrictive regulation is imposed upon domestic groundfish trawlers to reduce PSC levels, but rather, voluntary measures on the part of the U.S. trawlers are expected to protect prohibited species stocks adequately. This regulatory flexibility is seen to be vitally important to the sustained growth and economic success of the domestic groundfish industry, and many sectors of the industry have indicated that the U.S. groundfish fishery would not exist without this de-facto exemption from mandatory PSC reduction levels.

The last category of benefits associated with Amendment 3 involve the prospects for impoved management of the Pacific halibut, king crab, Tanner crab, and salmon resources. By significantly reducing the interception and attendant mortality of juvenile prohibited species in the groundfish trawl fisheries, the amendment enhances the health and stability of these resources and contributes to the efficient management of U.S. fisheries dependent upon them.

Amendment 3 carries with it no additional management nor enforcement costs beyond those already incurred in implementation of the Bering Sea and Aleutian Islands area FMP, and all the data on PSCs necessary for administering the provisions of the amendment are presently collected by the existing U.S. observer program or through other currently available sources.

The Administrator has further determined that implementation of Amendment 3 will have a significant beneficial economic impact on a substantial number of small domestic entities. The RIR/IRFA prepared on Amendment 3 concludes that the amendment could impose costs on those foreign nations which fail to achieve the target reductions in PSC by preventing those nations from harvesting a portion of their TALFF due to time and area closures or gear restrictions triggered by attainment of allocated PSC quotas. However, the assumption underlying the schedule of reductions set forth in the amendment is that achievement of these target levels is feasible without unduly inhibiting the attainment of TALFF. Information on the incidental foreign trawl catch of salmon, Pacific halibut, King crab, and Tanner crab during 1981 and 1982 supports this assumption. Had the PSC constraints proposed in Amendment 3 been in place during 1981 and 1982, in only two cases might they have constrained a foreign nation's fishing activity—those cases resulting from Korea exceeding its Pacific halibut PSC limit by a decreasing margin each year. For all other nations, the proposed PSC limits would have imposed no barrier to full attainment of allocated TALFF and there is no evidence to suggest that this is likely to change. As annual performance in meeting the scheduled reductions in PSC is observed, however, quantitative estimates of the cost of groundfish catch foregone, if any, will be possible.

Finally, the proposed rule does not contain a collection of information requirement or involve any collection of information within the meaning of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*)

List of Subjects in 50 CFR Part 611

Fish, Fisheries, Foreign relations, Reporting requirements.

Dated March 6, 1983.

William G. Gordon,

Assistant Administrator for Fisheries.

For reasons set out in the preamble, 50 CFR Part 611 is proposed to be amended as follows:

PART 611—FOREIGN FISHING

1. The authority citation for Part 611 reads as follows:

Authority: 16 U.S.C. 1801 *et seq.*, unless otherwise noted.

2. In § 611.93 paragraph (c)(2)(ii)(D) is revised and paragraph (e) is added to read as follows:

§ 611.93 Bering Sea and Aleutian Islands groundfish fishery.

* * * * *

(c) * * *

(2) * * *

(iii)* * *

(D) Prohibited species catch (PSC) limits.

(1) Salmon. (I) During any fishing year, that portion of fishing area I lying between 55°N. and 57°N. latitude and 165°W. and 170°W. longitude and all of fishing area II may be closed for the remainder of the periods January 1 through March 31 and October 1 through December 31 to trawl vessels of any nation. This closure will occur when vessels of a nation have intercepted an amount of salmon which exceeds by 10 percent that nation's portion of the salmon prohibited species catch (PSC) established for the current fishing year (Table 2), or when vessels of that nation have intercepted an amount of salmon in any consecutive three-year period which exceeds the sum of that nation's portion of the salmon PSC established for those three years. Any salmon caught incidentally by vessels of that nation in the area which remains open will be applied against its portion of the following years' salmon PSC. Fishing areas I and II are shown in § 611.9, Appendix II, Figure 2.

TABLE 2.—TARGET REDUCTION SCHEDULE OF SALMON PROHIBITED SPECIES CATCHES BASED ON THE AVERAGE 1977–80 FOREIGN TRAWL SALMON INCIDENTAL CATCH

Year	Salmon: Total salmon [1]
Base numbers: 1977–80	80,000
Reduced catch levels:	
1981	[illegible]
1982	[illegible]
1983	48,925
1984	[?]
1985	[?]
1986	17,473

[1] Total salmon numbers are calculated on the assumption that 93 percent of incidentally caught salmon are chinook. [illegible]

(ii) A nation's initial portion of the salmon PSC for a fishing year will be determined by multiplying the total salmon PSC for that year by the ratio of that nations's initial groundfish allocation to the total initial TALFF plus reserves for groundfish:

Nation's initial salmon PSC equals total salmon PSC multiplied by nation's initial groundfish allocation divided by total initial groundfish TALFF and reserve.

At the beginning of the fishing year, a portion of the salmon PSC will not be distributed to nations, because groundfish reserves will not yet be apportioned and some of the initial TALFF may not yet be allocated. This remaining portion of the salmon PSC will be subsequently distributed to nations in proportion to increases in their groundfish allocations which result from the apportionment of the initial unallocated TALFF and groundfish reserves.

(2) Pacific halibut, king crab, and Tanner crab. *(i)* When during any fishing year the trawl vessels of a nation have taken incidentally that nation's current portion of the PSC for Pacific halibut, king crab, or Tanner crab, the entire management area will be closed to trawling by vessels of that nation for the remainder of that fishing year or until that nation's groundfish allocation is increased. Any increase in a nation's groundfish allocation will result in a corresponding increase in its current portion of PSC for Pacific halibut, king crab, and Tanner crab.

(ii) For any (year i), the PSC_{ij}s for each of these species (species j) are based upon the incidental catch rates (R_{ij}) shown in Table 3:

PSC_{ij} equals R_{ij} multiplied by the total groundfish TALFF.

Using this formula, the PSC for Pacific halibut, king crab, and Tanner crab will increase in proportion to increases in the total TALFF which result from the apportionment of groundfish reserves or surplus DAH to TALFF under paragraph (b)(2) of this section.

(iii) A nation's current portion of the PSC_{ij}s for Pacific halibut, king crab, and Tanner crab, at any time during the fishing year, is determined by multiplying that nation's current groundfish allocation by R_{ij}:

Nation's PSC_{ij} equals R_{ij} multiplied by a nation's groundfish allocation.

TABLE 3.—INCIDENTAL CATCH RATE REDUCTIONS FOR PACIFIC HALIBUT, KING CRAB AND TANNER CRAB, BASED ON THE AVERAGE 1977–80 FOREIGN TRAWL GROUNDFISH AND PROHIBITED SPECIES CATCHES

Year	Halibut [1]	King crab [2]	Tanner crab [2]
Base catch rate:			
1977–80	8,182	916,604	16,003,329
Average	[3] 1,301,250	[4] 1,301,250	[5] 1,301,250
	Rate Reduction Schedule, R and R as percentage of base R (percent)		
1981	R=.00220 90	R=.00951 95	R=11.6840 95
1982	R=.00195 80	R=.00410 90	R=11.0886 90
1983	R=.00171 70	R=.00867 85	R=10.4537 85
1984	R=.00147 60	R=.00365 80	R=9.8087 80
1985	R=.00122 50	R=.00842 75	R=9.2236 75

[1] Metric tons per metric ton of groundfish.
[2] Number of individuals per metric ton of groundfish.
[3] Base R=0.00234.
[4] Base R=0.70456.
[5] Base R=12.25643.

* * * * *

(e) *Inseason management decisions.*

(1) *Field orders.*—(i) Any field order issued by the Secretary under this section will include the following:

(A) The Secretary's findings required by paragraph (e)(2) of this section;

(B) A description and order of the modification of time and area limitations, based upon the Secretary's findings; and

(C) The effective dates of the modification.

(ii) No field order issued under this section may take effect until:

(A) It has been filed for publication with the **Federal Register**;

(B) The foreign nations concerned and the designated representatives for affected foreign fishing vessels are notified. If practicable, notification shall be given at least 48 hours before the field order is to be effective; and

(C) The public has been offered the opportunity to comment upon the Secretary's proposed findings and order of modification for a period of at least thirty (30) days, unless the Secretary finds that such prior opportunity for public comment would adversely affect the conservation and management of groundfish or unallocated species.

(iii) If the Secretary finds that prior opportunity for public comment on the proposed findings and order of modification would adversely affect the conservation and management of groundfish or unallocated species, he will receive public comments on the field order for thirty (30) days after its effective date, making available to the public during business hours the aggregate data on which it was based. After considering the comments received, the Secretary will determine whether the field order should be changed.

(iv) Any modification prescribed by a field order issued under this section will remain in effect in accordance with the terms of the field order, or of any subsequent field order which may be issued under this section.

(2) *Prohibited species catch (PSC) limits.* (i) The PSCs or incidental catch rates for salmon, Pacific halibut, king crab, and Tanner crab established in paragraph (c)(2)(ii)(D) of this section will be reviewed annually by the Secretary, in consultation with the North Pacific Fishery Management Council, in order to respond to changes in relevant circumstances, including the following:

(A) Changes in the stock condition and abundance of prohibited species;

(B) Changes in the stock condition and abundance of target groundfish species, except that such changes will not be considered relevant to the salmon PSC except in the course of a full and complete review of the salmon PSC reduction program to be conducted during 1983;

(C) Changes in the degree of socioeconomic impact of prohibited species catches on the domestic fisheries dependent on those species; and

(D) Changes in the impact of PSC's on the opportunity of foreign fisheries to take their groundfish allocations.

(ii) Based upon the most recent scientific and technical information available, and prior to the beginning of the fishing year, the Secretary will issue a field order under paragraph (e)(1) of this section to adjust the PSC's or incidental catch rates from salmon, Pacific halibut, king crab, and Tanner crab after consultation with the North Pacific Fishery Management Council under paragraph (e)(2)(i) of this section and after he has considered all of the following in descending order of priority and issued relevant findings:

(A) The need to protect prohibited species for biological and other conservation reasons;

(B) The impact of PSC regulations on the domestic fisheries dependent on prohibited species;

(C) The impact of the PSC regulations on development and operation of domestic groundfish fisheries; and

(D) The impact of PSC regulations on the foreign groundfish fisheries.

(iii) The Regional Director will notify a nation when its portion of the PSC for salmon, Pacific halibut, king crab, or Tanner crab, as established under paragraph (c)(2)(ii)(D) of this section, is approached, so that voluntary efforts by vessels of that nation may reduce the incidental catch of these species. Once a nation's portion of the PSC for Pacific halibut, king crab, or Tanner crab, as established under paragraph (c)(2)(ii)(D) of this section, has been reached, the Regional Director may by field order allow selected fishing elements of the nation's fishing fleet to continue fishing under specified conditions until the nation's groundfish allocation is reached, although any additional incidental catch of prohibited species by vessels which have been allowed to continue fishing will be considered when establishing future PSC limits. The Regional Director will take into account the following considerations when making such allowance and will issue relevant findings:

(A) The risk of biological harm to prohibited species stocks and of socioeconomic harm to authorized prohibited species users posed by continued trawling by the selected elements;

(B) The extent to which the selected elements have avoided incidental prohibited species catches up to that point in the fishing year;

(C) The confidence of the Regional Director in the accuracy of the estimates of prohibited species catch by the selected elements up to that point in the fishing year;

(D) Whether observer coverage of the selected elements is sufficient to assure adherence to the prescribed conditions, and to alert the Regional Director to increases in the elements' prohibited species catch; and

(E) The enforcement record of owners and operators of vessels included in the selected elements, and the confidence of the Regional Director that adherence to prescribed conditions can be assured in light of available enforcement resources.

Notices

Federal Register
Vol. 48, No. 49
Friday, March 11, 1983

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

ACTION

Information Collection Request Under Review

AGENCY: ACTION.

ACTION: Information collection request under review.

SUMMARY: This notice sets forth certain information about an information collection proposal by ACTION, the national volunteer agency.

Background: Under the Paperwork Reduction Act (44 U.S.C., Chapter 35), the Office of Management and Budget (OMB) reviews and acts upon proposals to collect information from the public or to impose recordkeeping requirements. ACTION has submitted the information collection proposal described below to OMB. OMB and ACTION will consider comments on the proposed collection of information and recordkeeping requirements. Copies of the proposed forms and supporting documents [request for clearance (SF 83), supporting statement, instructions, transmittal letter, and other documents] may be obtained from the agency clearance officer.

Information About This Proposed Collection: Agency Clearance Officer—Richard D. English—202–254–8501.

Agency Address: ACTION, 806 Connecticut Ave., NW. Washington, D.C. 20525.

Title of Forms: Project Profile and Volunteer Activity Survey.

Office of ACTION Issuing Proposal: Office of Domestic Operations, Office of Older American Volunteer Programs.

Agency Official to Contact for Further Information: C. Wade Freeman, Director, Older American Volunteer Programs.

Type of Request: Revision.

Frequency of Collection: One time each year.

General Description of Respondents; Project Directors of OAVP projects (FGP, RSVP, SCP).

Estimated Number of Responses: 1090.

Estimated Hours for All Respondents to Complete Form: 10 Hours or less.

Respondent's Obligation to Reply: Voluntary.

This *is not* a collection proposal under Sec. 3504(h) of the Paperwork Reduction Act.

Person responsible for OMB Review: James L. Thomas, 202–395–6880.

Richard D. English,
Deputy Assistant Director, ACTION.

BILLING CODE 6050-01-M

ADMINISTRATIVE CONFERENCE OF THE UNITED STATES

Committee on Judicial Review; Public Meeting

Pursuant to the Federal Advisory Committee Act (Pub. L. No. 92–463), notice is hereby given of a meeting of the Committee on Judicial Review of the Administrative Conference of the United States, to be held at 9:30 a.m., Tuesday, March 29, 1983, in FTC Hearing Room #1 (lower level), 2120 L Street, NW., Washington, D.C. The Committee will meet to discuss two items: Professor Colin Diver's study of the degree of articulation of agency policies, and a proposed study of the procedure for certifying claims under the Contract Disputes Act.

Attendance is open to the interested public, but limited to the space available. Persons wishing to attend should notify the Office of the Chairman of the Administrative Conference at least two days in advance. The Committee chairman, if he deems it appropriate, may permit members of the public to present oral statements at the meeting; any member of the public may file a written statement with the Committee before, during or after the meeting.

For further information concerning this meeting contact Mary Candace Fowler, Office of the Chairman, Administrative Conference of the United States, 2120 L Street, NW., Suite 500, Washington, D.C. (Telephone: 202–254–7065.) Minutes of the meeting will be available on request.

Dated: March 8, 1983.
Richard K. Berg,
General Counsel.

BILLING CODE 6110-01-M

DEPARTMENT OF AGRICULTURE

Commodity Credit Corporation

[1983-Crop Peanuts]

1983 Peanut Program: Determination Regarding National Average Support Level for Quota Peanuts

AGENCY: Commodity Credit Corporation, USDA.

ACTION: Notice of determination.

SUMMARY: This Notice of Determination sets forth, effective with respect to the 1983 crop of peanuts, the national average level of support for quota peanuts. This determination is necessary to satisfy the requirements of Section 108A of the Agricultural Act of 1949 and to provide producers with information which is needed in order to make financial plans in accordance with program provisions.

EFFECTIVE DATE: March 10, 1983.

FOR FURTHER INFORMATION CONTACT: Gypsy Banks, Agricultural Economist, Agricultural Stabilization and Conservation Service, USDA, Room 3732-South Building, P.O. 2415, Washington, D.C. 20013; (202) 447–5953. The Final Regulatory Impact Analysis is available upon request.

SUPPLEMENTARY INFORMATION: This notice of determination has been reviewed under USDA procedures required by Executive Order 12291 and Secretary's Memorandum No. 1512–1 and has been classified "not major." It has been determined that this notice will not result in: (1) An annual effect on the economy of $100 million or more; (2) a major increase in costs or prices for consumers, individual industries, Federal, State, or local governments, or geographical regions; or (3) significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The title and number of the Federal Assistance program that this notice

applies to are: Title—Commodity Loans and Purchases; Number—10.051, as found in the Catalog of Federal Domestic Assistance.

It has been determined that the Regulatory Flexibility Act is not applicable to this notice since CCC is not required by 5 U.S.C. 553 or any other provision of law to publish a notice of proposed rulemaking with respect to the subject matter of this notice.

A notice that the Secretary was preparing to make a determination with respect to the quota support level for the 1983 peanut crop was published in the **Federal Register** on January 25, 1983 (48 FR 3389). The written comment period ended February 11, 1983. All comments received were considered in making the final determination. A total of 71 comments were received: 3 from national farm groups, 9 from State farm groups, 16 from Members of Congress, 2 from sheller associations, 1 from an area marketing association, 1 from a State Department of Agriculture, 1 from a State Agricultural Stabilization and Conservation Committee, and 38 from individuals.

Fifty-three respondents requested a 6 percent increase in the support level, while 17 respondents requested an increase but did not recommend a specific amount of increase. One respondent recommended maintaining the quota support level at the level which was applicable to the 1982 crop.

Determination

After taking into consideration the comments received as well as the applicable statutory provisions and the latest available data, it has been determined that the national average level of support for the 1983 crop of quota peanuts shall be $550 per ton. The support price specified herein applies to 1983-crop farmers stock peanuts in bulk or in bags, net weight basis, which are eligible for price support at quota levels under the General Price Support Regulations at 7 CFR Part 1446.

Section 108A(1) of the Agricultural Act of 1949 provides that the national average support level for each of the 1983, 1984 and 1985 crops of quota peanuts shall be the national average quota support rate for such peanuts for the preceding crop, adjusted to reflect any increase, during the period beginning January 1 and ending December 31 of the calendar year immediately preceding the marketing year for the crop for which a level of support is being determined, in the national average cost of peanut production, excluding any increase in the cost of land, except that in no event shall the national average quota support rate for any such crop exceed by more than 6 per centum the national average quota support rate for the preceding crop.

Because the 1982 calendar year immediately precedes the marketing year for which the 1983 quota support is being determined, the 1983 quota support level is required to be the 1982 quota support of $550 per ton adjusted to reflect the increase, if any, under the conditions specified above, in the cost of production for 1982-crop peanuts. However, based on the Department's analysis of the latest available data, the cost of producing 1982-crop peanuts is estimated to be below the cost of producing 1981 crop peanuts. Therefore, the national average support level for the 1983 crop of quota peanuts remains unchanged from the 1982 level of $550 per ton. The individual elements of the cost of production estimates are set forth in the Final Regulatory Impact Analysis and the cost estimates are summarized in the following table.

ESTIMATES OF NATIONAL AVERAGE COST OF PEANUT PRODUCTION

[Dollars per ton]

Item	1981	1982	1982 [1] excluding increase in land cost
Variable costs, machinery ownership, farm overhead, and management	445.60	419.89	419.89
Land allocation:			
Composite, current	106.82	111.16	108.63
Composite, acquisition	93.58	96.71	93.58
Current value	85.34	88.72	85.34
Total costs with:			
Composite, current	564.23	530.06	527.52
Composite, acquisition	549.18	516.60	513.47
Current value	520.94	497.61	494.23

[1] Excluding increase in land cost.

Signed at Washington, D.C., on March 8, 1983.

John R. Block,

Secretary.

BILLING CODE 3410-05-M

Forest Service

Curtis Tungsten, Inc., Special Use Permit Application for Road 2N06; Angeles National Forest, Los Angeles Co., California; Availability of an Environmental Impact Statement

The Department of Agriculture, Forest Service, has prepared a Draft Impact Statement for the proposed issuance of a special use road permit for access to Curtis Tungsten, Inc. mining operation.

A range of 5 alternatives was considered. One of these was the nonissuance of the permit. Other alternatives considered various access routes and different means of access to the mining operations. The actual mining operation was not considered as part of the project.

The Mt. Baldy District Ranger will hold a public meeting to take written comments and to answer questions concerning the Draft E.I.S. All coments must be in writing and will be accepted through May 13, 1983. This meeting will be held at the Bidwell Forum, Glendora City Library, 140 South Glendora Avenue, Glendora, CA 91740 at 7:30 p.m., Monday, April 11, 1983.

Gray Reynolds, Forest Supervisor, Angeles National Forest, is the responsible official.

Questions about the proposed action and Environmental Impact Statement should be directed to Charles McDonald, Environmental Coordinator, Angeles National Forest, 150 S. Los Robles Avenue, Pasadena, CA 91101, phone 213-577-0050.

Gray F. Reynolds,

Supervisor, Angeles National Forest.

[FR Doc. 83-6375 Filed 3-10-83; 8:45 am]

BILLING CODE 3410-11-M

Rural Electrification Administration

San Isabel Electric Association, Inc.; Environmental Impact

AGENCY: Rural Electrification Administration.

ACTION: Notice of finding of no significant impact.

SUMMARY: Notice is hereby given that the Rural Electrification Administration (REA), pursuant to the National Environmental Policy Act of 1969, the Council on Environmental Quality Regulations (40 CFR Part 1500) and REA Bulletin 20-21:320-21, Environmental Policies and Procedures, has made a Finding of No Significant Impact in connection with an approval of a Facilities Agreement, Large Power Contract, and Agreement for Service to San Isabel Electric Association, Inc., (San Isabel) of Pueblo, Colorado.

FOR FURTHER INFORMATION CONTACT: REA's Finding of No Significant Impact and Environmental Assessment (EA) and San Isabel's Supplemental Borrower's Environmental Report (SBER) may be reviewed at or obtained from Mr. William E. Davis, Director, Western Area—Electric, Room 3304, South Agriculture Building, Washington, D.C. 20250, telephone (202) 382-8846, or Mr. William Wood, Manager, San Isabel

Electric Association, Enterprise & Aerospace Drive, Pueblo, Colorado 81002, telephone (303) 547–2160, during regular business hours.

SUPPLEMENTARY INFORMATION: San Isabel originally proposed to construct a 69 kV transmission line to serve the Gardner area; however, they now propose to serve the area using an existing 115 kV line constructed by the Atlantic Richfield Oil Company (ARCO). This revised project consists of approximately 51 km (32 mi) of 115 kV transmission line extending from Walsenburg Substation located approximately 0.8 km (0.5 mi) southwest of Walsenburg, Colorado, to the ARCO CO2 project site located near Sheep Mountain in the vicinity of Gardner, Colorado, all in Huerfano County, Colorado.

REA has reviewed the SBER submitted by San Isabel in connection with the revised project and has determined that it represents an accurate assessment of the environmental impacts of the revised project. The SBER and EA adequately consider potential impacts of the revised project to resources including threatened and endangered species, important farmlands, cultural resources, floodplains and wetlands.

Alternatives to the revised project examined include no action, underground construction, alternative connection points in their Huerfano County, alternative routes in Huerfano County between the Walsenburg Substation and the ARCO CO2 project site, use of additional feeder lines in Huerfano County to the ARCO CO2 project site and construction of the proposed Walsenburg to Gardner 69 kV transmission line. After reviewing these alternatives, REA determined the 115 kV transmission line is an acceptable alternative because it meets San Isabel's needs with minimum of adverse impact.

Based upon the SBER and other support documents, REA prepared an EA and Finding of No Significant Impact concerning the ARCO 115 kV transmission line. It is REA's view that the proposed approval of a Facilities Agreement, Large Power Contract, and Agreement for Service will not be a major Federal action that will affect significantly the quality of the human environment.

This Program is listed in the Catalog of Federal Domestic Assistance as 10.850—Rural Electrification Loans and Loan Guarantees.

Dated: March 7, 1983.

Harold V. Hunter,

Administrator.

[FR Doc. 83-6363 Filed 3-10-83; 8:45 am]

BILLING CODE 3410-15-M

Telephone Utilities of Eastern Oregon, Inc.; Vancouver, Washington; Proposed Loan Guarantee

AGENCY: Rural Electrification Administration (REA).

ACTION: Proposed loan guarantee.

SUMMARY: Under the Authority of Pub. L. 93–32 (87 Stat. 65) and in conformance with applicable agency policies and procedures as set forth in REA Bulletin 320–22, "Guarantee of Loans for Telephone Facilities," dated February 4, 1975, published in proposed form in the **Federal Register**, September 16, 1974, (Vol. 39 No. 180 pages 33228–33229) notice is hereby given that the Administrator of REA will consider providing a guarantee supported by the full faith and credit of the United States of America for a loan in the approximate amount of $18,228,000 to Telephone Utilities of Eastern Oregon, Inc. of Vancouver, Washington. The loan guarantee will be used to finance the construction of facilities to extend telephone service to new subscribers and improve telephone service for existing subscribers.

FOR FURTHER INFORMATION CONTACT: Mr. A. M. Gleason, President, Telephone Utilities of Eastern Oregon, Inc., 915 Main Street, Vancouver, Washington 98660–0014.

SUPPLEMENTARY INFORMATION: Legally organized lending agencies capable of making, holding and servicing the loan proposed to be guaranteed may obtain information on the proposed program, including the engineering and economic feasibility studies and the proposed schedule for advances to the borrower of the guaranteed loan funds from Mr. A. M. Gleason at the address given above.

In order to be considered, proposals must be submitted (within 30 days of the date of this notice) to Mr. Gleason. The right is reserved to give such consideration and to make such evaluation or other disposition of all proposals received, as Telephone Utilities of Eastern Oregon, Inc. and REA deem appropriate. Prospective lenders are advised that financing for this project will be available from the Federal Financing Bank under a standing loan commitment agreement with the Rural Electrification Administration.

Copies of REA Bulletin 320–22 are available from the Director, Public Information Office, Rural Electrification Administration, U.S. Department of Agriculture, Washington, D.C. 20250.

This program is listed in the Catalog of Federal Domestic Assistance as 10.851 in Rural Telephone Loans and Loan Guarantees.

Dated: March 7, 1983.

Harold V. Hunter,

Administrator.

[FR Doc. 83-6364 Filed 3-10-83; 8:45 am]

BILLING CODE 3410-15-M

Soil Conservation Service

Deer Ridge RC&D Measure, Iowa; Environmental Impact

AGENCY: Soil Conservation Service, USDA.

ACTION: Notice of a finding of no significant impact.

SUMMARY: Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the Deer Ridge RC&D Measure, Union County, Iowa.

FOR FURTHER INFORMATION CONTACT: William J. Brune, State Conservationist, Soil Conservation Service, 693 Federal Building, 210 Walnut Street, Des Moines, IA 50309, telephone 515–284–4260.

SUPPLEMENTARY INFORMATION: The environmental evaluation of this federally assisted action indicates that the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, William J. Brune, State Conservationist, has determined that the preparation and review of an environmental impact statement are not needed for this project.

The measure concerns a plan for Water-Based Fish and Wildlife Development. Planned works of improvement include the construction of a 3.9 acre pond, tree planting, and two parking lots.

The Notice of a Finding of No Significant Impact (FONSI) has been forwarded to the Environmental Protection Agency and to various Federal, State, and local agencies and interested parties. A limited number of copies of the FONSI are available to fill single copy requests at the above

address. Basic data developed during the environmental evaluation are on file and may be reviewed by contacting William J. Brune.

No Administrative action on implementation of the proposal will be taken until 30 days after the date of this publication in the **Federal Register.**

Finding of No Significant Impact for Deer Ridge RC&D Measure, Union County, Iowa

Introduction

Deer Ridge is a Federally assisted action authorized under Section 102 of the Food and Agriculture Act of 1962 (PL 87–703) and the Soil Conservation Service Act of April 27, 1935, (16 U.S.C. 590 a–f). Sponsors of this measure are the Union County Conservation Board and the Union County Soil Conservation District. An environmental evaluation was conducted in consultation with local, State and Federal agencies along with other interested organizations and individuals. Data developed during the evaluation are available for review at the following location: U.S. Department of Agriculture, Soil Conservation Service, 693 Federal Building, 210 Walnut Street, Des Moines, IA 50309.

Recommended Action

This measure plan includes the installation of a dam to provide a 3.9 acre pond, tree and shrub plantings for wildlife and two parking lots adjacent to a county road. The dam will have a fill height of 32 feet and the principal spillway will be a 15 inch corrugated metal pipe. The pond will receive drainage from 147 acres including grassland, and 3 acres of roads. Seventy-eight percent of this drainage area is adequately protected to control erosion.

Proposed work of improvement will be installed in accordance to Section IV of the Technical Guide prepared for the Union County Soil Conservation District.

Effects of Recommended Action

This measure will create a 3.9 acre pond for fish, waterfowl and other aquatic animals and maintain flow of 1.2 miles of stream for riparian wildlife.

Shrub plantings will provide travel lanes and increase diversity of habitat for wildlife. Tree plantings of adapted native hardwoods will be used to improve species composition and age class of existing woodland.

Two parking lots will be provided to facilitate walk-in access to the area and to eliminate roadside parking hazards.

Installation of this measure will cause no loss of wildlife habitat, no known cultural resource sites are involved and no endangered species will be affected.

There are no wetlands in the project area. No prime farmland will be affected.

Construction will temporarily accelerate erosion and increase concentration of exhaust smoke and dust.

Measures installed will be operated and maintained by the Union County Conservation Board.

Alternatives

No project action would not meet objective of developing areas for fish and wildlife habitat.

Installation of items included in measure plan will provide a pond with capability of maintaining minimum flows in stream below. Tree and shrub plantings will provide diversity of habitat for wildlife and two parking lots will provide off-road parking.

Conclusion

The Environmental Assessment indicates that this federal action will not cause significant local, regional or national impacts on the environment. Therefore, based on these findings, I have determined that an environmental impact statement for Deer Ridge RC&D Measure is not required.

Dated: March 2, 1983.

William J. Brune,

State Conservationist.

BILLING CODE 3410–16–M

Patterson Creek Subwatershed, West Virginia; Environmental Impact

AGENCY: Soil Conservation Service, USDA.

ACTION: Notice of a finding of no significant impact.

SUMMARY: Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the Fort Ashby Mill Race Channel Work, Patterson Creek Subwatershed, Mineral County, West Virginia.

FOR FURTHER INFORMATION CONTACT: Rollin N. Swank, State Conservationist, Soil Conservation Service, 75 High Street, Room 301, Morgantown, West Virginia, 26505, telephone 304–291–4151.

SUPPLEMENTARY INFORMATION: The environmental assessment of this federally assisted action indicates that the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Rollin N. Swank, State Conservationist, has determined that the preparation and review of an environmental impact statement are not needed for this project.

The project concerns a plan for flood control along the Fort Ashby Mill Race, a man made waterway. The planned works of improvement include 2,650 feet of channel work.

The Notice of a Finding of No Significant Impact (FONSI) has been forwarded to the Environmental Protection Agency and to various Federal, State, and local agencies and interested parties. A limited number of copies of the FONSI are available to fill single copy requests at the above address. Basic data developed during the environmental assessment are on file and may be reviewed by contacting Rollin N. Swank.

No administrative action on implementation of the proposal will be taken until 30 days after the date of this publication in the **Federal Register.**

BILLING CODE 3410–16–M

Upper Explorerland RC&D Area; Critical Area Treatment Measures, Iowa; Environmental Impact

AGENCY: Soil Conservation Service, USDA.

ACTION: Notice of a finding of no significant impact.

SUMMARY: Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for Critical Area Treatment Measures, Howard, Winneshiek, Allamakee, Fayette and Clayton Counties, Iowa.

FOR FURTHER INFORMATION CONTACT: William J. Brune, State Conservationist, Soil Conservation Service, 693 Federal Building, 210 Walnut Street, Des Moines, IA 50309, telephone 515–284–4260.

SUPPLEMENTARY INFORMATION: The environmental assessment of this Federally assisted action indicates that the project will not cause significant local, regional, or national impacts on the environment. As a result of these

findings, William J. Brune, State Conservationist, has determined that the preparation and review of environmental impact statements are not needed for these measures.

These measures concern plans for critical area treatment. The planned works of improvement include small grade stabilization structures, tile outlet terraces and diversions, sediment and water control basins, critical area planting, debris basins, streambank protection, and fencing.

The Notice of a Finding of No Significant Impact (FONSI) has been forwarded to the Environmental Protection Agency and to various Federal, State, and local agencies and interested parties. A limited number of copies of the FONSI are available to fill single copy requests at the above address. Basic data developed during the environmental assessment are on file and may be reviewed by contacting William J. Brune.

Finding of No Significant Impact for Critical Area Treatment Measures in the Upper Explorerland RC&D Area, Iowa

Introduction

Critical Area treatment measures in the Upper Explorerland RC&D Area are Federally assisted actions authorized under Section 102 of the Food and Agriculture Act of 1962 (PL-703) and the Soil Conservation Act of April 27, 1935, (16 U.S.C. 590 a-f). The Upper Explorerland RC&D Area encompasses Allamakee, Clayton, Fayette, Howard and Winneshiek Counties (2,114,560 acres) in northeast Iowa. An interdisciplinary assessment of the environment was made by the Soil Conservation Service in consultation with local, state and federal agencies and interested persons during the planning of these measures.

Data developed during the assessment are available for review at the following location: U.S. Department of Agriculture, Soil Conservation Service, 693 Federal Building, 210 Walnut Street, Des Moines, Iowa 50309.

Recommended Action

About 30 miles of trout streams, approximately 500 severely eroding areas along public roads and facilities, and eroding areas on private land where damage occurs to public facilities, will be treated by installation of these measures. These are critical areas requiring special treatment, some of which may involve replacement of existing bridges with grade stabilization structures. The area estimated to be affected by measure action is 6,000 acres within the RC&D area. Measure sites are identified by local elected officials or the affected landowners. The planned actions are reviewed by RC&D Steering Committees, Soil Conservation Districts, planning commissions, and citizens groups at public meetings. All critical area treatment measure plans are reviewed through the Project Notification and Review System.

Each measure is individually planned and environmentally assessed. The State Division of Historic Preservation, Iowa Conservation Commission, local historical societies, and other groups are consulted for impact appraisal.

Project actions include some or all of the following erosion control practices; small grade stabilization structures; tile outlet terraces and diversions; sediment and water control basins; critical area plantings; debris basins; streambank protection; and fencing. Typical grade stabilization structures and debris basins will consist of vegetated earth dams 5-30 feet high with or without pools. Pools may cover from 1 to 5 acres with an average depth of 8 feet. Tile outlet terraces are earthen embankments constructed across slopes and range from 1 to 6 feet high. Surface inlets drain runoff water through underground conduits. The tile outlet terraces will be located in cropland. Diversions will be associated with areas in permanent vegetative cover.

Sediment and water control basins are short, earth embankments constructed generally across slopes and minor watercourses that drain runoff through underground conduits. Critical area planting is accomplished by vegetating seriously eroding areas.

Effects of Recommended Action

The planned action will change approximately 2000 acres from gullies along roads and in other land uses to permanent vegetation. Other areas (approximately 4000 acres) will be protected from excessive erosion with permanent vegetation or structural measures. Erosion of areas to be treated by measure action will be reduced at least 60 percent. Water quality in the area will be improved by reduced yields of sediment and the attached pesticides and nutrients to downstream areas. Installation of the measures will temporarily increase erosion and sedimentation during the construction period extending up to three months. Sediment leaving construction areas will not exceed limits established by soil conservation districts. About 100 multiple use structures will be encouraged and will contribute to the esthetic appeal of the area. Approximately 2500 acres of grasses and legumes will be established as critical area plantings. Terrestrial wildlife habitat will be changed. About 1500 acres of upland terrestrial habitat consisting of woody vegetation, grazed grassland, and crop fields will be changed to ecosystems of grasses and legumes on approximately 1200 acres and aquatic habitat on 300 acres. Impoundments to prevent gullying of small ephemeral water courses will decrease peak flows and increase duration of downstream flow. Reduced peak discharge will increase stability of the gullies.

Where gullies are damaging roads, installation of these measures will decrease traffic hazards and will reduce maintenance costs of roads and bridges. Construction will temporarily disrupt traffic. Elimination of gullies used for trash dumps will improve esthetics and reduce potential for vectors. Pools associated with these measures may increase the incidence of mosquitoes in this predominantly rural area.

Consultation with the State Historic Preservation Officer and local historical societies and groups will be used to plan these measures so that installation will not adversely affect any important archeological, historical, or other cultural resource. Biological assessments of the affected areas will be used so no habitat of threatened and/or endangered species will be affected. No wetlands, perennial streams, or important aquatic ecosystems will be affected. Required treatment associated with these measures will insure that prime farmlands will not be degraded by erosion or sedimentation.

Alternatives

The planned action consists of a set of alternative measures that best solve the land resource problems. The only other reasonable alternative is no action. The effects of the no-action alternative are the continued production of sediment; continued pollution to downstream areas and reservoirs; continued damage to roads and other public facilities; and an increasing traffic safety hazard. Gullies would continue to attract dumping.

Conclusion

The Environmental Assessment indicates that this federal action will not cause significant local, regional or national impacts on the environment. Therefore, based on these findings, I have determined that environmental impact statements for Critical Area Treatment Measures in the Upper Explorerland RC&D are not required.

Dated: March 2, 1983.

BILLING CODE 3410-16-M

Moncove Lake Critical Area Treatment RC&D Measure, West Virginia; Environmental Impact

AGENCY: Soil Conservation Service, U.S.D.A.

ACTION: Notice of a finding of No Significant impact.

FOR FURTHER INFORMATION CONTACT: Mr. Rollin N. Swank, State Conservationist, Soil Conservation Service, 75 High Street, Room 301, Morgantown, West Virginia 26505, telephone 304-291-4151.

SUPPLEMENTARY INFORMATION: Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agricultural, gives notice that an environmental impact statement is not being prepared for the Moncove Lake Critical Area Treatment RC&D Measure, Monroe County, West Virginia.

The environmental assessment of this federally assisted action indicates that the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Mr. Rollin N. Swank, State Conservationist, has determined that the preparation and review of an environmental impact statement are not needed for this project.

The measure concerns critical area treatment at Moncove Lake. The planned works of improvement will include a water control structure, small check dams, stone lined channel, and revegetation of a critical area. These works of improvement will enable the Sponsors to establish vegetation and reduce the erosion to the critical area. This will improve the water quality and reduce the sedimentation to the lake.

The Notice of a Finding of No Significant Impact (FONSI) has been forwarded to the Environmental Protection Agency. Basic data developed during the environmental assessment are of file and may be reviewed by contacting Mr. Rollin N. Swank, State Conservationist. An environmental impact appraisal has been prepared and sent to various Federal, State, and local agencies and interested parties. A limited number of copies of the environmental impact appraisal are available to fill single copy request at the above address.

No administrative action on implementation of the proposal will be taken until 30 days after the date of this publication in the **Federal Register**.

DEPARTMENT OF COMMERCE

International Trade Administration

Certain Softwood Products From Canada; Preliminary Negative Countervailing Duty Determinations

AGENCY: International Trade Administration, Commerce.

ACTION: Preliminary negative countervailing duty determinations.

SUMMARY: We preliminarily determine that certain benefits which constitute subsidies within the meaning of the countervailing duty law are not being provided to manufacturers, producers, or exporters in Canada of certain softwood products, as described in the "Scope of Investigations" section of this notice. The total estimated net subsidy for each product is *de minimis*, and therefore our preliminary countervailing duty determinations are negative.

If these investigations proceed normally, we will make our final determinations by May 23, 1983.

EFFECTIVE DATE: March 11, 1983.

FOR FURTHE INFORMATION CONTACT: Roland MacDonald or Mary S. Clapp, Office of Investigations, Import Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, D.C. 20230, telephone: (202) 377-4087 or (202) 377-2438.

SUPPLEMENTARY INFORMATION:

Preliminary Determinations

For purposes of these investigations, the following programs are preliminarily found to confer subsidies to the producers of the products under investigation. The total estimated net subsidies are 0.32 percent *ad valorem* for softwood lumber, 0.24 percent *ad valorem* for softwood shakes and shingles, and 0.29 percent *ad valorem* for softwood fence. These *ad valorem* subsidies are *de minimis*. Therefore, we preliminarily determine that there is no reason to believe or suspect that certain benefits which constitute subsidies within the meaning of section 701 of the Tariff Act of 1930, as amended (the Act), are being provided to manufacturers, producers, or exporters in Canada of certain softwood products, as described in the "Scope of the Investigations" section of this notice. Our preliminary determinations are negative.

A. Federal Programs

1. Investment Tax Credit.
2. Program for Export Market Development.
3. Forest Industry Renewable Energy Program.
4. Regional Development Incentives Program-Grants.

B. Federal/Provincial Programs

1. Agricultural and Rural Development Agreements.
2. General Development Agreements.
   a. Federal/Provincial Industrial Subsidiary Agreements.
   b. British Columbia—Assistance to Small Enterprise Program.
   c. New Brunswick.

(1) Northeast New Brunswick Development Program.
(2) Kent Region Pilot Project.
(3) Industrial Development Subsidiary Agreements.
d. Canada/Nova Scotia Forestry Subsidiary Agreement—Sawmill Improvement Component Grants.

C. Provincial Programs

1. Alberta—Timber Salvage Incentive Program.
2. British Columbia

b. Stumpage Payment Deferral.
3. Ontario—Stumpage Billing Deferral.
4. Québec.
a. Société de Récupération, d'Exploitation et de Développement Forestiers du Québec.
b. FRI Tax Abatement Program.
c. SDI Export Expansion Program.

Case History

On October 7, 1982, we received a petition from counsel for the United States Coalition for Fair Canadian Lumber Imports on behalf of a number of producers in the United States of certain softwood products. The petitioner alleged that certain benefits which constitute subsidies within the meaning of section 701 of the Act are being provided, directly or indirectly, to manufacturers, producers, or exporters in Canada of certain softwood products. We found the petition to contain sufficient grounds upon which to initiate countervailing duty investigations, and on October 27, 1982, we initiated countervailing duty investigations (47 FR 49878). We stated that we expected to issue preliminary determinations by December 31, 1982. We subsequently determined that the investigations are "extraordinarily complicated," as defined in section 730(c) of the Act, and postponed our preliminary determinations for 65 days until March 7, 1983 (47 FR 56688).

Since Canada is a "country under the Agreement" within the meaning of section 701(b) of the Act, injury determinations are required for these investigations. Therefore, we notified the U.S. International Trade Commission (ITC) of our initiations. On November 22, 1982, the ITC determined that there is a reasonable indication that these imports are materially injuring U.S. industries.

We presented questionnaires concerning the allegations to the Embassy of Canada in Washington, D.C. on December 6, 1982. On January 4, 1983, we received responses. Additional information was received on January 17, 1983. A supplemental questionnaire was presented on February 9, 1983, and a response was received on February 23, 1983. Additional information was submitted on numerous dates.

Scope of the Investigations

The products covered by these investigations are:
- Softwood lumber.
- Softwood shakes and shingles.
- Softwood fence.

The products are fully described in appendix A of this notice. There is a large number of producers and/or exporters of certain softwood products in Canada (approximately 1800). The period for which we are measuring subsidization is calendar year 1981.

Analysis of Programs

In its responses, the government of Canada (GOC) provided data at the federal and provincial levels for the applicable periods. In addition, information was provided by counsel for the Canadian producers and counsel for the petitioners.

General principles applied by the Department of Commerce (the Department) to the immediate investigations concerning certain softwood products from Canada, many of which are repeated throughout this notice, are described in detail below. Specific principles are discussed in the appropriate sections of this notice.

Petitioners alleged that respondent companies have received numerous grants for various purposes. Grants determined to be countervailable have been treated according to the Department's established methodology.

To calculate the benefit received from the type of grants being considered in these investigations, we allocated the present value of grants "tied" to the purchase of capital equipment over the number of years reflecting the average useful life of equipment used by the sector which produces the products under investigation. A grant is considered tied where the intended use is known to the donor, and where such use is acknowledged prior to, or concurrently with, its bestowal. The majority of grants encountered in these investigations have been tied to capital investment in plants and equipment, and have been allocated over a 15-year period representing the average useful life of sawmill plants and equipment. The Canadian government has indicated that its own survey of the industry establishes a conservatively estimated combined average useful life for sawmill equipment and buildings of 15 years.

In the grant methodology, we determine the present value of grants in order to calculate the current value of the benefit to the grant recipient. The calculation of the present value of funds received is a mechanism for allocating money received in one year to other years and is calculated using a discount rate. For these preliminary determinations, we determine that the most appropriate discount rate is the "risk-free" rate, as established by the secondary market rate for long-term (10 years and over) Canadian government debt. The foundation of a country's interest rate structure is usually its government's debt interest rate (the "risk-free rate"). The source used to determine the Canadian "risk-free" rate was *Financial Statistics* published by the Organization for Economic Co-operation and Development (OECD).

Certain small grants were expensed in the year received for reasons discussed in the "Programs Preliminary Determined to Confer Subsidies" section of this notice in the appropriate program descriptions.

We normally use data from a uniform period in calculating subsidies. The response contained mutually exclusive data based on both fiscal years and calendar years. Where the grants were reported on a fiscal year basis, we used those amounts as the best information available and allocated the calculated net benefit over annual sales values. Where information provided was based on fiscal year performance and it was necessary to apply a discount rate, a fiscal year discount rate was calculated by averaging the appropriate monthly rates. We will seek information regarding these benefits on a calendar year basis.

Unless otherwise stated in the "Programs Preliminarily Determined to Confer Susidies" section of this notice, the denominator used to calcuate an *ad valorem* subsidy depended on whether the response reported loans and grants to producers of the products under investigation on a product-by-product basis or on a combined basis. Where loans and grants were reported on a product-by-product basis, we allocated the benefits over the total sales, for the most recent year for which data are available, of the producers of that specific product.

Where loans and grants were reported on a combined basis for some or all of the products under investigation, we allocated the benefits over the total sales, for the most recent year for which data are available, of the producers of those certain softwood products.

To determine the total sales figures for the producers of the products under investigation, we used sales statistics provided by the GOC, which are the most recent and best data available. We

adjusted these statistics as necessary to reflect more accurately the total sale of the producer of each of the products under investigation.

Based on our analysis to date of the petition and responses to our questionnaires, we have preliminarily determined the following.

I. Programs Preliminarily Determined to Confer Subsidies

We preliminarily determine that subsidies are being provided to manufacturers, producers, or exporters in Canada of certain softwood products included in these investigations under the programs described below. The total estimated net subsidy for each product under investigation, however, is *de minimis*, and therefore our preliminary determinations are negative.

A. Federal Programs

1. *Investment Tax Credit.* The investment tax credit program is a federal program which provides income tax credits in amounts ranging from 7 to 50 percent for new depreciable manufacturing assets. This tax incentive is available to all entities that purchases equipment for manufacturing; processing; or activities involving oil and gas production, mining of minerals, processing mineral ore, prospecting or exploring for mineral resources, logging, farming, fishing, storing grain, and processing industrial minerals.

The amount of the credit received depends upon where the depreciable assets will be used. A credit of 50 percent of the capital cost of the depreciable assets is given to companies located in areas of Canada containing five percent of the population suffering the most from high family unemployment and low per capita income. These areas were not specifically identified in the GOC's responses. Since all areas of each province in Canada are specified in the regions eligible for one of the 20 percent, 10 percent or 7 percent credits, we assume that the 50 percent credits apply to locations within the above areas which meet the eligibility requirements relating to unemployment and low income. Companies located in the Atlantic area (Newfoundland, Prince Edward Island (PEI), Nova Scotia, New Brunswick and the Gaspe Peninsula) receive 20 percent of the capital cost of depreciable assets as a tax credit. Companies located in the Regional Development Incentive Program (RDIP) area (all of Canada except the southern portions of British Columbia (BC), Alberta and Ontario) receive 10 percent. All other areas in Canada receive the basic 7 percent credit (southern BC, southern Alberta and southern Ontario).

The investment tax credit is not available to all companies on equal terms. A larger tax credit is available to companies in designated areas. The criteria of "high family unemployment" and low per capita income are subjective criteria which are not "triggered" automatically. Based on information currently available to the Department, this criteria for eligibility could be operated to limit benefits to companies within specific regions. Therefore, we find that the tax credits in excess of 7 percent are limited to companies located within specific regions, and we preliminarily determine that the tax credits in excess of 7 percent confer benefits which constitute a subsidy.

The GOC reported that there are no statistics indicating the amount of tax credit clamied by the producers of the products under investigation in each of the four rate categories of the investment tax credit program.

Therefore, for the purposes of these preliminary determinations, the investment tax credits claimed in 1980 (the most recent period for which information is available) were evenly allocated to each of the four rate categories, and were used by the Department as best information available. Having assigned an amount to each category, the capital cost of the depreciable assets eligible for credits was calculated for each of the four categories.

The subsidy calculation for this program accounts for the fact that an investment tax credit immediately reduces the depreciable value of an asset. The capital cost allowance benefits lost because of the investment tax credit were captured in the subsidy calculation. For purposes of these preliminary determinations, we assumed: (1) That the investment tax credit is taken in the year in which the asset is acquired, and (2) that the capital cost allowance taken in conjunction with the investment tax credit would be equal to 25 percent, the rate applicable for the year in which an asset is acquired. The net benefit from the capital cost allowance is equal to the amount of the deduction multiplied by the taxpayer's tax rate. Since provincial governments use a taxpayer's federal taxable income as the base for calculating provincial taxes, we used the combined federal and provincial tax rate of 41 percent (in 1979) as the best information available for the purposes of our calculation.

Only the amounts in excess of the 7 percent level were found countervailable since the 7 percent tax credit is not limited to specific industries, groups of industries, or regions. The benefit to softwood lumber, and to shakes and shingles was allocated over the value of total 1980 sales for sawmills and planing mills and a subsidy of 0.9 percent ad valorem was calculated. The benefit to fence was allocated over the value of total 1980 sales of miscellaneous wood products, and a subsidy of 0.05 percent *ad valorem* was calculated. (In both instances, 1980 is the most recent period for which information is available.)

2. *Program for Export Market Development (PEMD).* PEMD is administered by the Canadian Department of Industry, Trade and Commerce and is available to all businesses in the manufacturing or service sectors which export, including producers of the products under investigation. The program facilitates the development of export markets for Canadian products by funding various companies' export market development activities through interest-free loans with forgivable repayment terms. If sales result from such activities, the funds must be repaid at a rate of two percent of sales generated for a period of three years up to the amount of assistance provided.

Only two projects were funded at a total of Canadian $4,077 by PEMD to develop market opportunities in the United States for the products under investigation. Because the sole purpose of PEMD is to stimulate exports, we preliminarily determine that assistance provided under the program confers benefits which constitute export subsidies. We allocated the benefit over the total 1981 exports sales to the United States of the products under investigation. However, the amount of the benefit provided to exporters of the products under investigation is so small relative to the value of exports to the United States of the products under investigation that the subsidy is less than 0.001 percent *ad valorem*.

3. *Forest Industry Renewable Energy Program.* The Forest Industry Renewable Energy (FIRE) program is administrated by the federal Department of Energy, Mines and Resources. The purpose of the program, which began in 1979, is to encourage the substitution of biomass energy sources for fossil fuels by companies that would otherwise have no economic incentive to do so. FIRE assistanace is given in the form of taxable grants that are tied to the purchase of captial equipment

(facilities for burning biomass in place of fossil fuels).

Prior to April 1, 1981, funds were made available under the FIRE program only to "forest industry firms," as defined by the GOC according to the Treasury Board submission of August 10, 1978. Thereafter, FIRE assistance became available to all industries throughout Canada according to the Treasury Board submission of January 8, 1981. Because the FIRE program by its terms limited eligibilty for grants to a designated group of industries for the first two years of its existence, we preliminarily determine that the benefits received by the producers of the products under investigation during that period conferred subsidies within the meaning of the Act. Benefits after that period did not confer subsidies because eligibility was not limited to a specific industry, group of industries or companies in specific regions.

The benefit is based on the amount of grants received by the producers of the products under investigation during the first two years of the program's existence. We calculated the benefit to these producers in accordance with the grant methodology described in the "Analysis of Programs" section of this notice. We allocated the benefit received over the total sales value of the producers of the products under investigation, and calculated a subsidy of 0.003 percent *ad valorem*.

4. *Regional Development Incentives Program (RDIP)—Grants.* The RDIP is administered by the federal government's Department of Regional Economic Expansion (DREE) for the purpose of creating stable employment opportunities in areas of Canada where employment and economic opportunity are chronically low. The program provides development incentives (grants) and loan guarantees to manufacturers whose capital investment projects for establishing new facilities are expanding or modernizing existing facilities will create jobs and economic opportunities in areas designated as economically disadvantaged. Loan guarantees are discussed in the "Program Preliminarily Determined Not to Confer Subsidies" section of this notice. The Governor in Council may designate a region upon the report of the Minister of the DREE, if satisfied that existing opportunities for productive employment in the region are exceptionally inadequate and the provision of development incentives will make a significant contribution to economic expansion and social adjustment within that region. Development incentives and loan guarantees are currently not available to manufacturing and processing industries located in southern Ontario, southern Alberta and southern BC.

The prime criterion for DREE approval of a proposed project is the likelihood that the project will provide needed economic opportunities and social adjustment. Projects which would proceed without RDIP assistance are ineligible.

The GOC stated in its responses that grants have been provided to producers of the products under investigation. We preliminarily determine that grants provided through the RDIP program of DREE confer subsidies because the benefits are limited to companies located within specific regions.

The subsidy to producers of the products under investigation has been calculated according to the grant methodology as described in the "Analysis of Programs" section of this notice.

The amounts of grants received since fiscal 1970 (when the program started) were provided on a product-by-product basis. Therefore, we have calculated a separate subsidy for each product. The amount of subsidy provided by RDIP grants is 0.18 percent *ad valorem* for softwood lumber, 0.07 percent *ad valorem* for softwood shakes and shingles, and 0.15 percent *ad valorem* for softwood fence.

B. Federal/Provincial Programs

1. *Agricultural and Rural Development Agreements (ARDA) Programs.* The Agricultural and Rural Development Act was the federal legislation establishing the ARDA's. These agreements resulted from joint determinations by the federal and provincial governments that government action is required to promote economic development and to alleviate conditions of social and economic disadvantages in certain rural areas. These agreements are available to all provinces throughout Canada and can be negotiated at provincial initiative; however, only BC and Ontario have entered into these agreements.

There are six programs under the General ARDA's and the producers of the products under investigation have received grants under the "Alternative Income and Employment Opportunities in Rural Development Region" program of the agreements. This program provides grants for the establishment, expansion, or modernization of production facilities in an effort to increase income and alternative employment opportunities for low income people in designated rural areas of a province. Both BC and Ontario have received federal funds to finance 50 percent of the assistance given under this program for rural areas which are "economically depressed." As the eligibility is limited to companies located within specific regions, we preliminarily determine that benefits under this program confer a subsidy.

There is a Special ARDA program which supplements the General ARDA and which is aimed at improving employment and income opportunities for people of native ancestry in rural BC. The rural area is defined in the Canada-British Columbia Special Rural Development Agreement which provides that ten specifically defined areas are not eligible for assistance under this program.

The Special ARDA advisory committee considers the relative isolation of the community, the number of residents affected and the projected impact the proposal will have on future economic development.

The maximum contribution through Special ARDA is 50 percent of the expected costs of buildings, machinery and initial working capital.

The GOC responses state that sixteen projects, tied to the purchase of equipment and construction of buildings, were undertaken by producers of the products under investigation. These projects were available in areas with a population of less than 2,000 residents of whom at least 30 percent were of native ancestry. The Special ARDA grants were funded equally by the federal and provincial governments as were those under the General ARDA. Because the program limits availability to companies located in rural areas, we preliminarily determine that it confers subsidies.

We used the grant methodology which is described in the "Analysis of Programs" section of this notice to calculate the benefits under the ARDA programs. The benefits were allocated over the total sales value of producers of the products under investigation and a total subsidy of 0.004 percent *ad valorem* was calculated for grants received under General and Special ARDAs.

2. *General Development Agreements.* As part of its activities to spur development in Canada, DREE entered into 10-year General Development Agreements (GDA's) with all provinces except PEI. A similar 15-year comprehensive development plan exists for PEI. GDA's have become the principal instruments of DREE's development policies, both in terms of expenditure and coordination of planning and programming. Within each GDA, specific subsidiary agreements

have been negotiated with individual provinces. These mainly fund general planning, infrastructure and community development, although some assistance has been provided to individual companies.

a. *Federal/Provincial Industrial Development Subsidiary Agreements.* Under the GDA's described above, Industrial Development Subsidiary Agreements with provisions for assistance to small enterprises are available to all provinces and were negotiated with Ontario, Manitoba, BC and New Brunswick. The GOC states that funds were provided to producers of the products under investigation only in the latter two provinces.

b. *British Columbia—Assistance to Small Enterprise Program (ASEP).* This program was established by a BC Order in Council on July 7, 1977. Under the program, small enterprises with sales of less than Canadian $500,000 located in areas other than "Lower Mainland" and "Southern Vancouver Island" are eligible for interest-free forgivable loans for approved projects for new facilities or the expansion or modernization of existing facilities.

For new projects, benefits can be as much as 50 percent of the "eligible capital cost" of the project or Canadian $30,000, whichever is less. For expansion or modernization projects, the limit is the lesser of 30 percent or Canadian $18,000. The applicant is required to provide new equity of at least 20 percent of the total cost of the project. Producers of the products under investigation received interest-free forgivable loans under this program between 1976 and 1981.

We preliminarily determine that benefits under this program are countervailable because they are limited to companies located within specific regions. Because loans under the programs are forgivable and the majority apparently have already been forgiven, we treated the benefits as grants.

In calculating the benefits, we used the grant methodology which is described in the "Analysis of Programs" section of this notice. The benefits under this program amount to a subsidy of 0.003 percent *ad valorem* for softwood lumber, 0.05 percent *ad valorem* for shakes and shingles, and 0.02 percent *ad valorem* for fence.

c. *New Brunswick—NED, KED and SIFAP.* Three parts of the subsidiary agreement between New Brunswick and the federal government provide assistance to small enterprises in the province. These are the Northeast New Brunswick Development (NED), the Kent Region Pilot Project (KED), and the Industrial Development Subsidiary Agreements (SIFAP). The responses of the GOC state that no applications for funds under these programs were accepted during the 1980–81 fiscal year, and that no funds were disbursed since March 31, 1982.

The benefits under these programs were interest-free forgivable loans. The total amount of funding provided could not exceed 50 percent of the cost of new manufacturing or processing facilities or 30 percent for modernization or expansion of existing facilities. To be eligible, firms had to have average sales of less than Canadian $1,000,000 over the past two years and had to be located in development regions, which varied for each of the three programs. Companies were required to make a contribution of new equity of at least 20 percent of the cost of a project. Producers of the products under investigation received interest-free forgivable loans under this program between 1978 and 1981.

We preliminarily determine that benefits under NED, KED, and SIFAP are countervailable because they are limited to companies located within specific regions. Because loans under the programs are forgivable and the majority apparently have already been forgiven, we treated the benefits as grants.

In calculating the benefits, we used the grant methodology which is described in the "Analysis of Programs" section of this notice. The benefits under this program amount to subsidies of 0.006 percent *ad valorem* for softwood shakes and shingles, and 0.007 percent *ad valorem* for softwood fence. However, the amount of the benefit provided to producers of softwood lumber is so small relative to the value of total sales of the producers of softwood lumber that the subsidy is less than 0.001 percent *ad valorem*.

d. *Canada/Nova Scotia Forestry Subsidiary Agreement—Grants.* Subsidiary agreements for forest management could be negotiated under the GDAs. Forestry subsidiary agreements have been reached with seven provinces.

Under the Nova Scotia forestry subsidiary agreement, grants were provided to producers of the products under investigation under two components, the sawmill improvement component and the forest management component. The forest management component grants are discussed in the "Programs Preliminarily Determined Not to Confer Subsidies" section of this notice. The forestry subsidiary agreements with other provinces are discussed in the "Programs Preliminarily Determined Not to Confer Subsidies" and the "Programs Preliminarily Determined Not to Be Used" sections of this notice.

The sawmill improvement component of the Canada/Nova Scotia Forestry Subsidiary Agreement provided grants of up to Canadian $50,000 per mill to encourage the adoption of improved sawmilling technology, better safety and improved conditions. The GOC states that the grants under this component were designed and used to offset the short-term operating expenses and the lower productivity associated with the installation of improved sawmilling technology and better safety and working conditions in the recipient mill.

The GOC stated in its responses that producers of the producers under investigation received improvement grants. We preliminarily determine that this grant program confers a subsidy on producers of the products under investigation because eligibility is limited to sawmills.

Because the grants were used to offset short-term operating expenses, we allocated them to the year received. We assumed that all funds were received in 1981, because the response did not provide a breakdown by year of receipt. We allocated the benefits over total sales by sawmills to calculate a subsidy of 0.006 percent *ad valorem*.

C. Provincial Programs

1. *Alberta.*—Timber Salvage Incentive Program. The Timber Salvage Incentive Program was created in response to the problem of harvesting large amounts of timber damaged or destroyed by fire or insects. Ordinarily, it is the companies' responsibility to salvage timber damaged by natural causes. The responses state that because of the depressed lumber markets, the companies have been unable to salvage the damaged timber economically. Because it is the province's interest to have the timber harvested (if it is not harvested there is a danger that fire and disease will spread, and reforestation cannot be carried out), the government instituted the Timber Salvage Incentive Program effective November 1, 1981 through October 31, 1983. The program provides an incentive of Canadian $34 per thousand board feet of lumber manufactured from fire-killed and beetle-killed timber. These payments are available only to producers of lumber.

The GOC's responses state that despite the incentive payment, the companies did not recover the additional costs associated with harvesting damaged timber. The GOC acknowledges, however, that the

companies are expected to salvage damaged timber at their expense as part of their contribution to the long-term management of Alberta's forests. Furthermore, as noted above, only lumber producers receive these grants. Accordingly, we preliminarily find that payments received by softwood lumber producers under this program during the period for which we are measuring subsidization are grants which confer subsidies. Because these grants specifically apply only to lumber, they do not confer benefits on softwood shakes and shingles or softwood fence. We have expense the 1981 incentive payments in the year received and allocated them over the total sales value of softwood lumber in 1980 (the most recent period for which information is available) to find to subsidy of 0.008 percent *ad valorem* for softwood lumber.

2. *British Columbia.*—a. *Low-Interest Loan Assistance (LILA).* The joint Canada-British Columbia Industrial Development Subsidiary Agreement (IDSA) of 1977 established the LILA program which provides business enterprises with loans at favorable interest rates. LILA was authorized by administrative action after the IDSA Agreement was signed. The British Columbia Development Corporation (BCDC) acts as trustee for the province in administering the LILA program and as the trustee, reports to the BC Ministry of Industry and Small Business Development on activities under this program. Funding for the LILA program is provided through the budget of the BC Ministry of Industry and Small Business Development and/or loans by BCDC from the BC Ministry of Finance.

The purpose of LILA is to enhance the province's industrial base by assisting in the establishment, modernization, or expansion of manufacturing and processing firms, or by assisting those companies providing services to the manufacturing/processing sector located in the province. A LILA loan must be used for capital improvements for plant expansion or modernization, or for the establishment of a new production facility which will create new economic activity and benefits.

Generally an applicant must make a minimum equity contribution to the project of 15 percent. The loan size (within the range of Canadian $18,000 to Canadian $200,000) is a maximum of one third of the capital costs of the fixed assets being purchased. The maximum term of a LILA loan is the lesser of three years or the economic life of the fixed asset. The GOC's responses indicate that loans may be amortized over a longer period but must be financed at commercial rates for any excess period. The LILA loan rate is established twice a year on March 15 and September 15, and is the BCDC's prime commercial rate divided by two, subject to a maximum interest rate of 10 percent per year. No principal or interest payments are required for the first six months (prior to 1981, 12 months) following the initial disbursement of the loan. LILA loans are secured by means of debentures, mortgages or personal guarantees, and there are no forgiveness provisions.

During the period 1978 through September 30, 1982, producers of softwood lumber and fence received 24 loans. From February 1978 to April 1979, loans were not available to companies located within the "lower Mainland and southern Vancouver Island" regions. After April 1979, companies in all regions of BC could apply for funds. Therefore, we preliminary determine that all four loans given during February 1978 to April 1979 are countervailable because the availability of LILA loans during that period was limited to companies within specific regions, and loans were provided on terms inconsistent with commercial considerations.

To calculate the subsidy rate for LILA loans given at a non-commercial interest rate, we compared what a company would pay a normal commercial lender in principal and interest in any given year with what was actually paid on the loan in that year. For purposes of the preliminary determinations, we included the one-year deferral of principal and interest payments in our subsidy calculations. The benchmark rate used was the chartered banks' prime rate in Canada, as reported in the OECD *Financial Statistics*. After calculating the payment differential in each year of the loan, we then calculated the present value of this stream of benefits in the year the loan was made using the secondary market bond yield for Canadian government bonds (one to three years), as reported in the OECD *Financial Statistics*, as the discount rate.

The GOC did not report the precise terms of individual loans. Because the program limits the loans to a term of the lesser of three years or the economic life of the fixed assets purchased, we allocated the benefits over three years as the best information available. Any amount financed beyond this period must be at commercial rates.

Benefits from the four LILA loans used by producers of softwood lumber and fence during February 1978 through April 1979 were allocated over the total sales value of the producers of softwood lumber and fence. We calculated a subsidy of 0.001 percent *ad valorem*.

b. *Stumpage Payment Deferral.* The Fort Nelson Selling Price Zone was created in northeastern BC in recognition of the problems of logging in spruce swamplands where logging is only possible after "freeze-up" (mid-November to March 1). However, the lumber mills operate over a 12-month period. The volumes logged during the period November through February are allocated during the period November through October and stumpage is billed accordingly, regardless of the month in which the lumber was actually cut. Only licensees within the Fort Nelson Selling Price Zone are eligible for this deferral.

We preliminarily determine that this deferral of stumpage payments confers a subsidy since the deferral eligibility is limited to companies located within a specific region and the deferral is preferential as compared with other companies in the province. The subsidy was calculated by taking the difference between the monthly stumpage payments due based on when the timber was actually cut and the monthly stumpage payments due based on the 12-month distribution plan. The best information available for calculating the benefit from the deferral of stumpage payments due was billing information for the period November 1981–October 1982.

However, the amount of the benefit provided to producers of the products under investigation is so small relative to the value of sales of the products under investigation to the United States that the subsidy is less than 0.001 percent *ad valorem*.

3. *Ontario.—Stumpage Billing Deferral.* In December 1981, the government of Ontario initiated a six-month program whereby billings for stumpage payments could be deferred for approved applicants. The program was extended for an additional six months.

The GOC in its responses indicates that this program was available only to sawmills. Therefore, we preliminarily determine that the program conferred a subsidy on the products under investigation because the benefits were limited to sawmills.

The subsidy was calculated by treating the amount of stumpage payments deferred during the period for which we are measuring subsidization as a short-term loan at a zero interest rate. We multiplied the amount of the loan by a benchmark short-term interest

rate, the three-month Treasury bill rate in Canada, for the one month in which billings were deferred in 1981. However, the amount of the benefit provided to sawmills is so small relative to the total sales value of the products of sawmills that the subsidy is less than 0.001 percent *ad valorem*.

4. *Québec.* a. *Société de Récupération, d'Exploitation et de Développement Forestiers du Québec.* The Société de Récupération, d'Exploitation et de Développement Forestiers du Québec (REXFOR) was incorporated in 1973 under Québec's REXFOR Act as a provincial Crown corporation. Jointly administered by the Ministére des Finances and the Ministére de l'Energie et des Ressources of Québec, its entire stock is allotted to the former, which approves REXFOR's operating and investment budgets.

REXFOR was created to manage specific provincially owned forest lands, to preserve and protect provincial forest lands through silviculture, and to encourage the development of the "forest industry" in Québec. REXFOR owns sawmills and pulp and paper mills, and produces the softwood products under investigation as well as a wide variety of products not under investigation. In carrying out these activities, REXFOR receives funds from both the Canadian and Québec governments, and is also an active investor in and provider of funds to the "forest products industry" in Québec.

(1) *Assistance to REXFOR from the Government of Canada.* REXFOR and three of its subsidiaries producing softwood lumber received six RDIP grants from DREE. These grants, which we preliminarily determine to confer subsidies, are included in the federal portion of the "Programs Preliminarily Determined to Confer Subsidies" section of this notice.

(2) *Assistance to REXFOR from the Government of Québec.* (a) Loans and Loan Guarantees. Between 1973 and 1977, REXFOR and its subsidiaries received a number of loans and a loan guarantee from the government of Québec at interest rates inconsistent with commercial considerations. We consider these loans and loan guarantee to have been targeted to a specific company. Accordingly, we preliminarily determine that these loans and loan guarantee confer a subsidy on REXFOR.

To calculate the subsidy for the loans and the loan guarantee made by the government of Québec to REXFOR, we compare the principal and interest a company would pay a normal commercial lender in any given year with amounts actually repaid in that year. For purposes of these preliminary determinations, we included deferral of principal and interest payments in our subsidy calculations.

The benchmark rate used was the chartered banks' prime rate in Canada as published in the OECD *Financial Statistics*. After calculating the payment differential in each year of the loan, we then calculated the present value of this stream of benefits in the year the loan was made, using the secondary market bond yield for Canadian government bonds, as published in the OECD *Financial Statistics*, as the discount rate.

We allocated the benefits from these loans and loan guarantee over the total sales of the producers of softwood lumber and shakes and shingles and calculated a subsidy of 0.004 percent *ad valorem*.

(b) Grants. Between 1977 and 1981, REXFOR received a number of grants from the government of Québec for the production of softwood lumber. We consider grants made to REXFOR by the government of Québec to have been targeted to a specific company. Accordingly, we preliminarily determine that these grants confer a subsidy on REXFOR.

We calculated the benefit to REXFOR in accordance with the grant methodology described in the "Analysis of Programs" section of this notice. We allocated the benefit received over the total sales of the producers of softwood lumber, and calculated a subsidy of 0.001 percent *ad valorem*.

(c) Loss Coverage. In two instances, the government of Québec covered operating losses sustained by REXFOR in connection with two of its subsidiaries which respectively produce softwood lumber (Scieries Chic-Chocs) and all the products under investigation (Samoco). In both instances, the amounts received exceeded the losses sustained by REXFOR. In the case of Scieries Chic-Chocs, the excess of the funds received over the loss incurred was used to purchase fixed assets; in the case of Samoco, the excess was transferred into REXFOR's retained earnings.

We preliminarily determine that loss coverage confers a subsidy. We expensed those portions of the grants used to cover actual operating losses in the year in which they were received. We treated the excess amounts as grants and allocated them over 15 years, the average useful life of capital assets of sawmill plants and equipment. We allocated the benefit received over the total sales of the producers of softwood lumber (in the case of Scieries Chic-Chocs) and of the producers of the products under investigation (in the case of Samoco), and calculated a subsidy of 0.02 percent *ad valorem*.

(d) Equity Purchases. The government of Québec has made equity purchases of REXFOR under two different sections of the REXFOR Act. Under section 6 of the REXFOR Act, the proceeds from Québec's equity purchases are made available to REXFOR for "general investment" purposes to be used as the company sees fit. Under section 7, the proceeds from Québec's purchases of REXFOR stock are specifically directed by the government of Québec to be used for loans to or equity purchases in third companies which may or may not be subsidiaries or affiliates of REXFOR, some of which produce softwood lumber or shakes and shingles.

(i) After analyzing REXFOR's financial statements since 1973, especially the company's debt position and rate of return on equity, we conclude that the government of Québec's section 6 equity infusions into REXFOR were not inconsistent with commercial considerations. Therefore, we preliminarily determine that government equity purchases in REXFOR that were not specifically directed do not confer a subsidy.

(ii) With regard to government equity purchases made pursuant to section 7 that were specifically directed, but *not* to producers of the products under investigation, we preliminarily determine that these purchases did not confer subsidies on the products under investigation.

(iii) With regard to equity purchases made by the government of Québec pursuant to section 7 that were specifically directed to producers of the products under investigation:

- Where the proceeds were used by REXFOR to make equity infusions in subsidiaries, affiliates or unrelated companies, we must consider whether these infusions were made on terms inconsistent with commercial considerations.

Our analysis of these companies leads us to conclude, based on financial data contained in the responses and REXFOR's annual reports, that REXFOR's equity purchases in these companies were in fact not inconsistent with commercial considerations. Accordingly, we preliminarily determine that these equity purchases do not confer subsidies within the meaning of the Act on producers of the products under investigation.

- There were no loans made by REXFOR pursuant to section 7 that were specifically directed to producers of the products under investigation, for which principal was still outstanding during

the period for which we are measuring subsidization.

b. *FRI Tax Abatement Program.* The Tax Abatement Program (TAP) is one of two programs under the aegis of the Fonds de Relance Industrielle (FRI) of Québec, which provided assistance to producers of the products under investigation. The second FRI program, *i.e.*, the Industrial Incentives Fund, is discussed below in the section titled "Programs Preliminarily Determined Not to Confer Subsidies."

The FRI is a fund, administered by the Ministère de l'Industrie, du Commerce et du Tourisme of Québec with the assistance of Revenu Québec, which grants financial aid to businesses in order to promote economic recovery.

Under the TAP, firms can deduct 25 percent of the cost of approved capital investments up to a maximum of 50 percent of taxes payable to the province, with an overall limit per company of Canadian $500,000 for the life of the program. Companies located in the metropolitan area of Montréal are excluded from this program. Since this program is limited to companies located within specific regions, we preliminarily determine that it confers subsidies.

Producers of the products under investigation received tax savings under this program. In the GOC responses, the government of Québec reported the aggregate tax savings for these producers over the period from 1977 to 1981. We divided this amount by five (the number of years reported) to obtain an estimate of the 1981 savings, because this was the best information available. Because taxes are normally expensed in the year paid, we allocated these 1981 savings over the total sales value of producers of the products under investigation, and calculated a subsidy of 0.005 percent *ad valorem.*

c. *SDI Export Expansion Program.* The Société de Développement Industriel (SDI) was established in 1971 by the Assemblée Nationale (Legislature) of Québec as a Crown corporation. SDI, which is wholly owned by the province, is an investment company acting on behalf of the government of Québec, and as such grants financial assistance to the private sector in order to promote new business investment, plant expansion or modernization, and the export of Québec goods and services.

According to its latest annual report, SDI assistance to the private sector comes in several forms: "subsidies" or grants, loans or loan guarantees, total or partial assumption of the interest on loans, partial forgiveness of loans, and acquisition of capital stock (the latter with the proviso that SDI not hold a majority of any given company's shares).

SDI receives annual budget appropriations voted by the Assemblée Nationale which are used to cover its operating costs and "subsidies." In fiscal 1981–1982, SDI received Canadian $55.8 million from the Assemblée, of which Canadian $44.9 million was specifically earmarked for "subsidies." Another government assets deposited with SDI in the amount of Canadian $47.4 million, of which Canadian $32 million is in the form of an endowment. Finally, SDI finances itself, in part, through borrowings on the capital markets, which amounted to Canadian $74 million as of July 15, 1982.

SDI assistance programs fall under three categories: the Export Expansion Program, which we preliminarily determine to confer a subsidy for the reasons outlined below, development programs, and financial assistance to manufacturing firms. The latter two categories are described later in the "Programs Preliminarily Determined Not to Confer Subsidies" section of this notice.

Under the Export Expansion Program, discontinued in May 1982, reimbursements on interest charges were paid to firms demonstrating high export growth over a five-year period. The maximum amount paid was the lesser of Canadian $250,000, two percent of export sales value, or the amount of the interest expense incurred in any given year.

Producers of softwood lumber who exported to the United States received funds under this program. We preliminarily determine this program to confer an export subsidy. Because interest charges are normally expensed in the year paid, we computed the benefit by allocating the amounts provided by SDI in the 1981–1982 fiscal year to softwood lumber producers over the total sales value of exports of softwood lumber to the United States, and calculated a subsidy of 0.04 percent *ad valorem.* Producers of softwood shakes and shingles and fence did not receive funds under this program during the period for which we are measuring subsidization.

II. Programs Preliminarily Determined Not To Confer Subsidies

We preliminarily determine that the Canadian federal and provincial governments are not providing subsidies to manufacturers, producers, or exporters of certain softwood products included in these investigations under the following programs:

A. *Stumpage Programs of the Canadian Federal and Provincial Governments*

Petitioner alleges that the stumpage programs of the Canadian federal and provincial governments confer a subsidy on the products under investigation. In general, "stumpage" refers to standing timber and "stumpage programs" refer to the systems by which the Canadian governments furnish private firms with the right to cut and remove standing timber from government lands in exchange for various in-kind and monetary payments by those private firms. (The stumpage programs of the various Canadian governments are described in further detail in Appendix B of this notice.) In Canada, the overwhelming majority of timber is owned by the governments, and has been owned by them for over a century. The Canadian governments did not recently acquire the lands involved and then begin to sell stumpage on those lands at rates below those which prevailed prior to government ownership.

Petitioner alleges that stumpage programs confer a domestic subsidy. (In a footnote to the petition, petitioner also alleges that stumpage programs confer an export subsidy.) Petitioner alleges that stumpage programs are provided to a specific industry within the meaning of subsection 771(5)(B) of the Act. Also, rather than alleging that stumpage programs constitute the provision of a good at preferential rates under subsection 771(5)(B)(ii) of the Act, petitioner alleges that stumpage programs constitute the assumption of a cost of production within the meaning of subsection 771(5)(B)(iv) of the Act. Essentially, petitioner claims that "assumption," as used in subsection (iv), should have a broad, all-inclusive meaning, encompassing any governmental activity that reduces or absorbs production costs on terms inconsistent with commercial considerations.

Based upon available information, the Department preliminarily determines that stumpage programs of the Canadian federal and provincial governments do not confer a subsidy on the products under investigation for the following reasons.

Stumpage programs do not confer an export subsidy, because they do not operate and are not intended to stimulate export rather than domestic sales, and because they are not offered contingent upon export performance. The mere fact that significant quantities of products made from stumpage are exported to the U.S. does not mean that

stumpage programs confer an export subsidy.

Further, stumpage programs do not confer a countervailable domestic subsidy for the following reasons. First, we preliminarily determine that stumpage programs are not provided only to a "specific enterprise or industry, or group of enterprises or industries." Rather, they are available within Canada on similar terms regardless of the industry or enterprise of the recipient. The only limitations as to the types of industries that use stumpage reflect the inherent characteristics of this natural resource and the current level of technology. As technological advances have increased the potential users of standing timber, stumpage has been made available to the new users. Any current limitations on use are not due to the activities of the Canadian governments; there is no evidence of governmental targeting regarding stumpage.

Although nominal general availability of a program does not necessarily suffice to avoid its being considered a possible domestic subsidy, the Department further preliminarily determines that stumpage is widely used within Canada by more than one group of industries. Stumpage is cut by the lumber and wood products industries (which manufacture products ranging from simple "two-by-fours" to window frames), the veneer, plywood and building boards industries, and the pulp and paper industries (which manufacture products ranging from cardboard boxes to newsprint), each of which requires different types of processing equipment and uses different channels of trading. Stumpage permits are also held by individual consumers and by industries producing turpentine, charcoal, wood alcohol, and even food additives (*i.e.*, wood flour, vanillin, and lignin). In this regard, we note also that, under the classification systems of both Canada and the United States, the lumber and wood products industries and the pulp and paper industries constitute two distinct groups of industries. Therefore, in view of its general availability without governmental limitation and its use by wide-ranging and diverse industries, we preliminarily determine that stumpage is not provided to a "specific group of * * * industries."

We note, however, the importance of stumpage's general availability without governmental limitation. Where, on the other hand, the governments expressly limit programs to the so-called "forest products industries," we have found some domestic subsidies. Unlike stumpage programs, these types of programs involve the provision of benefits, usually money, that can be used by all enterprises and all industries. In such cases, the restricitons on availability are due entirely to government direction, and not to any specific characteristics of the program involved. With respect to these types of programs, we believe that there is sufficient evidence of governmental targeting to support a preliminary determination that a benefit is conferred upon a "specific group of * * * industries."

Second, even if stumpage programs were being provided to a "specific group of * * * industries," we preliminarily determine that they would not confer a domestic subsidy within the meaning of subsection 771(5)(B). In this regard, we preliminarily determine that Canadian stumpage programs do not provide goods at perferential rates to the producers of the products under investigation within the meaning of subsection 771(5)(B)(ii). As used in that subsection, "preferential" normally means only more favorable to some within Canada than to others in Canada.[1] In this context, it does not mean "inconsistent with commercial considerations," a distinct term used in subsection 771(5)(B)(i) (which is not applicable with regard to stumpage programs, because they do not involve the provision of capital, loans, or loan guarantees). We note in this respect that we have preliminarily found certain programs in the provinces to confer subsidies under subsection (ii) as the perferential provision of "goods or services," bcause the goods or services were provided on preferential terms (*see, e.g.*, deferral of stumpage payments in the "Programs Preliminarily Determined to Confer Subsidies" section of this notice).

Petitioner claims that stumpage programs fall under subsection (iv) as the assumption of production costs on terms inconsistent with commercial considerations. Insofar as subsection (iv) may apply, we preliminarily determine that Canadian stumpage programs do not "assume" a cost of production. We believe that the most reasonable interpretation of "assumption" is that it refers only to government activity which relieves an enterprise or industry of a pre-existing statutory or contractual obligation. Otherwise, subsection (iv) would embrace all of the activities described in preceding subsections (i)–(iii), because the activities described in those subsections could all be regarded as activities which reduce or absorb—and thereby arguably "assume"—costs of production. Such a broad construction of the term "assumption" would make subsection (iv) largely redundant of subsections (i)–(iii) and is, as a matter of law, not preferred. Accordingly, "assumption," as used in subsection (iv), means something other than the universe of governmental activities which could have the effect of reducing or absorbing a cost of production. Rather, it refers to a specific type of activity. In the financial and legal terms relevant to subsection 771(5)(B)'s list of domestic subsidies, and "assumption" is the relief from a pre-existing statutory or contractual obligation.

Under this interpretation, stumpage programs do not constitute the assumption of a cost of production, because the Canadian governments do not relieve the producers of any pre-existing statutory or contractual obligations. To the contrary, the government impose a cost for the stumpage, which they have owned themselves for well over a century. These imposed costs include not only cash payments, but also in-kind services, such as road building, silviculture, and forest managment provided by the companies cutting the stumpage.

Even if "assumption" were construed more broadly, we preliminarily determine, based upon available information in the record of these investigations, that Canadian stumpage programs have not effectively reduced, and thereby "assumed," a cost of production. Petitioner claims that because there is an allegedly unified North American market for softwood lumber, shakes and shingles and fence, the Department should compare Canadian stumpage prices to prices for stumpage in the United States. We disagree. First, it has been the Department's policy not to use cross-border comparisons in establishing commercial benchmarks. Second, the absence of an international market price for stumpage makes any other comparative analysis unjustifiable. Third, while there may be a unified North American market for each of the products under investigation, there is not a unified market and a unified price for stumpage, because each individual stand of timber is unique due to a variety of factors, such as species combination, density, quality, size, age, accessibility, and terrain and climate. Because of these factors, a common

[1] There may be other cases in which the number of users of a good or service may be so limited that the preferentiality test may need to be examined further.

price for stumpage does not exist. Stumpage prices vary substantially both regionally and locally within Canada and the United States, even within a mill's timber supply area. For example, a publication called *Timber-Mart South* publishes stumpage prices for the southeastern United States. This publication covers thirteen states, each divided into three regions, and lists separate prices for each species within each region of each state. Thus, it is not reasonable to compare Canadian prices with U.S. prices.

In the absence of a market price for stumpage—either within Canada or elsewhere—with which Canadian stumpage prices may reasonably be compared, we could alternatively determine whether Canadian stumpage prices reflect "true market value."

The value of stumpage derives from a number of factors, including the price of the end products made from it, and not from any intrinsic value of the standing timber. Thus, a reasonable basis for determining the "true market value" of stumpage is to calculate its residual value based upon the end-product price.

Under the residual value approach, the seller makes allowances for normal profit and risk factors and deducts manufacturing costs from the end-product price to determine the minimum price for stumpage below which it will not sell. Any additional amount collected over and above the minimum price will be "economic rent." The practical significance of economic rent is that its decline does not reduce the supply of timber, and therefore it does not interfere with the efficient allocation of natural resources or the operation of market forces. If the price of timber is high, one can then obtain a higher rent from the resource, but the higher price of timber is not the result of higher rent.

The evidence we have thus far supports the conclusion that the residual value approach, as well as the competitive bid approach, is used in Canada. For example, residual valuation is used in British Columbia and Ontario. Thus, based upon information currently available, it appears that the Canadian governments are using methods of valuation that are a reasonable means of valuing their timber (indeed, these methods are used by the United States Forest Service). Accordingly, one cannot find that Canadian stumpage programs assume a cost of production, even if that term is interpreted broadly.

As implied above, a comparison of Canadian stumpage prices with U.S. prices would be arbitrary and capricious in view of: (1) The wide disparity between quality and accessibility of the standing timber in the U.S. and throughout Canada; (2) the significant in-kind payments which are required generally in Canada in addition to monetary payments, but not generally in the United States; and (3) the fact that in recent years prices in the U.S. usually have been bid anywhere between two to five years in advance of use, without having taken into account the decline in the housing industry. We are not convinced that there is a rational basis to adjust for these significant differences.

If, alternatively, one believes that there is a rational basis for adjustments, the record of these investigations includes studies showing that once appropriate adjustments are made to take into account these differences, Canadian prices for standing timber do not vary significantly from U.S. prices. Indeed, in some cases the Canadian price may be higher. Therefore, even if one were to use U.S. prices as a benchmark, there is evidence in the record which establishes that the Canadian governments do not assume costs of production through their stumpage programs.

For these reasons, we preliminarily determine that Canadian stumpage programs do not assume a cost of producing the products under investigation.

In conclusion, based upon currently available information, we preliminarily determine that Canadian stumpage programs do not confer a subsidy within the meaning of the Act, because they are not provided to a "specific enterprise or industry, or group of enterprises or industries," and because they do not confer a domestic subsidy within the meaning of subsection 771(5)(B).

B. Federal Programs

1. *Deductible Inventory Allowance.* The federal Income Tax Act authorizes a deduction equal to three percent of the opening value of inventories held for sale or for the production of goods for sale. This deduction is available on equal terms to all businesses holding inventories for sale throughout Canada.

We preliminarily determine that the deductible inventory allowance does not confer countervailable benefits because it is not limited to a specific industry groups of industries or to companies in specific regions.

2. *Capital Cost Allowances.* The federal Income Tax Regulations provide for a capital cost allowance for businesses throughout Canada that purchase qualifying assets used in abating water or air pollution, manufacturing or processing, or conserving energy. These companies receive a full write-off over three years with a cumulative maximum deduction of 25 percent in the first year, 75 percent in the second year and 100 percent in the third year. This is the only method of depreciation allowed for these properties, and they are depreciated according to this schedule regardless of use by industrial sector.

We preliminarily determine that these capital cost allowances do not confer countervailable benefits because they are not limited to a specific industry, group of industries or to companies in specific regions.

3. *Export Credit Insurance.* Petitioner alleges that the GOC covered export credit insurance losses incurred by the Export Development Corporation (EDC). EDC is a Canadian Crown corporation providing financial services to Canadian exporters and foreign buyers to develop Canada's export trade. One of EDC's services is export credit insurance. EDC maintains its own commercial operation as well as a separate operation on behalf of the government. Exports to the United States are insured solely through the EDC's commercial operation.

EDC has never incurred a fiscal year loss on its commercial operation, although there has been a downward trend in earnings. Although EDC does not maintain separate financial accounting systems for each of its services, the GOC responses state that the premiums charged by EDC are based on the perceived risk of the transaction and the need to cover its administrative expenses. In this regard, EDC allocates 38 percent of current premium revenue to cover future claims. Furthermore, premium rates were raised twice in the last two years. During the period October 1, 1977 through September 30, 1982, claims paid on insured shipments of softwood lumber totaled Canadian $110,603 while premiums totaled Canadian $298,015.

The GOC is the sole stockholder in EDC. During 1981, the GOC purchased an additional Canadian $40 million in EDC shares; however, the major portion of EDC's capitalization is long-term debt payable to non-government lenders. All of EDC's earnings are retained. Dividends were not disbursed.

Based upon our review of available information, it appears that the petitioner's allegation pertains to export credit insurance losses sustained by EDC in its operation on behalf of the GOC and not in its commercial operation. Since exports to the United States are insured solely through EDC's commercial operation and since it appears that export credit insurance premiums charged by EDC are sufficient to cover long-term operating costs and

losses in its commercial operations, we preliminarily determine that EDC's export credit insurance does not confer an export subsidy within the meaning of the Act.

4. *Federal Employment Programs.—A. Local Employment Assistance Program.* The Local Employment Assistance Program (LEAP), administered by the Canadian Employment and Immigration Commission (CEIC), aims to increase the self-sufficiency of chronically un- or under-employed workers through grants for job creation and worker training. As LEAP assistance was not limited to a specific industry, group of industries or to companies in specific regions, we preliminarily determine that these grants did not confer any countervailable benefits upon the producers of the products under investigation.

b. *Worksharing Program.* The purpose of the Worksharing Program, which is also administered by the CEIC, is to avert temporary layoffs during short-term economic downturns by reducing workweeks, taking steps so that available work is shared, and providing unemployment benefits when no work is available. Employees of producers of the products under investigation received benefits under this program.

It appears that this program was funded under section 37 of Canada's Unemployment Insurance Act by contributions from employers and employes, as well as from the federal government. Eligibility was not limited to a specific industry, group of industries or to companies in specific regions. Therefore, we preliminarily determine that the Worksharing Program did not confer any counteravailable benefits to producers of the products under investigation.

5. *Regional Development Incentives Program (RDIP)—Loan Guarantees.* The RDIP, administered by DREE, as described in the "Programs preliminarily Determined to Confer Subsidies" section of this notice, provides loan guarantees to manufacturers whose capital investment projects for establishing new facilities or expanding or modernizing existing facilities will create jobs and economic opportunities in areas designated as economically disadvantaged.

Under the loan guarantee program, DREE insures ultimate payment of losses related to approved loans at a cost of one percent of the balance of guaranteed principal per annum. No defaults have occurred, and loans are made on terms not inconsistent with commercial considerations.

We preliminarily determine that no benefit is being provided by RDIP loan guarantees, as all loans to producers of products under investigation were contracted at a rate of interest above the average Canadian commercial rate of interest based on the chartered banks' prime lending rate as reported in the OECD *Financial Statistics.*

6. *Enterprise Development Program.* The Enterprise Development Program (EDP) was established in 1977 to provide loans, loan insurance and contributions to manufacturers (individuals, firms or corporations in Canada engaged in a manufacturing or processing activity) and, in the case of loan insurance, to private lenders to assist in projects of product development or enhancement, or for other types of productivity initiatives. The program is administered by one national and ten regional Enterprise Development Boards (one in each province), in conjunction with the federal Department of Industry, Trade and Commerce.

Enterprise Development Regulations provide a listing of the qualifying purposes for which any loan, loan insurance or contribution may be issued, and state that a regional board may exercise and perform the powers, duties and functions of the Board under the regulations in respect of:

- Any loan, insurance or contribution made where the total amount of any such loan, insurance or contribution does not exceed Canadian $200,000, the aggregate liability of the manufacturer does not exceed Canadian $200,000 and the dollar volume of sales of the manufacturer did not exceed Canadian $5,000,000 in its fiscal year immediately preceding the application for the loan, insurance or contribution.
- Any loan or insurance where the total amount of any such loan or insurance does not exceed Canadian $50,000 and the aggregate liability of the manufacturer does not exceed Canadian $200,000, except as a result of the making of such loan or the provision of such insurance.
- Any contribution where the total amount of the contribution does not exceed Canadian $20,000 and the aggregate liability of the manufacturer does not exceed Canadian $200,000, except as result of the making of such contributions.

Loan insurance and contributions are preliminarily determined not to confer subsidies and are discussed below, while loans provided under EDP are discussed in the "Programs Preliminarily Determined Not to Be Used" section of this notice.

a. *EDP Loan Insurance.* The GOC provides loan insurance under the EDP to private lenders for loans to companies for approved productivity projects. The private lender pays a fee of one percent per annum, twice yearly, on the outstanding obligation for the insurance. This charge is usually passed on to the loan recipient. The insurance allows the lender to recover up to 90 percent of the actual loss it experiences on defaulted loans after all security has been realized.

Companies participating in this program first negotiate a loan insurance agreement with the Enterprise Development Board and then go to the private market to negotiate a loan. Loans vary in duration from 3 to 10 years, with the repayment schedule being set by the lender. All loans, according to the GOC, are obtained at commercial interest rates.

Loan insurance may be provided under EDP on loans made by a private lender to a manufacturer, individual, firm or corporation in Canada if a loan is required to enable the manufacturer to meet changing competitive circumstances and if the provision of loan insurance is necessary to encourage private lending at normal commercial rates.

The GOC states in its responses that producers of the products under investigation received loan insurance under the EDP. We preliminarily determine that the provision of the loan insurance is not limited to a specific enterprise or industry, group of enterprises or industries, or to companies in specific regions, and therefore does not confer a subsidy.

b. *EDP Contributions.* Under EDP the GOC shares the cost of approved projects with companies. Audits are conducted to verify that expenditures were made for the intended purpose. Contributions are administered in accordance with the terms and conditions approved by the Treasury Board. The funds are available to manufacturers in any industry or region for a project which represents a significant departure from a company's traditional productivity improvement practices and has an existing potential for productivity gains but demonstrated uncertainty as to benefits. The cost of any feasibility study and implementation of the results thereof should represent a significant burden on the company's resources. In addition, the manufacturer must be capable of implementing the results of the study.

All contributions provided to producers of the products under investigation were to assist in the cost of outside consultants to examine the feasibility of improving productivity of manufacturing operations.

We preliminarily determine that contributions given under the EDP are not limited to a specific enterprise or industry, group of enterprises or industries, or to companies in specific regions, and therefore do not confer a countervailable benefit to producers of the products under investigation.

7. *Transportation Programs.*—a. *Rail Freight Rates.* There are 33 common carrier companies providing rail transportation services in Canada, almost half of which are U.S. subsidiary lines. Of the Canadian lines, two companies—Canadian National (CN) and Canadian Pacific (CP)—are engaged in countrywide transport. Their combined trackage comprises 89 percent of the total railway trackage in Canada.

CP is a privately owned company, while CN is a Canadian Crown corporation. Laws and regulations governing railway operations and freight rates are promulgated by the federal government and administered by the Canadian Transport Commission.

Both Canadian and U.S. railroads offer three types of rates: class rates, commodity rates, and contract rates. In Canada, "agreed charges" is the term applied to contract rates for intra-Canadian shipments. Rail shipments within Canada that do not fall under agreed charges generally move under commodity rates. At the present time, class rates apply to very little rail traffic. International rail shipments move under rates established jointly by the U.S. and Canadian rail companies involved.

The petitioner alleged that agreed charges are a domestic subsidy because they are below "tariff rates" and because they apply only to "forest (wood) products." According to the GOC's responses, there are a total of 277 agreed charges in effect for a large number of different commodities, such as foodstuffs, automobiles, appliances and petroleum products. Ten of these agreed charges cover shipments of lumber, shakes and shingles, and fence.

The responses also state that agreed charges are rates agreed upon after arm's-length negotiations between the Canadian railway(s) and the shippers. Agreed charges are renegotiated every year and reflect such variables as market and modal competition, value of the commodity, loadability, and equipment use. Although rates are not calculated on a per car-mile or per ton-mile basis, revenue figures from 1977 (the latest available published statistics) show that "forest products" generated higher revenue for the railways than all other commodities both on a per car-mile and per ton-mile basis.

Because there are a number of agreed charges covering a wide range of commodities and because agreed charges are negotiated at arm's length, we preliminarily determine that agreed charges do not confer benefits which constitute subsidies within the meaning of the Act.

b. *Currency Exchange Rate Tariff (No. 6016A).* The currency exchange rate tariff was implemented in 1921 on all rail shipments between the United States and Canada. Because of currency fluctuations, the railroads agreed that the value of that portion of the rail haul taking place in the United States should be reflected in U.S. currency and the value of that portion taking place in Canada should be reflected in Canadian currency. A study was conducted showing that of the total amount of freight charges collected on international shipments, 60 percent accrued to U.S. railways and 40 percent accrued to Canadian railways. Based on this study, Canadian railways were authorized to collect a surcharge of 60 percent or to provide a discount of 40 percent on international shipments depending on prevailing exchange rates. These percentages were calculated to correspond to the average portion of a movement that took place in each country. Although the Canadian government has not legally mandated the exchange rate tariff since 1967, it is still applied by the Canadian railroads to all rail traffic between Canada and the United States.

The program works as follows: when U.S. funds are at a premium in relation to Canadian funds, the Canadian railways collect a surcharge of 60 percent of the current exchange rate differential on any prepaid movement from Canada to the United States without regard to the industry or region involved. When United States funds are at a discount in relation to Canadian funds, the shipper who pays in Canadian funds receives a discount of 60 percent of the exchange rate differential. If, however, charges are paid in the United States, the Canadian shipper must pay a surcharge of 40 percent of the prevailing exchange rate. Because the sole purpose of the tariff is to adjust for the differences in the value of the two currencies, it applies only to shipments exported to the United States.

Since 1977, U.S. currency has been at a premium in relation to Canadian currency. Therefore, Canadian shippers have been paying a surcharge on exports to the United States. Because Canadian shippers have been paying a surcharge, no benefits are being bestowed through the currency exchange rate tariff on exports of the products under investigation. Based upon our review of available information, the tariff is not intended nor does it operate to stimulate exports. Rather, it is a mechanism for maintaining Canadian rail carrier revenue. Therefore, we preliminarily determine that the currency exchange rate tariff does not confer a subsidy within the meaning of the Act.

c. *Fuel Tax Refund.* The fuel tax refund is a program which applies to the movement of motor carriers operating in interstate service within the United States, in interprovincial service within Canada, or in international service between Canada and the United States. The purpose of this program is to ensure that all states and provinces collect taxes equal to the actual fuel consumed within each jurisdiction but which has been purchased outside that jurisdiction. The tax refund is applied by each jurisdiction uniformly on all truck movements regardless of the type of merchandise carried, if any.

Each motor carrier must keep a log of travel to ensure proper payment of tax. Each jurisdiction may have different means of assessing the tax and the amount of fuel tax refund. Assessments are made on the basis of a motor carrier's log.

The fuel tax refund is simply a mechanism to ensure that each state or province receives proper payment of its share of fuel taxes. It does not relieve carriers of any tax, nor does it provide any benefits to shipments of the products under investigation. Therefore, we preliminarily determine that the fuel tax refund does not confer a subsidy on the products under investigation.

C. Federal/Provincial Programs

1. *Forestry Subsidiary Agreements.*—*a. Funding for Long-Term Forest Management Under the Forestry Subsidiary Agreements.* As described in the "Programs Preliminarily Determined to Confer Subsidies" section of this notice, DREE entered into 10-year GDAs with all provincial governments except PEI. A similar 15-year comprehensive development plan exists for PEI. Forestry subsidiary agreements are available to any province with a GDA and apparently to PEI as well, and have been negotiated with seven provinces.

Most of the funding under these agreements is for long-range resource management on public lands and public infrastructure development. A few other programs are funded under the forestry subsidiary agreements; these are discussed in other sections of this notice, as appropriate. The long-term forest management activities are conducted by the province on provincial lands, and apparently do not relieve any

companies of obligations incurred in their licensing arrangements.

The benefits from these long-term forest management activities will not be realized until the rotation age, (life span from planting to cutting for a tree) is met. This span is at least 40–60 years in eastern Canada and 60–80 years in the west. Further, activities under the forestry subsidiary agreements are primarily designed to help achieve the government's goal of renewing a "sustained-yield" forest. For example, the silvicultural camps facilitate cone collection for seed supplies of tree nurseries, and soil surveys are for the study of the proper species to plant in certain areas. These benefits would be attributable to the owner of the resource, the government, not to the short- or medium-term licensee, which may have its annual allowable yield reduced as a result of these long-term management practices.

Because these benefits will not be bestowed on the products under investigation until well into the future and would be attributable to the government as owner of the resource, we preliminarily determine the funding of long-term forest management activities under the forestry subsidiary agreements does not confer a countervailable benefit on producers of the products under investigation in the period for which we are measuring subsidization.

Under the forestry subsidiary agreements, the federal government makes payments to the provincial governments for the construction of forest access roads. Although the extraction of wood is one of the primary purposes of building forest roads, access to mineral resources, recreation, environmental protection, general development and forest management are other purposes. For example, there is information on the record regarding one province indicating that the notice of a closure of a forest road must be published in one or more newspapers having a general circulation in the area of the province affected by the closure. This indicates that usage is presumed to be general, necessitating widespread public notice regarding closure.

Further, the establishment of minimum standards and specifications for various classes of forest roads, above those standards which would be required by those harvesting stumpage, ensures that the roads will meet the needs of not only those holding stumpage rights, but also the traveling public and other users. For these reasons, we preliminarily determine that the construction of forest access roads does not confer a subsidy within the meaning of the Act.

b. *Saskatchewan Forestry Subsidiary Agreement: Opportunity Identification and Technological Advancement.* Under the Opportunity Identification and Technological Advancement Sector of the Saskatchewan Forestry Subsidiary Agreement, research and feasibility studies were funded and conducted by the province. The studies were designed to determine industrial opportunities in forestry and transfer known technology to an existing or new industrial application. The response indicates that the results of the studies were made available publicly. Therefore, we preliminarily determine that the studies did not confer a countervailable benefit on the products under investigation.

c. *Forestry Job Progam.* The Employment Bridging Assistance Progam (EBAP) is a job creation program sponsored jointly by the province of BC and the Canadian government (under section 38 of the Federal Unemployment Insurance Act of 1971). The purpose of the program is to allow forestry-dependent communities to retain their skilled workers and maintain their forestry payroll during a period of recession. The program also seeks to lend additional economic support to unemployed persons. The eligibility criteria of the program specify that a project sponsor may be any group or individual capable of implementing an acceptable project. The sponsor's work program must enhance forest improvement and all projects must be completed before March 31, 1983. Workers receiving funds must be recipients of unemployment insurance benefits.

Sponsors submit project proposals to the district manager of the BC Ministry of Forests. If approved, the proposals are then examined by a management committee consisting of representatives from the provincial Ministry of Forests and Labor and from the Canadian Forestry Service and the Canadian Employment and Immigration Commission (CEIC). The sponsor is responsible for project administration and for ensuring that project objectives are attained. Projects cannot be used to meet sponsors' forest management obligations under contracts to harvest public timber.

Funding for the program is provided by CEIC (to bring weekly payment up to Canadian $240 per week), the Canadian Forestry Service (equipment and supervisory costs), and the BC Ministry of Forests (a Canadian $80 weekly payment for wage, health, and other benefits).

The sponsors act as a conduit in passing payments to the workers and do not retain any funds provided through this program. Even though funds are paid directly to sponsors the program does not relieve the sponsor of any contractual obligations to engage in forest management. We preliminarily determine that this program does not confer a subsidy, because there will be no benefits until future years, and the benefits would be attributable to the government as owner of the resource. Therefore, there are no benefits attributable to the products under investigation during the period for which we are measuring subsidization.

d. *Canada/Nova Scotia Forestry Subsidiary Agreement—Forest Management Component Grants.* The forest managment component of the Canada/Nova Scotia Forestry Subsidiary Agreement provided grants to private landowners to promote effective management of their forest resources and to support various silvicultural activities. The GOC stated in its responses that producers of the products under investigation received grants under this program.

We preliminarily determine that forest management component grants do not confer countervailable benefits because they are not limited to a specific enterprise or industry, or a group of enterprises or industries, or to companies in specific regions.

D. Provincial Programs

1. *Alberta.—Alberta Opportunity Company.* The Alberta Opportunity Company (AOC) is a provincial Crown corporation and is funded by the government of Alberta. We have reviewed the annual reports of AOC and found that a variety of industries in the manufacturing and service sectors received assistance from AOC and that the lumber and wood products producers received only a small percentage of the total assistance provided by AOC. We preliminarily determine that AOC aid is not limited to a specific industry, a group of industries, or to companies in specific regions, and therefore is not countervailable.

2. *Ontario.—Employment Development Fund.* The Employment Development Fund (EDF) was created in the spring of 1979 by an administrative action of the Cabinet of Ontario. The fund was designed to increase long-term investment and employment in the province through the provision of grants and loan guarantees to companies making investments that had the potential to create new jobs. Funding was generally limited to between

Canadian $2,000 and Canadian $3,000 per job created where the new fixed asset investment was from 10 to 20 times the size of the grant. The EDF was terminated in January 1981, although committed disbursements were made through August 31, 1982. The responses of the GOC indicate that in 1979 one grant was provided under this program to producers of the products under investigation.

EDF funding was provided to a wide range of industries in Ontario and was not limited to a specific industry, a group of industries, or to companies specific regions. Therefore, we preliminary determine that the EDF did not confer a subsidy on the products under investigation.

3. *Québec.*—a. *Caisse de Dépôt et Placement du Québec.* The Caisse de Dépôt et Placement du Québec (CDPQ) was established by an Act of the Assemblée Nationale of Québec in 1965. Under the trusteeship of the provincial Ministère des Finances and the Régie des Rentes du Québec, CDPQ manages several pension funds and insurance programs, namely:

- The universal auto insurance program against physical injury to persons;
- A specific insurance program for farmers;
- The universal pension plan for all citizens of Québec; and
- Specific pension plans for all Québec civil servants and construction workers.

It appears that CDPQ is prevented by law from acquiring more than 30 percent of any company's common stock, and that it may not make funds available to companies on other than commercial terms. Indeed, CDPQ is compelled by law, as a fiduciary institution, to invest pension and insurance funds in order to achieve the best possible return on investment for the benefit of its annuitants. CDPQ funds are invested over a broad spectrum of industries not only throughout Québec and Canada, but also on the international financial markets. Accordingly, we preliminarily determine that none of the producers of the products under investigation received any countervailable benefits from CDPQ.

b. *FRI Industrial Incentives Fund for Small- and Medium-Sized Businesses.* This program, which falls under the aegis of FRI (see the "Programs Preliminarily Determined to Confer Subsidies" section of this notice), was established to allow participating firms to deposit one half of their income tax payable to the province into an escrow fund, from which they could withdraw funds equivalent to 25 percent of the cost of approved development projects (up to the amount of their deposit only).

As this program, which was discontinued in 1981, was not limited to a specific industry, a group of industries, or to companies in specific regions, we preliminarily determine that this program did not confer subsidies within the meaning of the Act on the products under investigation.

c. *Programme Expérimental de Création d'Emplois Communautaires.* The Programme Expérimental de Création d'Emplois Communautaires (PECEC), administered by the Office de Planification et de Développement du Québec (OPDQ), makes cash payments to entrepreneurs to assist them in maintaining and creating jobs for the chronically unemployed. A few producers of the products under investigation received grants under this program. Because the program was not limited to a specific industry, a group of industries, or to companies in specific regions, terms, we preliminarily determine that this program does not confer any subsidies within the meaning of the Act on the products under investigation.

d. *PME-Innovation.* The PME-Innovation (PME–I) program, which was discontinued late in 1981, was administered by the Ministère de l'Industrie, du Commerce et du tourisme of Québec. Its purpose was to assist small- and medium-sized businesses ("petites et moyennes entreprises") in obtaining capital for investment in a production or marketing project. Under this program, one loan was made to a softwood lumber export consortium. PME–I assistance was not limited to a specific enterprise or industry, a group of enterprises or industries, or to companies in specific regions of the province of Québec. Therefore, we preliminarily determine that the program does not confer a subsidy within the meaning of the Act.

e. *SDI Programs.* The Export Expansion Program administered by SDI is discussed in the "Programs Preliminarily Determined to Confer Subsidies" section of this notice. In addition, SDI manages a number of domestic programs of which producers of the products under investigation availed themselves. These programs fall under two headings: "development programs" and "financial assistance to manufacturing firms."

(1) *Development Programs.*—(a) Financial Assistance Program for High-Growth Firms. Under this program, SDI assumes a percentage of the interest charges for an eligible development project. This percentage is based on the land, building and equipment costs of the project.

(b) Financial Assistance Program for Mergers and Acquisitions. Under this program, which was discontinued in the summer of 1982, SDI paid a percentage of the purchase price of the stock or assets invested in an approved merger. Benefits paid under this program were sometimes combined with reductions in interest rates on loans bestowed under the program described in (2) below.

We note that in our final affirmative countervailing duty determination on "Railcars from Canada" [48 FR 6569 (February 14, 1983)], we erroneously determined SDI's domestic programs to be countervailable on the basis that their availability only in Québec made them region-specific within the broader context of Canada. Further, we erroneously calculated the benefit by considering funds authorized instead of funds actually disbursed. The petition was withdrawn and the case terminated before we discovered these two errors. We have now calculated that the correct subsidy in that case, after deduction of the improperly applied SDI "benefit" of the U.S. $173 per railcar, was actually U.S. $110,392 per railcar, instead of the U.S. $110,565 as set forth in the final determination (a reduction of 0.16 percent).

(2) *Financial Assistance to Manufacturing Firms.* Under this program, loans, loan guarantees and equity participations are provided to firms with sound financial prospects when these firms cannot otherwise obtain working capital on commercially reasonable terms. The SDI loan rate is a monthly composite of long-term commercial loan rates by the 10 major lenders in Québec.

Because their availability was not limited to a specific industry, group of industries or to companies in specific regions, we preliminarily determine that they do not confer a subsidy within the meaning of the Act.

III. Programs Preliminarily Determined Not To Be Used

We preliminarily determine that the following programs which were listed in the notice of "Initiation of Countervailing Duty Investigations" are not used by the manufacturers, producers, of exporters of the products subject to these investigations.

A. Federal Programs

1. *Federal Employment Program—CIAP.* The Community-based Industrial Adjustment Program (CIAP), which began early in 1981, is administered by the Department of Industry, Trade and

Commerce. Its purpose is to encourage industrial firms in "designated" Canadian communities to undertake viable capital projects.

CIAP assistance was not made available to any producers of the products under investigation. Accordingly, we preliminarily determine this program was not used by producers of the products under investigation during the period for which we are measuring subsidization.

2. *Enterprise Development Program—Loans.* The Enterprise Development Program includes a component that provides loans to companies, as described in the "Programs Preliminarily Determined Not to Confer Subsidies" section of this notice. The GOC has stated that no loans under the EDP were issued to producers of the products under investigation. We preliminarily determine that this part of the EDP program was not used by producers of the products under investigation during the period for which we are measuring subsidization.

B. Federal/Provincial Program

New Brunswick Forestry Subsidiary Agreement. Under the New Brunswick Forestry Subsidiary Agreement, funds are provided to small independent landowners to increase the future availability of wood fiber. The GOC states in its responses that no funds were provided under this program to producers of the products under investigation. Accordingly, we preliminarily determine that this program was not used.

C. Provincial Programs

1. *Alberta.*—a. *Deferral of Stumpage Payment.* The government of Alberta has deferred the payment of stumpage dues, reforestation levies and holding and protection charges for one year from May 1, 1982 to May 1, 1983. This applies to holders of stumpage rights under Forest Management Agreements, Quota Certificates, and Commercial Timber Permits.

However, this deferral was not in effect during the period for which we are measuring subsidization. Therefore, we preliminarily determine that this program was not used. If these investigations result in a countervailing duty order, the Department will review Alberta's program for deferral of stumpage payments in the annual review required under section 751 of the Act.

b. *Inventory Financing.* The Alberta Inventory Financing program was administered by the Alberta Opportunity Company. Although the program was approved there were no disbursements made under it, and the program is no longer in effect. Producers of the products under investigation have not used the program during the period for which we are measuring subsidization.

2. *British Columbia.—Market Development Assistance (MDA).* The MDA program is designed to benefit manufacturers of new, innovative products who are attempting to develop new export markets. Only two or three producers/exporters of the products under investigation have received support under this program, and all were assessing markets other than the United States. Therefore, we preliminarily determine that this program was not used by producers/exporters of exports to the United States of the products under investigation during the period for which we are measuring subsidization.

3. *Québec.* a. *Aide à la Promotion des Exportations.* The Aide à la Promotion des Exportations (APEX) program, administered by the Office Québecois du Commerce Extérieur (OQCE), which is a subdivision of the Ministère de l'Industrie, du Commerce et du Tourisme of Québec, has been available since 1977 to manufacturing and service companies in Québec. Under APEX, OQCE grants funds to companies for market research and for trade expositions for the promotion of exports of Québec goods and services outside of Canada.

No grants were made under this program to exporters of the products under investigation. Therefore, we preliminarily determine that the program was not used by producers of the products under investigation.

b. *SDI—Financial Assistance Program to Advanced Technology Manufacturing Firms.* Producers of the products under investigation were not eligible for the Financial Assistance Program to Advanced Technology Manufacturing Firms, one of the three development programs administered by SDI (see the "Programs Preliminarily Determined Not To Confer Subsidies" section of this notice). Accordingly, we preliminarily determine that this program was not used by any of the producers of the products under investigation.

IV. Programs for Which Petitioner Withdrew Its Subsidy Allegations

The petitioner withdrew its subsidy allegations with regard to the following programs which were listed in the notice of "Initiation of Countervailing Duty Investigations": "Federal Business Development Bank," "Canadian Forestry Service," "Manpower," "Small Business Loans," certain aspects of "Taxation Measures," and certain aspects of "Transportation."

Verification

In accordance with section 776(a) of the Act, we will verify all data used in making our final determinations.

Public Comment

In accordance with section 355.35 of the Commerce Department Regulations, if requested, we will hold a public hearing to afford interested parties an opportunity to comment on these preliminary determinations at 10:00 a.m. on April 14, 1983, at the U.S. Department of Commerce, Room 3407, 14th Street and Constitution Avenue, NW., Washington, D.C. 20230. Individuals who wish to participate in the hearing must submit a request to the Deputy Assistant Secretary for Import Administration, Room 3099–B, at the above address within 10 days of this notice's publication. Requests should contain: (1) The party's name, address, and telephone number; (2) the number of participants; (3) the reason for attending; and (4) a list of the issues to be discussed. In addition, prehearing briefs in at least 10 copies must be submitted to the Deputy Assistant Secretary by April 7, 1983. Oral presentations will be limited to issues raised in the briefs.

All written views should be filed in accordance with 19 CFR 355.34, within 30 days of this notice's publication, at the above address and in at least 10 copies.

Gary N. Horlick,

Deputy Assistant Secretary for Import Administration.

March 7, 1983.

Appendix A

Description of Products

The products covered by these investigations are described below:
